

Project # SANDTWOBOR | Borough: Manhattan | Date Issued: 03/06/2026  
The Brooklyn Bridge - Montgomery Coastal Resilience (BMCR) Project is an initiative to provide long-term flood protection on the south side of Manhattan.

## Temporary Esplanade Width Reductions

### Ongoing until further notice

Ahead of final restoration, temporary extensions of the fenced-in work zone under the FDR Drive are required to accommodate construction of permanent amenities. This will result in narrower paths intermittently along the esplanade between Catherine Slip and Rutgers Slip. Please follow all posted signs and flaggers.
