

Lower Manhattan Coastal Resiliency Battery Coastal Resilience

Construction Notification | Date Issued: 02/07/2025

Project Summary

The Battery Coastal Resilience Project will rebuild and elevate the Battery wharf to reduce risk from future tidal flooding and low level coastal storms, while maintaining the character and uses of the promenade and the rest of the park. The Battery Coastal Resilience Project is one of several projects, which together are known as the Lower Manhattan Coastal Resiliency (LMCR) Project.

The Battery Coastal Resilience Project will:

- Reconstruct the deteriorating wharf
- Protect The Battery from rising seas
- Accommodate passenger ferry uses
- Preserve and enhance park character and gardens
- Design for universal accessibility to create a welcoming and accessible esplanade
- Protect the park's historical and cultural resources

The project will be implemented in two phases. Phase 1 will reconstruct the western portion of the wharf and adjacent areas, and Phase 2 will reconstruct the eastern portion of the wharf and adjacent areas. See map and listing on next page for open vs closed park entrances, park areas, and features.

Anticipated Construction Schedule:

Phase 1: 2024 - 2025

Phase 2: 2025 - 2026

Summary of Upcoming Work

- Continued marine activity including crane mounted barge mobilizations and material supply deliveries via barge.
- Continued pile driving activities to install structural foundations for the reconstructed wharf near Pier A from barge mounted cranes.
- Installation of precast concrete pile caps and beams on top of structural foundations to shape the reconstructed wharf via barge mounted cranes.
- Land-side backfilling and concrete placement for retaining wall, planter bed, and accessible pedestrian ramp foundations.

Expected Work Timeline:

01/01/2025 - 05/01/2025 (~4 months duration)
