

Seaport Coastal Resilience (SPCR)

- Separate project from the FiDi and Seaport Climate Resilience Master Plan
- Narrow focus on the Seaport neighborhood between John Street and Brooklyn Bridge
- Designed to safeguard from immediate and future risks from tidal flooding and sea level rise projected for the year 2100

Climate Resilience Intentions

Seaport Coastal Resilience

- Raise waterfront to 11 feet above sea level
- Prevent flooding from tides and sea level rise in the year 2100

FiDi and Seaport Climate Resilience Master Plan (future phase)

- Extend the shoreline to accommodate multi-level waterfront
- Extend protection against 100-Year Storm Surge in the year 2100

Open House Overview

Open House Intent

- Introduce the project to the community
- Listen to the community's desires for the project and immediate neighborhood

Location & Date

Peck Slip School

Thursday, June 27

6:00 pm – 8:00 pm

Snapshots from the SPCR Open House on June 27th

Open House Promotion
