#### Landmarks Preservation Commission Designation

Landmarks Preservation Commission January 14, 1992; Designation List 241 LP-1629

MACOMB'S DAM BRIDGE (originally Central Bridge) AND 155TH STREET VIADUCT, from Jerome Avenue and East 162nd Street, the Bronx, crossing the Harlem River, to West 155th Street and St. Nicholas Place, Manhattan. Built 1890-95; Alfred Pancoast Boller, consulting engineer to N.Y.C. Departments of Public Parks and Public Works; Passaic Rolling Mill Company, contractor (bridge); Union Bridge Company, contractor (viaduct); and Herbert Steward (Steward & McDermott), contractor (bridge masonry and viaduct).

On September 15, 1987, the Landmarks Preservation Commission held a public hearing on the proposed designation of the Macomb's Dam Bridge and 155th Street Viaduct and the proposed designation of the related Landmark Site (Item No. 5). The hearing had been duly advertised in accordance with the provisions of law. Three speakers appeared at the hearing: representatives of both the N.Y.C. Department of Transportation and Modjeski & Masters, engineering consultants, took no position with regard to the designation, while a representative of the Municipal Art Society spoke in favor of the proposed designation. In addition, the Commission received letters in support of designation from Congressman Charles B. Rangel and Bronx Borough President Fernando Ferrer.

#### Landmarks Preservation Commission Designation

LPC Designation emphasizes structural components of the bridge, rather than paint scheme

Street Viaduct provides a gradual descent toward the bridge from the heights of Harlem to the west, while the long Jerome Avenue approach viaduct of the bridge, consisting primarily of steel deck truss spans carried by masonry piers, with a subsidiary camelback truss span, was built over what was then marshland in the Bronx. The appearance of the bridge and viaduct is enhanced by the central swing span truss outline, the steel latticework, the steel and iron ornamental details (including the Eighth Avenue stairs, sections of original railing, and several lampposts), and the masonry piers, abutments, and shelterhouses. Following in a succession of bridges at this site since 1815, the Macomb's Dam Bridge and 155th Street

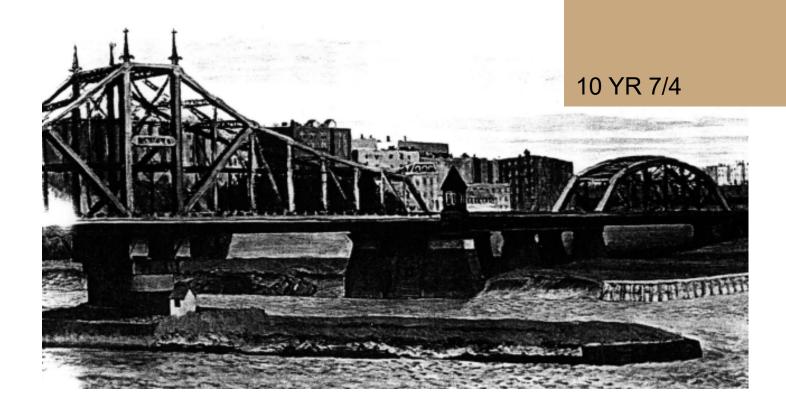

Viaduct continues to provide an historically important connection between upper Manhattan

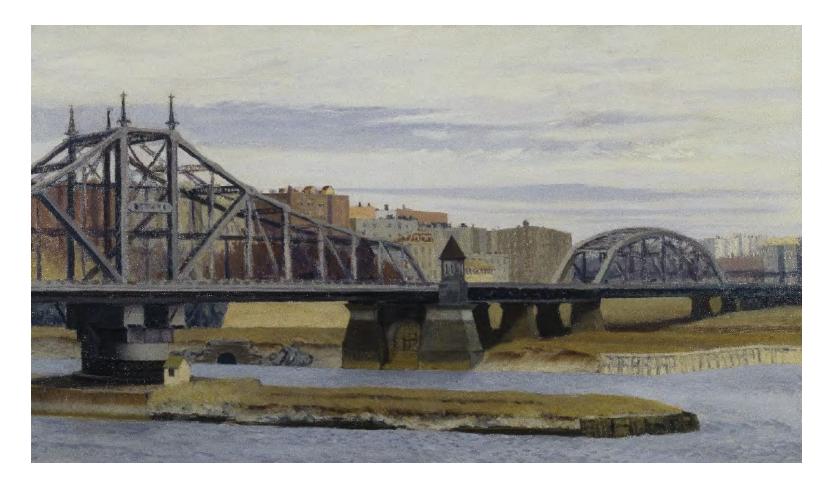

and the Bronx.

The long steel 155th

- A PDC paint analysis noted the **original 1895** paint scheme for the bridge was likely a light yellowish-brown similar to Munsell Number 10YR 7/4.
- The analysis then noted the painting scheme following the original was a two-color scheme of yellowish-white (2.5Y 9/2) and moderate reddish brown (10R 4/6).

Finally, in 1935, the Macomb's Dam Bridge was immortalized in the painting "Macomb's Dam Bridge" by eminent American artist Edward Hopper [fig. K].<sup>33</sup>

Interestingly, the **1935** oil painting by Edward Hopper of the bridge shows it in a **grey tone.** 

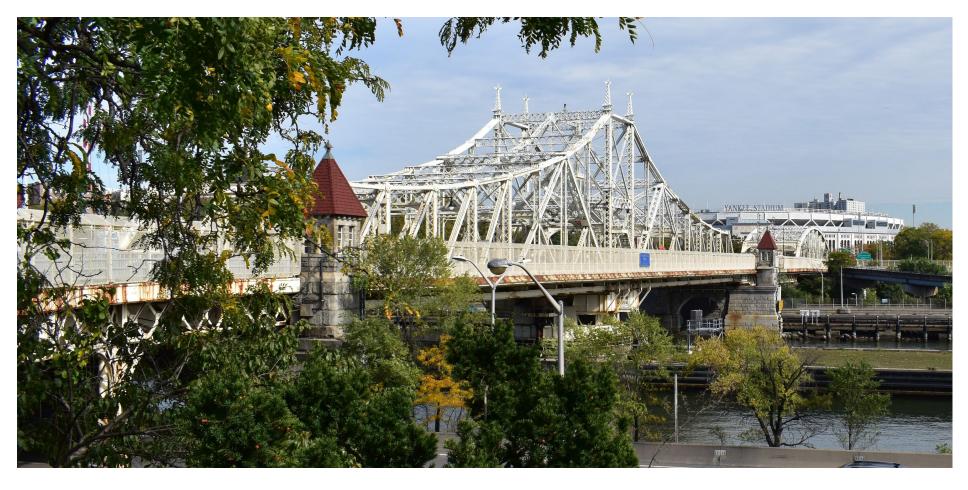

Macombs Dam Bridge is a 1935 oil painting by the American Realist artist Edward Hopper. The work depicts New York City's Macombs Dam Bridge

Prior to the repainting in the late 1990's, the bridge was painted a moderate blue (approved by PDC in 1979).

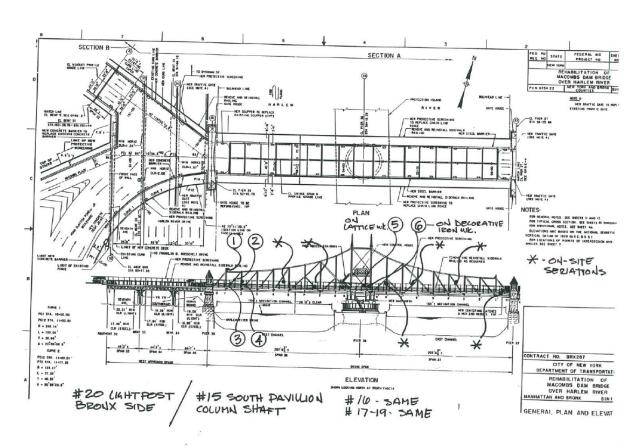

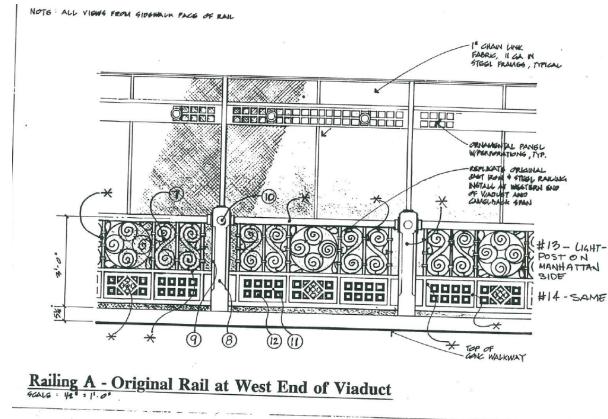

PDC approved the pale yellow-white color (#2.5Y 9/2) in **1995**. Since then, the pale yellow-white color **has significantly deteriorated** and is very difficult to maintain.

#### PDC Paint Analysis – Scope of Research

### PDC Paint Analysis – Further Prior Color Schemes

Sample #5, Bridge, Latti	cework					
Top Coat	moderate blue moderate orange heavy dirt layer moderate blue moderate reddish brown moderate blue	10B 4/6 2.5YR 6/10 10B 4/6 10R 4/6 10B 4/6				
	moderate orange very pale blue heavy dirt layer yellowish white heavy dirt layer	2.5YR 6/10 2.5PB 8/4 2.5Y 9/2	10B 4/6	10R 4/6	2.5YR 6/10	2.5Y 9/2

	heavy dirt layer yellowish white heavy dirt layer light olive heavy dirt layer	2.5Y 9/2 10Y 6/4	7.5GY 6/6	10 YR 6/2	10Y 6/4	10 YR 7/4
×	yellowish white yellowish white heavy dirt layer light grayish yellowish brown yellowish white	2.5Y 9/2 2.5Y 9/2 10YR 6/2			101 0/4	10 11(77-
Original Coat Primer Shop Primer Substratum	light yellowish brown moderate orange black metal	2.5Y 9/2 10YR 7/4 2.5YR 6/10 N 2.5/4.6% R				

#### PDC Paint Analysis – Similarities to Proposed Color

- Discounting the samples taken on the lampposts, of the remaining 17 samples, a grey tone (N 4.5) similar to the proposed Munsell Grey was found on
  - #12 (Viaduct Lower Screen)
  - #11 (Viaduct Lower Screen)
  - #10 (Viaduct Newel Post)
  - #9 (Viaduct Newel Post)
- A silver color (not corresponding to the Munsell chart) was noted on
  - #15 (Viaduct Pavilion Column Shaft)
  - #16 (Viaduct Pavilion Reeded Shaft)
  - #17 (Viaduct Pavilion)
  - #18 (Viaduct Pavilion)
  - #19 (Viaduct Pavilion Ironwork)
- On the Bridge, sample 1 notes a light olive grey (5Y 5/1) that is not far off from the proposed Munsell Grey

#### Summary of Findings

- •The PDC Paint Analysis presented the varying paint schemas, with some samples suggesting that the structure has taken on **over 21 different colors**
- •Historical documents, such as the Hopper painting, suggest that the structure has been similar to Munsell Gray before
- •The current cream-yellow is **difficult to maintain**, with visible rust on most parts of the structure
- •Proposed Munsell Gray will be aligned with past color installments, as well as DOT's commitment to continuing the long-term viability of an architecturally historic structure

## COLORS APPROVED BY NYC PUBLIC DESIGN COMMISSION FOR NYCDOT BRIDGES

#### 1995 PDC Approval and NYT Article

#### ART COMMISSION OF THE CITY

February 21, 1995

CERTIFICATE

18927

RESOLVED, That the Art Commission, having considered designs for the repainting of the Macombs Dam Bridge over the Harlem River, Manhattan, submitted by the Department of Transportation, represented by exhibits 4208-K & L of record in this matter, hereby gives to the same unanimous preliminary and final approval.

Final approval is conditioned upon the commencement of work before February 14, 1997, and the submission of an 8" X 10" black and white photograph of the completed project.

A true copy of resolution adopted by the Art Commission at its meeting

on February 14, 1995.

Vivian Millicent Warffield

Executive Director

#### Art Commission Raises Cry Over Hues in Picking Colors for Bridges

#### By ANNA QUINDLEN

Beneath the somber stares of former commissioners frozen in portrait and a grandfather clock that stopped long ago, the city's Art Commission was riven by disagreement yesterday over what the correct colors for city bridges should be. In fact, there was even disagreement over what color Yankee Stadium was.

What has come to be known as the great bridge controversy came down to a question of shades for three Harlem River spans. But it raised larger questions: whether the commission should develop a comprehensive esthetic policy for the color of city bridges, and whether the structures are handsome enough to be emphasized, ugly enough to be disguised, or even important enough to merit such

"The Macombs Dam Bridge will be blue because

On Colors for Bridges

Yankee Stadium is blue," said Ekkehart Schwarz of the Department of Transportation, who had presented photographs of that bridge, the Broadway Bridge, and the Madison Avenue Bridge to the members of the commission.

"Yankee Stadium is not blue," said Norval White, vice president of the commission, in a loud voice. "It is cream."

"The accent colors are blue," said Joseph Princiotta, also of the Transporta- derided by Raquel Ramati of the Urban tion Department.

Despite Mr. White's objections, the plan to paint the Macombs Dam Bridge Yankee Blue was approved by the commission, 5-2, with one abstention. The tan aluminum shade for the Broadway Bridge was a great favorite, and passed unanimously, while the transportation officials were sent back to the drawing bridges in primary colors, Bridge, Mr.

bers, who are empowered to pass on any alterations made to city buildings or structures, were unhappy with the conditions under which they were expected to agree upon color. Mr. Schwarz presented each with a color swatch, not unlike those found in a paint store, as well as the rether early photography. rather small photographs. Various commission members suggested that at the "I really object to them being in devery least he should have brought an en-signer colors," he added. largement.

"I think we should take a bridge tour," Clara Coffey, a landscape architect, said earnestly.

"I think they should take us on the Circle Line," said Mr. White, to polite laugh-

This is an early venture into creative coloring for bridges, an innovation that which had been highly touted by Councilman Henry Stern. He had asked the Koch administration earlier this year to consider a variety of shades for bridges, saying, "We can have bridges that span the

Mr. White and several other commission members also noted that bridges had begun to come under scrutiny with the recent paint job of the Manhattan Bridge, which is now rather blue. Mr. White called it "an atrocity" and said he was "very disturbed" about the color. That blue made him wary of the blue suggested for the Yankee Stadium span, which he voted against. He was, however, in favor of the rust color for the Madison Avenue Bridge, which in turn was Design Group.

"It is not an industrial color," said Miss Ramati. Mr. White disagreed.

"I frankly think it's marvelous," he

In fact, while other members expressed some pleasure at the ideas of bridges in primary colors, such as the board on the rust color for the Madison | brightly nueu Queensboto Brig group in his distress about possible large
