Tareake Dorill, Board Chair

Susan Stetzer, District Manager

District Needs Statement for Fiscal Year 2025 Introduction

Community District 3 Manhattan (CD 3) spans the East Village, Lower East Side, and part of Chinatown. It is bounded by 14th Street to the north, the East River to the east, the Brooklyn Bridge to the south, and Fourth Avenue and the Bowery to the west, extending to Baxter and Pearl Streets south of Canal Street. This community is filled with a diversity of cultures, religions, incomes, and languages. Its character comes from its heritage as a historic and present-day first stop for many immigrants. CD 3 is one of the most densely populated Community Districts in New York City, with approximately 141,066 residents.¹ Our community is diverse: we identify as 28% Asian, 11% Black, 25% Hispanic, and 33% White.² With this diversity comes different language needs. Twenty-seven percent of the district speaks English less than “very well,” which highlights the need for translation and interpretation services. Within CD 3 the percentage break down of languages is 16% speak Spanish, 25.6% speak Asian and Pacific Island languages, and only 53% speak only English.³ Our residents are very proud of their historic and diverse neighborhood, however, the very characteristics that make this district unique also make it a challenging place to plan and ensure services for all residents and businesses.

Growing Inequality and the Impact of COVID-19

Many people within our community live on the edge of homelessness and economic survival. Inequality and housing precarity are tied to rising housing costs and stagnating incomes within the Community District. In the 2nd quarter of 2022, there was a 43% increase in median asking rents in CD 3 compared to the same time period in 2021. The median asking rent of CD 3 in Q2 2023 is \$4,295 a month. This would require a renter household to have an income of \$163,000 to not be considered rent burdened,⁴ while the median household income for CD 3 is \$52,720 and 84.3% of district residents are renters.⁵ The gap between the lowest and highest earners in CD 3 continues to widen.⁶ In 2021, 24 percent of renter households in CD 3 were severely rent

burdened (spent more than 50 percent of household income on rent.)⁷ Before COVID-19, an estimated 24 percent of residents in CD 3 were living below poverty level, with approximately 36 percent of children under the age of 18 and 31 percent of adults 65 and over living below the poverty level.⁸ COVID-19 increased hardships for low-income residents and residents of color (68 percent of the CD 3 population), creating even more destitution and need for resources.⁹

The onset of COVID-19 in early 2020 significantly impacted the residents and business owners in CD 3 and emphasized the inequalities and income disparities that previously existed among our different communities. The COVID-19 case rate in CD 3 between February 2020 and April 2021 was 87.2 (per 1,000 residents) and the death rate between March 2020 and April 2021 was 2.7 (per 1,000 residents).¹⁰ We now know that New York City residents from low-income communities like CD 3 have tested positive for COVID-19 antibodies at a higher- than-average rate, underscoring the disproportionate impact of the disease on people of color.¹¹ The district now has one of the highest diversity (income diversity gap) in household incomes out of all 59 districts in New York City and it continues to grow.¹²

The pandemic has also exacerbated New York City's housing crisis, a major issue in CD 3 prior to COVID-19, and this impact has hit particularly hard for Black and Hispanic New Yorkers who have lost work. It has heightened existing inequities in our District and is highlighting the need for more resources to support our community.

Community-based organizations that provide essential services for residents in CD 3 continue to struggle to provide more services and fund themselves with fewer resources, particularly in the fiscal environment that COVID-19 has created. Community healthcare and social service providers face similar challenges and residents are left to grapple with service reductions while they are experiencing extreme economic and health vulnerability.

CD 3 is also a coastal community that was severely impacted by Superstorm Sandy in 2012, and the area is increasingly vulnerable to future climate change impacts and extreme weather scenarios that affect the waterfront. Several coastal resiliency projects have been planned for the district and are in various phases of approval, funding, or construction. This issue of coastal

¹¹ Lane, N. Singh, R. K. (May 20, 2020). *New York City's low-income, minority areas hit hardest by COVID-19, Cuomo says*. <https://www.reuters.com/article/us-health-coronavirus-usa-new-york/new-york-citys-low-income-minority-areas-hit-hardest-by-covid-19-cuomo-says-idUSKBN22W2IG>

¹² NYU Furman Center. (2023). *Lower East Side/Chinatown MN03*. <https://furmancenter.org/neighborhoods/view/lower-east-side-chinatown>.

vulnerability is further compounded by the city’s identification of a majority of CD 3 being an environmental justice area.

According to local law, an environmental justice area is a low-income community or a minority community, based on US Census data.¹³ These areas are more vulnerable to potential environmental injustice because of the history of racism and inequitable resource distribution.

Economic Development

Community District 3’s economic ecosystem continues to be impacted with the residual impacts from the COVID 19 shutdown.

- Retail stores, restaurants, bars, arts venues, personal care salons, hotels and many other local businesses are still recovering from significant revenue losses and continue to struggle to pay expenses such as rent, mortgages, utilities, and payroll.¹⁴
- Unemployment reached a high of 20 percent in May 2020 but has now dropped to 5.3 percent for New York City as of August 2023¹⁵ Businesses now struggle to hire staff.

There was a sustained loss of independent “mom-and-pop” stores providing a variety of goods and services in CD 3 prior to the pandemic. As the local economy becomes more homogenous, residents must increasingly leave our community or shop online to meet basic needs—a trend that was accelerated by COVID-19.¹⁶ Since reopening after the pandemic, there has been a slight increase in chain stores in Manhattan of just over three percent. This slight increase is reflected in CD 3. Zip Code 10009 had 22 chain stores in 2021 which increased to 26 in 2022, an 18.2% change. Zip Code 10002 currently has 39 chain stores; down from 51 stores pre-COVID in 2019.¹⁷

The still significant presence of these chain stores, despite the loss of 17 chain stores since 2020, has altered the character of the Lower East Side by shifting purchasing power to mass-market retailers and constructing facades out of context with the rest of the historical community.¹⁸ Retail stores that do survive in our community are threatened by the rising costs of doing business in NYC without sufficient relief or protection from the City.

Merchant Organizing and Additional Opportunities for City Support

CD 3 is represented by the following Business Improvement Districts (BIDs) and Merchant Organizations:

- **The Chinatown Partnership**—*Broome to Worth Street and from Allen to Rutgers:* Clean streets initiative, streetscape improvements, enhanced lighting gateways, and wayfinding projects. The BID seeks to preserve the neighborhood's unique culture while ensuring its vitality in the future with weekend Walks, festivals, and the Explore Chinatown marketing initiative.
- **The LES Partnership**—*Orchard Street and currently seeking to expand to include a large section of the Lower East Side with Houston Street as its northern border:* Current services include public space maintenance, sanitation, programming for Essex Market for food security and health and marketing services. There are plans to expand. CB 3 would like to also expand services and obtain funds for mechanized equipment.
- **The Union Square Partnership**—*In CD 3, 14th Street east to First Avenue:* Clean + Safe program and marketing and business development in the CD 3 blocks.
- **The Village Alliance**—*In CD 3, 8th Street east to Second Avenue and some businesses to east and west:* This BID focuses on sanitation and public safety (75% of the budget). It does not receive any programmatic funding. Impact is measured by the amount of trash and graffiti removed, low vacancies, and participants in membership. A current issue for the BID is the number of people in the area who have substance abuse conditions which disrupts many businesses. The BID would like to fund outreach and services for this population.
- **East Village Independent Merchants Association (EVIMA)**—*A merchant-led membership-based organization in the East Village:* Conduct merchant organizing, marketing and promotion, commercial lease assistance. The organization grew with an Avenue NYC grant but has been operating in a reduced capacity since the grant ran out. There is need for stable funding.

It is important to note that many merchants are still not organized into associations and therefore under-supported in a substantial portion of the district.

As our community continues to be burdened by a high cost of doing business, Community Board 3 has identified several ways that the City can help grow and strengthen our local economy:

- Provide Direct Support for Merchant Organizations – Continue financial and programming support for our local merchant-based organizations and BIDs
- Prioritize comprehensive adult education and job training / workforce programs to support district residents to access living wages, career mobility, and job quality.

- Continue financial and programming support for our local workforce development organizations and spaces like the Zero Irving Tech Training Center.

Housing and Land Use

While we do not know the long-term effects of Covid-19 crisis on the NYC housing market, housing in CD 3 is increasingly unaffordable for many residents, and the district has become increasingly socially stratified:

- Community District 3 currently has the highest income diversity rate of any community district in New York City with 13.4% of the district having an income of less than \$10,000 and around 13% of residents with an income of over \$200,000.¹⁹
- 24.2% of residents live below the poverty line and 50% of households have incomes under \$50,000.²⁰
- Median asking rents in CD 3 went up 5.4% in the second quarter of 2023 compared to the same period in 2022. The median asking rent for the second quarter 2023 is \$4,295.²¹
- 37% of low-income renter households in CD 3 are severely rent burdened and spend more than half their monthly income on housing.²²

Additionally, CD 3 is experiencing a crisis of street homelessness, and it is clear that new affordable and supportive housing is needed, but it must be targeted at affordability levels appropriate for current neighborhood income.²³ The points below show a need for an increase in affordable housing development in general and specifically targeted at low incomes, such as

- In 2021, median household income was just \$52,720²⁴
- CD 3 sits at 50% of Area Median Income, while other Lower Manhattan districts are well above 100% AMI, displaying CD 3 as the last area of affordability in the lower half of the borough and as an area with a high-level need for diverse housing options to fit the varying incomes that reside here.

<https://furmancenter.org/neighborhoods/view/lower-east-side-chinatown>.

- From 2010–2022, CB 3 gained 4,835 new housing units, but since 2014, only 1,434 new income-restricted units have been built.²⁵
- 415 Low-Income Housing Tax Credit units are set to expire within the next few years.²⁶

In the face of these challenges, CB 3 has identified several housing and land use needs the City should address:

Build and Preserve Affordable Housing

Since 2010, city-wide housing development of new units has lagged far behind population growth, largely due to restrictive regulations and high construction costs. At the same time the share of rent-burdened households paying more than 30 percent of their income for housing has steadily increased, while the number of apartments available at low rents has shrunk, leaving the lowest-income households with few options.²⁷

There is a need for more deeply affordable housing in CD 3 to address the crises of inadequate housing supply, affordability, inequality, and homelessness in the district. New opportunities for affordable housing must be found, including senior housing, supportive housing, housing for the formerly homeless, hotel and commercial conversions to residential uses, community opportunities to purchase distressed properties, and long-term preservation of existing affordable housing in the district. CD 3 also needs more family-sized affordable housing, with higher volumes of 2- and 3-bedroom affordable units than the typical affordable unit mix. In addition, the homeownership rate in CD 3 is 15.5%, which is lower than the citywide share of 33.3%.²⁸ Along with expanding affordable rental housing, there is a need to expand affordable homeownership opportunities like the kind seen in previous decades with programs like Mitchell-Lama.

Sufficient funding for capital projects and housing subsidy programs from the City will be required to ensure much needed affordable housing continues to be constructed. Additionally, unnecessary administrative and bureaucratic roadblocks in the approval process are some of the largest financial costs in building new affordable homes, which often renders desirable projects financially unfeasible. Community-based organizations in CD 3 which provide essential services to tenants dealing with the termination of basic services, egregious building code violations, and avoidable evictions need expanded support to ensure tenants can remain in their homes and that

²⁷ NYU Furman Center. (2023). *Lower East Side/Chinatown MN03*. <https://furmancenter.org/neighborhoods/view/lower-east-side-chinatown>.

²⁸ Ibid.

existing affordable housing is protected.

Provide Support for the Expansion of Community Land Trusts (CLTs)

CLTs are proving to be an effective mechanism for permanently preserving affordable housing. In CD 3, the Cooper Square CLT owns the land under 23 buildings, and the Cooper Square Mutual Housing Association manages 26 total buildings, with 418 housing units and more than 2 dozen storefronts, ensuring that they are a permanently affordable resource in the area. There has also been a new Community Land Trust established in Chinatown and This Land is Ours CLT, incorporated in 2020, is seeking to acquire City land for senior and family housing, accessible and supportive housing. In CD 3 there is a need for more support for planning and operations of CLTs that are looking to expand and as well as support for emerging CLTs that need technical assistance and education. CLTs also need priority consideration when disposing of City-owned property and need financial incentives to encourage the transition of City-foreclosed properties into CLT ownership.

Preserve the Viability of HDFC Buildings

Increasing operating costs, a lack of affordable refinancing options, and gentrification-fueled property value escalation has resulted in many Housing Development Fund Cooperatives (HDFCs) being converted to market-rate housing or being lost to foreclosure.²⁹ To ensure they remain a financially solvent and safe source of affordable housing in our district, HDFCs need expanded support services, financial training, enhanced and stronger resale restrictions including sales price caps, and long-term tax abatements.

Expand Support for Residential Resiliency Upgrades

In CD 3, over 21,000 dwelling units are located within the 2015 FEMA-identified 100-year floodplain and over 27,500 units are located within the 500-year floodplain.³⁰ Current programs that finance residential resiliency upgrades are not being widely used in CD 3, and there is a need for the City to tailor programs to the specific financial needs of low- and moderate-income housing providers, including HDFC co-op boards, so that they can complete critical building infrastructure upgrades and take proactive steps to become environmentally resilient.

NYCHA and Section 8 Housing

The New York City Housing Authority (NYCHA) owns and manages over 14,900 units of low-

²⁹ Stewart, Nikita. New York Times. (2018). *Under City Program, Renters-Turned-Homeowners Could Become Renters Again*. <https://www.nytimes.com/2018/07/29/nyregion/co-op-low-income-nyc-rent.html>.

³⁰ NYC Department of City Planning. (2020). *Manhattan CD 3 Community Profile*. <https://communityprofiles.planning.nyc.gov/manhattan/3>.

income housing in CD 3 and the preservation of these apartments as viable, secure, publicly owned housing is vital to ensure that our community remains diverse and economically integrated. Changes in agency leadership, new federal monitoring, uncertain funding from HUD, and proposals for increasing public- private partnerships underscores the fragile condition of NYCHA funding and operations in CD 3. The latest reports now show \$40 billion of capital and repair needs over the next five years, significantly more than the \$31.8 estimated in a 2018 report.³¹ CB 3 has identified the following as pressing district needs:

- **Capital improvements and repairs**

To the extent possible, the capital repairs in CD 3 NYCHA buildings need to be funded and construction and repairs expedited. NYCHA properties in CD 3 during the 2022-23 winter saw 587 heat outages.³² Other service outages include unplanned elevator, heat, hot water, water, and electricity services occurred at the rate of 23.5 outages per building in C 3 2022.³³

- **Bridge the NYCHA digital divide**

All NYCHA developments have internet services, but internet accessibility depends on affordability for residents. The Big Apple Connect initiative offers free internet services to 45 Allen Street, Baruch, Campos Plaza II, Hernandez, Lower East Side I Infill, Lower East Side Rehab (Group 5) and Meltzer Tower. Riis I & Riis II, Seward Park Extension and Wald are covered under the licensing agreements announced by the City in May 2021 offering symmetrical in-unit service. The remaining CB3 developments (Bracetti Plaza, First Houses, Gompers, La Guardia, La Guardia Addition, LES II & III, Rutgers, Smith, Stanton Street, Two Bridges URA (site 7), Vladeck and Vladeck II) are not currently included in either of these initiatives – although households are able to sign up for the Affordable Connectivity Program (ACP) for a discount on broadband service and connected devices.³⁴

- **Community Participation in NextGen NYCHA, RAD, and the Trust for Public Housing**

The NYCHA 2.0 programs, including NextGen NYCHA infill and Permanent Affordability Commitment Together (PACT), the local iteration of the federal Rental Assistance Demonstration (RAD) program, as well as the Blueprint for Change proposal to create a preservation trust, are new models for public housing that may introduce the private sector into NYCHA properties and could dramatically change the way

³⁴ Office of the Chief Information Officer, NYCHA

developments are managed and funded. Several developments in CD 3 have been discussed as possible sites for implementation of the three programs. There must be increased community engagement and transparency from NYCHA regarding these new programs, to better understand how they would impact public housing stock and public housing residents in our community district.

Health and Human Services

Technology

COVID-19 underlined the technological disparities in CD 3. Twenty five percent of households in CD 3 do not have internet access, while 44% have no broadband access to the internet.³⁵ This disparity will impact CD 3 residents' access to school, health care, and social services and, if left unaddressed, will have significant long-term and short-term impacts on the health and livelihood of our community.

New Refugees and Asylum Seekers

Our district has seen an increase in new refugees, migrants, and asylum seekers. Shelters and respite centers are being set up by DHS, OEM, HPD, and HHS. There is lack of coordination and standards for notifying communities and creating partnerships with the community, which impedes ability for local groups to help. It is difficult to project for 2024 if the current crisis will continue. Currently we see an increase in the need for necessities such as basic essential goods, food, and clothing. Many suffered or were exposed to traumatic events over the course of their journey to New York City and require culturally and linguistically competent mental health services for children and adults. Many face significant language barriers and are in need of ESOL and other adult education programs. Local service providers have also reported receiving requests for immigration legal services to obtain work permits. Many of the families have young children. There is a need for additional childcare slots to serve these families. There will also be a greater need for employment services and benefits enrollment assistance. There is a need for expedited work authorization so that these new immigrants may be gainfully employed.

Education

New Students

In school year 2022-2023, 300 new students from asylum seeker families enrolled into the elementary and middle schools in School District 1. Schools will continue to need additional

³⁵ NYC Open Data. (2022). *Internet Master Plan: Broadband Adoption and Infrastructure by Community District*. <https://data.cityofnewyork.us/City-Government/Internet-Master-Plan-Broadband-Adoption-and-Infras/rxpfyca2/data>.

resources, staffing, and teachers. These families live both in and outside of the district – many in hotels, shelters, and other types of facilities. There's a need for free transportation for students both inside and outside of the district. Schools should have sufficient bilingual ed classes, and ENL (English as new Language) classes so that these new students may access classroom instruction and the new literacy curriculum being rolled out. Students and their families faced much trauma on their journey to New York City, Mental health services and programming in the school is required. In addition, besides Spanish, schools will need staff fluent in other languages of the students and their families such as Portuguese and indigenous dialects.³⁶

In Spring 2020, the abrupt closure of the public schools and transition to at-home remote learning burdened low- income students and their families the most. Students attending schools without resources such as well-equipped computer labs and regular in-school digital literacy instruction were less prepared for at home remote learning and needed more support. Students with special needs or in temporary housing faced additional challenges. COVID-19 served to highlight these long-standing disparities that exist among K-12 students in CD 3.

Priority education needs in CD 3:

- **Social workers and counselors**

All schools have social workers but for the majority of schools, this is a part time position focused on managing mandated services. Eleven out of 19 schools in School District 1 report a need for a full-time social worker who can support the mandated services, support students and families' additional needs and work proactively to support future needs before they arise.³⁷ In school year 2022-23, School District 1 was able to partner with Families Thriving and NYU SW intern program and it positively impacted services to students and families. However, schools need full time support staff as opposed to itinerant staff because it better supports relationship building.³⁸

- **Technology**

Technological enhancements, including the provision of necessary devices, WiFi/internet and technical support, are needed to ensure our students are not left behind. This will be even more urgent as schools plan for greater use of technology in learning and communications. While all of students were provided with tablets for remote learning, this is a consumable item. Schools need additional tablets with hot spots since some families do not have WiFi. Because tablets are being used for remote learning in classrooms or at home, there is also a need for headphones.³⁹

³⁶ Report by District 1 Superintendent at the CB3 June 2023 Health, Seniors, & Human Services / Youth, Education, & Human Rights Committee meeting.

³⁸ Mustillo, K., Deputy Superintendent School District 1, email communication, August 21, 2023

³⁹ Mustillo, K., Deputy Superintendent School District 1, email communication, September 1, 2022

- **After school programs**

Families in CD 3 rely heavily on community-based programs during after-school hours, weekends, and holidays because 32 percent of our children under 18 years of age live below poverty level.⁴⁰ The biggest need is for after-school options for 3K and PK. Restrictions for CBOs who run these programs lead to lack of free affordable options for the youngest learners. It also means families are not entering our schools in 3K and PK but instead opting for full day programs so they can work. There is a need to provide support to families to access public education in 3K because this would provide the most benefit to early childhood literacy development.⁴¹

- **Learning to Read Well**

In order to achieve the Chancellor's priority, "All Students will Learn to Read Well" there will be a need to not only strengthen the schools' literacy practice but also create positive learning conditions in the school environment and culture. There will be a need for professional development related to this priority.⁴²

- **Students in Temporary Housing**

After-school for STH in non-title 1 schools is needed to ensure that after-care is available for working families of STH. An example of this is a Henry Street Settlement program that offers free arts programming for NYCHA families. Expansion of opportunities such as this is needed and would benefit students and families.⁴³

Need for a New School

Community School District 1 (CSD1) schools are outdated and under-resourced. From 2012-2022, CSD1 lost 3,643 students.⁴⁴ CD 3 is in need of a new public-school facility for the following reasons:

- Eighty-five percent of CSD1 schools share a building with one or more schools resulting in inadequate access to gym, arts and enrichment, science labs, and acceptable hours for school lunch. Sixteen percent of schools share a gym and/or yard space with three or more schools and almost 1/4 of these schools share gym facilities between two schools. This lack of access is further exacerbated by the fact that 35 percent of gym facilities are used for multiple purposes, creating "cafegymalaboriums."⁴⁵
- The NYC Department of Education (DOE) mandates 120 minutes of physical education

⁴⁵ Community School District 1 (2014). *Gym Survey*. <https://ceclnyc.org/gym-survey/>.

per week. Students in CD 3 do not have equal access to physical education and activity due to inadequate space.

- Inadequate, aging buildings were not designed for today's students. Middle and high school students often learn in classrooms designed for elementary school students. CD 3 has schools built from 1900 on—the average age of CD 3 schools is 80 years old. (*See school age chart in appendix.*)
- The lack of technology infrastructure in all these aging buildings prevents CD 3 children from access to 21st Century College and Career Ready skills. With the advent of updated state testing moving to an online format, these aging buildings will limit students' ability to compete in this new online testing format. There is a dearth of K-8 schools in the western side of School District 1 where the proposed site is located.

Unmet Needs

Community Board 3 has overlapping unmet needs that restrict the ability for our social service organizations to serve our most underserved residents, particularly children and seniors.

- **Families no longer qualified for programs due to outdated income requirements**
Many families now surpass the federal maximum income requirement for programs serving low-income families (such as Head Start). This is often the result of wage increases from minimum wage to living wage without corresponding increases in maximum income requirements. Families earning a living wage are still in need of these programs.
- **Pay disparity and competitive compensation**
There is a lack of pay parity between staff of DYCD funded programs and staff of DOE funded programs. Staff of DOE programs receive COLA, while staff of DYCD programs do not, the result is that pay parity is not sustained. Service providers saw an exodus of staff from DYCD funded programs as a result.

In 2021, City Council legislation required pay parity for educators in early childhood programs, whether funded by DOE or DYCD (CBO based). However, the pay parity is not sustained. While first year CBO-based teachers receive a salary that is comparable to that of DOE teachers, DOE teachers also receive salary increases over time whereas CBO teachers do not.⁴⁶ Service providers saw an exodus of staff from DYCD funded programs as a result. In order to operate sustainable programs, pay parity is needed regardless of funding agencies.⁴⁷

The lack of competitive compensation for staff impacts mental health programs and youth serving programs as well. Local providers report recruitment and retention of highly qualified

⁴⁶ Education Alliance (n.d.) <https://edalliance.org/>.

⁴⁷ Cheng, M., Director Child Development Services, Ho, W., President and CEO, Chinese American Planning Council, email communication, August 18-25, 2023

staff is hindered by the inability to offer competitive compensation. This compensation would not only enable them to serve more people, but also promote recruitment and retention of a diverse, culturally sensitive, linguistically competent staff.⁴⁸ Youth service providers report that they are unable to recruit and retain more direct service staff such as program group leaders because they are competing with other industries such as the retail industry when hiring.⁴⁹

Older Adults

CD 3 needs critically important investments to help older residents live healthier and more fulfilling lives as they age in place, specifically, case management, healthcare assistance, and activities that support aging-in-place in CD 3⁵⁰:

- There are 38,867 residents (24.5 percent of total CD 3 population) over the age of 60;
- Approximately 33 percent of all seniors in the district—live below the poverty line;
- 32 percent of seniors are living with a disability;
- 29 percent of seniors experience ambulatory difficulties; and
- 53 percent of seniors live alone⁵¹

In practice, seniors require care on a continuum that covers their diverse cultural, health and wellness needs. Priority concerns of seniors that have been identified are:

- Concerns about isolation
- Food access
- Wellness concerns such as needs for physical activity, mental stimulation, coping with depression, low self-esteem & self-worth issues (especially amongst the oldest)
- Staying informed with accurate information about health and other issues

Programs at Older Adult Centers and Naturally Occurring Retirement Communities (NORCs) provide programs to address these concerns:

- **Older Adult Centers**

According to the Department for the Aging (DFTA), in CD 3 there are 13 DFTA-funded

<https://data.census.gov/table?q=United+States&t=Older+Population&g=795XX00US3603809&tid=ACSSST5Y2021.S0102>

Older Adult Centers (formerly known as senior centers).⁵² Each center is particularly important as they are culturally sensitive to the needs of our diverse communities. Given the growing senior population, there is a need to maintain and expand the existing facilities and to address significant capital maintenance needs.

- **Naturally Occurring Retirement Communities**

In addition to senior centers, NORCs are also vital in CD 3. A NORC is a multi-age housing development or neighborhood that was not originally designed for seniors, but now is home to a significant number of older persons. There are eight NORCs in CD 3 that provide Supportive Services Programs to maximize and support the successful aging in place of older residents (*See appendix for list of NORCs in CD 3*).

Often, NORC residents can access health and social services in their own buildings, building complexes or locally within their neighborhoods. Both the City Council and DFTA recognize the need for NORCs in the community and are working to budget more NORC programs. NORC programs are a model for bringing necessary care and support to seniors living in age-integrated buildings and neighborhoods. Nurses and social workers are necessary to provide supportive services.

Lack of proper facility maintenance by NYCHA

Many of our programs are held in NYCHA community rooms and serve mostly NYCHA residents. Because the programs are not run by NYCHA, the housing authority does not maintain the facilities. The settlement houses and other nonprofits who run the programs receive funding for programming and staff, but do not receive capital funding for needed extensive repairs.

There are intolerable conditions that have been ongoing for years—plumbing backups in facilities used by Cornerstone programs, the ceiling falling in a senior center and raw sewage in a preschool program are among the significant problems. The situation is so dire that some of our settlement houses have taken it into their own hands to fix the problems. However, this diverts funds needed for operating these programs that serve our residents. The smaller organizations do not have the resources to do the major fundraising needed to both meet organizational goals and to raise funds to repair NYCHA facilities. NYCHA resources are needed for maintenance that allows use of facilities to properly serve the clients. This includes proper maintenance of compactor rooms to prevent infestation, immediate repair of leaks and other work orders with management of work orders by NYCHA staff, proper maintenance of systems such as pumps and waste systems.

Health Care Needs and Services

COVID-19 has highlighted health justice inequities that are particularly notable in CD 3 because of the large gap between the lowest and highest income populations and concentration of lower income communities of color who are at two to three times higher risk of contracting COVID-19 than wealthier, white residents.⁵³ Underlying health conditions and low-paying essential jobs are two of the most visible conditions causing this disparity. There are seven federally qualified health care centers in CD 3 according to the Health Resources and Services Administration locator tool.

The changes in responding to health care needs due to COVID-19 have highlighted areas of unmet needs as well as new trends in the provision of health care. In 2021, approximately 5 percent of CD 3 residents were uninsured.⁵⁴ The trends and priorities below were reported to the CB 3 Health and Human Services Committee by the following community health care facilities: Charles B. Wang Community Health Center, the Betances Health Center, and the Gouverneur Health Facility.

Mental Health Services

During 2021, the aftereffects of the COVID-19 pandemic highlighted the need for heightened mental health services, both general and targeted. Models of care that eliminate or decrease barriers to access, including the CONNECT model and improved telehealth services, should be expanded, scaled, and made sustainable. Mental health support services should also be expanded, including programs that focus on mindfulness and well-being, in addition to programs for those with diagnosed mental illnesses. The demand for mental health services among the Asian-American community has grown partly due to anti-Asian hate crimes and isolation associated with the COVID-19 pandemic. Targeted mental health services, including services for migrant families, individuals and families experiencing homelessness, young people, older adults, and other priority populations in CB3, should also be strengthened.⁵⁵

In addition, behavioral health services are a priority for people with underlying conditions: seniors, first responders, and those with substance abuse disorders and pre-existing health conditions, people with disabilities, and those who have experienced traumatic changes in their employment. An overall plan to address the continuing increase in substance abuse and an

⁵⁵ Burrowes, Hyacinth. (2023). *Manhattan Community Board 3 Mental Health Resources Survey.*

<https://www.nyc.gov/assets/manhattancb3/downloads/resources/CB3-mental-health-survey-directory-2023.pdf>

increase in outreach/harm reduction services is needed.

Mental Health Services for Youth

Suicide is now the second leading cause of death among youth 10-24 years old in the U.S., and self-harm is reported to be on the rise among NYC youth, normalized through communities formed on social media that reinforce negative mentalities and attitudes.⁵⁶

There is a need for more services and programs deliberately and inclusively designed for youth, with a strong peer component, and with few barriers to access. Mental health services that address youth-specific issues through youth-designed strategies and approaches are needed especially for LGBTQ+ and BIPOC youth who deal with stigma, discrimination, and racism on a regular basis.

After school programs are needed more than ever to help children and youth to build the cognitive, socio-emotional, and intellectual skills they need to succeed and thrive as students and adults.

Health

Health disparities with a root in social determinants

People of color and those with lower income experience a disproportionate burden of preventable disease, death, and disabilities.⁵⁷ Maintaining social supports and community programs (such as smoking-cessation, medical screenings, and family planning as a few examples) are necessary.

Pediatricians are seeing children left behind socially, educationally, and emotionally. Enhanced services for these children will be needed for the near future and on an ongoing basis for several years.

Telehealth

Telemedicine has proved to be important in enabling community residents to access care. In 2020-2021, tele-visits increased access for senior citizens who were homebound and for those too ill to travel. The biggest challenge facing telehealth is the lack of internet access—25% percent of households in CD 3 do not have internet access, while 44% have no broadband access

⁵⁶ Ibid.

⁵⁷ New York City Department of Health. (2018). *Community Health Profile 2018: Lower East Side and Chinatown*. <https://www1.nyc.gov/assets/doh/downloads/pdf/data/2018chp-mn3.pdf>.

to the internet.⁵⁸

Skilled Nursing and Rehabilitation Facilities

After suffering losses of hospital resources and nursing home/rehab beds, our community is in critical need to ensure these services. There are currently no Alzheimer's dedicated beds/units in the district. From 2006 to 2022, the number of long-term care facility beds in Lower Manhattan decreased from 1,085 beds across eight facilities to 353 beds across two facilities.⁵⁹ This includes the 219 beds lost when Rivington House was closed.⁶⁰ Rivington House closed in 2015 when the Allure Group bought them. The community facility deed restriction was lifted for a fee of \$16.15 million to the City and then Rivington House was sold to Rivington Street Investors for \$116 million.

The Allure Group is required by the New York State Attorney General's office to open a new health care facility on the Lower East Side. The original deadline was 2022 but has been extended because of COVID. CB 3 is working with the Attorney General's office and state elected officials to ensure that the much-needed nursing home beds are replaced by Allure.⁶¹

The remaining long-term care providers are Gouverneur Skilled Nursing Facility with a total of 295 beds for rehabilitation and long-term care beds and New East Side Nursing Home with 58 beds. The skilled nursing facility at Gouverneur operates at 93% percent occupancy rate—greater than the New York City average and the national average.⁶²

Food Security

Between April 2022 and April 2023, the food price index rose 7.7%—this rise in food costs is particularly burdensome to low-income residents and senior citizens.⁶³ Food pantries and community fridges operated by local community organizations or GrowNYC continue to fill the

⁵⁸ NYC Open Data. (2022). *Internet Master Plan: Broadband Adoption and Infrastructure by Community District*. <https://data.cityofnewyork.us/City-Government/Internet-Master-Plan-Broadband-Adoption-and-Infras/rxpfyca2/data>.

⁶³ US Department of Agriculture (n.d.) *Food Price Outlook*. <https://www.ers.usda.gov/data-products/food-price-outlook/>

gaps of food security.

Older adults continue to demonstrate a very high need for food assistance, including free delivered meals and home delivered groceries, due to the continuing rising cost of food. One provider reported that in 2022-2023 the number of food bags distributed increased by 8.5% from 6,900 bags of food every month from July to Oct 2022 to 7,480 bags of food per month (Jan-March 2023).⁶⁴

They also reported that the demand for communal lunch has skyrocketed. From April 2021 to April 2022, they served 215 congregate lunches. From April 2022 to the beginning of April 2023, they served more than 12,197 congregate lunches. In addition, the distribution of grab and go meals increased 9% from 2022-2023.⁶⁵

Other providers report the same needs and trends.

Homeless Population

In January 2023, more than 72,000 people each night slept in New York City's main shelter system, the highest number since the city started keeping count forty years ago.⁶⁶ While this number includes the migrants, the crisis of unsheltered New Yorkers existed before the migrant crisis as evidenced by the increase in the number of New Yorkers currently living on the streets and subways [as shown by the 2022 Homeless Outreach Population Estimate (HOPE) Count].⁶⁷

The annual HOPE count survey conducted by New York City counted 4,042 people sleeping on the streets or in the subways on January 24, 2023—up from 3,439 in 2022. The previous year, the same report also showed an increase of about 1,000 people from the preceding year. Department of Social Services, attributed the rise partially to end of COVID-related interventions, such as the use of federally funded private rooms in commercial hotels, which led to a far lower count earlier in the pandemic.⁶⁸

Street Homeless Outreach

⁶⁷ NYC Department of Social Services. (2022). *HopeNYC: Homeless Outreach Population Estimate 2022 Results*. <https://www1.nyc.gov/assets/dhs/downloads/pdf/hope/hope-2022-results.pdf>

⁶⁸ Brand, David. (2021). *NYC Touts Drop in Street Homelessness, But Advocates Say Count Obscures Extent of Crisis*. <https://citylimits.org/2021/05/20/nyc-touts-drop-in-street-homelessness-but-advocates-say-count-obscures-extent-of-crisis/>

Manhattan Outreach Consortium (MOC) workers are the primary contacts for case management and outreach to those unhoused on the street in the effort to have them accept placements and services. Providing necessary tools for these workers are of primary importance:

- More outreach staff are needed—both to fill vacancies and handle the increase in clients and higher salaries to retain staff. Current caseload sizes are 30-40 clients while the ideal caseload would be 25 clients per worker.⁶⁹
- Translation resources are needed. Currently there are a few Spanish speaking staff and no Chinese speaking staff. Outreach to the homeless requires building trust and culturally sensitive communication. Phone translation does not provide this and often translators are not familiar with terms used.
- Outreach workers report an increase in fentanyl overdoses. Goddard staff has created a partnership with local harm reduction providers to include harm reduction outreach. A formalized, funded program is needed to have this coordinated outreach more frequently and throughout the District.
- Mental Health resources are lacking. There is anecdotally an increase in homeless people needing mental health services. Services must be provided with consistent follow up where the people are living—on the street. There are currently not enough outreach psychiatric health care services.⁷⁰

Shelters

CD 3 is home to 13 permanent shelters, among the highest in the city.⁵⁵ The perception of many people experiencing homelessness that the shelters are unsafe appears to contribute to the many homeless people refusing services unless there is a Safe Haven bed available in a community they are connected to.

In 2017-2018, the Coalition for the Homeless conducted a survey of individuals sleeping on the streets and subways. The majority of those interviewed on the streets had stayed in the DHS shelter system at some point and were unwilling to return to the shelter system because they feared for their safety and/or experienced difficulty following the rules and procedures. Additionally, two-thirds of those interviewed had mental health needs.⁷¹

Coalition for the Homeless' State of The Homeless 2023 report cites the following factors that contribute to an increase in shelter population⁷²:

⁶⁹ Manhattan Outreach Consortium report via e-mail, July 21st, 2023.

⁷⁰ Report by Goddard Outreach and Dr. Van Yu at the CB3 May 2023 Health, Seniors, & Human Services / Youth, Education, & Human Rights Committee meeting.

⁷¹ Coalition for the Homeless. (June 2023). *State of the Homeless 2023*.

<https://www.coalitionforthehomeless.org/wp-content/uploads/2023/06/StateoftheHomeless2023.pdf>

⁷² Ibid.

- Average length of time that families and single adults must spend in shelters is now longer than it has ever been;
- The number of homeless households provided with City rent vouchers to help them move from shelters into permanent housing reached its lowest level in five years;
- The number of homeless single adults placed into supportive housing was at the second-lowest level since 2004 (with only the previous year being marginally lower).

CB 3 has long advocated for more Safe Havens and supportive housing as well as more affordable housing as part of the solution to end homelessness. As noted in the 2022 State of the Homeless report, while the long-term retention rate for individuals referred to congregate shelters was only about 24 percent in the 19 months leading up to December 2021. The rate for those referred to Safe Havens was far higher, at roughly 63 percent. (Community issues sometimes arise around adult shelters.) Outdoor space and programming that engages the residents is necessary. Better security is also necessary for both the neighboring community members and the shelter residents.

Transportation, Public Safety and Environment

Accessibility and Safety

Accessibility is a CB 3 priority, especially with 6.4 percent of residents in the area reporting ambulatory difficulty.⁷³ There are several ways to address this issue in the district:

- Improved accessibility of bus stops, which is necessary for seniors and people with disabilities. Buses often do not pull up to the curb for accessibility.
- Observations by the CB office and community residents is that bus stops are being used as short-term parking, which render the stops inaccessible for those in wheelchairs and walkers. NYPD needs to enforce bus stop regulations and visible markings for bus stop/no parking area should be considered.

Pedestrian and Traffic Safety

There have been 717 total injuries and 1 fatality resulting from 602 crashes in CD 3 between June 2022 and June 2023. The density of injuries in CD 3 is high in comparison to other community districts in Manhattan and the rest of the City. The areas with the highest volume of

⁷³ U.S. Census Bureau. (2023). *Disability Characteristics, 2016-2021 American Community Survey 5-year estimates*.

<https://data.census.gov/table?q=United+States,+New+York,+NY+difficulty&t=Disability&tid=ACSST5Y2021.S1810>

crashes were located at:

- East Houston Street (between Avenue B and Bowery)
- Delancey Street (between Bowery and Clinton)
- Grand Street (between Bowery and Clinton)
- Third Ave (between East Houston and East 10th St)⁷⁴

Pedestrian safety improvements and traffic calming measures are needed on these key corridors and high priority intersections to reduce overall traffic crashes and ensure the safety of pedestrians on our most dangerous streets. Of the 717 injuries resulting from crashes, 186 of those injuries were to cyclists. This exemplifies the need for the creation of new protected bike lanes as well as the enhancement of current unprotected bike lanes to ensure safety of cyclists in CD 3. Increasing safer bicycle infrastructure as well as strategies to increase compliance with the rules of this infrastructure and roadways will help to create a safer environment for cyclists as well as pedestrians. Pedestrians sustained 185 injuries of the 717 total.⁷⁵ To increase pedestrian safety further, there is a need for more open spaces and safe pedestrian routes that could be created with city programs like pedestrian plazas.

Delivery and Curbside Management

Neighborhood Loading Zones were installed in the East Village, but the Lower East Side below Houston did not receive needed loading zones. We have seen constant problems, especially in the Essex Crossing area, that have not been addressed. Semi-large box stores such as Target and Trader Joes have 18- wheelers with deliveries that cannot fit into the loading areas. They block sidewalks and bike lanes, causing potentially dangerous situations. The areas on Canal Street between Allen and Essex and on Grand Street between Essex and the FDR are the highest priority areas needing a safety/loading plan.

Public Transportation

CD 3 is underserved by public transportation despite the fact that 93 percent of workers in the district do not use a car to commute to work.⁷⁶ Many residents are poorly served by the subway system, with 13 percent living more than ½ mile from the nearest subway stop.⁷⁷ Therefore:

- There is a need for more east/west bus service south of 8th Street. The ease of East/West

⁷⁴ ChekPeds. (2023). *NYC Crash Mapper*. <https://crashmapper.org>

⁷⁵ Ibid.

⁷⁶ U.S. Census Bureau. (2023). *Commuting Characteristics by Sex, 2021: ACS 5-year Estimates Subject Tables*. <https://data.census.gov/table?q=United+States&t=Commuting&g=795XX00US3603809&tid=ACSST5Y2021.S0801>.

⁷⁷ NYU Furman Center. (2023). *Lower East Side/Chinatown MN03*. <https://furmancenter.org/neighborhoods/view/lower-east-side-chinatown>.

travel has been diminished by the elimination of the Grand Street Bus in the early 1980's and by the limited number of M14A buses. Even though the Grand Street crosstown bus was eliminated over 40 years ago, there's still a dire need for a crosstown bus south of 8th Street.

- There is a need to take strong, creative measures in CD 3 to reduce traffic congestion, which contributes to a vicious cycle of reduced ridership and reduced service. The MTA/NYCT reduces service after ridership on a bus route drops below a certain threshold. Service cuts have a severely negative impact on vulnerable populations, including the elderly and disabled, who rely on public transportation.

Rodents

Community Board 3 Manhattan (CB 3) was one of the original three neighborhood rat-reduction areas launched in 2017. The neighborhood rat reduction program was on pause during the pandemic and was reactivated in January 2022. Overall, the District improved in 2023 when compared to 2022. From January to June 2019 there were 340 complaints compared to 419 complaints in the same time period in 2022. From January to June 2023, there were 326 complaints—this is a 22% decrease (93 fewer complaints) when compared to 2022.⁷⁸

NYCHA burrow counts in 2023 have significantly decreased across the 24 CB 3 developments by 28%.

In other public and private property, the failure rate for Active Rat Sign (ARS) has ranged from 10% to 18% but is now trending toward 10%. The average failure rate for active rat signs on compliance inspections from January to June 2023 is 44%, with a high of 48% (this is lower than the average failure rate of 2022, which was 49%).⁷⁹ In a June 2023 presentation to CB 3 regarding rodent mitigation, the City did not appear to have interagency coordination to mitigate the rat problems caused by outdoor dining sheds. With the establishment of Open Dining as a permanent program, it is critical for an interagency effort to mitigate rats.

Sanitation

From June 2022 through June 2023 there were 877 complaints regarding dirty conditions involving trash in CD 3.⁸⁰ There is a need to remedy this issue with programs like Clean Curbs which would bring more containerized trash to the district and help to keep garbage organized, off the curb, and out of the street.

⁷⁸ Dept of Health and Mental Hygiene, Director of Neighborhood Intervention Pest Control Services.

⁷⁹ Ibid.

⁸⁰ NYC Open Data. (2023). *311 Service Requests from 2010 to Present*. <https://data.cityofnewyork.us/Social-Services/311-Service-Requests-from-2010-to-Present/erm2-nwe9/data>

At this time there are no plans to install Clean Curbs in CD3. This should be a priority, especially without rodent problem and the current changes in garbage pickup.

Environment

Air pollution is a significant environmental threat to the health of CD 3 residents. The New York City Community Air Survey (NYCCAS) measurements of air pollutants in CD 3 were among the highest in NYC in 2018, which was the last reported survey.⁸¹

- Airborne particulate matter: CD 3 ranks 3rd of the 59 CDs for PM 2.5 (Fine Particulate Matter) and 7th for Nitrogen Dioxide. These pollutants are particularly harmful, worsening respiratory and cardiovascular disease, and causing hospital admissions and deaths. CD 3 has the highest number of Asthma Emergency Department visits for adults of the Lower Manhattan districts with 78.8 visits annually per 10,000 residents.⁸² (*See appendix for further discussion of health impacts.*)
- A key finding of their 2018 report is that some air pollutants (PM2.5, NO2, NO, and BC) are highest in areas of higher traffic density. CD3 has transportation infrastructure that the Williamsburg Bridge causes these conditions in CD 3, with vehicles heading to the bridge using residential streets surrounding Grand and Clinton St, and vehicles, especially trucks, crossing to the Holland Tunnel using Canal St. Traffic has high counts on all three bridges that run through the neighborhood (Brooklyn Br., Manhattan Br., & Williamsburg Br.) as well as FDR Drive, with over 250,000 and 135,000, respectively, annual average daily traffic counts.⁸³

Climate change is causing more weather events with extreme heat and stormwater. CD 3 is a high priority area for planting trees to reduce air temperature, according to the US Forest Service.⁸⁴ We are one of the warmest parts of the city with the most people and have the fourth highest air temperature planting index (heat stress index) among the 59 NYC community districts.⁸⁵ 84% of CD 3 is covered by impervious surfaces. A high rate of impervious surfaces impacts the local environment in causing the urban heat island effect, increasing stormwater runoff, flooding, and hindering mitigation of local air, water, noise, and light pollution (DEP Impervious Map). Increasing the District's tree canopy will help combat these negative effects by reducing peak temperatures in the summer and improving air quality by directly removing air

pollutants, including PM2.5, NOx, sulfur dioxide and ozone from the air. CD 3 currently has 21.1 percent tree cover, with a further 27.3 percent that is space where trees can be planted.⁸⁶ To improve the local environment in CD 3:

- Prioritize building blue and green roofs and street side green infrastructure to mitigate the negative effects of traffic, particulate material, runoff, flooding, urban heat, and noise and light pollution.
- Prioritize planting a variety of native plant species to enhance local biodiversity and resiliency, survivability and mitigations provided by local natural land cover and increase the tree canopy.

Noise is the number one complaint in CD 3 and is increasing in frequency. From June 2022 to July 2023 there were 62,372 total 311 noise complaints in CD 3. Most of these complaints are regarding residential noise (8,298 complaints) followed by street/sidewalk noise (5,419 complaints). There was an 11% increase (4,336 to 4,822) in complaints of commercial noise from the previous year.⁸⁷ There are resident requests for legislation to address residential noise. *(See appendix for further breakdown of 311 complaints and discussion of health impacts.)*

Public Safety

The serious crime rate, those crimes classified as major felony defined by the NYPD, in CD 3 was 21.4 serious crimes per 1,000 residents in 2022, compared to 14.2 serious crimes per 1,000 residents citywide.⁸⁸ Major felonies include murder, robbery, felony assault, burglary, grand larceny along with drug dealing.

Crime between January and July across precincts 5, 7, and 9 increased 45.8% from 2021 to 2022. In January through July 2022, Precinct 5 experienced a total of 635 crimes committed (410 in 2021), Precinct 7 a total of 816 crimes committed (569 in 2021), and Precinct 9 experienced a total of 1,116 crimes committed (803 in 2021). There was an increase of burglary, assault and grand larceny, across all three precincts. However, between June 2022 and June 2023, crime across Precincts 5, 7, and 9 fell 4.01%, from 2,167 to 2080.⁸⁹ *(See appendix for further 2023 YTD crime data.)*

There has been a significant increase in the number of complaints to the Community Board

regarding open drug use and crime. One of our parks, SDR, is known as the destination location in NYC to buy K2.⁹⁰ There are complaints from residents for some blocks and developments that are home to drug dealers as well residents seeking safe homes. We have seen gang violence result in murder and drug dealers murdered over land jurisdiction.⁹¹ Police have been contacted and have some short-term successes, but there does not appear to strategies and plans to bring safety in all areas of CD 3. This displays a need for more harm reduction resources in addition to resources with a proactive focus on the root causes of these issues.

Hate Crime

Hate Crimes in CB 3 are primarily Anti-Asian, Anti-Jewish, and Anti-Gay. During the COVID pandemic in CB 3, Anti-Asian crimes rose to 25 reported to NYPD from March 2021 to March 2022, then lowered to 3 the following year. Anti-Jewish reported crimes rose from 9 to 10 in the same years.

A report by the Asian American Bar Association of NY notes that hate crimes and incidents often go unreported because, for many victims, filing an official report can be time consuming, too personal, and burdensome. There may be language barriers, as well as fear of backlash from the community or retaliation from the perpetrator.⁹²

Nightlife and Licensing

The dining and nightlife environment in CD 3 has changed significantly since the COVID-19 shutdown that began in March 2020 and lasted through 2021. While CD 3 is a primarily residential district, it has one of the highest volumes of licensed eating and drinking businesses of any community district in the City.⁹³ The shutdown significantly affected many of the community's eating and drinking establishments, leaving many vacant storefronts. CD 3 is now seeing an increasing number of applications for both previously licensed and previously unlicensed locations. The community is also dealing with the continued effects of outdoor dining that revitalized the community after the shutdown but now has had unforeseen negative impacts as demonstrated by the increase in 311 noise complaints, rat indexing findings and complaints regarding garbage on the street. CD 3 has the highest number of commercial noise complaints in Manhattan (4,436 complaints) and the second highest in the City.⁹⁴ These issues were evident on a street walkthrough with CB 3, Department of Health, Department of Transportation, and the District 2 council office in 2022 to observe the conditions of the outdoor dining sheds, as well as the rat and garbage issues. The City is implementing rat mitigation efforts; however, there appears to be little of the coordination that is needed among the Department of Transportation, the Department of Health, the Department of Sanitation and the Director of Rodent Mitigation.

The yearly commercial noise complaints for CD 3 have significantly increased between pre-COVID years (FY 2019) and post-COVID regulation years (FY 2023). There was a 67 percent increase in NYPD commercial noise complaints. See chart below.

Commercial/Business Noise Complaints (311 Calls)⁹⁵						
	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	% Change (FY19 – FY23)
Noise – Commercial (loud music/talking)	3,007	2,087	2,756	4,336	4,436	+48%
Noise – Street Sidewalk (loud talking/music/party)	2,289	3,288	6,165	6,046	4,792	+109%
TOTAL	5,296	5,458	8,921	10,382	9,228	+74%

These conditions have highlighted the ongoing issues associated with allowing numerous licensed businesses within a small residential community. Complaints related to nightlife are

⁹³ New York State. (n.d.). *NYS Liquor Authority Mapping Project (LAMP)*. <https://lamp.sla.ny.gov/>.

⁹⁴ NYC Open Data. (2023). *New York City 311 Service Requests*. <https://data.cityofnewyork.us/Social-Services/311-Service-Requests-from-2010-to-Present/erm2-nwe9>

⁹⁵ NYC Open Data. (2023). *New York City 311 Service Requests*. <https://data.cityofnewyork.us/Social-Services/311-Service-Requests-from-2010-to-Present/erm2-nwe9>.

difficult to resolve because no single agency has sole jurisdiction over noisy crowds and loud music, traffic congestion and horn honking outside businesses. The SLA, which issues licenses and has jurisdiction over license compliance, has limited investigation and enforcement abilities and expects the NYPD to document and enforce noise and other quality of life problems caused by licensed businesses. Conditions resulting from the saturation of nightlife businesses are often not criminal and are not prioritized by police and the police do not have the resources to adequately address these conditions.

CD 3 needs coordinated and effective oversight, education and enforcement from City and State agencies to address the high volume of liquor licenses in primarily residential areas.

Open Restaurants

The City has made the open restaurant program permanent, however the rulemaking for the program is still to come. The former sidewalk café program no longer exists and sidewalk seating is regulated under the open restaurants program. Having community boards at the table as one of the stakeholders when drafting guidelines for open restaurants would address and prevent many of the problems we are currently experiencing.

CD 3 currently has 1,028 open restaurants, 740 serving alcohol. There are 539 businesses with both sidewalk and roadway seating that will most likely be under the new Open Restaurant program.⁹⁶

Parks/Recreation

Community District 3, like most community districts in New York City, is underserved in terms of open space, with less than the City-recommended 2.5 acres of open space per 1000 residents.⁹⁷

- Citywide the median open space ratio is 1.8 acres per 1,000 residents⁹⁸ – CD 3 is below that average at 0.7 acres per 1,000 residents.⁹⁹

⁹⁹ New Yorkers For Parks. (2021). *Manhattan Community District 3 Open Space Profile*.

- While 88 percent of residential units in CD 3 are located within ¼ mile of a park, not all parks are easily accessible or maintained at an acceptable level.¹⁰⁰
- Open space is not evenly distributed throughout the district, with the area west of Avenue A and Chinatown lacking adequate open space.
- With the closure of half of East River Park until 2026, other parks in CD 3 risk being inundated and over-used by people looking for alternative spaces.

Parks Buildings

There are numerous Parks Department buildings in the district that are underutilized. These spaces are either completely closed or are used as storehouses for borough wide Parks operations. Our local park houses should not bear this disproportionate burden for other neighborhoods, especially considering that the majority of CD 3 is in an environmental justice area.¹⁰¹ These buildings should be used as community facilities to meet the needs of the community as neighborhood safe anchors, especially in Sara Delano Roosevelt (SDR) Park.

These buildings should be renovated and reopened for community use. According to a 596 Acres Study, the following properties are underutilized in the district¹⁰²:

- **Sara D. Roosevelt Park**

The Stanton Street Park House (Manhattan Storehouse) in SDR Park was a community center until the 1970s and should be returned to community use (only the restrooms are open to the public). Two out of four Parks buildings in SDR Park are used for borough-wide Parks maintenance or communication centers (Hester Street, Broome). Public restrooms are closed in one park house and open only for limited, unsupervised, and sporadic hours in the three others. This inequitable distribution of resources does not allow CD 3 to meet its needs for community space, programming, and park safety, especially in this very densely used and troubled park straddling the Lower East Side and Chinatown. Parks has shared a plan to move the storage space and return the Stanton Street building for programming. This proposed use of this space will come to CB 3 for stakeholder input.

- **Allen Street Mall Public Restroom**

This facility has been unused for years; a proposal and ULURP action will come before CB 3 in Fiscal Year 25.

¹⁰² Living Lots NYC. (2016). *NYCommons Community District 3*.

https://livinglotsnyc.org/media/files/LESmap_7.27.16_FINAL.pdf

- **Allen Street Mall**
- **Seward Park "Park House" Building**
Bathrooms are open, space slated for temporary use by Lower East Side Ecology Center at the time of this writing as an East Side Coastal Resiliency project mitigation.
- **LaGuardia Houses Playground Building**
Demolished and converted to open turf area. However, this is a temporary conversion and Parks needs to commit to building a permanent community recreation facility.
- **Baruch Houses Bath House**
Currently closed, proposal to come to CB 3.

Recreational Use

The lack of park space is exacerbated by a lack of recreational sports fields for our local youth groups. While CB 3 does not seek to exclude outside groups from our parks, the Board had taken the following position:

- Priority access to recreational sports fields should be given to not-for-profit organizations serving the youth of CD 3 especially considering the *partial* closure of East River Park
- NYC Parks must revisit the policy of grandfathering sports field permits to certain organizations.

Rodents in Parks and Community Gardens

There has been an improvement overall in burrow count. In June 2022, the overall earthen burrow count was 207 across 32 parks. In June 2023, the overall count of park burrows was 194. This is a 6% decrease from 2022. The Community Garden failure rate is almost unchanged from last year. 18 gardens out of 36 total failed for earthen burrows (50% failed). The gardens with the highest burrow count in June 2023 were Children's Magical Garden, Le Petit Versailles Garden, and Sage's Garden.¹⁰³

- **Sara D. Roosevelt Park**
The burrow count decreased by 60% from 2022 to 2023. The six month average burrow count of SDR (January to June) decreased from 169 to 40 from 2022 to 2023.
- **Tompkins Square Park**
The burrow count increased by 147% from 2022 to 2023. The six-month average burrow count (January to June) increased from 34 to 43.

¹⁰³ Dept of Health and Mental Hygiene, Director of Neighborhood Intervention Pest Control Services.

- **Allen Malls**

The burrow count increased by 118% from 2022 to 2023. The six-month average burrow count of the Allen Malls (January to June) decreased from 34 to 23. However, there were 11 burrows on June 30th, 2022, and 24 burrows on June 12th, 2023.

Wireless Access

CD 3 residents would benefit greatly from free wireless access in all public parks, such as the networks currently available in Alfred E. Smith Playground, Tompkins Square Park, and Hamilton Fish Park, which allow all in the community to use their laptops and other devices in parks. 25% of CD 3 households do not have internet access and 44% have no home broadband adoption, compared to 14% and 24% respectively in Manhattan.¹⁰⁴ Proliferating wireless internet connection in the parks will help to supplement these households who do not have any or regular access to the internet.

Maintenance

Currently Parks, like other agencies, need to find ways to meet staffing and adequate maintenance needs. The following are continuing needs in CD 3:

- Adequate staffing of Parks mobile maintenance staff
- More frequent cleaning of playgrounds in parks, as well as standalone park playgrounds during the weekends and on summer weekdays, especially in all spray showers and water fountains, to maintain safety and sanitation
- Maintenance of new street trees and bioswales

Community Gardens

CD 3 has one of the highest concentrations of Greenthumb gardens in New York City and the densest distribution of gardens in the city.¹⁰⁵ It is essential that our community gardens are protected. Currently gardens can still be sold as they are not legally Parks property. CB 3 supports:

- The creation of a new Special Purpose “Community Garden District” that would offer a measure of protection, as would a new protected NYC zoning designation of

¹⁰⁴ NYC Open Data. (2022). *Internet Master Plan: Broadband Adoption and Infrastructure by Community District*. <https://data.cityofnewyork.us/City-Government/Internet-Master-Plan-Broadband-Adoption-and-Infras/rxpf-yca2/data>

¹⁰⁵ NYC Parks Green Thumb. (n.d.) *Green Thumb Garden Map*. <https://greenthumb.nycgovparks.org/gardensearch.php>

"Community Garden."

Since all community gardens have the same maintenance and resource needs as public parks, CB 3 requests that:

- All gardens under NYC Parks jurisdiction receive funding through Greenthumb and should be provided with adequate infrastructure, such as available water spigots, ongoing topsoil renewal, wrought iron fencing, and electricity/solar lighting where applicable. There should be installation of Bruckner Boxes in all parks that require them to ensure watering facilities are adequate to sustain greenery.

Keeping the gardens well-lit is a public safety need. The increase in illicit drug use, as reported by area gardeners, makes garden lighting especially relevant.

Bioswales and Indigenous Plantings

Bioswales are vegetated areas that are designed to collect and filter stormwater runoff. They can help to reduce flooding, improve water quality, and create habitat for wildlife and are essential for the health and well-being of our community. This, along with Indigenous plants that are well-adapted to our local climate, can help to improve biodiversity in CD 3. We need more bioswale installations throughout the district help to reduce flooding, improve water quality, and create habitat for wildlife. They are also essential for the health and well-being of our community especially considering the impact of the ESCR project. This, along with indigenous plants that are well-adapted to our local climate, will help to improve biodiversity in CD3.

Waterfront

Pier 42 has been partially funded, but the delayed project leaves the unfulfilled need to complete the critical missing link of public access along Lower Manhattan's East River shoreline. Although additional funding from the city has been provided as part of the East Side Coastal Resiliency mitigations, this is only for the construction of temporary fields and amenities. The full masterplan approved by CB 3 in 2013 would provide needed access to the waterfront at Pier 42 with passive recreation space, barriers to storm surges, marine habitat, and ecological education opportunities.

New York Public Libraries

CD 3 has five branches of the New York Public Library (NYPL) system: Chatham Square, Hamilton Fish, Ottendorfer, Seward Park, and Tompkins Square.

Manhattan Community Board 3, FY23¹⁰⁶		
Branch	Visits	Program Attendance
Chatham Square	133,175	18,252
Seward Park	158,003	27,136
Ottendorfer	87,211	17,848
Tompkins Square	84,797	16,608
Hamilton Fish Park	24,863	2,912
Totals	488,049	82,756

**In FY23 NYPL had 23,449,390 visits to its website.*

*** Program attendance numbers include both in person and virtual program attendance*

Every branch in CD 3 had an increase in visits and program attendance since FY22. There was a 20.4% increase in overall library visits (405,320 in FY22 to 488,049 in FY23) and a 40.6% increase in overall program attendance (58,855 in FY22 to 82,756 in FY23).¹⁰⁷

Youth in CD 3 were disproportionately impacted by the Covid-19 pandemic, widening gaps between high and low needs communities. NYPL is currently focused on youth and education with an emphasis on teens. In Fiscal Year 2024, NYPL looks to continue to build on youth programs and services, explore new programs that address the needs of older adults, and support ongoing efforts to connect asylum seekers to essential resources.

Arts and Cultural Affairs

Arts and cultural activities are an important means of preserving and exploring our exceptionally diverse community culture in Community District 3. Arts and cultural activities are also an

¹⁰⁶ New York Public Library. (2020). *NYPL Statistics for Fiscal Year 2022 in Community Board 3*.

¹⁰⁷ Ibid.

important economic engine for our district that has a large concentration of artists and arts and cultural organizations—large and small, professional and community-based, experimental and culturally specific.

Artists, cultural workers and arts and cultural organizations of all sizes were impacted to a devastating degree by COVID-19 in 2020. The performing arts sector was one of the hardest hit industries in NYC, putting cultural workers, including performing artists and administrators, in vulnerable positions.¹⁰⁸

Artists and cultural producers lost precipitous amounts of income and jobs since 2020—56 percent between February 2020 and July 2020. Fiscal year 2021 saw a slow recovery across the sector, and fiscal year 2022 saw a steady incline, with a total of 24,000 jobs added in the arts. However, the number remains well below pre-pandemic levels. The negative economic impact on the arts and cultural sector is anticipated to last months, if not years depending on sector specificities.¹⁰⁹ Performing arts industries have faced challenges in recovery, with an overall reduction in box office sales, and increased costs associated with living in NYC for artists, and theatrical production materials. These are challenges that pose long term risk to the sustainability of small- and large-scale performing arts organizations alike.¹¹⁰

City funding for small, vulnerable arts organizations is uncertain. The Department of Cultural Affairs (DCLA) primarily funds larger, well-known cultural institutions, with less funding typically awarded to small arts nonprofits located in CD 3. There is a need for equitable funding, support and resource opportunities for small local organizations in CD 3 that focus on the population most impacted by COVID-19, which are low-income people of color.¹¹¹

CB 3 has identified the following priority needs for Arts & Culture:

- In May 2021, NYC announced the Artists Corps program, which was created to assist with pandemic recovery and provided a \$25 million investment in grant funding for local artists across the City. This should become an ongoing program to meet the long-term needs of artists recovering from loss of income during the pandemic.¹¹²
- Independent artists and cultural producers, especially those in the performing arts continue to experience disruptions due to Covid and haven't been able to return to the income levels they had prior to March 2020, while now, many have accrued debt due to

Covid.¹¹³ DCLA hasn't received funds in FY23 or FY24 for a new edition of NYC Artist Corps 2.0. There is a need for the City to urgently fund other direct subsidies and easily accessible grants for impacted performing artists.

- Artists that attend CB 3 meetings report the need for more affordable and accessible workspaces for artists in the district.
- There is a continual need for more equitable funding for small and mid-sized cultural organizations, which are limited in their capacity to plan for the future because their funding is not baselined, unlike the Cultural Institutions Group (CIG). Black, Latinx, Asian, and Indigenous segments of the sector have never received appropriate funding; equitable funding is needed for their survival. CB 3's dozens of small cultural organizations, many of which are Black, Latinx, and Chinese-run, are not members of the CIG and do not have the same access to wealthy donors.¹¹⁴ These organizations also need better access to cross-sectoral and inter-agency partnerships, which was outlined as a priority in the 2017 DCLA Cultural Plan.¹¹⁵
- There is a need for CHARAS/El Bohio, a nonprofit community and cultural center that served as a much-needed axis for a local web of organizations, stakeholders and leaders to be restored. Continued support from the City is needed for future development that will return Charas to its status as a community and cultural hub.
- Arts programming in public spaces is particularly needed in CB 3 where 24 % of residents live below the poverty line and over 57% of households have incomes under \$60,000).¹¹⁶ Arts and culture associated with the new activation of open streets and public spaces is the only available programming available to large number of members of our community. This programming is provided by local artists and organizations, who need audiences in order to develop their works, practices, generate income, and exposure, particularly after the prolonged social and economic consequences of COVID19. Successful examples of programming that need to be expanded: weekly programming at Avenue B Open Streets and Fourth Streets Art Block and the ROAR festival in SDR park.
- There is a need for CHARAS/El Bohio, a nonprofit community and cultural center that served as a much-needed axis for a local web of community organizations, stakeholders and leaders to be restored. Continued support from the City is needed for future development that will restore Charas as a community and cultural hub of the community.

Landmarks

Community District 3 is rich in buildings of historic, cultural, and architectural significance. Compared to other areas of Manhattan, CD 3 is significantly under-designated, with only three historic districts and a modest number of individual landmarks.

In CD 3, emphasis also needs to be given to designation of buildings of historical and cultural significance, including buildings on the Bowery. In addition, meticulous regulation of the currently designated Landmarks and Historic Districts requires strict application of the law, including that against “demolition by neglect.” For example, 18 Bowery, The Edward Mooney House has not been maintained as required by Landmarks Law. This property was the first designation under the new Landmarks Law in 1966 and is the only known town house surviving in Manhattan that dates from the period of the American Revolution. Such an important landmark should not be allowed to deteriorate.
