

NEW YORK CITY HOUSING AUTHORITY FLOOD PROTECTION DEPLOYMENT

At this development there are several types of flood protection:

Deployable Flood Barriers	Self-Raising Flood Barriers (Raised by Flood Waters)	Building Wall Reinforcement & Water Sealing	Flood-Rated Doors
Permanent Concrete Barriers	Backwater (check) Valves	Flood Recovery Portable Sump Pumps & External Sump Pits for Flood Water Removal	Rescue Stairs

ATTN: NYCHA employees, contractors, vendors, utility companies and other service personnel:
DO NOT DRILL THROUGH, MODIFY, OBSTRUCT OR IMPEDE THE FLOOD PROTECTION SYSTEMS AT THIS LOCATION

The flood protections were installed as part of NYCHA's Superstorm Sandy Recovery & Resilience Program.

If a storm will potentially impact NYC, **communication** to residents will occur as early as five days prior to the event, with continuous updates during and after the storm.

Flood protection measures will be deployed following a **mandatory evacuation** issued by NYC officials for all residents.

Flood protection measures will be deployed. Final deployment will occur **24 hours** prior to the onset of storm impacts.

Electric, water, and elevator services, along with some **building exits**, will experience disruption during a significant flood or storm event.

If you see damage to any of the flood protection components, please email fpm@nycha.nyc.gov with details.
