2017 Family-Related Violence Snapshots: New York City Community Board Districts

Introduction

This is the fifth annual *Domestic Violence Snapshots: New York City Community Board Districts*, which provides snapshots of domestic violence incident and offense statistics for each community board district in the City. This report, specifically, is the first to focus on family-related violence in the City and is being published alongside a partner report, which covers intimate partner violence in the City. Together, family violence and intimate partner violence offenses comprise the total domestic violence offenses in New York City.

The domestic violence incident and offense data were obtained from the New York City Police Department (NYPD). Please note, intimate partner complaint and domestic incident report data are preliminary and subject to further revision by the NYPD. The snapshots include:

- 1) **Domestic Incident Reports:** The number and percentage of domestic violence incidents in each community board that were between non-intimate partner family members. Please note, for some domestic incident reports, the relationship categorization was missing so these reports are excluded from the number and percentage of family-related reports. The bar graph presents a comparison with the community boards in the borough with the highest and lowest frequencies of family-related domestic incident reports.
- 2) **Felony Assault Offenses:** The number and percentage of felony assault offenses in each community board that were between non-intimate partner family members. The bar graph presents a comparison with the community boards in the borough with the highest and lowest frequencies of family-related felony assault.
- 3) **Rape Offenses:** The number and percentage of rape offenses in each community board that were between non-intimate partner family members. The bar graph presents a comparison with the community boards in the borough with the highest and lowest frequencies of family-related rape.
