

APPLICATION FOR EXEMPTION FROM REQUIREMENT(S) OF LOCAL LAW 86 OF 2005

1. Provide contact names, telephone numbers, and email addresses for the budgeting agency and the managing agency. Note that the managing agency is the city agency managing construction, or, in the case where construction will be managed through a non-city entity that holds a funding, lease, or land acquisition agreement with a city agency, the managing agency is the city agency that manages such agreement for the release of funds from the city treasury to pay for the project.

2. If construction will be managed through a non-city entity that is party to one of the above referenced agreements with the managing agency, provide the name of the organization as well as a contact name, telephone number, and email.

3. Indicate the LL86 requirement(s) below for which a full or partial exemption is requested.

LEED® Rating Level:

- LEED® Certified
- LEED® Silver
- Check if seeking an exemption from requirement to submit project to USGBC for certification pursuant to Charter section 224.1 (k)

Energy Cost Reduction (for Project Subject to LEED® Rating Level Requirement):

- 20% reduction, with additional 5% if payback on energy efficiency measures does not exceed seven years
- 20% reduction, with additional 5 or 10% if payback on energy efficiency measures does not exceed seven years (use group G only)
- 25% reduction, with additional 5% if payback on energy efficiency measures does not exceed seven years

Energy Cost Reduction (for Project Subject to System Specific Provisions):

- 10% reduction for boiler work
- 10% reduction for lighting work
- 5% reduction for work on HVAC comfort controls

Potable Water Use Reduction:

- 20% reduction
- 30% reduction

4. Attach the documentation necessary to explain why full compliance with requirement(s) indicated above cannot be achieved and/or is not in the public interest. Also describe any measures that will be implemented that may compensate for the decrease in environmental performance that would occur as a result of granting the requested exemption. If partial compliance with requirement(s) indicated above is requested, explain and justify degree of partial compliance and estimate the construction cost difference between the baseline and the proposed partially compliant design as well as the cost difference between the baseline and a hypothetical fully compliant design, where the baseline is defined in accordance with the calculation methodology required in LL86.

5. Complete and submit design tab on the LL86 Reporting Form that is available from the Mayor's Office of Environmental Coordination.
