The U.S. Dollar is the currency used to express performance. Returns that are presented gross of management fees include trading expenses and the reinvestment of all income. Net-of-fees returns are calculated by deducting a model management fee of 12 basis points from the annual gross composite return. Actual returns may be higher or lower and will depend upon the agreed upon investment advisory fee schedule and other expenses that may be incurred in the management of the account. Performance returns of RhumbLine's Pooled Funds are net professional fees including custody and audit expenses. The collection of fees produces a compounding effect on the total rate of return, net of management fees. Actual investment advisory fees will vary. More information on RhumbLine's investment advisory fees is available upon request and described in Part 2A of RhumbLine's Form ADV.
