

Fourth Quarter 2022

City of New York – Stable Income Fund

The Stable Income Fund is managed to protect principal while providing the potential for higher rates of return than other conservative investments, such as money market funds. To achieve this, the Fund invests in instruments which are not expected to experience price fluctuation in most economic or interest rate environments. Examples of these assets include guaranteed investment contracts (GICs), bank investment contracts (BICs), and security backed contracts.
