

## ● Highlight ●

Earlier this year, two Department of Homeless Services locations—Street Homeless Solutions and the PATH Family Intake Center—hosted Vision Board Making sessions for their staff.

These events provided a creative and relaxing opportunity for employees to reflect on their goals and aspirations while engaging in a hands-on activity.

Staff members designed personal vision board collages, using images, words, and symbols to represent their hopes for the future—both personally and professionally.

***“I loved the vision board workshop. I was able to articulate my goals for the year in a creative context and that felt good.”***

## Envisioning Wellness

The process was not only fun and engaging, but also served as a meaningful form of stress relief and self-expression.
