## Citywide Savings Program Overview

The Citywide Savings Program is the result of a collaborative effort between OMB and City agencies to reexamine internal processes and policies, use resources efficiently, and re-estimate expenses. This publication is a compilation of savings initiatives implemented by all City agencies.

### Savings Classifications

Savings are classified by funding type. Some initiatives reduce the burden on City funded dollars, directly contributing to closing the “gap” between expenses and revenues. Other savings initiatives allow the City to borrow less by reducing the Capital budget and lowering debt service costs.

There are five broad categories of savings:

- **Efficiency** – Active changes to agency practices that improve the City’s finances without reducing service levels. This can be achieved by lowering spending, optimizing grant claiming, or increasing revenue collection. This includes hiring freeze savings and vacancy reductions.
- **Expense Re-estimate** – Savings associated with lower than expected spending due to a delay or lower than expected costs.
- **Revenue Re-estimate** – Revenue savings that did not require active agency efforts, either through grant claiming that results in a funding shift or an increase in City funds revenue.
- **Service Reduction** – Expense savings from scaling back programs, resulting in a decrease of services provided to the public.
- **Debt Service** – Savings associated with lower than expected cost of debt service expenditures.
