Tank Info:

Tank Number: NORTH #1
Tank Id: 41240
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

F05 - Pipe External Protection - Jacketed
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
K01 - Spill Prevention - Catch Basin
H00 - Tank Leak Detection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
J02 - Dispenser - Suction Dispenser
E12 - Piping Secondary Containment - Double-Walled (AG only)
L00 - Piping Leak Detection - None
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1981
Capacity Gallons: 15000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 61033
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 12/22/1949
Capacity Gallons: 1500
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 10/11/2016
Register: True
Modified By: DMPOKRZY
Last Modified: 04/14/2017

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B004
. Waste name: PCB articles containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs, excluding small capacitors. This includes oil-filled electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D008
. Waste name: LEAD

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Status: No violations found

FINDS:

Registry ID: 110004519806

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110055465928

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 14931
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
A01 - Tank Internal Protection - Epoxy Liner
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
E02 - Piping Secondary Containment - Vault (with Access)
C03 - Pipe Location - Aboveground/Underground Combination
F06 - Pipe External Protection - Wrapped
J02 - Dispenser - Suction Dispenser
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 9941
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
D00 - Pipe Type - No Piping
I04 - Overfill - Product Level Gauge (A/G)
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 1500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 01/08/2001
Register: True

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 2064
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
H00 - Tank Leak Detection - None
G03 - Tank Secondary Containment - Vault (w/o access)
I04 - Overfill - Product Level Gauge (A/G)
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None

Tank Location:

Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 12/01/1972
Capacity Gallons: 11000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The tank failed the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent. fill, suction and return separately and the tank itself. Plumber checked the lines and found the vent and fill are very old. 06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line. 6/13/14-

Riteway sent the report dated 6/13/14. On April 30, 2013 Riteway Maintenance Corp. was contracted to perform a tank cleaning for a fuel oil conversion. Part of the conversion requirement is performing a tank tightness test. Riteway proceeded to pump and clean the tank. The tank was left empty for the conversion. the tank was then tested. The tank tightness test failed with an ullage (dry) portion leak. Line were isolated and a tank only test was performed with passing results. The source of the leak was determined to have been a faulty fill line. The old fill line was excavated and removed. soil was field screened via PID during the excavation and there was no contamination found. A new fill line was installed up to the first available fitting inside. The area was then backfilled, compacted and re-cemented to grade. the site is clean and free from contamination Spill Closed. 6/13/154- David from Riteway sent the following email. The area was only excavated in order to remove the fill line, but no contamination was found"

Remarks: "6000G #6 Oil tank was empty and failed tank test."

Tank Info:

Tank Number: 001
Tank Id: 10877
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
I04 - Overfill - Product Level Gauge (A/G)
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 02/01/1979
Capacity Gallons: 5000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

I04 - Overfill - Product Level Gauge (A/G)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron

Tank Status: Closed Prior to Micro Conversion, 03/91

Pipe Model: Not reported

Install Date: 01/01/1988

Capacity Gallons: 1200

Tightness Test Method: NN

Date Test: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Info:

Tank Number: 2003
Tank Id: 228967
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
L99 - Piping Leak Detection - Other
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
E02 - Piping Secondary Containment - Vault (with Access)
G02 - Tank Secondary Containment - Vault (w/access)
H05 - Tank Leak Detection - In-Tank System (ATG)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: 02/23/2000
Capacity Gallons: 2000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, no movement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results. 2/28 @ 19:50 According to Conduit plate E 26 - I - 1, there is no sewer connection. Update 3-1-05 @ 06:07 Lab Sequence Number: 05-01745-001 - PCBs < 1 ppm Lab Sequence Number: 05-01747-001 - Analysis indicates the presence of a substance similar to a lubricating oil. Update: 3/1/05 @ 17:21 hrs. Manhattan Environmental Desk added manhole M50206 to the Description and Location fields in order to track the completion of the cleanup in this structure. This was discussed with ERT, Paul Walsh and he agreed with this change. In addition, the Responsible Operation was changed from Flush Operations to Underground South since they are responsible for the cleanup in the manhole. Based on the results of the sample analysis the oil in the manhole is the lubricating or hydraulic fluid spilled by the Vactor truck. The cleanup of the vehicle was completed but the cleanup of the manhole is pending scheduling of UG crews and Tanker or Vactor truck. Update 3-25-05 @ 05:25 A Munro # 13615 reports that the cleanup is complete as of 05:25. 2 bags of ppe. 650 gallons of oil and water mixed removed by tanker. Double washed with slix and flushed. Tag # 38687 removed. Source of spill was a vactor truck that was on location previously. Cleanup crew and supervisor are listed in the event involved person screen."

Remarks: "sprang leak on hydraulic hose. leak from vehicle recovered. manhole affected 60533"

Tank Info:

Tank Number: 001
Tank Id: 11983
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

J05 - Dispenser - On Site Heating System (Supply/Return)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
L09 - Piping Leak Detection - Exempt Suction Piping
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
G02 - Tank Secondary Containment - Vault (w/access)
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 03/21/1988
Capacity Gallons: 5000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: DAFRANCI

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 38401
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

C03 - Pipe Location - Aboveground/Underground Combination
F06 - Pipe External Protection - Wrapped
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
I04 - Overfill - Product Level Gauge (A/G)
K00 - Spill Prevention - None
H00 - Tank Leak Detection - None
F07 - Pipe External Protection - Retrofitted Sacrificial Anode
G01 - Tank Secondary Containment - Diking (Aboveground)
L00 - Piping Leak Detection - None
E01 - Piping Secondary Containment - Diking (AG only)
Aboveground - contact with soil.... Tank bottom rests on soil,
allowing no visual inspection.

Tank Location:

Tank Type: Steel/Carbon Steel/Iron

Tank Info:

Tank Number: 001
Tank Id: 14360
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
C01 - Pipe Location - Aboveground

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Material Name: #2 fuel oil (on-site consumption)

Tank Number: 1
Tank Id: 213683
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
G01 - Tank Secondary Containment - Diking (Aboveground)
L00 - Piping Leak Detection - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 02/06/1997
Capacity Gallons: 5000

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 272824

Equipment Records:

K01 - Spill Prevention - Catch Basin
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
E12 - Piping Secondary Containment - Double-Walled (AG only)
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
C01 - Pipe Location - Aboveground
J07 - Dispenser - Loading Rack/Transfer Pump
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 001
Tank Id: 35194
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

I02 - Overfill - High Level Alarm
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
F01 - Pipe External Protection - Painted/Asphalt Coating
G99 - Tank Secondary Containment - Other
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
H05 - Tank Leak Detection - In-Tank System (ATG)
D02 - Pipe Type - Galvanized Steel

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 12/01/1965
Capacity Gallons: 550
Tightness Test Method: NN

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

Site

Database(s)

EDR ID Number
EPA ID Number

AMPEX CASTING CORP (Continued)

1001229260

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/31/05 MT// spill # 05-00615 closed and referred to this spill number// Large scale project found a few old tanks along perimeter of excavation, GCI has full time geologist field screening as excavation continues. Will submit report once the excavation has been completed. 08/07/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to Jim Grond (212)986-9460 he said that he did not take the soil sample because there is bed rock from the surface 40ft. He will fax me the document on August 8,2006 for closing the spill. -QA 10/26/06: Called Mr. James Bellessimo (800)282-8701 (Tradewinds Environmental Restoration, Inc. and left message to call me back regarding information of the spill. -QA 11/16/06: Called Mr. Jim Grond regarding information of spill and left message to call me back. Also called Mr. Frank Golden, left message to call me back. -QA 11/27/06: Called Mr. Jim Grond at (212)986-9460 regarding supporting documents to close the spill he said he will fax the report tomorrow. -QA 03/19/07: Called Mr. Jim Grond, he was not there. left message to call me back. -QA 03/20/07: Reviewed report of construction site (1 Bryant Park) dated March 29, 2006 received on November 28, 2006. Also talked to Mr. Jim Grond (Consultant) GCI Environmental, Advisory he also mentioned that he hired as a subcontractor to Mr. Frank Galdun, Project Manager Geologist for this work. They excavated the area up to 70 ft. They encountered the bedrock at 30 ft. Mr. Grond also reported that 215,000 tons of soil have been excavated. Soil samples are cleaned. So on the basis of information provided by Mr. Grond and the reference of the Spill # 0312591 (Closed by Mr. Richard Rutland) I closed this spill. -QA"
Remarks:	"Leaking underground storage tank. Has not been cleaned up. SPill is associated with another spill #0212591 or #0312591. Michelle Tipple is covering this. Tank was discovered during excavation and Trade winds environmental responded to scene for purposes of emptying oil from tank. DSUrin this time Trade winds found one or more holes in the tank and the spill occurred at an unknown date. Michelle Tipple will be at site tomorrow. Soils at site are all being screened with a

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110023024001

Click Here:

Environmental Interest/Information System:

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 244114
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was HINTON/SANGESLAND 9/18/2001 Sangesland spoke to Jim Simori (212-867-2120) He has a contractor who completed a Closure Report for the spill and he wanted to know what the correct process was to close the spill out. Sangesland told him to submit the report, color photos of the clean site along with a coverletter requesting that the spill be closed out. Overfill onto basement floor and vent line to sidewalk. 10/26/2001 - Spill was reviewed and closed out by Michael Hinton (DEC region #9) while he spent 1 week in NYC helping after WTC incident. According to a copy of a work report prepared by Eastmond & Sons Boiler Repair Inc., on 1/4/01 Eastmond was called to the site by Stuyvesant Fuel. Tank had been overfilled. 30 to 40 gallons spilled on the sidewalk. Speedie Dry was laid on the sidewalk and then it was pressure washed. Water/oil was vaccumed up. Eastmond provided a waste manifest for everything removed. Eastmond also provided color photos of the sidewalk and basement to confirm the cleanup. "

Remarks: "SUPERINTENDANT GAVE INACCURATE READING TO DRIVER. SUPER CLAIMED TANK WAS EMPTY AND TANK WAS NOT. EASTMAN ENROUTE TO CLEAN UP SPILL. PHOTOS AND CLEAN-UP REPORT SUBMITTED - SPILL CLEANED AND CLOSED - R. AUSTIN"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

properties affected. The source and cause of the spill are unknown. There was no fire or smoke involved. There were no injuries related to the spill. There was no evidence of release to sewer or waterways as per Mr Roman. Weather conditions did not contribute to the hazard of the spill. There is oil filled equipment in the structure the transformer. There is standing water but no visual movement. A sewer connection, concrete sump and any substantial cracks could not be verified. No sump pump running. Spill tag # 17465 was installed Two liquid samples were taken one for OIL ID and one for PCB on a priority E basis. Chain of Custody # BB06626 was used. Account # 80484 is also used. Cleanup pending lab results and will try to get an over 50 tanker as soon as possible so I & A can see if there is a leak on the unit or it is cooking oil. This incident meets the criteria of a 24 Hr spill. Note: There is a scaffolding over the vault. No parking anytime. Logger: N Muldoon #18723 Update 9-23-03 @ 18:25 S Brenseke # 05729 reports that a partial cleanup is complete , final cleanup is pending transformer removal. 250 gallons of oil and water mixed removed. Speedy dry applied , drain is clogged. Transformer is leaking from the fin and S Brenseke #05729 stated that he will request the transformer ooe-2. Cleanup crew and supervisor are listed in the event involved person screen. Incident is being re-classified from a 24 hour deminimis spill to a spill dielectric transformer. J Moran #01182 Lab Sequence Number: 03-07877-001 Analysis indicates the presence of a substance similar to a dielectric fluid. Lab Sequence Number: 03-07876-001 TOTAL PCB 17 ppm Update: Clean up complete as of 05/04/04 @ 05:00 hrs Reports V.Mirance 58484 O.S., and that flush truck removed approx. 55 gallons of mud,oil & water mix. V4638 was washed twice with slix,no barrels used,tag 17465 pulled. Old unit removed and was the source of the spill & new unit installed"

Remarks: "transformer oil and water mixed - total 250 gals - unk how much of each involved - removed 150465"

Tank Info:

Tank Number: 001
Tank Id: 12599
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
L99 - Piping Leak Detection - Other
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J05 - Dispenser - On Site Heating System (Supply/Return)
G01 - Tank Secondary Containment - Diking (Aboveground)
I05 - Overfill - Vent Whistle
F00 - Pipe External Protection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1955
Capacity Gallons: 6000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Tank Info:

Tank Number: 001
Tank Id: 19940
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
I02 - Overfill - High Level Alarm
C01 - Pipe Location - Aboveground
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
D00 - Pipe Type - No Piping
J03 - Dispenser - Gravity
L00 - Piping Leak Detection - None
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 07/01/1979
Capacity Gallons: 5000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Tank Info:

Tank Number: 001
Tank Id: 249649

Equipment Records:

E12 - Piping Secondary Containment - Double-Walled (AG only)
F06 - Pipe External Protection - Wrapped
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
C01 - Pipe Location - Aboveground
J01 - Dispenser - Pressurized Dispenser
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 03/01/2012
Capacity Gallons: 1500

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "02/08/06. Feroze, PBS case is #2-603524. TTF letter is sent to. Albert Rosenberg Rose & Berg Realty. 131 west 35th Street, 7th Floor New York, NY 10001. 03/07/06 Feroze. Called Mr. Albert (212-981-6501), he informed that Eastman & sons 718-378-3000 is going to replace the fill line. They will test the tank after the replace work is done and will submit the documents to DEC soon. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 03/29/06-Hiralkumar Patel. Spoke with Ms. Diania at Petroleum and she told me that petroleum tank did isolation test on Feb. 17 and found problems with fill line and vent line. they haven't done anything after that. REceived copy of tank test results from Alber Rosenberg from Rosenberg Realty, who is managing property. test results shows the system passed in test. Eastmond has replaced fill pipe and vent line. Spoke with Mr. Rosenberg and asked him to send me copy of previous tank test results. Spoke with Issac at Eastmond and he told me that the fill line was leaking at flange as it was passing through solid concrete into the building. eastmond has replaced the fill line from this flange to curb and also replacecd the vent line. as per Isaac it was very little leak and there was no cotaminated soil. all cleaned up. no further action required. 03/31/06-Hiralkumar Patel. REceived clear copies of work invoices from Albert. based on available information from owner and from Isaac from EAstmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond. Albert Rosenberg Ph. (212) 981-6517 FAX (212) 465-8122"

(516-375-5890) who originally called in spill due to a tank test failure. I inquired as to whether Crown Leak did follow up testing. Crown Leak never returned to re-test. He gave me the # for ABC Tank who tested tank after Crown Leak 01/05/2006 - Haggerty - spoke with Robert from ABC Tank (718-272-2800), ABC was hired simply for a second opinion which again failed. 01/06/2006 - Haggerty - Tom Valentine from Albert Rosenberg's office called to tell me no retesting and no clean-up was ever performed. He will call (Sally Dewes) back when they contract an environmental company previously assigned to M. Haggerty in Albany office. 10/11/06 - Austin - Reassigned from Central Office staff to Piper, for follow up and closure - end 10/17/06- DEC Piper left message at Rosenberg realty requesting callback. Refer to legal if no response. DEC Piper received call from Rosenberg. As per him there was a second spill # at the property Sp# 0512893. It was also a tank test failure. Notes from DEC Patel 03/31/06-Hiralkumar Patel. Received clear copies of work invoices from Albert. based on available information from owner and from Isaac from Eastmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond. In light of this info, this spill is also closed. "

DEC Memo: " 04/25/95: CALLED HOWARD GREENBERG ON 04/25/95 TO FIND OUT IF ANY ACTION HAS BEEN TAKEN. HE WAS NOT AVAILABLE WILL CALL BACK. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK TAKING ON WATER. ON JULY 8, 1996, Spoke to Carl Westerman, Properties & Facilities - Budget Rent-A -Car (708)955-7203 There are two 4,000 gallon UST gasoline in service at the facility. Tanks were steel installed in 1985. Tanks were laid into a bedrock foundation and had apoured concrete incasement. The problem involved one of the tanks. One tank began taking on water (12) over a rainy event. Upon cleaning and inspecting the tank they found a hole in the bottom of the tank the size of a quarter. The tank was repaired with a steel plate and was fiberglass coated. The piping systems were repalced with fiberglass due to potential corrosion problems. The tanks were then cathodically protected by upgrading, and a leak detection system was added. According to Mr. Westerman, there was no loss of product from the system, and the only source of problems was water entering the tank. There have apparenetly been no other indications of further leakage, or seepage into adjoining buildings. Mr. Westerman has photographs of the tank installation and documentaion on the cleanup which indicated that no product migrated back into the tank when it was emptied. See also Spill #9408906. On May 22, 2002, DEC Sigona received a call from Eric Meyn, Project Manager, American Environmental Assesment Corp, 188 LOnG Island Avenue, Wyandanch, N.Y. 11798 (631)586-2000 called to request the abandon the tanks in-place. They have not filed an application to abandon the tanks in-place. Eric Meyn was not aware that there is a spill history or additional spill reports which have been reported. DEC Sigona requested a complete site investigation plan along with documentation on previous remedial actions to be forwarded to DEC Sigona for review. DEC Sigona will consult with DEC Tipple regarding See Spill Nos. 9914694 and 9408906. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 3/28/05 - spill closed, refer to spill # 9914694 for additional info. - KST "

further action. The site owner Budget Rent A Car (contact Michael Feeley @ 973-496-3467). Case reassigned to BURB (Lauren MacDonald @ (518)402 - 9768.) DURNIN, 5/1/2006: October 2005:TRC was hired by Budget Rent-A-Car to address Spill No. 9914694. November 16, 2005:TRC Tank Closure Plan Submitted to NYSDEC. December 1, 2005:NYSDEC Approval of Tank Closure Plan. December 6, 2005:Tanks closed in-place, piping removed. January 20, 2006:TRC ordering well socks for remediation of groundwater. January 25, 2006:TRC schedules ORC socks to be installed in a few weeks. March 20, 2006:The ORC socks were installed in the monitoring wells around the abandoned tanks. As per approved Work Plan, the ORC socks will be checked September 2006. August 23, 2006:TRC was emailed a request to schedule the 6 month replacement of ORC socks and the groundwater sampling event. September 5, 2006:The NYSDEC Project Manager visited the site and witnessed the removal and condition of the ORC socks from the 5 monitoring wells. MW-3 sock was the only discolored ORC sock. September 19, 2006:Groundwater samples were collected. October 19, 2006:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. November 10, 2006: TRC proposed to conduct another round of ORC applications. November 13, 2006:NYSDEC approved the Letter Report and the next round of ORC applications. November 14, 2006:The ORC socks were installed by TRC. The socks are to be in until May 2007. May 23, 2007:The Project Manager visited the site. The socks were removed and inspected. May 30, 2007:Groundwater samples were collected. July 16, 2007:TRC submitted the Letter Report on the results of the ORC application for the past 6 months and proposed to conduct another round of ORC applications. July 20, 2007:NYSDEC approved the Letter Report and the next round of ORC applications. September 5, 2007:The next round of socks were installed. The socks will be removed after 6 months (March 2008) and the groundwater will be sampled. March 2008:The socks were removed. April 11, 2008:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. TRC proposes to conduct two more 6-month rounds of ORC applications. May 9, 2008: NYSDEC approved the Letter Report and two 6-month rounds of ORC applications. June 16, 2008:TRC installed ORC socks in monitoring wells MW-2, MW-3 and MW-5. December 18, 2008:The ORC socks were removed. The DEC Project Manager was on-site for the removal event. February 24, 2009:The Letter Report was received and reviewed. March 5, 2009:NYSDEC approved the proposed plan to continue using ORC socks for the next 12 months. March 2009:The next round of ORC socks installed in wells MW-2, MW-3 and MW-5. August 31, 2009:TRC FOILs NYSDEC September 30, 2009:The ORC socks were removed. December 2009:TRC provides the results of the latest groundwater sampling. January 2010:TRC will submit an Exposure Assessment based on a DEC approved outline with the recommendation to close the spill. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. April 2010:NYSDEC reviews the Report. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. March 2010:NYSDEC reviewed The Letter Report. April 20, 2010:NYSDEC approved the Letter Report (no further action). A well commissioning work Plan is required. April 21, 2010:The Spill files are prepared for edoc filing June 23, 2010, J. Durnin: PM is waiting for TRC to submit a well decommissioning plan. July 14, 2010, J. Durnin: TRC submitted the Groundwater Monitoring Well Decommissioning Plan on July 13, 2010. The Plan was reviewed and approved on July 14, 2010. Well decommissioning is scheduled for the

DEC Memo: "06/07/19 - Lakhani Approved Oil integrity tested a 4000 gallon #2

F.O. square tank wrapped in cement located in the basement of the commercial property. A leak was detected on the dry side of the tank. Approved removed the product from the tank and is set to remove it. No contamination has been found yet. The basement floor is cement. The property is currently running of gas. 6/18/19-Zhune spoke to Eric Stuphem. Eric said they are going to remove the tank and collect soil samples under the tank. They will either remove the lines or test them. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
 DER Facility ID: 27874
 DEC Memo: "12/13/05 - Raphael Ketani. Spoke to Vinny Lovari of Island Tank. He said his crew is squeegeeing the floor, vacuuming the oil out of the tank, and found a hole in the tank. He said there are cracks in the floor and about 300 gals. spilled. I spoke to Nick who is managing the renovation of the closed hotel. He said that the owner is David Adelipour, O&O Properties, 120 West 44 Street, NY, 10036. Need to send new spill contaminated soil letter. 12/21/05. CSL has been send to: Pete Avison Integrated Services 245 5th Avenue, Suite 2102 New York, NY 10016 YK. J.Krimgold spoke to Vinny (Island Pump & Tank) @ 718-967-9424. He stated that in the process of switching from #6 to #2 oil the tank was cleaned and 3000 gal was delivered the day before. They pumped out 1100 gal from tank and recovered about 100 gal from floor. He thinks that 1800 gal have been lost. He will install a soil boring to determine the vertical and lateral spill extent. 12/28/05. Levent Eskicakit of Nova Env. Serv. 347-556-7787 called and stated that they are a consultant hired by the owner to work on this case. I suggest him to obtain our CSL letter form the RP. 08/08/2006. J.Krimgold reviewed the Remedial Action Report submitted by SAI Envir Consult. dated July 28, 2006. Based on the reportleaking 5000 gal AST was removed together with 35 cu yards of contamoned soil. During excavation bedrock was exposed on the east and west sidewalls as well as the bottom of the excavation. Following excavation no evidence of pertol contamination was found. NFA letter."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 2/26/2002 - Aprox 60 gal of gasoline was pushed out the top of a tank during a delivery. Delivery port is on the sidewalk, but the overfill spill occurred inside the building basement. Site has 6 - 550 gal steel tanks installed under the basement garage floor. Gasoline came up through the stick Dip Ports on 2 of the tanks. This gasoline flowed into a puddle on the garage floor, moved

U003390357

approx 30 ft into a floor drain. This floor drain system eventually deposited into a 2ft x 2ft drain Trap in the car wash room. Contactor says they don't believe the gasoline went any further. Fire Dept on scene, area was vacuumed and drysol cleaned. Basement area was closed off from use. Concern is gasoline vapors. on 2/26, Contractor vacuumed out sump, flushed all drain lines and vacuumed out again. Hertz called Cura Emergency Services (Matt Dupont - 972-488-2222 ext 233) Cura Emergency hired Castleton Environmental (Bill Jacobson - 973-652-7752) to handle cleanup. 2/27/2002 Sangesland met NYFD Rep. Mike Reardon (718-999-2493) at the site and inspected the whole system. Hertz Branch Manager - Maxine Lawson-Adams 212-486-5060 Hertz Regional Environmental Rep: Jim Weingardner 201-307-2421 Apparently today the clean up is being organized by Tom Moritz of HMHTTC 908-558-0156 (cell 201-602-0306) Sangesland noted that the 6 tanks were installed in 1963, had been upgraded in 1998, but the Cathodic Protection system does not seem to have been operating. NYFD is requiring the tanks to be tested (last tested by Tanknology in Dec 2001 -Kenneth Gelor - 800-964-7311) -copy of this report is in the file. Apparently the leak detection (Veeder-Root) system was located in a back room where is was not normally visible. Sangesland spoke to Matt Dupont again from Cura Emergency. Cura will be providing the close out report documentation for this project. DEC requested: 1) Detail & Photos of spill cleanup (drains/sump pit) and soil samples where appropriate (8270/8021) 2) Discussion on changes to poor practices (not dipping a tank before filling, leaving the dip stick caps open on the tanks) 3)Fix/Test mechanical systems(overflow alarm/cathodic protection) Move alarms into an area where they can be seen/heard 4)Tank test results (tank was tested in Dec 2001, but may have been damaged during this event) 4)Plan to remediate any soil contamination around and under the buried tanks. (This is probably the major portion of the work.) 2/28/2002 - Matt Dupont requested written guidance, so Sangesland faxed/e-mailed a copy of this report with the notes listed above. Sangesland will be out of the office from March 3 thru March 19. Any questions during that time should be directed to DEC Spills Rep. Tim DeMeo (718-482-4634) - Remember to state the spill number (0111214). 3/21/2002 - Sangesland received a copy of an Incident Report from Matt Dupont at Cura Emergency Services. The report outlines all of the basic facts listed above. One new item is the fact that Cura and it's subcontractor tried to dig out the contaminated soil near the buried tanks and were not able to get very much out because of underground piping and potential tank damage. The report does say that Cura will propose some method of addressing the contaminated soil issue. 7/1/2002 - Sangesland received a report from Cura titled Corrective Action Final Report . It once again repeats the information provided earlier, but does not address the size or scope of the problem in the soil around the tanks. This letter does request closure, but the DEC still requires information on the contamination around the tanks. 7/8/2002 - Sangesland called Cura to find that Matt Dupont no longer works there. The project will be reassigned and someone from Cura should call back within the next few days to get more details about what additional work the DEC needs. 7/8/2002 - Ted from Cura called back to say the contact for future work at this site will be: Sue Pinera 201-307-2547 at Hertz. 7/9/2002 - Roland Costanzo of Hertz (673-465-6942) called to say that Dave Winslow of ATC had been hired to conduct an investigation of the soil around the buried tanks and would be forwarding a report on that subject to the DEC later this

U003390357

week. 7/10/2002 - Sangesland reviewed a report submitted by Dave Winslow of ATC Associates (212-353-8280). The report shows that four GeoProbe soil borings were taken on May 9, 2002 within 2 to 3 feet of the subject petroleum tanks. Borings were advanced to a depth of 16 ft (10 ft below the bottom of the tanks). All soil samples came back Non Detect for VOC's and SVOC's. No water samples were taken because of the inability to get a larger drill rig in the garage space. DEC is satisfied with the investigation and the results. Spill Closed. "

DER Facility ID: 301699
DEC Memo: "Petroleum Tank Cleaners was called to the site to conduct a tank test. On arrival, the PTC Rep saw drysol on the floor with fresh oil leaking from the tank. No test was done, it was clear that the tank was leaking. PTC was hired by Lawrence Environmental (718-237-5125) TTF Letter was sent to: Stonehenge Mgt LLC James Bush -Director Building Operations Ritz Plaza 235 West 48th st New York, NY 10036 Phone 212 977 5000 jbush@stonehengeny.com 11/21/2005 A fax submittal was made by Lawrence Environmental Group ((718) 237-5125) on behalf of the property owner. The fax was sent to Steve Sangesland, but was forwarded on to Raphael Ketani, the case manager on this site. 11/21/05 - Raphael Ketani. I received a FAX from Lawrence Environmental Group, LLC, regarding the site. The letter was dated 11/18/05 and stated that the manhole cover on the empty tank was replaced and that the tank and lines passed the pressure test. The letter also said that COMCO (the remediation company) could not conduct its work until the asbestos removal project in the boiler room was finished. Lawrence Environmental is waiting for an NYCDEP variance approval before it starts the investigation/cleanup work. 12/21/05 - Raphael Ketani. I spoke to Peter Ellams, General Manager of Lawrence Environmental, regarding progress on the spill cleanup. He said that they got the variance for the asbestos from DEP and began the cleanup. He said a cleanup company, IER, cleaned out the #6 oil tank (about 3,000 gal. tank) and cleaned up the oil contaminated material on the tank room floor. The work ended last week. He said he will get me the cleanup report soon. 1/3/06 - Raphael Ketani. I talked to Mr. Ellams and asked him when I would receive the cleanup report. He said that the transit strike messed things up and they are still cleaning the site. I was told I will get the report within a week. 6/20/06 - Raphael Ketani. I received a package of documentation regarding the removal of the 1500 gal. tank and the cleaning, testing and putting back into service of the 6000 gal. tank. Everything looked alright, except PBS case #2-601407 doesn't show the existence and then removal of the 1500 gal. tank. I called up Mr. Ellams of Lawrence Environmental Group, LLC (718) 237-5125 and told him to submit a revised PBS application as this was the last item I needed to close the case. He said he would. 7/20/06 - Raphael Ketani. I talked to Mr. Ellams. He said he sent the owner the PBS application to sign. I told him I hadn't received anything. He said he would look into the matter and get me the form. 8/11/06 - Raphael Ketani. I contacted Mr. Ellams regarding the revised PBS registration form. He said he thought this had been sent out some weeks ago. I told him I hadn't received it. He said he will get on it. 8/30/06 - Raphael Ketani. I tried to contact Mr. Ellams regarding the unregistered and

removed 1500 gal. tank (I checked the PBS today), but could only leave a message. 9/8/06 - Raphael Ketani. Nick Lombardo of the PBS Unit brought me a copy of the revised PBS registration form and indicated via a Post-It that he is processing the change. Based upon receipt of the revised PBS registration form, the 11/18/05 letter from Lawrence Environmental Group stating that the tank passed after the repairs, and the package of documentation received on 6/20/06, I am closing the spill case. "

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was GOERTZ/TIPPLE/VOUGHT 10/3/01: On this date, K.Goertz inspected the site. Goertz met with the super; Dave Pilchuk, who described what had happended, what was done, and what was going to be done. The oil which leaked from the tank, spilled onto the concrete floor, but this floor contained several drains which led to a sump pit which discharges to the sewer. Fortunately, there has been no precipitation over the last few days, so the sump pump did not discharge any oil to the sewer. The sump pump has been deactivated until the cleanup has

reched its conclusion. Emteque was hired to supervise the cleanup. John Raguso (212-631-9000) arrived on site immediately after Goertz's inspection. They will continue to vacuum up remaining oil in the sump, and steam clean impacted areas. Mr.Raguso will take pictures at various staged of the cleanup and will forward a report to M. Tipple at the conclusion of the remediation. As of today, there does not seem to be any environmental impact as a result of this spill. (KG) 10/5/01: K.Goertz phoned John Reguso. He said cleanup is complete, and the basement looks better than it did before the spill occurred. He has taken several photos and will be sending a report to Michelle Tibble next week. (KG) 01/21/2002-VOUGHT-Received report from Emteque on 11/9/02. Eastmond & Sons did cleanup via vacuum truck by removing 100 gallons of product from the sump pit and 1000 gallons from the containment room floor and tank room. Room cleaned via degreaser. 11,000 gallon AST rusted beyond repair and was replaced with 7500 gallon AST. PBS application received 1/6/2002. Spill closed 1/21/2002."

Remarks: "caller notified of spill in basment from leak in tank. caller is supervising cleanup."

observations during the site visit this morning, informed him that the department requires subsurface investigation in tank room and investigation along portion of former fill line which is abandoned under the sidewalk. also asked him to disconnect sump pump to prevent discharge of oily water into city sewer system. 02/25/14-Hiralkumar Patel. 10:32 AM:- sent letter to Mr. Pantelic requiring weekly monitoring/product removal from tank room sump pit, investigation along abandoned remote fill line and delineation of contaminated noted in tank room. asked him to submit monthly record for sump pit monitoring/product recovery and investigation report by the end of 05/23/14. letter emailed to Mr. Pantelic. 05/23/14-Hiralkumar Patel. met with Alison Jacobs, property owner's attorney who came to office. she requested an unspecified time extension for submission of documents listed in letter dated 02/25/14. she mentioned that Riteway conducted cleanup and they are waiting for report. she was unaware of work conducted by Riteway. 10:30 AM:- spoke with Rob at Riteway regarding work done by Riteway at the site. he mentioned that they only did cleanup of spilled material in tank vault, from the fill line. he also confirmed that they have not done any investigation or sump monitoring as listed in letter dated 02/25/14. spoke with Ms. Jacobs and informed her about discussion with Riteway. informed her that prior to approving any time extension, the department requires update on required work. Alison Jacobs, Esq. **property owner's attorney** Cohen Hochman & Allen Ph. (212) 566-7081 Fax (212) 566-7406 email: aparker@violationlawyers.com 11:04 AM:- left message for Mr. Pantelic. 1:33 PM:- received call from Rob and Mr. Pantelic. Mr. Pantelic mentioned that the spill cleanup was completed by Riteway. informed him about discussion with Rob earlier today. asked him to refer to letter dated 02/25/14 for required investigation/remediation. 3:17 PM:- received email from Mr. Pantelic including copy of invoices and work proposal from contractors. Mr. Pantelic mentioned that building super was monitoring the water pit with absorbent pads, every tuesday. he also mentioned that no petroleum product was noted in pit during monitoring. he has contracted Riteway for required subsurface investigation. 05/27/14-Hiralkumar Patel. 11:54 AM:- sent email to Mr. Pantelic. asked him to submit spill cleanup report, instead of copy of invoices and work proposal from contractors. email copied to Rob and law firm representing property owner. 05/28/14-Hiralkumar Patel. 9:20 AM:- received email from Mr. Pantelic. he has hired Riteway to prepare and implement the necessary work and reports. 3:38 PM:- received call from Rob. he is working on report for fill line spill and will visit site tomorrow to start required investigation/monitoring. 09/12/14-Hiralkumar Patel. 1:51 PM:- spoke with Rob. they have been monitoring sump, but has not conducted any subsurface investigation. 1:55 PM:- left message for Mr. Pantelic. 2:15 PM:- received message from Mr. Pantelic. he mentioned that super is monitoring the sump and riteway will schedule geoprobe. as per the letter dated 02/25/14, the department required submission of monthly reports on interim remedial measures and an investigation report by the end of 05/23/14. as of today, the department has not received any such documents. 2:28 PM:- sent letter to Mr. Pantelic requiring submission of required documents by the end of 09/30/14. informed him that case will be referred to legal, if documents are not received by 09/30/14. letter emailed to Mr. Pantelic and Ms. Jacobs. 09/24/14-Hiralkumar Patel. 12:43 PM:- spoke with Rob at Riteway. he mentioned that they are conducting subsurface investigation today. 09/25/14-Hiralkumar Patel.

10:23 AM:- received call from Dave from Riteway. during geoprobe installation inside tank/boiler rooms, refusal encountered between 1.5 and 2.5 ft below surface. they also found heavily contaminated soil and oil on groundwater in the boreholes. groundwater was found about 6 to 9 inches below surface. as groundwater was at shallow depth, boreholes were resealed to prevent flooding. Riteway will schedule boring installation along remote fill line. asked Dave to schedule an on-site meeting with property owner/manager during next field activity. discussed with DEC Austin and DEC DeMeo. based on findings of free phase product underneath the tank/boiler room, it was decided to transfer the case to remediation after receiving results of fill line investigation. 09/29/14-Hiralkumar Patel. 1:40 PM:- received call from Scott from Riteway and scheduled a site meeting at 9 AM on 10/06/14. 09/30/14-Hiralkumar Patel. 10:01 AM:- received email from Rob including sump pit weekly monitoring log from 03/25/14 to 09/23/14. 10/06/14-Hiralkumar Patel. 9:00 AM:- visited site. met George (building super), Peter and Joe (Riteway) and Mr. Pantellic. due to improper marking and wrong permit location, no field work was conducted along the remote fill line. based on field observations, suggested Mr. Pantellic to excavate and remove the out of service remote fill line and any associated contamination. Mr. Pantellic has agreed to it and Riteway will get permit to open sidewalk flags. Peter brought oil/water mixture that was collected from boring in tank room. product was dark colored. asked Peter to send product sample for fingerprint analysis. inspected the subject building and adjacent building at 139 E 35th Street to locate possible location for borings surrounding the tank/boiler room in building 136. there is no place to install soil borings inside both buildings. inspected sump in boiler room in building 139, where no product was noted. building 139 has one square #6 oil AST in basement, which was installed about 10 years ago when previous AST (which is wrapped in concrete) was found leaking (spill #: 0512684). the previous AST in building 139 is closed-in-place. both ASTs in building 139 are away from tank in building 136. based on field observations, asked Mr. Pantellic to install three monitoring wells (two on Lexington Ave sidewalk and one on E 36th Street sidewalk) to investigate groundwater contamination. Riteway will conduct required groundwater investigation. 2:00 PM:- received email from Dave including site map and boring logs for borings installed in tank/boiler room. total 10 borings were installed in tank/boiler rooms. refusal encountered between 1.5 and 3.5 ft below surface. boring locations can not be read in the site plan. 10/14/14-Hiralkumar Patel. 10:09 AM:- sent email to Dave and asked him to resubmit boring location map. also asked him about update on installation of monitoring wells and removal of former fill line. 10/27/14-Hiralkumar Patel. received email from Dave (at 1:28 PM on 10/22/14) including fingerprint sample result. analysis shows product as #6 oil. 9:02 AM:- spoke with Rob at Riteway. they removed sidewalk flag by the building wall and found contamination. they have dug down about 8 ft, but there is more contamination. scheduled a site inspection at 9:30 AM tomorrow. Rob mentioned that they are waiting for a permit for well installation. 10/28/14-Hiralkumar Patel. 9:50 AM:- visited site. met Anthony from Riteway. Riteway crew has excavated to about 20-22 ft depth along building's foundation wall in the area of recently closed fill line. more contamination at the bottom of the excavation. crew will continue excavation, to feasible limits only. Anthony mentioned that no contamination has noted from

the remote fill line (with fill port at the curb) which was closed in past. asked Anthony to collect endpoint bottom sample and to install a minimum of 4 inch diameter pipe in excavation, prior to backfilling. the pipe is needed to install a monitoring well in the area. 11/10/14-Hiralkumar Patel. received email from Scott (at 3:36 PM on 11/07/14) from Riteway. he mentioned that well installation will begin at 9 AM on 11/12/14. 11/12/14-Hiralkumar Patel. 2:54 PM:- received call from Scott from Riteway. he mentioned that the drilling equipment to install 4 inch well is big and Riteway does not have sidewalk obstruction permit. he will install 2 inch wells with smaller equipment, next week, and then based on findings, impacted well(s) will be replaced with bigger ones after holidays. 11/21/14-Hiralkumar Patel. 7:19 AM:- received email from Dave including site map and soil sample results. total of four (4) soil samples were collected on 10/28/14 from excavation by the foundation wall and three (3) soil samples were collected on 11/07/14 from excavation along curb in area of previously abandoned fill port. out of seven soil samples, some SVOCs were found in one soil sample which was collected from area close to foundation wall. a monitoring well has been installed near the foundation wall. 11/24/14-Hiralkumar Patel. 9:46 AM:- sent email to Dave inquiring about well installation status. 04/13/15-Hiralkumar Patel. 1:17 PM:- spoke with Dave and inquired him about well installation report. he will call back with update. 04/14/15-Hiralkumar Patel. received email from Sylvia (at 4:46 PM on 04/13/15) from Riteway. she is in process of getting street obstruction permit and will schedule the work, once permit is received. 10/29/15-Hiralkumar Patel. 9:40 AM:- received call from Rob. he mentioned that monitoring wells have been installed. he will submit report. 12/14/15-Hiralkumar Patel. 3:25 PM:- received email from David from Riteway including site map with well locations and pics of absorbent socks from the wells. he mentioned that all the absorbent socks are free from product. site map shows location of four monitoring wells. the department has not received complete groundwater investigation report. 12/24/15-Hiralkumar Patel. 8:58 AM:- spoke with Rob. informed him that the department has not received complete groundwater investigation report yet. he will submit report by next week. 9:54 AM:- received email from David. he mentioned that they did not sample four monitoring wells yet. they will collect samples soon. he also mentioned that they only did a 'fingerprint' sample in the area. 10:21 AM:- sent email to David. asked him where the product sample was collected from for fingerprint analysis and why absorbent socks were installed in the wells. 10:55 AM:- received email from David from Riteway including site map and fingerprint analysis. fingerprint result shows presence of #6 oil. he mentioned that fingerprint sample was taken from well #3. he also mentioned that absorbent socks were installed as general procedure. 11:25 AM:- sent email to David. asked him to provide information about date of monitoring, depth to water, depth to product, product thickness, amount recovered from the impacted well and observations during subsequent visits. email copied to Rob (Riteway), Peter (Riteway) and Mr. Pantellic. as per chain-of-custody submitted with fingerprint analysis, the product sample was collected on 10/06/14, but based on previous notes, the monitoring wells were installed sometime after Apr. 2015. reviewed previous notes and noted that fingerprint result submitted today was previously submitted in Oct. 2014 which was for product collected from boring inside the tank room. 11:31 AM:- sent email to David again. informed him that

fingerprint result submitted earlier today was previously submitted in Oct. 2014 and based on information provided, that product sample was collected from soil boring installed inside the building. asked him about result for product sample collected from well #3, installed outside the building. email copied to Rob (Riteway), Peter (Riteway) and Mr. Pantellic. 01/07/16-Hiralkumar Patel. 2:06 PM:- received email from David. they will sample four wells tomorrow. 01/21/16-Hiralkumar Patel. 11:01 AM:- received email from David. they recently went back to obtain water samples from four wells. they were able to retrieve water from three wells (# 1, 2 and 4), but well # 3 was completely dry. samples from three wells were clean based on visual and olfactory inspection. will send samples to lab. 02/29/16-Hiralkumar Patel. 12:19 PM:- sent email to David inquiring about results of groundwater samples and monthly reports for sump pit monitoring/product recovery. email copied to Rob, Mr. Pantellic, Charisma Hill (Riteway) and Peter. 12:54 PM:- received email from David including groundwater sampling results. groundwater samples were collected from wells # 1, 2 and 4 on 01/19/16. no contamination was noted in groundwater samples. 03/24/16-Hiralkumar Patel. 9:01 AM:- received email from Rob including pit monitoring logs and pics of absorbent pads taken on 03/09/16. as per monitoring logs, trace amount or no oil was found after 04/17/15. 04/29/16-Hiralkumar Patel. 9:50 AM:- visited site and met George. inspected tank room sump. no oil was found on water in the sump. 3:34 PM:- left message for Mr. Pantellic. 05/02/16-Hiralkumar Patel. 1:02 PM:- received call from Mr. Pantellic. suggested him to submit one detailed report including information about spill investigation and remediation. he will talk to Riteway. 07/08/19-Hiralkumar Patel. after discussing with DEC Austin, case closed based on following: - removal of contaminated soil along the former remote fill line - passive product recovery within tank room - no groundwater impact outside building foundation wall - building foundation possibly within bedrock preventing migration of remaining heavy product trapped beneath the tank/boiler room floor - no impact to indoor air"
Remarks: "on floor - cleanup pending"

 DEC Memo: "6/8/05 - Project transferred to TLGibbons in Central Office, Albany
 7/5/05 - Spill caller (Dry-as-a-Bone) called in a tank failure on
 1/06/97 however, they did not do repairs. Couldn't find phone number
 of building owner/manager so sent letter to Goldman, SOLIL Management
 Corp. 7/21/05 - Mr. David Ostrov (SOLIL - 212-265-1577) called me.
 Said his records show the repair was made by Pheonix Environmental
 Technology, Inc. (516-864-4200) in January 1997. Will send paperwork.
 8/4/05 - Mr. Ostrov said he is waiting on documents, but will conduct
 tank test tomorrow (A L Eastmond). 9/7/05 - Spoke with Erica, Mr
 Ostrov's assistant. Mr. Ostrov left company, she will send papers.
 Received papers (dated January 1997) which show epoxy repairs
 followed by a tank test failure. A subsequent weld patch seems to
 have fixed problem but no follow-up test. Asked SOLIL to send me
 results of 8/5/05 test. 9/9/05 - Close spill. A second spill was
 opened (# 0505705) on 8/9/05 after second test failed. This spill
 will be combined with 0505705 and handled by Mr. Rahman of the Region
 2 office. "

DEC Memo: "TTF ltr sent to PBS address: Solil Management 640 Fifth Ave - 3rd Flr New York, NY 10019 12/28/05-Sharif// Ronald Lichtman,(212)506-0417 from Solil Management called to say they pumped out the old tank and going to install new 1500 gall. tank after replacing the old tank.According to him, there was no oil spill occurred as a result of the tank test fail.I suggested him to send DEC brief description of the job they have done, couple of photographs of the AST. I also told him to file paper work with DEC for installing the new tank. Cross reference to Spill # 9612022. 05/08/06 Sharif Rahman- I left a messege for Ronald Lichtman,(212)506-0425 to get back to DEC regarding the current status of the tank. 05/09/06 Sharif Rahman- Mr.Angel Reyes,(212)265-1577 called DEC to say he would send DEC the report and make sure pbs information is updated with the department. 07/24/06 Rahman- Ronald Lichtman to send DEC the report and take necessary actions to update the PBS certificate. 12/06/06 Rahman-Letter from Stephan Dejean, land lord's legal counsel, dated September 06,2005 states that there was no literal spill at the building in 1997 or anytime thereafter, and that the failing portion of the tank is at the very top of the tank.Again, letter, dated 11/15/06 signed by Stephan Dejean , reveals that the old tank was removed and a new tank was installed, but the registration has not been done yet. Spill is closed due to absence of oil contamination;site has been referred to PBS section for necessary action to correct the PBS violation/s."

Spiller Name: VINNY LOVARI
Spiller Company: APARTMENT BUILDING GARAGE
Spiller Address: 250 EAST 39TH STREET
Spiller Company: 001
Contact Name: VINNY LOVARI
DEC Memo: "8/28/2006 Sangesland spoke to Vinny at Island Tank. He said they've been digging at the site for several days. Originally they thought it was just an isolated spill, but then they found an old #6 oil return line which had rotted under the garage floor. This line is now being removed. Work is moving slowly because they have to juggle cars being parked in the garage to make room to dig. So far they have removed 18 drums of #6 oil contaminated soil. By the end of this week they expect to be finished and to take end point samples. Vinny says they will send in a closure report with photos as soon as the endpoint sample results come back. 9/19/06 - Raphael Ketani. I tried to contact Vincent Lovari of Island Tank (718) 967-9424, but could only leave a message. 10/16/06 - Raphael Ketani. I tried to contact Mr. Lovari, but got his assistant. I left a message requesting a copy of the analyticals for the soil. His assistant said that they were still laying pipe at the site. 11/7/06 - Raphael Ketani. Mr. Lovari returned my call with a voice message. He said that they will move the drums on this thursday or friday and then take end-point samples on friday. He said they have to do things this way as the site is very tight. 3/7/07 - Raphael Ketani. I tried to reach Vinny or his assistant, but could only leave a voice mail. 3/8/07 - Raphael Ketani. I spoke to Vinny of Island Tank (718) 708-3425. He said that 40 drums of soil have been removed so far from around the fill line and the return line. He said that it looks like the lines had been

S106972442

leaking for many years. Someone had even put a bucket with a pump under one leak in the fill line many years. He said that there still is some more soil to remove. Soil samples will start to be taken this friday. He said that it's a big mess at the site. 3/27/07 - Raphael Ketani. I received the update of work report for the site from Mr. Lovari. The report stated that the tank was relined, the 3 inch fill line was replaced, the 2 inch vent line was replaced, the suction/return line was replaced, a new vent alarm was installed, an overfill alarm was ordered, and a leak detection system will be installed. The report has soil manifests and sets of pictures of the work. End-point samples will be taken. The work is 75% completed, according to the report. A full report will be sent once all of the work is completed and the analyticals are received. 5/9/07 - Raphael Ketani. I spoke to Vinny. He said that he is now doing the fill line. He said that he will replace the line and then do soil samples. 7/25/07 - Raphael Ketani. I spoke to Vinny. He said the project is still ongoing. He said that the fill line is very long under the garage and they couldn't do the job in one shot. He said they did part of it and now have to wait for a truck to come with gravel. Then they will back fill and cement and then move over to do the other part. He said that the geologist and geoprobe are coming this friday to do the end-point samples. He doesn't think there is more soil to remove as he has already shipped out 40 drums of soil. He said they are also in the boiler room doing work. 10/17/07 - Raphael Ketani. I tried to reach Vinny, but could only leave a message. Vinny's wife called me back and said that there is a health emergency with Vinny's parents. She said that he will get back to me sometime later. 10/18/07 - Raphael Ketani. Vinny called me back. He said that the job is almost done. All he needs to do is take sidewall and bottom end point samples. 12/3/07 - Raphael Ketani. I spoke to Vinny. He said that he finished installing the fill line. He believes the job will finish soon. 1/31/08 - Raphael Ketani. I spoke to Vinny. He said that he is basically done. He said that DEC will get the paperwork next week. 3/31/08 - Raphael Ketani. I tried to contact Vinny (cell (718) 708-3425/(718) 967-9424), but could only leave a message. 4/4/08 - Raphael Ketani. Vinny called me back. He said that he had been out for awhile because he had family issues to deal with. He said that he had essentially completed the remediation report and that DEC should get it very soon. I told him that the DEC has been waiting for a long time for this report and that we're very anxious to get it. He said we'll get it soon. 6/10/08 - Raphael Ketani. Sharif Rahman of the DEC Region 2 Spills Unit approached me and told me that he is working on a case for the same tank and fill line as concerns this case. He said his case is #0505707. Vinny never informed us that there were two Spills people involved in the same case. As Mr. Rahman has the older case, I am closing this spill case and referring it back to his case of #0505707."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "3/2/15 TJD TTF Spreadsheet updated. 3/9/15: Mahat DEC Mahat received

an email from Gregory Collins (GC Enviromental) mentioning following: Santosh, We were recently retained to replace the tank at the above referenced site. The tank failed a system test and a tank only test. The dry portion of the tank failed. The tank is located in the basement in a concrete vault with weep holes and no oil is emitting from the weep holes. We intend on installing temp tanks in the basement, breaking up the concrete, removing the tank and installing a new tank. Once the tank is removed I will email you photos of the condition to discuss a plan of action. Any questions let me know. Thanks, Gregory A. Collins *****Retained Contractor G.C. Environmental, Inc. 22 Oak Street Bay Shore, NY 11706 Tel: 631-206-3700, Ext.111 Fax: 631-206-3729 Email: gc@gcenvironmental.com Website: www.gcenvironmental.com, www.greencleanenv.com DEC is waiting for a report. 3/17/15: Mahat An email was sent to Mr. Collins requesting to call back to the Department if contamaintaed soil is found underneat the tank. DEC is waiting for progress report. 7/21/15: Mahat DEC Mahat received a closure report on the spill case. Report has been uploaded on D2 for reference. The soil underneath the tank was not contaminated. A new tank has been installed on the site. As per the report, no further investigation is warranted by the Department. Spill case is closed in DEC Spill Database. "
Remarks: "Test failure. Repair and retest being done Monday."

DEC Region: 2
DER Facility ID: 291145
DEC Memo: "4/29/05 Tipple responded, Response off the case and Ambrose Env overseeing cleanup. PTC arrived with a vac truck, oil spread to thin and too many under many things be effective, Tristate began cleanup, PTC to continue. 4/30/05 Ambrose off case, Response back, PTC off, Tristate back conducting cleanup. 5/2/05 Tipple got conflicting descriptions of site status, re-visited site. Oil in tank appears to remain in tank, + - 1/16 inch wide cut from prior tank work visable, apparently the tank was opened, the cut steel was re-attached with a few screws and glue. Over time minor the glue let loose and the patch reveals a cut line around it. Ultimately the vent line is not effective, the hole atop of the tank is the primary acting vent, although oil also shot out the sidewalk vent onto the walk. Upon further inspection, the steel at the bottom end of the tank closest to the boiler room appears to show signs of a serious corrosion problem. Tipple sent a letter requiring the cleanup be completed and the tank system pass a tank test prior to receiving future deliveries, and the tank registration be updated/corrected. T&S - delivery Company, Castle Oil - fuel supplier. The tank surround must be removed and replaced due to the saturated cinder block, at that time it was suggested that the tank be replaced/repared. 1/5/06 - Raphael Ketani. The party in charge of managing the building is Ernest Faraci at Vimar Realty (212) 696-7127. The PBS case is #2-600047 for the 1500 gal. tank. About 400 gals. of #4 oil were spilled. I called Tri-State Environmental ((888) 938-2658) to try to find out if they knew anything about the cleanup. The person who answered the phone said he wasn't sure, but would get back to me. 1/6/06 - Raphael Ketani. Joanne Peretti of Tri-State called to ask what documentation I needed to close the case. I described what I needed and she said she would get it to me next week. Ms. Peretti called back and said that Response Env. would have the documentation as they were the subcontractor. She told me to call Glen Goral at (508) 795-0110, ext. 202. 1/24/06 - Raphael Ketani. I received the cleanup report from Resonse Env. However, they mentioned a broken epoxy seal on the tank as the source of the leak. I called up Anthony Lara of PTC (718) 624-4842 and asked him whether the tank was

S106869316

repaired or removed. He said that the patch was welded onto the tank. I asked him for a letter describing this. He said he would send it.

1/27/06 - Raphael Ketani. A new oil spill #0512449 was called in yesterday night. Castle Oil (718) 579-3413 made a delivery of 300 gals. and discovered oil in a deep sump. There were 20 gals. of oil in the sump. The newer spill case is being closed and referred back to this one. PTC is going to the site to investigate. Super's phone: (646) 764-0511/(212) 869-1290. Super is Carrie Tucker. PTC (718) 624-4842 will be on site at between 12 and 2 today. I spoke to Ms. Tucker at 12:13PM today and she said that PTC is on sight. She said that the oil is black (same color as in tank). I told her to have PTC come over to suck out the sump as needed and to keep track of the thickness of the oil layer, and let me know what's happening. She said she would. I asked her whether the system lines were in the ground or concrete floor. She said they were not. Ms. Tucker called me back. She said PTC will do a full system test next week to try and find out where the oil is coming from.

1/31/06 - Raphael Ketani. Ms. Tucker called me back and said that PTC tested the tank and the pipes. She said that only the return line failed. They told her, she said, that the leak in the return line was a slow drip and that they will repair the line. I told Ms. Tucker that I needed a report of the testing and the repair. She said she would get it for me. She added that there is still some very slow seepage into the 4'X6' sump. She said that after awhile it might measure one cup. I told her to keep an eye on the seepage and to let me know how it does. She said she would. She said that, right now, the sump is clean.

2/8/06 - Raphael Ketani. Ms. Tucker called to say that she had Robert J. Keaney, Jr. of John Anderson & Associates, and Rich Gilbert of Westfair Restoration Services on site to inspect the damage from the two previous oil spills. He said that Mr. Keaney is an insurance adjuster. Ms. Tucker said that he was trying to get money to rebuild the tank vault, replace the oil damaged cinder block wall behind the tank, replace the damaged sump pump, and to clean up the oil seeping into the sump. She said that they agreed that Castle Oil was responsible for the spills, and she said that they admitted responsibility. Ms. Tucker asked me to send a letter to Castle to get them to clean up the seeping oil. I told her I would only address the seepage in the letter, not order them to do construction/replacement work. She said that was alright.

2/24/06 - Raphael Ketani. Ms. Tucker called to ask what DEC wanted to get to close the spill case. I told her that we wanted the system test results, and statements regarding the fixing of the return line leak, the cleanup of the sump, removal of staining, revaulting of the tank, and welding of the patch on the tank. Ms. Tucker said he would have PTC send me such a letter.

3/22/06 - Raphael Ketani. I contacted Carrie Tucker. She said that all of the work has been done. I asked her to call PTC and get me a closure report. She said he would contact the building's owner and he will contact PTC.

4/6/06 - Raphael Ketani. I spoke to Mark at PTC. He said they haven't been paid and so they are not sending any documentation to the management company or to the DEC. I called up the management company, Walter and Samuels (646) 764-0511, and spoke to a woman [Ernest Faraci, Director, Walter & Samuels, 419 Park Avenue South, NY, 10016]. She said to send a letter regarding all of the documentation that DEC needs to close the case. I told her I would. I sent the letter today.

4/21/06 - Raphael Ketani. I spoke to Ms. Tucker. She said that she is still getting the paperwork together for the report regarding the spill. She said that, partly, the delay

S106869316

is because she's waiting for manifests and such from the contractor. She asked that I give her another week or 10 days to get the report sent to DEC. I told her this would be alright. 5/15/06 - Raphael Ketani. I received a FAXed letter from Castle Oil on 5/4/06. The letter had an invoice attached for cleanup work that was done on 4/29/05. THIS IS NOT THE CLOSURE REPORT I NEEDED! 5/16/06 - Raphael Ketani. I received a letter with attached documentation from Walter & Samuels. It still doesn't have documentation of the patch repair, repair of the return line, removal of the oil contaminated cinder blocks, system test results from 2/06, and sump cleanup. 5/17/06 - Raphael Ketani. I sent Walter & Samuels a letter stating that I still haven't received the necessary documentation describing the above issues and other issues mentioned in the April 6 DEC letter to them. 6/30/06 - Raphael Ketani. Yesterday I received a package of documentation from Ernest Faraci, Director of Management at the management company Walter and Samuels. The package included: the cover letter dated 6/27; failing tank system results; passing tank only results; passing tank system results; a letter from Ms. Tucker stating that everything has been cleaned up; and repair work documents from Castle Oil and PTC. Based upon the above documentation which was received on June 29, the May 10, 2006 package of documents that were submitted by Walter and Samuels and received on May 16, and other documents in the file, I am closing the case. "

Remarks: "Confined in the basement of the commercial building. Clean up is in process."

DEC Memo: "ConEd Manhole impacted - See Emis #232308 12/21/12-Zhune responded to this spill. The fill line was cut from the fill port from where they hooked the hoze and not sealed. They installed a new fill port and fill line few feets from the one that they made the wrong delivery. Approximately 800 gallons spilled. Most of oil went under the sidewalk into Con-ED structures. Some through the basement wall enter the basement and went into two sumps. one of this sumps ended up in the sewer. The pumps were disconnected. Petroleum tank cleaner is doing the cleanup. DEP was notified. Company Name: Waltert Samuels 419 Park Ave South 15FI Owner information: Norman Silver 217-646-7134 Super information: Vate Pepushy 347-992-6474 02/07/13- Zhune spoke to Mark from PTC. He said they Pumped out the oil from the tank room. the oil that went to the Con-Ed structure was managed by Con-Ed contractors. 10/2/14-Kevin MacCarty emailed the Subsurface Investigation and Remedial Scope dated 7/24/13 On 21,2012 Castle oil delivered 800 gallons of #4 fuel oil to 701 7th Avenue. The oil was pimped into an abandoned but open fill line on West 47th Street and it was reported by the building management to be leaking into the basement from outside the building. Con Edison performed repeated oil recovery from within their electrical vault located to the west of the fill line. The vault extebded approximately 8 ft below the sidewalk. As of June 2013 approximately 500 gallons were estimated to have been recovered from varios location in the vicinity of the fill port. Fourteen soil borings were installed and sampled to delineate the impact of the spill to the soil beneath the sidewalk and the Property basement. Each boring was extended to refusal or into water table. Six boreholes were drilled in the sidewalk adjacent to 47th Street. Eight borehole were performed within the property's basement. Twelve soil samples were collected from 10 of the 14 boreholes. The soil analytical results for the samples collected from the sidewalk showed the following concentrations of VOCs and SVOcs exceeding the limits. Sample SB-03(10-11') detected benzene 0.4 mg/kg, 0-xylene 0.79 mg/kg, p/m-xylene 0.79 mg/kg and chrysene 1.9 mg/kg. Sample SB-05(9-10')detected methyl tert butyl ether(MTBE)1.4 mg/kg, o-xylene 1.4 mg/kg, p/m-xylene 1.4 mg/kg and toluene 1mg/kg. The soil analytical results for the samples collected from the basement were found to be non- detected for the majority of the sample analyzed for VOCs and SVOC. SB-09 and SB-10 has the only detected result exceeding the limit. BB-09 (1-1.5') detected benzene

0.13 mg/kg, naphathelene 16 mg/kg, oxylene 3 mg/kg and p/m-xylene 6.7n mg/kg and SB-10(1-2') detected p/m-xylene 1.9 mg/kg. Porposed remedial Scope.- This scope is based on the results of the subsurface investigation and included the installation of recovery well followed by vacuum enhanced fluid recovery (VEFR) and the intallation of sorbent material to remove any available free phase product from the soil beneath the sidewalk. Periodic well gauging and absorvent sock maintenance were proposed for the recoveryof remaining product beneath the sudewalk. 10/2/1-Kevin MacCarty emailed the Remdial Report dated 4/30/14. On July 29-30, 2014 a total of 6 recovery wells were installed in 2 rows of 3 and extend from the Con Edison vault to SB-3. The recovery wells were installed to 15 ft below grade. On August 27, 2013, each recovery well was probed to evaluate the presence of product and detemine those wells to be evacuated with VEFR. Wells RW-2, RW-3 and RW-6 were observed to contain product with product thickness of 0.57 frt, 0.03 ft, 0.06 ft respectively. In total 15 gallons of product-impacted water were removed from recovery wells RW-2, RW-3 and RW-6"

DEC Memo:

"8/3/07 - Raphael Ketani. I called up Joe Ostrowski at PTC (718) 624-4842 regarding the spill. He said that his crew is there now and they are emptying the tank. He said no drains or sumps are affected and that all of the 150 gals. spilled in the tank room. He said the tank is 10,000 gal. and it just gave way. The block and lot are 890 and 1. The site is 7 Park Avenue, NY, 10016. The management contact is Ellen Kornfeld, Lovett Co., 450 7 Avenue, rm. 1106, NY, 10123. The PBS case is #2-289213 with a 10,000 gal. tank containing #6 oil. I sent a CSL. 9/25/07 - Raphael Ketani. I received a call today from Eric Menjoya (718) 367-9800, ext 201 of Controlled Combustion. He said that the old tank has been removed and the site has been cleaned up. I told him to send me pictures and manifests for the work that was done and to update the PBS registration to show that the old tank was removed. He said he will do this. 9/28/07 - Raphael Ketani. I received a set of pictures by e-mail from Mr. Menjoya. The pictures showed the cleaned former tank room. I chose those pictures that weren't duplicates and that were clear and attached them to the e-Docs. I e-mailed Mr. Menjoya that DEC still needed a cover letter explaining what the situation was, how it was cleaned up and what the end result was. I also wrote that manifests were needed and that the PBS registration needed to be updated to reflect the changed status of the tank. Mr. Bendjouya e-mailed me that he had sent the manifest to Jeffrey Vought of Region 2 Spills. 10/1/07 - Raphael Ketani. I talked to Mr. Vought about the manifests. He found them and gave them to me. I checked the PBS registration. The tank is listed as closed and removed. Based upon the pictures that were sent that show a clean tank room with no cracks in the floor, and the manifests for the contaminated materials removed, I am closing the spill case."

Site Description: Location: The East 60th Street Con Ed Steam Station Site is located in an urban area of New York County (Manhattan) in New York City. The site is partially located beneath the elevated section of the Ed Koch Queensboro Bridge (also known as the 59th Street Bridge) between East 59th and East 60th Streets. Site Features: The Site consists of the interior basement floor of the building which occupies the site. Current Zoning/Use(s): The on site building is in use as a steam generation plant by a utility company which distributes steam to utility customers. The Site parcel is in a manufacturing zone, with commercial zoning to the west and north, and residential zoning to the south of East 59th Street. The surrounding properties are currently used for a combination of uses, with a park/playground to the north across East 60th Street, residential to the south across East 59th Street, a Department of Transportation yard adjacent to the west, and the FDR Drive (highway) to the east. Further to the east is the East River, which is the receiving waterbody for the facility's SPDES discharge. Historical Uses: Prior uses that appear to have led to site contamination potentially include the use of mercury-filled flow measurement equipment as part of the steam plant operations. Upon finding mercury in the facility's SPDES discharge sampling, a report was made to the Department's Division of Water and subsequently a report was made to the Department's Spill Hotline upon finding mercury beads in the facility's internal drainage system. Site investigations were undertaken under the spill program to delineate areas of mercury contamination. Remedial measures were implemented including excavation of impacted media and encapsulation of the basement floor and components of the drainage system with a two-layer epoxy coating.

Env Problem: Nature and Extent of Contamination: The primary contaminant of concern at the site is mercury. Investigations initially identified mercury in the facility's SPDES discharge, which prompted the investigation of potential source areas. The presumed principal source area identified was the floor trench drainage system, which is a concrete-lined floor trench to which various equipment within the facility discharge wastewater from the steam plant operations and through which this wastewater is conveyed toward the facility discharge point. Some sections of the trench were found to be in disrepair with cracked and or spalling concrete. Liquid mercury was observed in two separate locations in the trench system. Additional investigation with sampling identified mercury concentrations above industrial use recommended soil cleanup objectives in soil beneath and in the vicinity of the floor trench. In that an additional goal of the remedial effort was to prevent mercury contamination from being discharged through the facility's SPDES discharge, additional sampling was conducted to identify other possible sources of low concentration sources of mercury including the concrete floor itself and the paint on the floor. Remediation at the site is complete. An estimated 4.5 pounds of liquid mercury were removed from the two areas in the trench system where it was found. Approximately 4.3

cubic yards of mercury-impacted soils and concrete were also removed from the trench areas. An additional 15 cubic yards of concrete were removed during activities to repair spalling concrete and repair of concrete slab areas beneath the boilers. The facility owner decided to apply a two-coat epoxy system to the entire floor area and the trench system to minimize to the extent feasible the release of mercury through the facility discharge. To apply the epoxy, the floor area needed to be scarified; the paint chips and concrete generated in this process were removed in 22 55-gallon drums. Waste water generated from dust control or washing activities was containerized in fractionation tanks and removed for offsite disposal. In addition, the facility oil water separator and structures were cleaned and/or repaired until analysis demonstrated that mercury concentrations were less than 50 parts per trillion in water passing through the system, per the Department's Division of Water's requirements.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020	Source: EPA
Date Data Arrived at EDR: 05/06/2020	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

MTA HQ
347 MADISON AVENUE
NEW YORK, NY 10017

TARGET PROPERTY COORDINATES

Latitude (North):	40.754297 - 40° 45' 15.47"
Longitude (West):	73.977817 - 73° 58' 40.14"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	586288.6
UTM Y (Meters):	4511773.5
Elevation:	59 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013
Southeast Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970088F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3604970089F	FEMA FIRM Flood data
3604970201F	FEMA FIRM Flood data
3604970202F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Middle Ordovician (Mohawkian)
Code: O2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Preparer Information

Joe Pressler

Project Scientist

Joe Pressler is a Project Scientist in VHB's Site Investigation and Remediation (SIR) group. He has proven his expertise working on several large projects ranging from RCRA Closures to Brownfield sites. Joe gained extensive knowledge and experience with Brownfield Cleanup Programs, RCRA Closures, E-Designations, NYCOER, NYCDEP, NYSDEC, state, and county regulations. Joe is on his way to becoming a Project Manager at VHB.

Education

MALS, Environmental Management, Stony Brook University, 2018

BS, Environmental Science, State University of New York at Oneonta, 2012

Certifications

Asbestos Inspector Refresher Training 2019

10-Hour OSHA Construction Certification 2019

Asbestos Inspector Initial Training 2017

TSA TWIC Certification 2018

8-Hour HAZWOPER Supervisor Refresher 2020

8-Hour HAZWOPER Supervisor 2016

40-Hour HAZWOPER Certification 2013

American Red Cross CPR/AED Certification 2019

7 years of professional experience

Country Pointe, Plainview, NY (February 2017 – Present)

Joe has conducted routine field observations and field oversight of the former Nassau County Sanatorium campus undergoing redevelopment as a residential community. Field oversight included monitoring the movements of onsite soils during construction activities in conformance with the Nassau County Department of Health-approved Work Plans. Joe is also conducting routine observations of the installation of active sub-slab depressurization systems (SSDS), including the collection of measurements and observations of installations to ensure compliance with the engineer's specification.

Estates at East Meadow, East Meadow, NY (January 2019 – Present)

Joe has conducted routine field observations and field oversight of the demolition of the former on-site residence and Oberle florist and greenhouses. In addition, a Community Air Monitoring Program (CAMP) was implemented during demolition activities in accordance with appropriate regulatory agencies. Field oversight also included the project oversight of the movement of onsite soils during remedial/construction activities in conformance with the Nassau County Department of Health-approved Work Plans.

7-Eleven, Wantagh, NY (June 2019 – August 2019)

Joe has conducted routine field observations and field oversight of the installation of an active SSDS, including the collection of measurements and observations of installations to ensure compliance with the engineer's specification during the construction of a 7-Eleven convenience store.

Commander Oil Terminal, Oyster Bay, NY (January 2018 – Present)

The Commander Oil Terminal site is an active Major Oil Storage Facility (MSOF) with an active pump and treat groundwater system, as well as an active ozone injection system. Joe is responsible for routine observations of the P&T system, ozone injection system, and groundwater sampling from existing onsite monitoring wells.

461 West 125th Street, New York, NY (March 2016 – May 2016)

Joe performed project oversight of the remediation of on-site soils and off-site disposal during renovations to the footings of a multiple-story brick building in Harlem, New York (E-Designation Property). Furthermore, Joe provided oversight of soil waste manifests and conducted daily reports for the New York City Mayor's Office of Environmental Remediation (OER).

Norwood Terrace, Bronx, NY (February 2014 – May 2014)

Joe performed project oversight for the demolition of a former automobile repair shop and the removal of soils down to bedrock prior to and during the construction of affordable housing in the Bronx. Joe implemented a CAMP throughout the remedial phase of the project and worked closely with the NYSDEC to close an active on-site spill. Joe was a big part in making sure the project, listed in the Brownfield Cleanup Program (BCP), moved along smoothly to become affordable housing. This project ultimately received a NYC Green Property Certification.

395 Leonard Street, Brooklyn, NY (May 2013 – August 2013)

Joe assisted in preparing the Phase I and Phase II ESA reports and work plans required to develop the (E) designated property. Joe also performed the project oversight of the excavation, remediation of on-site soils, off-site disposal, and tank removals. Furthermore, Joe assisted in preparing the Tank Closure Report and Remedial Closure Report for the project.

Project Oversight and Community Air Monitoring, NY

Joe has performed oversight for multiple projects in the New York Metropolitan Area, including Brownfields, E-Designations, and smaller-scale remedial projects. In addition, Joe has experience in writing and conducting Community Air Monitoring Programs (CAMP) in accordance with appropriate regulatory agencies. Joe has utilized various equipment, including a MiniRAE-3000, personal DataRam™ pDR-1000AN monitor, and other variations of similar equipment. In addition, Joe has worked on several projects that have received NYC Green Property Certifications based upon their completion of the Voluntary Cleanup Program (VCP).

Project Hydrogeologist, Hampton Bays, NY

Joe prepared technical reports, including work plans, environmental site assessments, remedial action plans, closure reports, and underground storage closure reports. He was responsible for designing and implementing investigation and remediation activities, including excavations for soil and groundwater treatment. Joe also prepared proposals and managed personnel and website maintenance.

Field Hydrogeologist, Hampton Bays, NY

Joe prepared Phase I and Phase II reporting for soil, groundwater, and soil vapor sample collecting; oversaw UST removals; monitored well installations and construction projects; and was responsible for coordinating the proper equipment and personnel to complete each project. Joe gained extensive knowledge and experience with Brownfield Cleanup Programs, RCRA Closures, E-Designations, NYCOER, NYCDEP, NYSDEC, state, and county regulations. He also conducted subsurface investigations using auger and direct push drilling technologies, geologic logging, well construction, and soil groundwater sampling, and assisted in preparation of Site Investigation Work Plans and Reports, Remedial Action Plans, Closure Reports, Tank Closure Reports, and Quarterly Monitoring Reports.

Bryan Murty

Project Manager

United States Armed Forces Reserve Center/Nike Missile Base, Amityville, NY

Performed Phase I and Phase II Environmental Site Assessments for the closure and redevelopment of the former United States Armed Forces Reserve Center and Nike Missile Base located in Amityville, New York. Mr. Murty evaluated all environmental conditions at the property including sub-slab soil vapor and ambient air quality analyses, multi-depth soil sampling, underground injection control (UIC), as well as groundwater and wastewater sampling within abandoned missile silos.

Former Bay Shore Armory, Bay Shore, NY

Performed a Phase II Environmental Site Assessment for the re-use and redevelopment of the former New York State Armory property. Mr. Murty coordinated with sub-contractors and provided field oversight for a geophysical survey, the sampling from several large leaching fields, abandoned underground structures including vehicle lifts, tanks and an oil/water separator.

Polytechnic Institute of New York University, Brooklyn, NY

Mr. Murty assisted in the design and implementation of a large-scale groundwater remediation system associated with a former leaking underground storage tank located at the Polytechnic Institute in Brooklyn. The groundwater remediation system is designed to collect and capture contaminated groundwater and recover product floating on the groundwater table. In order to achieve this, Mr. Murty coordinated with various additional team consultants in order to gather information needed to produce a New York State Department of Environmental Conservation-approved remedial action work plan.

T.C. Dunham Paint Company, Yonkers, NY

Mr. Murty provided consulting services including emergency response, and production and oversight of an approved remedial action work plan associated with a 4-alarm paint warehouse fire that impacted a large area in Yonkers. Mr. Murty teamed with various consultants and coordinated with various regulatory agencies, including the City of Yonkers, New York State Department of Environmental Conservation and the United States Environmental Protection Agency to generate various approved documents including a remedial action work plan, health and safety plan (HASp) and community air monitoring program (CAMP) plan.

Country Point at Plainview, Plainview, NY

Mr. Murty conducted a Phase I Environmental Site Assessment on the former Nassau County Sanatorium and associated recreational playing fields in Plainview, New York. Mr. Murty used this information to provide integrated services and incorporated same into a Draft Environmental Impact Statement to analyze existing conditions, potential impacts and mitigation measures associated with the redevelopment of the former Nassau County Sanatorium to a multi-family residential subdivision.

Queen of Peace Cemetery and Residential Subdivision, Old Westbury, NY

Preparation of the FEIS for the development of a cemetery for the Diocese of Rockville Centre.

Nassau Coliseum Redevelopment, Lighthouse at Long Island, Uniondale, NY

Assisted in preparation of the DGEIS for the redevelopment of the existing Nassau County Veterans Memorial Coliseum to a multi-use entertainment and residential complex in the Town of Hempstead.

EIS for Heartland Town Square Redevelopment, Brentwood, NY

Assisted in preparation of the EIS for the rezoning and redevelopment of the 475± acre former

Mr. Murty manages and conducts Phase I and Phase II Environmental Site Assessments. In addition, Mr. Murty performs various environmental services including soil vapor sampling/ambient air quality analysis, design, oversight and technical support of small and large-scale remediation projects, as well as noise studies. Mr. Murty also participates in various environmental planning activities, including preparation of Draft and Final Environmental Impact Statements.

7 years of professional experience

Pilgrim Psychiatric Center as a Smart Growth Community.

Sheltair Aviation, Republic Airport, Farmingdale, NY

Assisted in preparation of the Hazardous Materials section of DEIS for proposed redevelopment and improvement of a former residential subdivision as a private jet terminal.

Costco, Hicksville, NY

Prepared Phase I and Phase II Environmental Site Assessment and assisted in preparation of the revised FEIS for the redevelopment of the property at West John Street and Charlotte Avenue.

Pulte Homes, Courthouse Commons, Central Islip, NY

Prepared Phase I and Phase II Environmental Site Assessment and assisted in the monitoring of a large-scale remediation of a landfill at the former Central Islip Psychiatric Facility under the direction of the Suffolk County Department of Health Services and the New York State Department of Environmental Conservation for the ultimate redevelopment of the property as a residential condominium complex.

Lowe's Home Centers, Various Nassau County and Suffolk County Sites, NY

Prepared Phase I and Phase II Environmental Site Assessments for several Lowe's stores throughout Long Island.

Verizon Wireless Phase I & Phase II Environmental Site Assessments, Various, NY

Mr. Murty also prepared Phase I and/or Phase II Environmental Site Assessments throughout Long Island and the five boroughs of New York City for Verizon Wireless service expansion. Supported Phase II ESAs by performing soil sampling, groundwater investigations/monitoring and soil vapor monitoring. Also provided remedial investigation support.

PANYNJ Passenger Facility Charge, Newark, NJ, New York, NY, New Windsor, NY

Assisted in developing and administering the 2010 PFC application for the Port Authority of New York and New Jersey for Newark Liberty International Airport, John F. Kennedy International Airport, LaGuardia Airport and Stewart International Airport. This application includes \$570 million in capital development projects that incorporate terminal expansion, runway and taxiway pavement rehabilitation and security enhancements. Working with Port Authority staff, assisted in developing each project description justification through detailed meetings with a variety of Port Authority staff (technical services, accounting, planning) throughout the agency. The application received considerable support by the airlines and worked diligently with Port Authority staff and the FAA to the eventual approval of the application.

Education BA, Environmental Studies, SUNY Binghamton, 2005

Professional Registrations/Certifications OSHA 40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER), Certified 2006, 8-hour Refresher (current)
OSHA 10-Hour Construction Safety, 2012

Affiliations/Memberships American Association of Airport Executives, 2010 - Present
