**Re: 343 Madison Avenue
Block 1279, Lots 23, 24, 25, and 48
CEQR # 21DCP020M**

Dear Ms. McCarthy:

The New York City Department of Environmental Protection, Bureau of Sustainability (DEP) has reviewed the August 2020 Draft Environmental Impact Statement (DEIS) Hazardous Materials chapter and the July 2020 Phase I Environmental Site Assessment (Phase I) prepared by VHB on behalf of BP 347 Madison Associates, LLC and the Metropolitan Transportation Authority (MTA) (applicant) for the above referenced project. It is our understanding that the applicant is seeking two Vanderbilt Corridor Subarea special permits from the New York City Department of City Planning (DCP) available for developments within the Vanderbilt Corridor Subarea that provide public realm improvements in the form of pedestrian and mass transit circulation improvements in and around Grand Central Terminal. The three buildings on lots 23, 24, and 48 (project site) are currently vacant and are set to undergo demolition as approved by the MTA in 2018. They once contained a total of 351,871 gross square feet (gsf) of mixed commercial office and retail use. The fourth structure on Lot 25 contains a 2,482 gsf ventilation structure for the East Side Access. The proposed action would permit the redevelopment of the project site with a new, approximately 1,050-foot tall commercial office and retail building. The ventilation building at Lot 25 would not be redeveloped under the proposed action and portion of the building would cantilever over the existing ventilation structure. Block 1279 is bounded by Madison Avenue to the west, Vanderbilt Avenue to the east, East 44th Street to the south, and East 45th Street to the north. The project site consists of the western portion of Block 1279, fronting on Madison Avenue and is located in the East Midtown neighborhood of Manhattan Community District 5.

The July 2020 Phase I report revealed that historical on-site and surrounding area land uses consisted of a variety of residential and commercial uses including residential buildings, commercial buildings with ground floor retail, an athletic club, rail spurs and platforms, mixed-use buildings, a hotel, office buildings, Grand Central Terminal, banks, a post office, a church, etc.

Given the age of the on-site buildings, asbestos containing materials and lead based paints may be present. In addition, fluorescent lighting fixtures and building materials may include polychlorinated biphenyls. Regulatory databases identified 66 spills, 11 historical auto sites and 1 historical cleaner within 1/8 mile; 13 underground storage tank sites, 92 aboveground storage tank sites, and 1 dry cleaner within 1/4 mile; 97 leaking storage tank sites and 3 voluntary cleanup program sites within 1/2 mile; and 4 manufactured gas plant sites within 1 mile of the subject property.

Based upon our review of the submitted documentation, we have the following comments and recommendations to DCP:

Block 1279, Lots 23, 24, and 48

- Based on prior on-site and/or surrounding area land uses which could result in environmental contamination and testing is not physically possible during the CEQR process, DEP concurs with the DEIS recommendation that an (E) Designation for hazardous materials should be placed on the zoning map pursuant to Section 11-15 of the New York City Zoning Resolution for the subject property. The (E) Designation will ensure that testing and mitigation will be provided as necessary before any future development and/or soil disturbance. Further hazardous materials assessments should be coordinated through the Mayor's Office of Environmental Remediation.

Future correspondence and submittals related to this project should include the following CEQR # **21DCP020M**. If you have any questions, you may contact Mohammad Khaja-Moinuddin at (718) 595-4445.

Sincerely,

Wei Yu
Deputy Director, Hazardous Materials

Executive Summary

This document is a Phase I Environmental Site Assessment (ESA) prepared to determine evidence of recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historic recognized environmental conditions (HRECs) and business environmental risks (BERs) in connection with three (3) commercial properties located on the east side of Madison Avenue, between East 44th Street to the south and East 45th Street to the north in the Borough of Manhattan, City of New York, New York. The subject properties are identified by the street addresses of 341, 345 and 347 Madison Avenue, and as Borough 1 – Block 1279 – Lot Nos. 24, 23 and 48, respectively on the New York City (NYC) tax maps. The subject properties have a topographic elevation of approximately 59 feet above mean sea level (amsl). The subject properties are relatively flat with the general topographic gradient sloping downward to the east. Depth to groundwater is estimated to be less than 59 feet below grade surface (bgs). As the subject properties are located at a high point on Manhattan Island, groundwater flow is assumed to flow toward the nearest surface water body. In this case, groundwater flow is expected to flow to the east, toward the East River.

Site History and Current Property Uses

Based upon a review of municipal records, historical Sanborn maps and aerial photographs, VHB was able to establish a history for the subject properties dating back to 1890. According to historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at that time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

A brief summary of the current occupancy and property use associated with each respective parcel is provided, below:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts. The two ground floor storefronts are vacant with one fronting along

Madison Avenue and the other along East 44th Street. The remaining portions of the first floor consist of a security and two passenger elevator foyers that are accessible from Madison Avenue and East 44th Street. Vacant commercial office space occupies the floors two-through-19.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail tenant that fronts solely along Madison Avenue. The ground floor retail tenant is vacant and was most recently occupied by a Johnston & Murphy clothing store. The remaining portions of the first floor consist of a security and passenger elevator foyer that is accessible from Madison Avenue. Vacant commercial office space occupies floors two-through-15.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with two ground floor retail tenants that front along Madison Avenue and East 45th Street. Two vacant storefronts are present. A vacant storefront fronting along Madison Avenue is present that was most recently occupied by a J.Crew clothing store. The second vacant storefront contains frontage along East 45th Street to the north and was most recently occupied by a COSI coffee shop and bistro. The remaining portions of the first floor consist of a security and passenger elevator foyer and connecting corridor that provides access to the COSI retail tenant and the adjacent building to the east. A pedestrian passage that connects underground to Grand Central Terminal is present in the foyer. The building was formerly utilized as the Metropolitan Transportation Authority (MTA) Headquarters. However, office space on the upper floors is currently vacant.

Based on the results of the site inspection, records review and interviews, it was determined that there were several RECs noted for the subject properties. The following RECs were identified during the course of this Phase I ESA:

- Given the numerous database listings, New York State Department of Environmental Conservation (NYSDEC) spill incidents and petroleum bulk storage registries associated with the adjacent and surrounding properties, and given the presence of Grand Central Terminal proximate to the east of the subject properties, there is a potential for subsurface impacts, including soil, groundwater and soil vapor impacts beneath the subject properties. Same represents a REC.
- Based upon a review of historical Sanborn maps, an adjacent rail depot was identified to the north on Sanborn maps as early as 1890 through at least 1910. The adjacent buildings to the east, northeast and southeast are also depicted on Sanborn maps as constructed overhead of subgrade railroad tracks. The current and historical presence of rail tracks adjacent to the subject properties are attributed to Grand Central Terminal located to the east of Vanderbilt Avenue.

Given the current and historical presence of adjacent mass transit rail spurs, there is a potential for subsurface impacts at the subject properties associated with these adjacent rail uses. Same represents a REC for the subject properties.

In addition to the aforementioned RECs, the following BERs were identified for the subject properties:

- Soils in New York City are typically classified as “urban fill” with the potential to be impacted based on the grading activities prior to development. Given these conditions, there is a potential for urban fill to be present at the subject properties and is considered a BER.
- Given the ages of the subject buildings, there is a potential for asbestos-containing material (ACM) to be present in pipe insulation, roofing and other building materials. Prior to any potential demolition and/or renovation, an ACM survey should be conducted at the subject properties if renovation or redevelopment is contemplated. ACM should be abated in accordance with applicable local, State and federal regulations prior to any renovation or redevelopment.
- Based upon the age of the buildings, the potential exists for lead-based paint (LBP) to be present. Should the buildings be identified for renovation, an LBP survey should be conducted in order to determine if any LBP is present at the subject property and abated in accordance with New York State Department of Health (NYSDOH) regulations if identified and potentially disturbed. If the buildings are identified for demolition, a LBP analysis would not be warranted.
- Fluorescent light fixtures were observed throughout the building spaces. Given the ages of the buildings, there is a potential for ballasts associated with same to contain polychlorinated biphenyls (PCBs). Furthermore, given the ages of the buildings, there is a potential for building materials (i.e., window caulking, mastics, etc.) to contain PCBs. PCBs are subject to federal disposal restrictions and should be dealt with prior to any potential renovation and/or demolition.

1.0

Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (ESA) was prepared to determine recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historic recognized environmental conditions (HRECs) and business environmental risks (BERs) in connection with three (3) commercial properties located on the east side of Madison Avenue, between East 44th Street to the south and East 45th Street to the north in the Borough of Manhattan, City of New York, New York (hereinafter referred to as the “subject properties”). The subject properties are identified by the street addresses of 341, 345 and 347 Madison Avenue, and as Borough 1 – Block 1279 – Lot Nos. 24, 23 and 48, respectively on the New York City (NYC) tax maps. Site figures are included in Appendix A, and representative site photographs are included in Appendix B.

1.2 Detailed Scope of Services

This Phase I ESA has been prepared in accordance with procedures established by environmental professionals and in concert with the guidance of regulatory agencies and funding institutions and American Society for Testing and Materials (ASTM) Practice E1527-13, inclusive of the United States Environmental Protection Agency (USEPA) “All Appropriate Inquiry” requirement amended in the Federal Register on December 30, 2013. The USEPA “All Appropriate Inquiry” requirement establishes specific regulatory requirements for conducting appropriate inquiries into the previous ownership, uses, and environmental conditions of a property for the purposes of qualifying for certain landowner liability protections under Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The purpose of ASTM Practice E1527-13 is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of CERCLA and petroleum products. As such, the practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability; that is, the practices that constitute *"all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice," as defined in 42 U.S.C. §9601 (35)(B).*

As stated in ASTM Practice E1527-13, the purpose of the Phase I ESA is to identify, to the extent feasible, pursuant to the process established by ASTM Practice E1527-13, *"recognized environmental conditions in connection with a property."*

The term *"recognized environmental conditions,"* as defined by ASTM Practice E1527-13 means *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment under conditions indicative of a release to the environment under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions"*

The term *"de minimis conditions,"* as defined by ASTM Practice E1527-13 means *"a condition that generally does not present a threat to human health or the environment that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions."*

The term *"controlled recognized environmental condition,"* as defined by ASTM Practice E1527-13 means *"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls. A condition considered by the Environmental Professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental conditions in the conclusions section of the Phase I Environmental Site Assessment.*

The term *"historic recognized environmental condition,"* as defined by ASTM Practice E1527-13 means *"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required*

controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls. Before calling the past release a historical recognized environmental condition, the Environmental Professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the Environmental Professional considers the past release to be a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition."

The term "business environmental risk," as defined by ASTM Practice E1527-13 means "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

This Phase I ESA, as required by ASTM Practice E1527-13, specifically consists of the following four components:

1. Records Review
 - a. Physical settings document review
 - b. Regulatory database records search
 - c. Local municipal agency records search
 - d. Historic use records search
2. Site Reconnaissance
3. Interviews with Past and Present Owners and Occupants
4. Evaluation and Reporting

As stated in Practice E1527-13, there may be environmental issues or conditions at the property, which may be requested by the user to be addressed as part of the Phase I ESA, which are not covered within the scope of ASTM Practice E1527-13. The issues are referred to as non-scope considerations. The following is a list of non-scope considerations, which may be addressed, in a limited capacity within this Phase I ESA:

- Radon
- Lead-Based Paint (LBP)
- Asbestos-Containing Materials (ACM)
- Wetlands
- Mold and Water Damage

1.3 Significant Assumptions

In preparation of the Phase I ESA, it is assumed that information provided within the Environmental Database, regulatory agency records, municipal agency records, as well as information obtained from the user is accurate.

1.4 Limitations and Exceptions

The conclusions presented in this report are professional opinions based on the data described in this report. These opinions have been arrived at in accordance with currently accepted engineering and hydrogeologic standards and practices applicable to this location, and are subject to the following inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the public domain, and interviews with individuals having information about the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration of the site, analysis of data, and re-evaluation of the findings, observations, and conclusions presented in this report.
2. The data reported and the findings, observations, and conclusions expressed are limited by the scope of work and defined in ASTM Practice E1527-13. Any deviations from this scope are defined below. Furthermore, the scope of work was defined and developed pursuant to the request of the Client.
3. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported, findings, observations, or conclusions. These are based solely upon site conditions in existence at the time of the investigation, and other information obtained and reviewed by VHB.
4. VHB's Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report will not be construed to offer legal opinion or representations as to the requirements of, or compliance with, environmental laws, rules, or regulations, or policies of federal, state, or local government agencies. VHB does not assume liability for financial or other losses or subsequent damage caused by or related to any use of this document.
5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such. An evaluation of subsurface soil and groundwater conditions was not performed

as part of this investigation. As at any site, the actual condition of the groundwater and sub-surface soil cannot be determined without further investigation.

6. This report is based, in part, on information supplied to VHB by third-party sources. While efforts have been made to substantiate this third-party information, VHB cannot attest to the completeness or accuracy of information provided by others.
7. The Phase I ESA practice does not include any testing or sampling of materials (e.g., soil, water, air, building materials).

1.5 User Reliance

This report was prepared in July 2020 by Joseph Pressler, Project Scientist, and was supervised by Bryan Murty, Senior Project Manager of VHB at the request of the Metropolitan Transportation Authority (MTA). VHB assumes no liability for use of this report by any person or entity other than the Client, for which it was prepared. Any potential future user of this document would be subject to VHB approval and such user's reliance on this document would be in accordance with the terms and conditions of the original contract.

2.0

Site Description

2.1 Property and Address Location

The subject properties consist of three commercial parcels located on the east side of Madison Avenue, between East 44th Street to the south and East 45th Street to the north in the Borough of Manhattan, City of New York, New York. The subject properties are known by the street addresses of 341, 345 and 347 Madison Avenue (see Figures 1 through 4, Appendix A).

It should be noted that according to the New York City Department of Buildings (NYCDOB), the subject properties are identified by multiple street addresses which are listed as follows:

341 Madison Avenue

- 41 through 45 East 44th Street
- 341 Madison Avenue

345 Madison Avenue

- 343 through 345 Madison Avenue

347 Madison Avenue

- 347 through 355 Madison Avenue
- 30 through 32 East 45th Street

For the purposes of this Phase I ESA, the subject properties addresses will be referred to as 341, 345 and 347 Madison Avenue.

2.1.1 Tax Map Numbers

As previously indicated, the subject properties consist of three (3) contiguous commercial parcels and are identified as follows on the NYC tax maps:

- 347 Madison Avenue- Borough 1 – Block 1279 – Lot No. 48 (hereinafter Lot 48)
- 345 Madison Avenue- Borough 1 – Block 1279 – Lot No. 23 (hereinafter Lot 23)
- 341 Madison Avenue- Borough 1 – Block 1279 – Lot No. 24 (hereinafter Lot 24)

2.1.2 Acreage and Building Size

According to New York City tax maps and records of the New York City Department of Finance, the subject properties consist of three (3) contiguous tax parcels that total approximately 0.51-acre. The following improvements are noted on each parcel that comprise the subject properties:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts that front along Madison Avenue and East 44th Street. According to the New York City Department of Finance (NYCDOF), Lot 24 is approximately 0.06-acre and the building on Lot 24 is approximately 50,840 square feet (s.f.) in size.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail storefront that fronts solely along Madison Avenue. According to the NYCDOF, Lot 23 is approximately 0.11-acre and the building on Lot 23 is approximately 69,086 s.f. in size.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with ground floor retail storefronts that front along Madison Avenue and East 45th Street. According to the NYCDOF, Lot 48 is approximately 0.34-acre and the building on Lot 48 is approximately 231,945 s.f. in size.

2.1.3 Ownership

According to information maintained by the New York City Department of Finance, the current owner of record for each parcel comprising the subject properties is Metro North.

2.1.4 Title Report

No title reports were provided to VHB for review from the Client or property owner(s).

2.1.5 Zoning

According to the City of New York Zoning Maps, the subject properties are located within the C5-3 commercial zoning district, which covers large portions of the East Midtown neighborhood.

2.2 Current Occupancy and Property Use

As previously indicated, the subject properties consist of three (3) contiguous parcels located on the east side of Madison Avenue that total approximately 0.51-acre. The subject properties occupy the entire western portions of the block to the west of Vanderbilt Avenue and contain frontage along Madison Avenue to the west, East 44th Street to the south and East 45th Street to the north. A brief summary of the current occupancy and property use associated with each respective parcel is provided below:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts. The two ground floor storefronts are vacant with one fronting along Madison Avenue and the other along East 44th Street. The remaining portions of the first floor consist of a security and two passenger elevator foyers that are accessible from Madison Avenue and East 44th Street. Vacant commercial office space occupies the floors two-through-19.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail tenant that fronts solely along Madison Avenue. The ground floor retail tenant is vacant and was most recently occupied by a Johnston & Murphy clothing store. The remaining portions of the first floor consist of a security and passenger elevator foyer that is accessible from Madison Avenue. Vacant commercial office space occupies floors two-through-15.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with two ground floor retail tenants that front along Madison Avenue and East 45th Street. Two vacant storefronts are present. A vacant storefront fronting along Madison Avenue is present that was most recently occupied by a J.Crew clothing store. The second

vacant storefront contains frontage along East 45th Street to the north and was most recently occupied by a COSI coffee shop and bistro. The remaining portions of the first floor consist of a security and passenger elevator foyer and connecting corridor that provides access to the COSI retail tenant and the adjacent building to the east. A pedestrian passage that connects underground to Grand Central Terminal is present in the foyer. The building was formerly utilized as the MTA Headquarters. However, office space on the upper floors is currently vacant.

3.0

Site Geology and Hydrogeology

3.1 Topography and Site Characteristics

3.1.1 Elevation

The topography of the site and surrounding area was reviewed from the United States Geological Survey (USGS) 7.5-minute series topographic map for the Central Park, New York (NY) Quadrangle (see Figure 4 in Appendix A). The subject properties have a topographic elevation of approximately 59 feet above mean sea level (amsl). The subject properties are relatively flat with the general topographic gradient sloping downward to the east.

3.1.2 Surface Water Bodies

There are no surface water bodies on or adjacent to the subject properties. The nearest surface water body is the East River, which is located approximately 0.66 mile east of the subject properties.

3.1.3 Soils

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. Soil maps, based on the State Soil Geographic (STATSGO) Database, are compiled by generalizing more detailed Soil Survey Geographic (SSURGO) database maps.

According to the STATSGO data, the soil component in the vicinity of the subject properties are identified as Urban Land and is described as having a variable surface texture. The STATSGO database states that additional subordinant soil types may be

present in the general vicinity of the subject properties. These soil types are described as mainly loamy sand and silt loam. Deeper soil types consist of very gravelly, loamy sand, unweathered bedrock and stratified sandy loam.

Additional information regarding the soil classification is also included on Page A-4 of the Environmental Data Resources, Inc. (EDR) database report (Appendix F).

3.2 Groundwater Characteristics

3.2.1 Depth to the Water Table

No water table elevation maps are available for New York County. Depth to groundwater is estimated to be less than 59 feet below grade surface (bgs).

A review of well data available from the USGS indicates that the nearest USGS monitoring well (Well No. 404506073584001) is located approximately 0.15 mile southeast of the subject properties. The well was installed to a depth of 420 feet bgs. No groundwater measurement data was available for this site.

3.2.2 Groundwater Flow Direction

No groundwater elevation maps are available for New York County. As such, confirmed groundwater flow direction cannot be determined. However, groundwater flow tends to mimic surface topography. As the subject properties are located at a high point on Manhattan Island, groundwater flow is assumed to flow toward the nearest surface water body. In this case, groundwater flow is expected to flow to the east, toward the East River.

3.2.3 Groundwater Classification

Groundwater underlying the subject properties and the surrounding area is categorized as Class GA, a source of potable water supply. This classification requires quality standards to be the most stringent.

3.2.4 Groundwater Quality

As groundwater is not used as a potable water source in the site vicinity, no current groundwater quality data are known to exist for New York County. However, due to the historic high density development associated with Manhattan, groundwater is likely impaired.

3.3 Geology

Manhattan Island is underlain by pre-Cambrian metamorphic rocks which have been tightly folded and subsequently eroded to form northeast-trending low hills and valleys that are most prominent in the northern half of Manhattan. Northwest-trending major faults cross the island in the vicinity of 125th Street and Dyckman Street in northern Manhattan. The rock beneath most of the county is the Manhattan Schist.

The Manhattan Schist is a dark-gray to black micaceous rock composed of biotite, muscovite, quartz, feldspar and smaller amounts of accessory minerals, and locally containing dikes and veins of pegmatitic material. The rock contains some joints, irregular fractures, and faults along which groundwater moves, but in some places chemical weathering has filled these openings with clay, an end product of rock weathering. The Manhattan Schist formation underlies more than three-fourths of Manhattan, is of varied topography, and is not considered to be an important source of groundwater.

The Inwood Limestone underlies two small areas in the northern half of the county and the surrounding tidal channels. In addition, a narrow belt of limestone also extends across the southeastern portion of the county near the East River. The Fordham Gneiss crops out in a few places in the northern half of Manhattan, and it underlies several islands in the East River between Manhattan and Queens.

In most areas, the pre-Cambrian rocks are overlain by a thin covering of unconsolidated Pleistocene deposits consisting chiefly of till and stratified drift. The till was deposited as ground moraine, is discontinuous, and less than 25 feet thick in most areas. It is not a productive aquifer because it is thin and of low permeability. There are a few small deposits of Recent age in northern Manhattan and in the tidal channels bordering the County, but they have no practical value as sources of groundwater.

However, there are two sizeable areas where there is a significant thickness of stratified glacial deposits which have accumulated in depressions on the bedrock surface. One of these areas is located in southern Manhattan with a depth of approximately 250 feet below grade surface (Delancy Street), and in the north-central part of the island (depth of approximately 175 feet below grade surface). These two depressed areas contain most of the available groundwater in the County. The depressions may have resulted from one or more processes including faulting, solution of limestone, and glacial erosion.

The smaller, northern depression, which actually consists of several depressions having different depths, is situated along a major fault zone in the area of 125th Street. This depression extends northwest across Manhattan from 96th Street and the East River to about 145th Street and the Hudson River. The stratified drift

consisting of sand, gravel and clay ranges in thickness from about 25 feet on the perimeter of the depressed area to as much as 175 feet at central areas.

The second body of stratified drift that contains large amounts of groundwater covers all the island south of 14th Street. The deposits consist mostly of sand, although beds of gravel and clay are also present. The thickness of the stratified material averages about 100 feet and may be as much as 250 feet.

4.0

Site History

4.1 Municipal Records Review

Local government record keeping, pertaining to the subject properties being located in the Borough of Manhattan, City of New York, New York County, New York, is under the jurisdiction of the following agencies:

Agency Name	Type of Records Maintained	Date Freedom of Information Request Submitted	Date of Agency Response, Records Review or Records Receipt
City of New York, Department of Finance	Tax assessment records, parcel/Building size, ownership.	N/A	On-line database review conducted July 9, 2020.
City of New York Department of Buildings	Building permit applications, building permits, site plans, surveys.	N/A	On-line database review conducted July 9, 2020.
City of New York Fire Department	Fire prevention violations, registration of underground and aboveground petroleum and motor vehicle fuel storage tanks.	April 11, 2016/ July 8, 2020	FDNY Tanks Section: Response received on April 18, 2016. Updated response pending. FDNY Violations Section: Response received on April 25, 2016. Updated response pending.
City of New York Department of Health (NYCDOH)	Environmental investigations, lead-based paint poisoning, asbestos.	April 11, 2016 / July 2, 2020	Responses received April 25, 2016. Updated response pending.
City of New York Department of Environmental	Sewer and water records, lead-paint, asbestos, emergency response, air,	April 11, 2016 / July 2, 2020	No prior responses received. Updated response pending.

Agency Name	Type of Records Maintained	Date Freedom of Information Request Submitted	Date of Agency Response, Records Review or Records Receipt
Protection	noise, permitting and enforcement.		
New York State Department of Environmental Conservation, Region Two	Spill incidents records.	July 10, 2020	Response pending.

Copies of local government correspondence and/or records are provided in Appendix C. Pertinent records, if any, which have not yet been provided or made available for review by the above-listed local government agencies will be provided as an addendum to this report.

Summary of Records Reviewed/Obtained as of the Date of Report Issuance

New York City Department of Finance (NYCDOF)

The following is a summary of pertinent information obtained:

Tax Lot: Borough 1 – Block 1279 – Lot No. 48
 Address: 347 Madison Avenue
 Owner: Metro North
 Lot Size: 125.42-feet-by-125-feet
 Building Size: 15,000 square feet
 Building Class: O9 – Office Buildings

Tax Lot: Borough 1 – Block 1279 – Lot No. 23
 Address: 343 Madison Avenue
 Owner: MTA-Metro North
 Lot Size: 50-feet-by-100-feet
 Building Size: 5,000 square feet
 Building Class: O6 – Office Buildings

Tax Lot: Borough 1 – Block 1279 – Lot No. 24
 Address: 341 Madison Avenue
 Owner: MTA-Metro North

Lot Size: 25.42-feet-by-100-feet
Building Size: 2,541 square feet
Building Class: O3 – Office Buildings

New York City Department of Buildings

The New York City Department of Buildings (NYCDOB) computerized Property Profile Overviews (PPOs) were reviewed on July 9, 2020 for each parcel that comprises the subject properties. Based upon a review of the PPO for the subject properties, the following information was obtained:

Lot 48

A Certificate of Occupancy (C/O) was issued in 1922 for a 20-story bank and office building with a cellar.¹ It should be noted that this C/O supersedes several previous C/Os dated in the late 1910s. Numerous Building Notices and Elevator violations exist for this parcel. Furthermore, several plumbing, sign and alteration permits were issued for this parcel. Several active NYCDOB Building violations are listed for this parcel that are construction and elevator-related. It should also be noted that a stop work order was issued by the NYCDOB in June 2019 due to interior work being performed without a permit. However, none of the alteration permits, building violations or other building notices reviewed on the NYCDOB PPO are noted to be of significant environmental concern.

Lot 23

A C/O (C/O No. 4931, dated 1922) was issued for a 12-story office building with stores and a cellar.² Numerous Building Notices and Elevator violations exist for this parcel. Furthermore, several plumbing, sign and alteration permits were issued for this parcel. Several active NYCDOB Building violations are listed for this parcel that are construction and elevator-related. None of the alteration permits, building violations or other building notices reviewed on the NYCDOB PPO are noted to be of significant environmental concern.

Lot 24

A C/O (C/O No. 11864, dated December 13, 1926) was issued for a 19-story office building with stores and a cellar.³ Numerous Building Notices and Elevator

¹ It should be noted that based upon historical Sanborn maps, the building on Lot 48 was constructed circa 1918, and that the building is currently 20-stories based upon the visual inspection.

² It should be noted that based upon historical Sanborn maps, the building on Lot 48 was constructed circa 1921, and that the building is currently 15-stories based upon the visual inspection.

³ It should be noted that based upon historical Sanborn maps, the building on Lot 48 was constructed circa 1925.

violations exist for this parcel. Furthermore, several plumbing, sign and alteration permits were issued for this parcel. Several active NYCDOB Building violations are listed for this parcel that are construction and elevator-related. None of the alteration permits, building violations or other building notices reviewed on the NYCDOB PPO are noted to be of significant environmental concern.

Copies of the NYCDOB information are included in Appendix C.

New York City Fire Department (FDNY)

Freedom of Information Law (FOIL) applications were previously submitted to the New York City Fire Department (FDNY) on April 11, 2016. Responses were received from the FDNY Tanks Section, dated April 18, 2016 that indicated no tank registries or records were found for the subject properties. Responses were received from the FDNY Violations Section on April 25, 2016 that indicated each parcel that comprise the subject properties received notices of violation in the areas of sprinkler and reporting requirements. None of the noted violations listed by the FDNY are of significant environmental risk with respect to the scope of this Phase I ESA. Updated FOIL applications were submitted to FDNY on July 8, 2020. Responses from this agency were pending at the issuance of this Phase I ESA. Should any pertinent information be provided that affect the findings, conclusions and/or recommendations set forth in this Phase I ESA, same will be forwarded as an addendum to this Phase I ESA.

New York City Department of Health

A FOIL application was previously submitted to the New York City Department of Health (NYCDOH) on April 11, 2016. Responses were received from this agency, dated April 25, 2016 that indicated no environmental records were found for the subject properties. An updated FOIL application was submitted to NYCDOH on July 2, 2020. No response from this agency has been received to date. Should any pertinent information be received from this agency that affect the findings, conclusions and/or recommendations set forth in this Phase I ESA, same will be forwarded as an addendum to this Phase I ESA.

New York City Department of Environmental Protection

A previous FOIL application was forwarded to the New York City Department of Environmental Protection (NYCDEP) on April 11, 2016. No previous responses were received from this agency. An updated FOIL application was submitted to NYCDEP on July 2, 2020. No response from this agency has been received to

date. Should any pertinent information be received from this agency that affect the findings, conclusions and/or recommendations set forth in this Phase I ESA, same will be forwarded as an addendum to this Phase I ESA.

New York State Department of Environmental Conservation, Region Two

The subject properties did not appear on any NYSDEC listings including the EDR database report and Spill Incident database. One NYSDEC spill incident (Spill No. 99-12831) is located adjacent to the north and associated with the Roosevelt Hotel. According to spill information provided in the EDR database report, this spill case was opened February 10, 2000 due to the release of approximately 200 gallons of No. 4 fuel oil into the tank room. The NYSDEC issued a letter of no further action on March 4, 2003; however, cleanup does not meet standards. Based upon the closure of the spill incident and the hydraulically crossgradient location, it is unlikely this site presents a significant environmental risk to the subject properties. However, for precautionary reasons, VHB submitted a FOIL application to the NYSDEC requesting spill records. No spill records have been provided to date. Should any pertinent spill records become available that affect the findings, conclusions and/or recommendations set forth herein, same will be forwarded as an addendum to this Phase I ESA.

4.2 Historical Resources Review

4.2.1 Sanborn Fire Insurance Map Review

EDR conducted a search of available Sanborn Fire Insurance Maps for the subject properties and immediate surrounding area. Fire Insurance Maps were provided for the years 1890, 1899, 1910, 1929, 1950, 1968, 1980, 1983, 1985, 1987, 1988, 1991-1996 and 2001-2005 (Appendix D). The following is a summary of information provided within the aforementioned Sanborn Maps:

Date	Comments
1890	<p>Subject Properties: Lot 48 is improved with a six-story building that occupies the majority of the parcel which is depicted as the "Manhattan Athletic Club." Lot 23 is depicted as two separate parcels of similar size and improved with two (2) four-story buildings (likely mixed-use) that occupy portions of the parcels fronting along Madison Avenue. Lot 24 is improved with a three-story and partial four-story building (likely mixed-use) that occupies the entire parcel.</p> <p>Surrounding Properties: The adjacent properties to the east consist of four- and five-story buildings along East 44th and East 45th Streets, along with a Hotel. The adjacent properties to the north consist of a Men's Club with railroad car sheds. The adjacent properties to the west consist of three- and four-story buildings (likely mixed-use) across Madison Avenue. The adjacent properties to the south are depicted as a vacant block. Grand Central Depot is depicted to the east, with numerous rail spurs and platforms. Although not indicated, it is likely that rail spurs are present on the northern adjacent block given the presence of railroad car sheds. The remaining surrounding properties are densely developed with multi-story buildings (likely mixed-use) on neighboring roadways.</p>
1899	<p>Subject Properties: The subject properties are similar to the 1890 Sanborn map depiction. However, the building occupying Lot 48 is depicted as the "Knickerbocker Athletic Club."</p> <p>Surrounding Properties: The Men's Club to the north has been expanded. Furthermore, the adjacent property to the north is depicted with numerous rail spurs associated with Grand Central Depot. The remaining adjacent and surrounding properties are similar to their 1890 Sanborn map depictions.</p>
1910	<p>Subject Properties: The subject properties are similar to their 1899 Sanborn map configurations. However, the building on Lot 48 is depicted as "Tiffany Studio."</p> <p>Surrounding Properties: The adjacent properties are similar to their 1899 Sanborn map depictions. However, the adjacent property to the south is improved with a three-story building that occupies the entire parcel that is depicted as "American Express Co." Grand Central Terminal to the east has been constructed overhead of the existing rail tracks.</p>
1929	<p>Subject Properties: The subject properties are improved with the existing buildings located on Lots 48, 23 and 24. Specifically, the building on Lot 48 is indicated as the "Equitable Trust Building" constructed in 1918 with elevators. The building on Lot 23 is improved with a building reportedly constructed in 1921 and depicted as the "American Bond & Mortgage Building." The building on Lot 24 was reportedly constructed in 1925 and is depicted as an office building.</p> <p>Surrounding Properties: The adjacent property along East 44th Street is similar to the 1910 Sanborn map depictions. The adjacent properties to the east, with frontage along Vanderbilt Avenue are improved with the existing multi-story buildings, including the Yale Club and the Vanderbilt Concourse Building. It should be noted that the adjacent properties to the east, with frontage along Vanderbilt Avenue are noted as "Constructed over New York City Railroad Tracks." The adjacent property to the south is of similar configuration to the 1910 Sanborn map depiction. However, same is indicated as the "Biltmore Hotel" and incoming station of the New York Central Lines. The remaining surrounding properties are similar to their 1910 Sanborn map depictions, consisting of densely developed commercial and residential buildings.</p>

1950	Subject and Surrounding Properties: The subject, adjacent and surrounding properties are generally consistent with their 1929 Sanborn map depictions.
1968	<p>Subject Properties: The subject properties are similar to their 1950 Sanborn map depictions.</p> <p>Surrounding Properties: The adjacent and surrounding properties are generally similar to their 1950 Sanborn map depictions. However, the existing high rise has been constructed over Grand Central Terminal to the east and is indicated as the "Pan American Building."</p>
1980-2005	Subject and Surrounding Properties: The subject, adjacent and surrounding properties are generally consistent with their 1968 Sanborn map depictions.

Based on a review of historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at this time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

Given the presence of an existing full basements within the on-site buildings, any potential demolition debris or fill material associated with the former on-site buildings identified in previous Sanborn maps would have been removed as part of construction of the current buildings during their respective redevelopment year(s). As such, the former presence of on-site buildings on the subject properties do not represent a significant environmental risk.

It should be noted that an adjacent rail depot was identified to the north on Sanborn maps as early as 1890 through at least 1910. The adjacent buildings to the east, northeast and southeast are also depicted on Sanborn maps as constructed overhead of subgrade railroad tracks. The current and historical presence of rail tracks adjacent to the subject properties are attributed to Grand Central Terminal located to the east of Vanderbilt Avenue. Based upon information provided by site representatives and representatives of MTA, there are no current or historical rail tracks (i.e., subway, commuter or service rail) that traverse below the subject properties. However, given the current and historical presence of adjacent mass transit rail spurs, there is a potential for subsurface impacts at the subject properties associated with these adjacent rail uses. Same represents a REC for the subject properties.

4.2.2 Historical Aerial Photograph Review

EDR conducted a search and provided copies of available historical aerial photographs showing the subject and surrounding properties. VHB performed a review of aerial photographs available from EDR (1924, 1940, 1951, 1954, 1961, 1966, 1974, 1976, 1980, 1984, 1991, 1994, 2006, 2010, 2013 and 2017) to identify information regarding past uses of the subject and surrounding properties to determine if historical usage represented an environmental risk. Copies of the EDR Historical Aerial Photograph search are included in Appendix E.

The following is a summary of information provided within the aforementioned historical aerial photographs:

Date	Comments
1924	<p>Subject Properties: The subject properties are improved with the existing buildings located on Lot Nos. 48 and 23, which is consistent with Sanborn map depictions. Lot No. 24 is depicted as vacant and potentially under construction, also consistent with Sanborn map depictions.</p> <p>Surrounding Properties: The adjacent properties to the east that front along East 44th Street to the south and Vanderbilt Avenue to the east are improved with the existing buildings. The adjacent building to the north is improved with the existing multi-story commercial building. The buildings to the south and west are improved with multi-story commercial buildings. Grand Central Terminal is depicted to the east of the subject properties. The surrounding properties are improved with densely developed residential apartment buildings, commercial buildings and mixed-use buildings.</p>
1940-1954	<p>Subject and Surrounding Properties: The building at Lot 24 is present, and the subject, adjacent and surrounding properties are similar to their 1924 aerial photograph depictions.</p>
1961	<p>Subject Properties: The subject properties is similar to the 1954 aerial photograph depiction.</p> <p>Surrounding Properties: The adjacent properties are similar to their 1954 aerial photograph depictions. The existing MetLife Building is under construction to the east of the subject properties. The remaining surrounding properties are more densely developed with commercial high rises, characteristic of Midtown Manhattan.</p>
1966-1980	<p>Subject Properties: The subject properties are similar to the 1961 aerial photograph depiction.</p> <p>Surrounding Properties: The adjacent properties and majority of surrounding properties are similar to their 1954 aerial photograph depictions. The MetLife Building has been completed to the east.</p>
1984-2017	<p>Subject Properties: The subject properties are similar to the 1980 aerial photograph depiction.</p> <p>Surrounding Properties: The adjacent properties and majority of surrounding properties are similar to their 1954 aerial photograph depictions. The existing commercial office building adjacent to the south has been constructed.</p>

Based upon a review of historical aerial photographs, Lot Nos. 48 and 23 were improved with the existing multi-story buildings as early as 1924. Lot 24 was vacant and under redevelopment as early as 1924. By 1945, the subject properties were at their current configurations.

The historical aerial photographs reviewed do not indicate the presence of debris, dumping or historical water bodies at the subject properties.

4.2.3 Previous Environmental Site Assessments

No previous Environmental Site Assessments or additional documentation were provided to VHB for review and inclusion as part of this Phase I ESA.

4.2.4 Activity and Use Limitation

A search was conducted for Activity and Use Limitations (AULs) associated with the subject properties, more specifically Institutional Controls (ICs) and/or Engineering Controls (ECs), which have been placed upon the property as a result of environmental issue identified at the property.

No environmental liens or AULs were identified for the subject properties as a result of the search.

4.2.5 Summary of Site History

Based upon a review of municipal records, historical Sanborn maps and aerial photographs, VHB was able to establish a history for the subject properties dating back to 1890. According to historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at that time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

As previously indicated, the subject properties consist of three (3) contiguous parcels located on the east side of Madison Avenue that total approximately 0.51-acre. The subject properties occupy the entire western portions of the block

to the west of Vanderbilt Avenue and contain frontage along Madison Avenue to the west, East 44th Street to the south and East 45th Street to the north. A brief summary of the current occupancy and property use associated with each respective parcel is provided, below:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts. The two ground floor storefronts are vacant with one fronting along Madison Avenue and the other along East 44th Street. The remaining portions of the first floor consist of a security and two passenger elevator foyers that are accessible from Madison Avenue and East 44th Street. Vacant commercial office space occupies the floors two-through-19.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail tenant that fronts solely along Madison Avenue. The ground floor retail tenant is vacant and was most recently occupied by a Johnston & Murphy clothing store. The remaining portions of the first floor consist of a security and passenger elevator foyer that is accessible from Madison Avenue. Vacant commercial office space occupies floors two-through-15.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with two ground floor retail tenants that front along Madison Avenue and East 45th Street. Two vacant storefronts are present. A vacant storefront fronting along Madison Avenue is present that was most recently occupied by a J.Crew clothing store. The second vacant storefront contains frontage along East 45th Street to the north and was most recently occupied by a COSI coffee shop and bistro. The remaining portions of the first floor consist of a security and passenger elevator foyer and connecting corridor that provides access to the COSI retail tenant and the adjacent building to the east. A pedestrian passage that connects underground to Grand Central Terminal is present in the foyer. The building was formerly utilized as the MTA Headquarters. However, office space on the upper floors is currently vacant.

USEPA	Fuels Program Registered Listing	FUELS PROGRAM	0.25 mile	No	12

The subject properties were identified on the RCRA No Longer Regulated Hazardous Waste Generators (RCRA-NonGen) database for two (2) separate listings under the names "MTA Metro North Railroad" and "Con Ed-Metro North Railroad," both listed for the address 347 Madison Avenue. RCRA-NonGen sites that do not presently generate hazardous waste, but may have historically. The subject properties are listed for the historic generation of ignitable wastes, cadmium, lead, arsenic and mercury. There are no unresolved violations associated the subject properties listings on the RCRA-NonGen database, and there is no reported evidence that suggests this listing represents a significant environmental risk to the subject properties. In addition, no evidence of storage handling/disposal of these items were observed during the visual inspection. Furthermore, the RCRA-NonGen listings are identified as Metro North, which may indicate that the shipment of hazardous waste may be administratively addressed to the subject properties, but may not have been directly generated at the site.

In addition to the 27 federal databases with search radii of one-eighth of a mile to one mile, 21 additional federal databases were searched to determine if the subject properties were listed. These databases include Federal Superfund Liens (NPL Liens), Hazardous Material Information Reporting System (HMIRS), Enforcement and Compliance History Information (ECHO), USEPA Watch List (WL), Section 7 Tracking System (SSTS), Integrated Compliance Information System (ICIS), Radiation Information Database (RADINFO), FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act), A listing of FIFRA/TSCA Tracking System (FTTS), Historic FTTS sites (HISTFTTS), US Department of Transportation Incident and Accident Date (DOT OPS), Clandestine Drug Labs (CDL), Historical Clandestine Drug Labs (HCDL), CERCLA Lien information (LEINS2), Risk Management Plans (RMP), Potentially Responsible Parties (PRP), PCB Activity Database System (PADS), RCRA Administrative Action Tracking System (RAATS), PCB Transformer Registration Database (PCBTRD), Coal Ash – DOE (CADOE), Lead Smelters (LS), Facility Index System (FINDS), Aerometric Information Retrieval System Facility Subsystem (US AIRS), and Financial Assurance Information Listing (FAIL).

The subject properties are listed on the following additional databases:

- The subject properties are listed on the ECHO database as “MTA Metro North Railroad” and “Con Ed- Metro North Railroad.” The subject properties are listed on the USEPA ECHO system database due the status as a RCRA-NonGen facility.
- The subject properties are listed on the FTTS and HISTFTTS databases under the name “MTA Metro North Railroad” (Docket Number PCB-92-0219) due to failure to report polychlorinated biphenyl (PCB)-containing material. According to the EDR database report the complaint was reported on June 30, 1992 and a final order/closure was issued on April 5, 1994. Given the resolved status of this docket number, there is no reported evidence that suggests this site represents a significant environmental risk to the subject properties.
- The subject properties are listed on the FTTS and HISTFTTS databases under the name “Metro-North Commuter Railroad” (Docket Number PCB-88-0225) due to failure to maintain PCB records and PCB storage requirements. According to the EDR database report the complaint was reported on March 28, 1988 and a final order/closure was issued on August 22, 1988. Given the resolved status of this docket number, there is no reported evidence that suggests this site represents a significant environmental risk to the subject properties.
- The subject properties are listed on the RAATS database under the name “MTA Metro North Railroad.” The RAATS database contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the USEPA. The subject properties are listed on the RAATS database due to compliance orders from the

USEPA in 1986. The compliance orders reportedly also achieved compliance in 1986. As such, it is unlikely this listing represents a significant environmental risk.

- The subject properties are listed on the Facility Index System (FINDS) database. The FINDS database is a compilation of information contained in several major and minor federal environmental databases. It contains some facility information, but mostly provides leads to the individual databases or other sources which contain more information. EDR includes the following minor databases in the FINDS index: Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS) Facility Subsystem (AFS); environment statute civil and criminal enforcement dockets (DOCKET and C-DOCKET); Federal Underground Injection Control (FURS); Federal Facilities Information System (FFIS); State Environmental Laws and Statutes (STATE); and PCB Activity Data System (PADS). The subject properties are identified on the FINDS database for two separate listings, "MTA Metro North Railroad" and "Con Ed – Metro North Railroad." The subject properties are listed on the FINDS database due to their inclusion on the RCRA-NonGen database. As previously indicated, there are no unresolved violations, and it is unlikely the subject properties inclusions on the FINDS database represents a significant environmental risk.

As previously indicated, the above listings for the subject properties at 347 Madison Avenue listings are identified as Metro North, which indicates the sites may be administratively addressed to the subject properties, but may not have been directly generated at the site.

A review of the EDR database report has revealed that there is one FUSRAP site, two FUDS sites and four CONSENT sites within one mile; one SEMS site and one SEMS-ARCHIVE within one-half mile; 12 FUELS PROGRAM sites, 24 RCRA-LQG facilities, 17 RCRA-SQG facilities, 10 RCRA-VSQG facilities and 433 RCRA-NonGen facilities within one-quarter mile of the subject properties.

Formerly Utilized Sites Remedial Action Program (FUSRAP)

This database contains a listing of FUSRAP sites. The FUSRAP was established by the United States Department of Energy to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (EAC) operations. The one FUSRAP site listed on the EDR database report is summarized as follows:

- Radiation Application Inc., 370 Lexington Avenue, located approximately 0.230 mile south-southeast and hydraulically crossgradient/downgradient with respect to groundwater flow. According to the EDR database report, this site developed foam separation techniques and proposed investigations to remove cesium and strontium from fission product waste solutions. There was no indication that a substantial quantity of radioactive material was involved at this site, and it was determined that the potential for contamination is considered remote. No further

information was provided in the EDR database report. Given the information provided in the EDR database report, it is unlikely this site represents a significant environmental risk to the subject properties.

Formerly Used Defense Sites (FUDS)

The FUDS database contains a listing of properties where the United States Army Corps of Engineers (USACOE) is actively working or will take necessary cleanup actions. The two (2) FUDS sites listed on the EDR database report are summarized as follows:

- Org Res Corps Site, New York, NY, located approximately 0.21 mile to the west of the subject properties and hydraulically upgradient with respect to groundwater flow. According to the EDR database report, this is an eligible site which has no active projects. No further pertinent information was provided in the EDR database report. Given the information provided in the EDR database report, it is unlikely this site represents a significant environmental risk to the subject properties.
- Lang Products Co., New York, NY, located approximately 0.39 mile to the south-southwest of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this site is ineligible and has no active projects. No further pertinent information was provided in the EDR database report. Given the information provided in the EDR database report, it is unlikely this site represents a significant environmental risk to the subject properties.

CERCLA Consent Decrees (CONSENT)

Facilities on this database are NPL sites that have been involved in major legal settlements that establish responsibility and standards for cleanup. The four (4) CONSENT sites listed on the EDR database report are listed under the same address and are summarized as follows:

- Glencore LTD., 330 Madison Avenue, located approximately 0.08 mile to the south of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this site is a renewable fuel importer. No further pertinent information was provided in the EDR database report. Given the information provided in the EDR database report, it is unlikely this site represents a significant environmental risk to the subject properties.

Superfund Enterprise Management System (SEMS)

The SEMS database contains information on potentially hazardous waste sites that have been reported to the USEPA by States, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental

Response, Compensation and Liability Act (CERCLA). The SEMS database contains sites which are either proposed to, or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL. This database was formerly known as the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) until renamed to SEMS by the USEPA in 2015. The one SEMS site listed on the EDR database report is summarized as follows:

- Con Edison NYC Steam Explosion, Lexington Avenue Between 42nd and 41st, located approximately 0.230 mile southeast and hydraulically crossgradient/downgradient with respect to groundwater flow. According to the EDR database report, this SEMS facility is related to a cleanup that was conducted due to a large steam pipe explosion in Midtown. The site is not listed on the NPL database. No further information was provided in the EDR database report. However, given the distance and hydraulically crossgradient/downgradient location with respect to groundwater flow, it is unlikely this site represents a significant environmental risk to the subject properties.

Superfund Enterprise Management System Archive (SEMS-ARCHIVE)

SEMS-ARCHIVE sites are archived sites that have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of the USEPA's knowledge, assessment at a site has been completed and the USEPA has determined that no further steps will be taken to list the site on the NPL, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the site is not judged to be a potential NPL site. This database was formerly known as the CERCLIS-NFRAP database until renamed to SEMS-ARCHIVE by the USEPA in 2015. The one SEMS-ARCHIVE site listed on the EDR database report is summarized as follows:

- Anchor Casting Co. Inc., 38 West 48th Street, located approximately 0.25 mile north-northwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, a discovery site assessment was completed on August 24, 1990 and the site was archived on June 27, 1991, when it was determined the site did not qualify for the NPL based upon the existing information. No further information was provided in the EDR database report. However, given the distance and hydraulically crossgradient location with respect to groundwater flow, it is unlikely this site represents a significant environmental risk to the subject properties.

Resource Conservation and Recovery Act – Large Quantity, Small Quantity, Very Small Quantity and No Longer Regulated Hazardous Waste Generators (RCRA-LQG, RCRA-SQG, RCRA-VSOGs and RCRA-NonGen)

RCRA information is the USEPA's comprehensive information and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on-site which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. RCRA large quantity hazardous waste generators (RCRA-LQGs) generate over 1,000 kilograms (kg) of hazardous waste or over one kg of acutely hazardous waste per month. RCRA small quantity hazardous waste generators (RCRA-SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. RCRA very small quantity hazardous waste generators (RCRA-VSOGs) generate less than 100 kg of hazardous waste, or less than one kg of acutely hazardous waste per month. RCRA no longer regulated hazardous waste generators (RCRA-NonGens) sites do not presently generate hazardous waste. There were no unresolved violations listed for the listed for the 24 RCRA-LGQ, 17 RCRA-SQG, 10 RCRA-CESQG and 433 RCRA-NonGen hazardous waste generator facilities, and there is no reported evidence that suggests these facilities present a significant environmental risk to the subject properties. In addition, 23 of the 24 RCRA-LGQ facilities, each of the 17 RCRA-SQG facilities, nine (9) of the 10 RCRA-VSOG facilities and 422 of the 433 RCRA-NonGen hazardous waste generator facilities are not located adjacent to the subject properties. The one (1) RCRA-LQG, one (1) RCRA-VSOG and 11 RCRA-NonGen facilities located adjacent to the subject properties are summarized as follows:

- Con Edison – Manhole 50236, 342 Madison Avenue, located adjacent to the southwest of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this RCRA-LQG facility. According to the EDR database, an unknown quantity of lead was generated from this site in 2017. Based up the absence of any RCRA violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Jones Lang Lasalle, 335 Madison Avenue – Loading Dock, located adjacent to the south of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this RCRA-VSOG facility. Based upon the available manifest information, one shipment of containing 60 pounds of corrosive waste was reported in 2003. Based up the absence of any RCRA violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Con Edison Vault: 7999, 32 East 45th Street, located adjacent to the northwest of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this RCRA-NonGen facility. Based upon the available manifest information, one shipment of waste was reported in 2014. Based up the absence

of any RCRA violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.

- Bell Atlantic-NY, 45 Street / Madison Avenue, located adjacent to the northwest and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this site. As there are no violations reported for this facility, and based upon the crossgradient location, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- 350 Madison Properties LLC, 350 Madison Avenue, located adjacent to the west and hydraulically upgradient with respect to groundwater flow. This RCRA-NonGen facility generated wastes containing corrosive waste, ignitable waste, lead, halogenated solvents, and non-halogenated solvents. As there are no violations reported for this facility, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Con Edison Vault Box: 227, 41 East 45th Street, located adjacent to the east and hydraulically downgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this RCRA-NonGen facility. Based upon the available manifest information, one shipment of waste was reported in 2000. As there are no violations reported for this facility, and based upon the downgradient location, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Con Edison V: 775, 41 East 45th Street, located adjacent to the north and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this vault. Based upon the available manifest information, one shipment of petroleum/PCB oil was reported in 1997. As there are no violations reported for this facility, and based upon the crossgradient location, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Bank of America C.O Lasalle Partner, 335 Madison Avenue, located adjacent to the south and hydraulically downgradient / crossgradient with respect to groundwater flow. This RCRA-NonGen facility generated wastes containing mercury. As there are no violations reported for this facility, and based upon the downgradient / crossgradient location, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Con Edison Service Box: 50237, 333 Madison Avenue, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. According to the database, there are no reported violations associated with this RCRA-NonGen facility. Based upon the available manifest information, one shipment of waste was reported in 2012. Based upon the lack of violations, it is

unlikely that this facility represents a significant environmental risk to the subject properties.

- Con Edison Vault: 9542, 52 E 44th Street, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, there are no reported violations associated with this RCRA-NonGen facility. Based upon the lack of violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Con Edison Vault: 8341, 52 E 44th Street, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, there are no reported violations associated with this RCRA-NonGen facility. Based upon the lack of violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Speed Graphics Inc., 342 Madison Avenue, located adjacent to the west-southwest, beyond Madison Avenue, and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, there are no reported violations associated with this RCRA-NonGen facility. Based upon the available manifest information, one shipment of non-listed ignitable wastes was reported in 1999. Based up the lack of violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- Hannan Medical Laboratory, 342 Madison Avenue, located adjacent to the west-southwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, there are no reported violations associated with this RCRA-NonGen facility. Based up the lack of violations, it is unlikely that this facility represents a significant environmental risk to the subject properties.

USEPA Fuels Program Registered Listing (FUELS PROGRAM)

This database includes facilities that are registered under CFR Part 80 USEPA Fuels Programs. None of the 12 FUELS PROGRAM sites identified in the EDR database are located adjacent to the subject properties, and there is no reported evidence that suggests these sites are a significant environmental risk to the subject properties.

There were no additional federal database listings in the EDR database report.

5.2 New York State Databases

Agency	Listing Name or Database Searched	Abbreviation	Search Distance	Subject Properties Listed?	No. of Sites within the Search Radius
NYSDEC	Inactive Hazardous Waste Disposal Sites, including De-listed Sites	SHWS	1.0 mile	No	1 SHWS 0 Del SHWS
NYSDEC	Vapor Intrusion Legacy Site List	VAPOR	1.0 mile	No	0
NYSDEC	Hazardous Substance Waste Disposal Site	HSWDS	0.5 mile	No	0
NYSDEC	Solid Waste Facilities/Landfill Sites	SWF/LF	0.5 mile	No	0
NYSDEC	Registered Recycling Facility List	SWRCY	0.5 mile	No	0

NYSDEC	Facility and Manifest Data	MANIFEST	0.25 mile	Yes	739
NYSDEC	Registered Drycleaning Facilities	DRYCLEANERS	0.25 mile	No	1
NYSDEC	Coal Ash Disposal Sites List	CADS	0.5 mile	No	0

The subject properties are listed on the MANIFEST database as “MTA Metro North Railroad” and “Con Ed – Metro North Railroad” addressed at 347 Madison Avenue. The MANIFEST database provides information on hazardous waste shipments and the generators of such shipments, as well as tracking the waste transported and listing the waste disposal facility. According to the EDR database report, the subject properties were listed in the MANIFEST database due to shipments of mercury waste in 2002 and a shipment of lead in 2008. No RCRA violations are listed for the subject properties. As such, same is unlikely to present a significant environmental risk. It should be noted that the MANIFEST listings for the subject properties are identified as Metro North, which may indicate that the shipment of hazardous waste may be administratively addressed to the subject properties, but may not have been directly generated at the site.

In addition to the 21 New York State (NYS) and NYC databases with search radii of one-eighth of a mile to one mile, seven additional NYS databases, the New York Spill Liens database (NY LIENS), the State Pollutant Discharge Elimination System (SPDES), Air Emissions Data (AIRS), New York Financial Assurance Information Listing (NYFAIL), Historic Aboveground Storage Tanks (Hist-AST), Historic Underground Storage Tanks (Hist-UST) and Underground Injection Control Wells (UIC) were searched to determine if the subject properties were listed. The subject properties was identified on the SPDES database under “Metro North Commuter Railroad.” Based upon the lack of information on the EDR database report, this listing is unlikely to represent a significant environmental risk to the subject properties. It should be noted that the SPDES listing for the subject properties are identified as Metro North, which may indicate that the SPDES permits may be administratively addressed to the subject properties, but may not have been permitted for the subject properties.

A review of the EDR report has revealed that there are one (1) SHWS site within one mile; three (3) VCP sites, 97 LTANKS sites and six (6) MOSF facilities within one-half mile; 13 PBS-UST, 92 PBS-AST, 739 MANIFEST, one (1) CBS facility and one (1) DRYCLEANERS site within one-quarter mile; and 66 NYSPILLS and 24 E-Designation sites within one-eighth mile of the subject properties.

New York State Hazardous Waste Sites (SHWS)

The SHWS database is the State's equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The one (1) SHWS site listed in the EDR database report is summarized as follows:

- East 60th Street Steam Station, 514 East 60th Street, located approximately 0.98 mile east-northeast and hydraulically downgradient of the subject properties. According to the EDR database report, the primary contaminant of concern at this site is mercury. Initial investigations identified mercury in the facility's SPDES discharge, which prompted the investigation of potential source areas. The source of mercury was identified to be a concrete trench drain in the basement of the facility. According to the EDR database report, 4.5 pounds of liquid mercury and approximately 4.3 cubic yards of mercury impacted soil and concrete were removed during remediation activities. Given the distance and hydraulically downgradient location, it is unlikely this facility represents a significant environmental risk to the subject properties.

Leaking Underground Storage Tanks (LTANKS)

LTANKS records contain an inventory of reported leaking storage tank incidents. They can be either leaking USTs or leaking ASTs. The causes of the incidents are tank test failures, tank failures or tank overfills. Ninety-five of the 97 LTANKS sites listed in the database were issued letters of no further action by the NYSDEC, and there is no reported evidence in the database search which suggests that these sites are a significant environmental concern to the subject properties. In addition, none of the listed 97 LTANKS sites are located adjacent to the subject properties. The two active LTANKS sites are summarized as follows:

- NYSDEC Spill No. 19-02445, Con Edison Service Box: 7733, 80 West 40th Street, located approximately 0.35 mile west and hydraulically upgradient of the subject properties. According to the EDR database report, this spill case was opened June 7, 2019 due to a tank test failure of a 4,000-gallon fuel oil tank. According to the EDR database report, the leak was remediated and the tank will be removed. However, no further information is provided in the EDR database report. Given the distance from the subject properties, it is unlikely that this potential release has impacted the subject properties.
- NYSDEC Spill No. 13-01250, Watton Studio TTF, 333 Park Ave South, located approximately 0.30 mile northeast and hydraulically crossgradient of the subject properties. According to the EDR database report, this spill is related to a No. 2 fuel oil UST tank test failure and was opened on May 7, 2013. A retest is planned, but no further information was provided in the EDR database report. Given the

hydraulically crossgradient location, it is unlikely that this potential release has impacted the subject properties.

Petroleum Bulk Storage – Underground and Aboveground Storage Tank Databases (PBS-UST/AST)

Thirteen PBS-UST and 92 PBS-AST sites are listed in the database report. The inclusion on the PBS-UST/AST list means that a site has one or more registered underground/aboveground storage tank(s), regulated under regulated under 6 NYCRR Part 612 (NYSDEC Petroleum Bulk Storage) and/or the FDNY. This database does not indicate leaks, spills, or other violations. Twelve of the 13 PBS-UST sites, as well as 87 of the 92 PBS-AST sites are not located adjacent to the subject properties, and there is no reported evidence that suggests these sites are a significant environmental risk to the subject properties. The one (1) adjacent PBS-UST and the five (5) adjacent PBS-AST sites are summarized as follows:

- 342 Madison Avenue, located adjacent to the southwest and hydraulically upgradient/crossgradient with respect to groundwater flow. According to the EDR database report, this facility is currently listed on the PBS-UST registry with one (1) 18,000-gallon No. 6 fuel oil UST.
- JAL 58 Associates, 342 Madison Avenue, located adjacent to the southwest and hydraulically upgradient/crossgradient with respect to groundwater flow. According to the EDR database report, this facility is currently listed on the PBS-AST registry with one (1) 3,000-gallon No. 2 fuel oil AST.
- 350 Madison Avenue, located adjacent to the west and hydraulically upgradient with respect to groundwater flow. According to the EDR database report, this facility is currently registered with one (1) active 6,000-gallon steel/carbon steel/iron No. 2 fuel oil AST.
- 17 E 45th Street (Building Demolished), 360 Madison Avenue, located adjacent to the northwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this facility is currently registered with one (1) active 5,000-gallon steel/carbon steel/iron No. 6 fuel oil AST.
- Roosevelt Hotel, 45 East 45th Street, located adjacent to the north and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this facility is currently registered with one (1) removed 12,500-gallon steel No. 4 fuel oil AST, one (1) removed 18,500-gallon steel No. 2 fuel oil AST, and one (1) active 2,000-gallon steel/carbon steel/iron diesel AST.

There is no reported evidence that suggests the adjacent PBS-AST/PBS-UST sites are a significant environmental risk to the subject properties.

Chemical Bulk Storage (CBS)

CBS database includes facilities storing hazardous substances listed in 6NYCRR Part 597 in aboveground tanks of 185-gallons or greater, and/or underground tanks of any size. The EDR database report does not indicate leaks or releases associated with registered CBS facilities. The one listed unspecified CBS site "400 Madison Avenue" is located approximately 0.12 mile north-northeast of the subject properties and hydraulically crossgradient with respect to groundwater flow. According to the database the site is no longer active. No additional information is provided regarding the listing on the CBS database. As such, there is no reported evidence that suggests this listing is a significant environmental risk to the subject properties.

Major Oil Storage Facility (MOSF)

The Major Oil Storage Facilities (MOSF) database includes a list of onshore facilities or vessels with petroleum storage capacities of 400,000 gallons or more. The six (6) MOSF sites are summarized as follows:

- 390 Madison Ave-Comref 380 LLC, 390 Madison Avenue, located approximately 0.08 mile north and hydraulically crossgradient with respect to groundwater flow.
- Tank Barge Superior, 310 Madison Avenue, located approximately 0.12 mile southwest and hydraulically crossgradient with respect to groundwater flow.
- M/V R.J Bushey, 500 Fifth Avenue, located approximately 0.14 mile southwest and hydraulically crossgradient with respect to groundwater flow.
- Mobil Mt. Vernon, 150 East 42nd Street, located approximately 0.25 mile south-southeast and hydraulically downgradient with respect to groundwater flow.
- M/V George Whitlock, 1185 Avenue of the Americas, located approximately 0.31 mile northwest and hydraulically crossgradient with respect to groundwater flow.
- Michelle F, 362 Fifth Avenue, located approximately 0.48 mile southwest and hydraulically crossgradient with respect to groundwater flow.

Given the distances and hydraulically crossgradient and downgradient locations with respect to groundwater flow, it is unlikely the above-listed MOSF facilities are a significant environmental risk to the subject properties. Furthermore, there is a potential for these MOSF listings to be administrative registrations given the absence of major oil storage facilities within the general vicinity of the subject properties.

Voluntary Cleanup Program (VCP)

The VCP was developed by New York to enhance private sector cleanup of brownfield sites by enabling parties to remediate sites using private rather than public funds and to reduce development pressures. The three (3) VCP sites are summarized as follows:

- One Vanderbilt, 10 Vanderbilt Avenue, located approximately 0.09 mile southeast of the subject properties and hydraulically crossgradient with respect to groundwater flow.

- 11 East 51st Street, located approximately 0.31 mile north of the subject properties and hydraulically crossgradient with respect to groundwater flow.
- 53 West 53rd Street, located approximately 0.49 mile north of the subject properties and hydraulically crossgradient with respect to groundwater flow.

Given the distances and hydraulically crossgradient and downgradient locations with respect to groundwater flow, it is unlikely the above-listed VCP sites are a significant environmental risk to the subject properties.

Spills Incidents Database (NYSPILLS)

The NYSPILLS databases contain information regarding spills reported to the NYSDEC, including chemical and petroleum spills incidents. The NYSPILLS database includes spills active as of April 1, 1986, as well as spills occurring since this date. Sixty-five of the 66 listed NYSPILLS were issued letters of no further action by the NYSDEC, and there is no evidence that any of these listings represent a significant environmental risk to the subject properties. In addition, five (5) of the 66 listed NYSPILLS sites are located adjacent to the subject properties. The five (5) adjacent and one (1) active NYSPILLS sites are summarized as follows:

- NYSDEC Spill No. 00-10574, Grand Central Station -NYCT, #7 Line, Track C2, Col 57, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened December 20, 2000 due to discharge of oil through the walls of the #7 subway line tube. According to the EDR database report the spill is actively being remediated by workers utilizing mops and absorbent pads. It should be noted that the spill remains active. Although crossgradient of the subject properties, due to the close proximity and ongoing (open) spill issue since 2000, this site presents an environmental risk to the subject properties; thus, it is a REC for the subject properties.
- NYSDEC Spill No. 00-06666, Manhole #50248, Madison Avenue and East 45th Street, located adjacent to the north-northwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened September 5, 2000 due to an equipment failure of a feeder joint releasing one gallon of dielectric fluid that mixed with 100 gallons of water. According to the EDR database report, the spill was remediated utilizing a pump truck removing 20 gallons of water/oil and the feeder joint was replaced. As such, the NYSDEC issued a letter of no further action on August 23, 2002; however, cleanup does not meet standards. Given the minimal quantity released and the crossgradient location of same, it is unlikely this site presents a significant environmental risk to the subject properties.
- NYSDEC Spill No. 15-01047, Vault #8341, 52 East 44th Street, located adjacent to the southwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened April 30, 2015

due to 10 gallons of oil found atop of 50 gallons of water. According to the EDR database report, the spill was remediated by Con Edison and the original source was a unit in the adjoining vault. The NYSDEC issued a letter of no further action on May 14, 2015; however, cleanup does not meet standards. Given the minimal quantity released and the crossgradient location of same, it is unlikely this site presents a significant environmental risk to the subject properties.

- NYSDEC Spill No. 15-01044, In Front of Vault #9542, 52 East 44th Street, located adjacent to the southwest and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened April 29, 2015 due to 50 gallons of transformer fluid identified on top of 100 gallons of water. According to the EDR database report Con Ed removed the transformer and remediated the spill. As such the NYSDEC issued a letter of no further action on October 24, 2016; however, cleanup does not meet standards. However, given the crossgradient location, it is unlikely this site presents a significant environmental risk to the subject properties.
- NYSDEC Spill No. 10-05321, Construction site, 47 East 44th Street, located adjacent to the southwest and hydraulically downgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened August 11, 2010 due to an unknown source of petroleum. According to the EDR database report, during construction activities approximately five-gallons of heavy petroleum product was identified approximately 42 feet below grade surface. According to the EDR database report, the contractor remediated the spill within their scope of work and the NYSDEC issued a letter of no further action on May 14, 2015; however, cleanup does not meet standards. Given the proximate location to the subject properties, same represents a REC for the subject properties.
- NYSDEC Spill No. 99-12831, Roosevelt Hotel, 45 East 45th Street, located adjacent to the north and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this spill case was opened February 10, 2000 due to the release of approximately 200-gallons of No. 4 fuel oil into the tank room. The NYSDEC issued a letter of no further action on March 4, 2003; however, cleanup does not meet standards. Based upon the closure of the spill incident and the hydraulically crossgradient location, it is unlikely this site presents a significant environmental risk to the subject properties.

Facility and Manifest Database (MANIFEST)

The MANIFEST databases provide information on hazardous waste shipments and the generators of such shipments, as well as tracking the waste transported and listing the waste disposal facility. Seven hundred twenty-two of the of the 739 MANIFEST sites listed in the database report are not located adjacent to the subject properties, and there is no reported evidence that suggests these sites are a significant

environmental risk to the subject properties. The 17 adjacent MANIFEST sites are summarized as follows:

- Con Edison Vault: 7999, 32 East 45th Street, located adjacent to the northeast of the subject properties and hydraulically downgradient with respect to groundwater flow direction. This site is listed two times on the EDR database report and was previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Bank of America C.O Lasalle Partner, 335 Madison Avenue, located adjacent to the south and hydraulically downgradient / crossgradient with respect to groundwater flow. This site was previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Jones Lang Lasalle, 335 Madison Avenue – Loading Dock, located adjacent to the south of the subject properties and hydraulically crossgradient with respect to groundwater flow. This site was previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Bell Atlantic - NY, 45 Street and Madison Avenue, located adjacent to the north-northwest of the subject properties and hydraulically upgradient/crossgradient with respect to groundwater flow direction. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison, Madison Ave and 45th Street, located adjacent to the northwest of the subject properties and hydraulically crossgradient with respect to groundwater flow direction. Based upon the information provided in the EDR database report, it is unlikely that this site represents a significant environmental risk to the subject properties.
- Con Edison Vault: 8341, 52 E 44th Street, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison Vault: 9542, 52 E 44th Street, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.

- Con Edison, 52 East 44th Street, located adjacent to the southwest of the subject properties and hydraulically crossgradient with respect to groundwater flow direction. According to the EDR database report, this facility is responsible for the generation and shipment of unspecified waste in 2014. Based upon this information, it is unlikely that this site represents a significant environmental risk to the subject properties.
- Con Edison, 52 East 44th Street, located adjacent to the southwest of subject properties and hydraulically crossgradient with respect to groundwater flow direction. According to the EDR database report, this facility is responsible for the generation and two shipments of unspecified waste in 2015. Based upon this information, it is unlikely that this site represents a significant environmental risk to the subject properties.
- Con Edison, 52 East 44th Street, located adjacent to the southwest of the subject properties and hydraulically crossgradient with respect to groundwater flow direction. According to the EDR database report, this facility is responsible for the generation and two shipments of unspecified waste in 2015. Based upon this information, it is unlikely that this site represents a significant environmental risk to the subject properties.
- Speed Graphics Inc., 342 Madison Avenue, located adjacent to the west-southwest, beyond Madison Avenue, and hydraulically crossgradient with respect to groundwater flow. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- 350 Madison Properties, 350 Madison Avenue, located adjacent to the west of the subject properties and hydraulically upgradient with respect to groundwater flow direction. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison Service Box: 50239, 350 Madison Avenue, located adjacent to the west-northwest of the subject properties and hydraulically upgradient with respect to groundwater flow direction. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison Vault: 227, 41 East 45th Street, located adjacent to the east of the subject properties and hydraulically downgradient with respect to groundwater flow direction. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison Vault: 775, 41 East 45th Street, located adjacent to the east of the subject properties and hydraulically downgradient with respect to groundwater

flow direction. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.

- Con Edison Service Box: 50239, 350 Madison Avenue, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. This site is previously summarized under its RCRA database listing. As previously indicated, it is unlikely that this site presents a significant environmental risk to the subject properties.
- Con Edison, 342 Madison Avenue, located adjacent to the south and hydraulically crossgradient with respect to groundwater flow. According to the EDR database report, this facility is responsible for the generation and shipment of unspecified waste in 2014. Based upon this information, it is unlikely that this site represents a significant environmental risk to the subject properties.

E DESIGNATION (E-Des)

The E-Des database contains a listing of lots with an “E” designation on the New York City Zoning Maps for potential hazardous material contamination, air and/or noise quality impacts. Nineteen of the 24 E-Des sites listed in the EDR database report are not located adjacent to the subject properties, and there is no reported evidence that suggests these sites are a significant environmental risk to the subject properties. The three adjacent E-Des sites are summarized as follows:

- 352 Madison Avenue, located adjacent to the west of the subject properties and hydraulically upgradient with respect to groundwater flow. According to the database, this site is subject to the hazmat air and noise protocols and was designated under E-408, effective as of August 2017. According to the EDR database report, this site has not been remediated. Based upon this information, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- 346 Madison Avenue, located adjacent to the west of the subject properties and hydraulically upgradient with respect to groundwater flow. According to the database, this site is subject to the hazmat air and noise protocols and was designated under E-408, effective as of August 2017. According to the EDR database report, this site has not been remediated. Based upon this information, it is unlikely that this facility represents a significant environmental risk to the subject properties.
- 360 Madison Avenue, located adjacent to the west of the subject properties and hydraulically upgradient with respect to groundwater flow. According to the database, this site is subject to the hazmat air and noise protocols and was designated under E-408, effective as of August 2017. According to the EDR database report, this site has not been remediated. Based upon this information,

it is unlikely that this facility represents a significant environmental risk to the subject properties.

Registered Drycleaning Facilities (DRYCLEANERS)

Two DRYCLEANERS sites were listed in the database report. The one (1) DRYCLEANERS site is not located adjacent or hydraulically upgradient to the subject properties. No violations are noted for the listed dry cleaning facilities, and it is unlikely that the site presents a significant environmental risk to the subject properties.

There were no additional NYS database listings in the EDR database report.

Given the numerous database listings, NYSDEC spill incidents and petroleum bulk storage registries associated with the adjacent and surrounding properties, and given the presence of Grand Central Terminal proximate to the east of the subject properties, there is a potential for subsurface impacts, including soil, groundwater and soil vapor impacts beneath the subject properties. Same represents a REC.

5.3 Tribal Records and EDR Proprietary Databases

Agency	Listing Name or Database Searched	Abbreviation	Search Distance	Subject properties Listed?	No. of Sites within the Search Radius
USGS	Indian Reservations	IRESERVE	1.0 mile	No	0
USGS	Indian Reservation - Leaking Underground Storage Tanks	ILTANKS	0.5 mile	No	0
USGS	Indian Reservation - Registered Underground Storage Tanks	IUST	0.25 mile	No	0
USGS	Indian Reservation – Open Dump Inventory Sites	IODI	0.25 mile	No	0
USGS	Indian Reservation – Voluntary Cleanup Program Sites	IVCP	0.5 mile	No	0
EDR	Manufactured Gas Plants	MGP	1.0 mile	No	4
EDR	Historical Auto Stations	HAS	0.125 mile	No	11
EDR	Historical Cleaners	HCL	0.125 mile	No	1

The subject properties are not listed on any of the databases listed above.

Manufactured Gas Plants (MGP)

The EDR Proprietary MGP database includes records of coal gas plants compiled by EDR's researchers. MGPs were used in the United States from the 1900s to 1950s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar, sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as continuous source of soil and groundwater contamination. The four MGP sites are summarized as follows:

- New Amsterdam Gas Co.- 1st Avenue between East 42 Street and 40th Street, located approximately 0.58 mile southeast and hydraulically crossgradient with respect to groundwater flow.
- Con Edison-East 39th Street Works MGP, East 39th Street – East 42nd Street, located approximately 0.591 mile southeast and hydraulically crossgradient with respect to groundwater flow.
- Con Edison - West 58th Street Station MGP, 11th Avenue between West 58th Street and West 59th Street, located approximately 0.76 mile north and hydraulically crossgradient with respect to groundwater flow.
- Con Edison – East 32nd Street Station MGP, East 32nd – East 33rd Streets, located approximately 0.811 mile south-southeast and hydraulically downgradient with respect to groundwater flow.

Given the distances and hydraulically crossgradient locations with respect to groundwater flow, it is unlikely the above-listed MGP facilities are a significant environmental risk to the subject properties.

US Historical Auto Stations (HAS)

The US Historical Auto Stations (HAS) database is EDR's listing of potential gas station/filling station/service station sites. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. The database falls within a category of information EDR classifies as "High Risk Historical Records." These records present unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches. None of the 11 listed HAS site are located adjacent to the subject properties, and there is no evidence in the EDR database report that suggests these sites present a significant environmental risk to the subject properties.

US Historical Cleaners

The US Historical Cleaners (HCL) database contains a listing of potential drycleaner sites. This database falls within EDR's category of information classified as "High Risk Historical Records." The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. The one (1) listed HCL site is not located adjacent to the subject properties, and there is no evidence in the EDR database report that suggests this site presents a significant environmental risk to the subject properties.

There are no additional tribal database listings provided in the EDR report.

5.4 Orphan Site Summary

Orphan sites are those sites where due to poor or inadequate address information the location of the property cannot be determined sufficiently for it to be included on the radius map. However, sites with similar street names or zip codes are summarized in the database report as these sites may present environmental risks to the subject properties. The Orphan Summary identified ten sites with inadequate address information. Based on a review of the Orphan Summary and available address information, it was determined that the listed sites are not located adjacent to the subject properties and are unlikely to present a significant environmental concern.

6.0

Site Reconnaissance

6.1 Site Inspection

VHB representative Bryan Murty visually inspected the subject properties on April 26, 2016 and July 8, 2020. The subject properties consist of three (3) contiguous parcels located on the east side of Madison Avenue that total approximately 0.51-acre. The subject properties occupy the entire western portions of the block to the west of Vanderbilt Avenue and contain frontage along Madison Avenue to the west, East 44th Street to the south and East 45th Street to the north. A brief summary of the current occupancy and property use associated with each respective parcel is provided, below:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts. The two ground floor storefronts are vacant with one fronting along Madison Avenue and the other along East 44th Street. The remaining portions of the first floor consist of a security and two passenger elevator foyers that are accessible from Madison Avenue and East 44th Street. Vacant commercial office space occupies the floors two-through-19.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail tenant that fronts solely along Madison Avenue. The ground floor retail tenant is vacant and was most recently occupied by a Johnston & Murphy clothing store. The remaining portions of the first floor consist of a security and passenger elevator foyer that is accessible from Madison Avenue. Vacant commercial office space occupies floors two-through-15.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with two ground floor retail tenants that front along Madison Avenue and East 45th Street. Two vacant storefronts are present. A vacant storefront fronting along Madison Avenue is present that was most recently occupied by a J.Crew clothing store. The second vacant storefront contains frontage along East 45th Street to the north and was most recently occupied by a COSI coffee shop and bistro. The remaining portions of the first floor consist of a security and passenger elevator foyer and connecting corridor that provides access to the COSI retail tenant and the adjacent building to the east. A pedestrian passage that connects underground to Grand Central Terminal is present in the foyer. The building was formerly utilized as the MTA Headquarters. However, office space on the upper floors is currently vacant.

6.2 Surrounding Land Use

North: The Roosevelt Hotel with ground-floor retail located to the north of East 45th Street, followed by commercial office buildings and high rises of similar uses.

South: A commercial office building with ground floor retail located to the south along East 44th Street, followed by commercial office buildings and high rises of similar uses.

East: A ventilation building is currently under construction adjacent to the east that contains frontage along East 44th Street to the south, associated with the MTA East Side Access project. The Yale Club and a commercial office building are also adjacent to the east that contain frontage along Vanderbilt Avenue. The MetLife Building and Grand Central Terminal are present further east.

West: A commercial office building with ground floor retail located to the west across Madison Avenue, followed by commercial office buildings and high rises of similar uses.

6.3 Interviews

VHB was accompanied by Mr. Rolando Moronta of the Engineering Department of property management during the April 26, 2016 visual inspection. Mr. Moronta indicated that the buildings located at the subject properties are heated via steam provided by ConEdison. Mr. Moronta indicated that there are no petroleum storage tanks located at the subject properties, with the exception of rooftop diesel-fired emergency backup generators located on Lot 23. VHB was accompanied by Mr. Bernie Woods, Chief Engineer during the July 8, 2020 visual inspection. Mr. Woods

indicated that the subject properties have remained in similar condition since the previous 2016 visual inspection. Additional pertinent statements made by Mr. Moronta are included throughout this Phase I ESA.

VHB personnel also spoke with Mr. Stephen Pirrelli, Deputy Director of Facility Operations and Support for the MTA during the April 26, 2016 visual inspection. Mr. Pirrelli indicated that there are no current or historic rail tracks that traverse the subject properties that are associated with Grand Central Terminal or MTA subway lines.

6.4 Summary of Environmental Site Features

6.4.1 Hazardous Materials Handling, Storage and Disposal

Flammable liquids storage was observed in red marked cabinets located within the basement areas of Lot 48 (a.k.a. 347 Madison Avenue). In addition, maintenance products, including paints, thinners, cleaners and other items were observed within designated maintenance shops located throughout the basements of the buildings. Pallets of building maintenance supplies were also observed to be staged on the second floor of the former MTA Headquarter building (Lot No. 48). Furthermore, although not observed, it is likely that toners, office maintenance supplies and other such items exist throughout the building in association with former commercial operations. Observed items were noted to be in good condition, with no evidence of leaks or release. The presence of these items do not represent a significant environmental risk. However, same should be removed and disposed in accordance with applicable regulations prior to any potential renovation and/or redevelopment.

No local, State or federal database listings, including chemical bulk storage registries, or other records were identified for the subject properties during the course of this Phase I ESA that would suggest the bulk storage of hazardous materials and large scale generation of hazardous waste at the subject properties.

6.4.2 Underground and Aboveground Storage Tanks

According to a representatives of the subject properties, the buildings located at the subject properties are currently heated via ConEd steam that services each building from mains located along adjacent roadways, and that no fuel oil tanks/boiler systems are present within each building.

There is currently no active natural gas service to the subject properties. Natural gas was previously provided to Lot 48 and is associated with cooking purposes in

association with the former COSI bistro restaurant tenant. Natural gas service was also formerly provided to Lot 23. There is currently no natural gas service on Lot 24.

Two rooftop diesel-fired emergency backup generators are located on Lot 23. According to representatives of the subject properties, the diesel generators have a reported capacity of 250 gallons each, and service the building on Lot 23. VHB observed the rooftop generators to be in good condition, with no evidence of leaks or releases. The presence of the rooftop generators do not represent a significant environmental risk. However, the contents of the generator should be removed from the site in accordance with applicable regulations prior to any potential site redevelopment. Site representatives further indicated that the building located on Lot 48 was formerly provided emergency backup power from Grand Central Terminal but no longer maintains an active connection to this system. No backup emergency power is provided to Lot 24.

No additional evidence of petroleum storage tanks (i.e., fill ports and/or vent pipes) were identified at the subject properties during the visual inspection. Furthermore, no local, State or federal database listings, including petroleum bulk storage registries or other records were identified for the subject properties during the course of this Phase I ESA that would suggest the presence of additional petroleum USTs and/or ASTs.

6.4.3 Utilities and Sanitary and Stormwater Disposal Facilities

Utilities Provided to the Site

- Electricity is provided via underground distribution lines
- Telephone is provided via underground distribution lines
- No active natural gas service is provided to the subject properties. Natural gas is available via underground distribution lines

Sanitary and Stormwater Disposal Systems

- The subject properties are serviced by the New York City municipal sewer system
- Stormwater runoff discharges into curbside storm drains located along East 44th Street to the south, Madison Avenue to the west, and East 45th Street to the north.

Water Supply

- Potable water is provided to the subject properties by the NYCDEP

6.4.4 Underground Injection Control Program-Regulated Site Features

Underground injection wells are regulated by the UIC Program under the authority of Part C of the Safe Drinking Water Act (SDWA) (42 U.S.C. 300h *et seq.*). The SDWA is designed to protect the quality of drinking water in the United States, and Part C specifically mandates the regulation of underground injection fluids through wells. The USEPA has promulgated a series of UIC regulations under this authority. Recent applicable revisions to UIC regulations were published in the State Implementation Guide - Revisions to the Underground Injection Control Regulations for Class V Injection Wells, September 2000. This document specifically addresses Class V injection wells, which include on-site wastewater disposal features such as drywells, cesspools and in-situ drains. The USEPA issued a Notice of Final Determination for Class V wells; Final Rule on June 7, 2002. With the exception of motor vehicle waste disposal wells and large-capacity cesspools, Class V wells are “authorized by rule” (40 CFR 144.24) and may inject non-hazardous waste as long as the following criteria are met:

- The injection does not endanger underground sources of drinking water (40 CFR 144.12)
- The well owners or operators submit basic inventory information (40 CFR 144.26)

The USEPA *may*, at its discretion, require the owner or operator of any well authorized by rule to submit information for review to determine if a well may be endangering an underground source of drinking water.

Sanitary wastes generated at the subject properties discharge into the New York City municipal sewer system. No on-site sanitary systems were identified during the visual inspection.

Stormwater runoff generated at the subject properties discharges into curbside storm drains located along East 44th Street to the south, Madison Avenue to the west, and East 45th Street to the north.

Condensate floor drains were observed throughout the basement utility areas of the subject properties. According to representatives of the subject properties, all floor drains are piped into sump pits located within the basements of the subject properties. All condensate drainage are subsequently pumped from their respective sump pits into the New York City municipal sewer system.

No structures subject to the UIC program were observed at the subject properties during the visual inspection.

6.4.5 Potable Water Supply and On-Site Wells

Potable water is provided to the surrounding properties by a municipal water source (NYCDEP). No on-site potable water wells, active or inactive, or groundwater monitoring wells were observed on the subject properties during the visual inspection. Furthermore, there are no public water supply wells within one mile of the subject properties.

6.4.6 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCBs) were used until 1978 and are a group of compounds formed by the chlorination of biphenyl. PCBs have extremely high physical and chemical stabilities which led to their being used in many applications, including heat transfer fluids, hydraulic fluids, and dielectrics. PCBs are often found in transformers, capacitors and hydraulic systems. PCBs were also added as a plasticizer in caulking used to seal joints between masonry units and around windows, in addition to other building materials such as paints, mastics, sealants, adhesives, and specialty coatings. According to the USEPA PCBs were used in buildings primarily between 1950 and 1980.

Electrical equipment containing PCBs are still in use and can pose a serious health hazard if fluids come in direct contact with humans, soil or groundwater. Fires involving electrical equipment containing PCBs can cause the material to be dispersed over a large area and potentially expose many people to a health risk. Because of the health hazard associated with PCBs, they are regulated under the Toxic Substances Control Act (TSCA).

No transformers were observed at the subject properties during the visual inspection. However, several grated ConEd vaults were observed within the sidewalks along Madison Avenue, which have the potential to be equipped with transformers that provide electric service to the subject properties.

Lot 48 features 10 elevators (seven passenger elevators, one small freight elevator, one maintenance elevator and one mail room elevator). The freight elevator associated with Lot 48 was observed to be hydraulically driven. VHB observed the associated mechanical room in the basement of the building on Lot 48 and noted all hydraulic equipment to be in good condition with no visual evidence of release. Based upon the relatively new condition of the hydraulic equipment observed, there is minimal potential for hydraulic fluids associated with this elevator to contain PCBs. The remaining elevators associated with Lot 48 were observed to be cable operated. Lot 23 features three elevators (two passenger elevators and one freight elevator). Lot 24 features three elevators (two passenger elevators and one freight elevator). VHB accessed and observed mechanical rooms within Lots 23 and 24 and observed all elevators within the on-site buildings to be cable-operated. As such, it is unlikely

that any PCB-containing hydraulic fluids are present in associated with the respective elevators.

Fluorescent light fixtures were observed throughout the building spaces. Given the ages of the buildings, there is a potential for ballasts associated with same to be contain PCBs. Furthermore, given the ages of the buildings, there is a potential for building materials (i.e., window caulking, mastics, etc.) to contain PCBs. PCBs are subject to federal disposal restrictions and should be dealt with prior to any potential renovation and/or demolition.

6.4.7 Debris, Dumping and Surficial Staining

No significant debris, dumping or surficial staining was observed within the basement or common areas of the subject properties during the visual inspection. Commercial tenant and maintenance storage areas were identified in the basements of the on-site buildings. No representation could be made with respect to the office spaces on the upper floors, as access to these portions of the subject properties was not feasible.

Solid waste generated at the subject properties are removed by a municipal or private carrier. No RECs were identified in association with solid waste generation.

6.4.8 Stressed Vegetation

No stressed vegetation was present at the time of inspection.

6.4.9 Fill Materials

Based on a review of historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at this time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

Given the presence of existing full basements within the on-site buildings, any potential demolition debris or fill material associated with the former on-site buildings identified in previous Sanborn maps would have likely been removed as part of construction of the current buildings during their respective redevelopment

year(s). As such, the former presence of on-site buildings on the subject properties do not represent a significant environmental risk.

Notwithstanding the above, soils in New York City are typically classified as "urban fill" with the potential to be impacted based on the grading activities prior to development. Given these conditions, there is a potential for urban fill to be present at the subject properties and is considered a BER.

6.4.10 Soil Vapor Migration and Encroachment

VHB conducted a Tier 1 vapor encroachment screen in accordance with ASTM E2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The ASTM E2600-10 guidance provides, "...practical guidance and a useful process for conducting a vapor encroachment screen (VES) on a property parcel involved in a real estate transaction in the United States of America with respect to chemicals of concern (COC) that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property."

The goal of the VES, as established by the ASTM E2600-10 is to, "...identify a vapor encroachment condition (VEC) which is the presence of likely presence of COC vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property..."

The Tier 1 screening included a review of the following:

- Available regulatory data (i.e. historical aerial photographs, historical Sanborn maps and the EDR database report [see Section 5.0]).
- A review of municipal records, including NYSDEC spill records.
- Current and historical usage of the subject properties and surrounding areas.
- Depth to groundwater and groundwater flow direction in the vicinity of the subject properties.
- Soil characteristics in the vicinity of the subject properties.
- Preferential pathways.
- Current remedial status of any contaminated properties.

Based upon a review of the above-listed sources, given the numerous database listings, including NYSDEC spill incidents and petroleum bulk storage registries, and the presence of Grand Central Terminal proximate to the east, there is a potential for vapor migration beneath the subject properties. As such, a VEC cannot be ruled out at the subject properties.

7.0

Non-Scope Considerations

7.1 Radon

Radon is a colorless, radioactive, inert gas formed by the decay of radium and may be present in soils and rocks containing granite, shale, phosphate and pitchblende. The USEPA's [Map of Radon Zones for New York State](#), September 1993, indicates that Manhattan is not a radon risk area. The EDR report provides information from the NYSDOH radon survey which indicates that 114 radon tests have been conducted in New York County. Test results indicate average radon concentrations of 2.07 pCi/L.

Additional data (October 2019) obtained from the NYSDOH indicates that 124 basement radon tests have been conducted in New York County, with an average radon basement concentration of 2.07 pCi/L. Based on these data, radon does not likely represent an environmental concern.

7.2 Lead-Based Paint

In 1978, the U.S. Product Safety Commission issued a ban on paints or surface coatings that contain greater than 0.06 percent lead. Painted surfaces observed within the accessible portions of the subject properties were observed to be in fair condition, with minor evidence of chipping and peeling. The lead contents of the paints are unknown. However, based upon the ages of the buildings, the potential exists for LBP to be present. Same represents a BER for the subject properties.

7.3 Asbestos-Containing Materials

Asbestos is the name given to a group of fibrous silicate minerals, typically those of the serpentine group. The tensile strength, flexibility, and non-flammability of asbestos have led to many uses including structural materials, brake linings, insulation, and pipe manufacture. Asbestos is of concern as an air pollutant because

when inhaled it may cause asbestosis, mesothelioma, and bronchogenic carcinoma. In 1989, the USEPA announced regulations that would phase out most uses of asbestos by 1996.

As part of the visual inspection, a visual survey was conducted of accessible areas for the presence of suspect ACM. Suspect ACM pipe insulation and roofing materials were observed within the basements and building rooftops during the visual inspection. Given the ages of the buildings, there is a potential for ACM to be present in pipe insulation, roofing and other building materials. Same represents a BER for the subject properties.

7.4 Wetlands

According to the NYSDEC Freshwater Wetlands Maps, there are no NYSDEC-regulated freshwater wetlands exist on or adjacent to the subject properties. Further, there are no NYSDEC regulated Freshwater Wetlands within one mile of the subject properties.

Tidal wetlands line much of the salt water shore, bays, inlets, canals, and estuaries of Long Island and New York City, and Westchester County. The tidal wetlands regulations apply anywhere tidal inundation occurs on a daily, monthly or intermittent basis, including but not exclusively within the salt wedge. Vegetation in intertidal areas beyond the range of the salt wedge is classified as coastal fresh marsh. In accordance with the New York State Tidal Wetlands Land Use Regulations (6 NYCRR Part 661), sixteen wetland categories are defined in the regulations. Coastal and tidal fresh water wetlands categories are identified by the presence of a tide and the types of vegetation present. The categories of wetlands and the restrictions placed on activities in and around them are defined in detail in 6 NYCRR Part 661. VHB reviewed the NYSDEC Tidal Wetlands Maps available online at <http://twi.ligis.org>. The NYSDEC Tidal Wetlands Map (No. 586-510) showing the subject and surrounding properties indicate the nearest tidal wetlands are located approximately 0.66 mile east and re associated with the East River. These wetlands are classified as Littoral Zone (LZ) tidal wetlands. According to the NYSDEC, LZ wetlands are defined as the tidal wetland zone that includes all lands under tidal waters of six feet or less in depth at mean low water that are not included in any other category.

Potential federal wetlands were identified from the U.S. Fish and Wildlife Service (FWS) Wetlands Mapper software and National Wetlands Inventory indicates that the nearest mapped wetlands located approximately 0.66 mile east of the subject properties and are associated with the East River. These wetlands are classified as E1UBL wetlands, which are defined as subtidal estuarine water bodies with unconsolidated bottoms, which are permanently flooded.

Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) were reviewed to determine if the subject properties are located within the 100-year or 500-year flood zones. The FIRM showing the subject properties (No. 3664970088F) indicates that the subject properties are located outside the 100-year and 500-year flood zones. This indicates that there is a minimal risk of flooding at the subject properties.

7.5 Mold and Water Damage

Concern about indoor exposure to mold has been increasing as the public becomes aware that exposure to mold can cause a variety of health effects and symptoms, including allergic reactions. Molds can be found almost anywhere; they can grow on virtually any organic substance, as long as moisture and oxygen are present. There are molds that can grow on wood, paper, carpet, foods, sheetrock, plaster and insulation. When excessive moisture accumulates in buildings or on building materials, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed.

As part of this assessment, a visual inspection was conducted for the presence of water damage and odors, indicative of the potential for mold growth. No visible or olfactory evidence of mold or mildew was observed during the visual inspection.

8.0

Findings

This document is a Phase I ESA prepared to determine evidence of RECs, CRECs, HRECs and BERs in connection with three (3) commercial properties located on the east side of Madison Avenue, between East 44th Street to the south and East 45th Street to the north in the Borough of Manhattan, City of New York, New York. The subject properties are identified by the street addresses of 341, 345 and 347 Madison Avenue, and as Borough 1 – Block 1279 – Lot Nos. 24, 23 and 48, respectively on the NYC tax maps. The subject properties have a topographic elevation of approximately 59 feet above amsl. The subject properties are relatively flat with the general topographic gradient sloping downward to the east. Depth to groundwater is estimated to be less than 59 feet bgs. As the subject properties are located at a high point on Manhattan Island, groundwater flow is assumed to flow toward the nearest surface water body. In this case, groundwater flow is expected to flow to the east, toward the East River.

Site History and Current Property Uses

Based upon a review of municipal records, historical Sanborn maps and aerial photographs, VHB was able to establish a history for the subject properties dating back to 1890. According to historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at that time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

A brief summary of the current occupancy and property use associated with each respective parcel is provided, below:

341 Madison Avenue – Lot 24

Lot 24 is improved with a 19-story vacant commercial building with ground floor retail storefronts. The two ground floor storefronts are vacant with one fronting along Madison Avenue and the other along East 44th Street. The remaining portions of the first floor consist of a security and two passenger elevator foyers that are accessible from Madison Avenue and East 44th Street. Vacant commercial office space occupies the floors two-through-19.

345 Madison Avenue – Lot 23

Lot 23 is improved with a 15-story vacant commercial building with one ground floor retail tenant that fronts solely along Madison Avenue. The ground floor retail tenant is vacant and was most recently occupied by a Johnston & Murphy clothing store. The remaining portions of the first floor consist of a security and passenger elevator foyer that is accessible from Madison Avenue. Vacant commercial office space occupies floors two-through-15.

347 Madison Avenue – Lot 48

Lot 48 is improved with a 20-story vacant commercial building with two ground floor retail tenants that front along Madison Avenue and East 45th Street. Two vacant storefronts are present. A vacant storefront fronting along Madison Avenue is present that was most recently occupied by a J.Crew clothing store. The second vacant storefront contains frontage along East 45th Street to the north and was most recently occupied by a COSI coffee shop and bistro. The remaining portions of the first floor consist of a security and passenger elevator foyer and connecting corridor that provides access to the COSI retail tenant and the adjacent building to the east. A pedestrian passage that connects underground to Grand Central Terminal is present in the foyer. The building was formerly utilized as the MTA Headquarters. However, office space on the upper floors is currently vacant.

EDR Database Report

A review of the EDR database report has revealed the subject properties were identified on the RCRA-NonGen database for two separate listings under the names "MTA Metro North Railroad" and "Con Ed–Metro North Railroad," both listed for the address 347 Madison Avenue. There are no unresolved violations associated the subject properties listings on the RCRA-NonGen database, and there is no reported evidence that suggests this listing represents a significant environmental risk. In addition, no evidence of storage handling/disposal of these items were observed during the visual inspection. Given the subject properties' inclusion on the RCRA-NonGen database, same were also listed on the MANIFEST and federal FINDS databases. The subject properties were also identified on site-specific target property databases searched in the EDR database report, including the ECHO, RAATS, HISTRAATS databases, which were determined not to represent a significant

environmental risk. However, it should be noted that all the database listings attributed to the subject properties were identified in the EDR database report as Metro North, which may indicate that the shipment of hazardous waste and other relevant databases may be administratively addressed to the subject properties, but may not have been directly generated at the site.

Given the numerous database listings, NYSDEC spill incidents and petroleum bulk storage registries associated with the adjacent and surrounding properties, and given the presence of Grand Central Terminal proximate to the east of the subject properties, there is a potential for subsurface impacts, including soil, groundwater and soil vapor impacts beneath the subject properties. Same represents a REC.

Site Reconnaissance

Flammable liquids storage was observed in red marked cabinets located within the basement areas of Lot 48 (a.k.a. 347 Madison Avenue). In addition, maintenance products, including paints, thinners, cleaners and other items were observed within designated maintenance shops located throughout the basements of the buildings. Pallets of building maintenance supplies were also observed to be staged on the second floor of the former MTA Headquarter building (Lot No. 48). Furthermore, although not observed, it is likely that toners, office maintenance supplies and other such items exist throughout the building in association with former commercial operations. Observed items were noted to be in good condition, with no evidence of leaks or release. The presence of these items do not represent a significant environmental risk. However, same should be removed and disposed in accordance with applicable regulations prior to any potential renovation and/or redevelopment.

No local, State or federal database listings, including chemical bulk storage registries, or other records were identified for the subject properties during the course of this Phase I ESA that would suggest the bulk storage of hazardous materials and large scale generation of hazardous waste at the subject properties.

According to representatives of the subject properties, the buildings located at the subject properties are currently heated via ConEd steam that services each building from mains located along adjacent roadways, and that no fuel oil tanks/boiler systems are present within each building.

There is currently no active natural gas service to the subject properties. Natural gas was previously provided to Lot 48 and is associated with cooking purposes in association with the former COSI bistro restaurant tenant. Natural gas service was also formerly provided to Lot 23. There is currently no natural gas service on Lot 24.

Two rooftop diesel-fired emergency backup generators are located on Lot 23. According to representatives of the subject properties, the diesel generators have a reported capacity of 250 gallons each, and service the building on Lot 23. VHB observed the rooftop generators to be in good condition, with no evidence of leaks

or releases. The presence of the rooftop generators do not represent a significant environmental risk. However, the contents of the generator should be removed from the site in accordance with applicable regulations prior to any potential site redevelopment. Site representatives further indicated that the building located on Lot 48 was formerly provided emergency backup power from Grand Central Terminal but no longer maintains an active connection to this system. No backup emergency power is provided to Lot 24.

No additional evidence of petroleum storage tanks (i.e., fill ports and/or vent pipes) were identified at the subject properties during the visual inspection. Furthermore, no local, State or federal database listings, including petroleum bulk storage registries or other records were identified for the subject properties during the course of this Phase I ESA that would suggest the presence of additional petroleum USTs and/or ASTs.

Sanitary wastes generated at the subject properties discharge into the New York City municipal sewer system. No on-site sanitary systems were identified during the visual inspection.

Stormwater runoff generated at the subject properties discharges into curbside storm drains located along East 44th Street to the south, Madison Avenue to the west, and East 45th Street to the north.

Condensate floor drains were observed throughout the basement utility areas of the subject properties. According to representatives of the subject properties, all floor drains are piped into sump pits located within the basements of the subject properties. All condensate drainage are subsequently pumped from their respective sump pits into the New York City municipal sewer system.

No structures subject to the UIC program were observed at the subject properties during the visual inspection.

No transformers were observed at the subject properties during the visual inspection. However, several grated ConEd vaults were observed within the sidewalks along Madison Avenue, which have the potential to be equipped with transformers that provide electric service to the subject properties.

Lot 48 features 10 elevators (seven passenger elevators, one small freight elevator, one maintenance elevator and one mail room elevator). The freight elevator associated with Lot 48 was observed to be hydraulically driven. VHB observed the associated mechanical room in the basement of the building on Lot 48 and noted all hydraulic equipment to be in good condition with no visual evidence of release. Based upon the relatively new condition of the hydraulic equipment observed, there is minimal potential for hydraulic fluids associated with this elevator to contain PCBs. The remaining elevators associated with Lot 48 were observed to be cable operated. Lot 23 features three elevators (two passenger elevators and one freight elevator).

Lot 24 features three elevators (two passenger elevators and one freight elevator). VHB accessed and observed mechanical rooms within Lots 23 and 24 and observed all elevators within the on-site buildings to be cable-operated. As such, it is unlikely that any PCB-containing hydraulic fluids are present in associated with the respective elevators.

Fluorescent light fixtures were observed throughout the building spaces. Given the ages of the buildings, there is a potential for ballasts associated with same to be contain PCBs. Furthermore, given the ages of the buildings, there is a potential for building materials (i.e., window caulking, mastics, etc.) to contain PCBs. PCBs are subject to federal disposal restrictions and should be dealt with prior to any potential renovation and/or demolition.

No significant debris, dumping or surficial staining was observed within the basement or common areas of the subject properties during the visual inspection. Commercial tenant and maintenance storage areas were identified in the basements of the on-site buildings. No representation could be made with respect to the office spaces on the upper floors, as access to these portions of the subject properties was not feasible.

Solid waste generated at the subject properties are removed by a municipal or private carrier. No RECs were identified in association with solid waste generation.

Based on a review of historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At that time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at this time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Based upon indications on the 1929 historical Sanborn maps, Lot 48 was improved with the existing building circa 1918, Lot 23 was improved with the existing building circa 1921 and Lot 24 was improved with the existing building circa 1925. The subject properties have remained of similar configuration since the development.

Given the presence of existing full basements within the on-site buildings, any potential demolition debris or fill material associated with the former on-site buildings identified in previous Sanborn maps would have likely been removed as part of construction of the current buildings during their respective redevelopment year(s). As such, the former presence of on-site buildings on the subject properties do not represent a significant environmental risk.

Notwithstanding the above, soils in New York City are typically classified as "urban fill" with the potential to be impacted based on the grading activities prior to development. Given these conditions, there is a potential for urban fill to be present at the subject properties and is considered a BER.

Based upon a review of the above-listed sources, given the numerous database listings, including NYSDEC spill incidents and petroleum bulk storage registries, and the presence of Grand Central Terminal proximate to the east, there is a potential for vapor migration beneath the subject properties. As such, a VEC cannot be ruled out at the subject properties.

Non-Scope Considerations

In 1978, the U.S. Product Safety Commission issued a ban on paints or surface coatings that contain greater than 0.06 percent lead. Painted surfaces observed within the accessible portions of the subject properties were observed to be in fair condition, with minor evidence of chipping and peeling. The lead contents of the paints are unknown. However, based upon the ages of the buildings, the potential exists for LBP to be present. Same represents a BER for the subject properties.

As part of the visual inspection, a visual survey was conducted of accessible areas for the presence of suspect ACM. Suspect ACM pipe insulation and roofing materials were observed within the basements and building rooftops during the visual inspection. Given the ages of the subject buildings, there is a potential for ACM to be present in pipe insulation, roofing and other building materials. Same represents a BER for the subject properties.

The subject property does not appear in any additional listings, databases or registries of Superfund sites, hazardous waste treatment facilities, petroleum bulk storage/spill sites, known or suspected hazardous waste disposal sites or landfills maintained by the USEPA, NYSDEC or NYCDEP.

9.0

Conclusions and Recommendations

Based on the results of the site inspection, records review and interviews, it was determined that there were several RECs noted for the subject properties. The following RECs were identified during the course of this Phase I ESA:

- ▶ Given the numerous database listings, NYSDEC spill incidents and petroleum bulk storage registries associated with the adjacent and surrounding properties, and given the presence of Grand Central Terminal proximate to the east of the subject properties, there is a potential for subsurface impacts, including soil, groundwater and soil vapor impacts beneath the subject properties. Same represents a REC.
- ▶ Based upon a review of historical Sanborn maps, an adjacent rail depot was identified to the north on Sanborn maps as early as 1890 through at least 1910. The adjacent buildings to the east, northeast and southeast are also depicted on Sanborn maps as constructed overhead of subgrade railroad tracks. The current and historical presence of rail tracks adjacent to the subject properties are attributed to Grand Central Terminal located to the east of Vanderbilt Avenue. Given the current and historical presence of adjacent mass transit rail spurs, there is a potential for subsurface impacts at the subject properties associated with these adjacent rail uses. Same represents a REC for the subject properties.

In addition to the aforementioned RECs, the following BERs were identified for the subject properties:

- ▶ Soils in New York City are typically classified as “urban fill” with the potential to be impacted based on the grading activities prior to development. Given these conditions, there is a potential for urban fill to be present at the subject properties and is considered a BER.
- ▶ Given the ages of the subject buildings, there is a potential for ACM to be present in pipe insulation, roofing and other building materials. Prior to any potential

demolition and/or renovation, an ACM survey be conducted at the subject properties should any potential renovation or redevelopment be contemplated. ACM should be abated in accordance with applicable local, State and federal regulations prior to any renovation or redevelopment.

- Based upon the age of the buildings, the potential exists for LBP to be present. Should the buildings be identified for renovation, an LBP survey should be conducted in order to determine if any LBP is present at the subject property and abated in accordance with NYSDOH regulations if identified and potentially disturbed. If the buildings are identified for demolition, a LBP analysis would not be warranted.

- Fluorescent light fixtures were observed throughout the building spaces. Given the ages of the buildings, there is a potential for ballasts associated with same to be contain PCBs. Furthermore, given the ages of the buildings, there is a potential for building materials (i.e., window caulking, mastics, etc.) to contain PCBs. PCBs are subject to federal disposal restrictions and should be dealt with prior to any potential renovation and/or demolition.

10.0

Environmental Professional Statement

This Phase I ESA has been prepared in accordance with procedures established by environmental professionals and in concert with the guidance of regulatory agencies and funding institutions, ASTM Practice E1527-13, inclusive of the USEPA "All Appropriate Inquiry" requirement amended in the Federal Register on December 30, 2013. The USEPA "All Appropriate Inquiry" requirement establishes specific regulatory requirements for conducting all appropriate inquiries into the previous ownership, uses, and environmental conditions of a property for the purposes of qualifying for certain landowner liability protections under CERCLA.

VHB, declares that, to the best of its professional knowledge and belief, it meets the definition of "Environmental Professional" as set forth in 312.10 of 40 CFR 312 and it has the specific qualifications based on education, training and experience to assess a property with respect to the nature, history and setting of the subject properties.

VHB has developed and performed the "All Appropriate Inquiries" in conformance with the standards and practices set forth in 40 CFR Part 312.

Section 11.0 contains the data gaps and deficiencies of the research data encountered during VHB's preparation of this report.

11.0

Data Gaps/Data Failure

As stated within this document, the Phase I ESA was conducted in accordance with requirements set forth in the ASTM Practice E1527-13 and USEPA All Appropriate Inquiry Rule. Based upon VHB's research in an attempt to satisfy all the requirements set forth in the above-referenced standards, the following data gaps were encountered:

- VHB was able to establish a history for the subject properties dating back to 1890. According to historical Sanborn maps, Lot 48 was previously improved with a six-story building that occupied the majority of the parcel and was previously utilized as an athletic club as early as 1890. At this time, Lot 23 was improved with two (2) four-story buildings (likely mixed-use) that occupied portions of the parcels with frontage along Madison Avenue. Also, at this time, Lot 24 was improved with a three-story and partial four-story (likely mixed-use) building that occupied the entire parcel. Prior to 1890, the development history of the subject properties is unknown.
- It is VHB's understanding that COVID-19 restrictions have impacted this agency's ability to review FOIL applications in a timely manner and no response from this agency have been received to date. Any pertinent information that may become available that affect the findings or conclusions of this Phase I ESA will be forwarded as an addendum.

Pent House	60			50	Offices.

Standpipe System approved by Fire Department - November 13, 1961.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

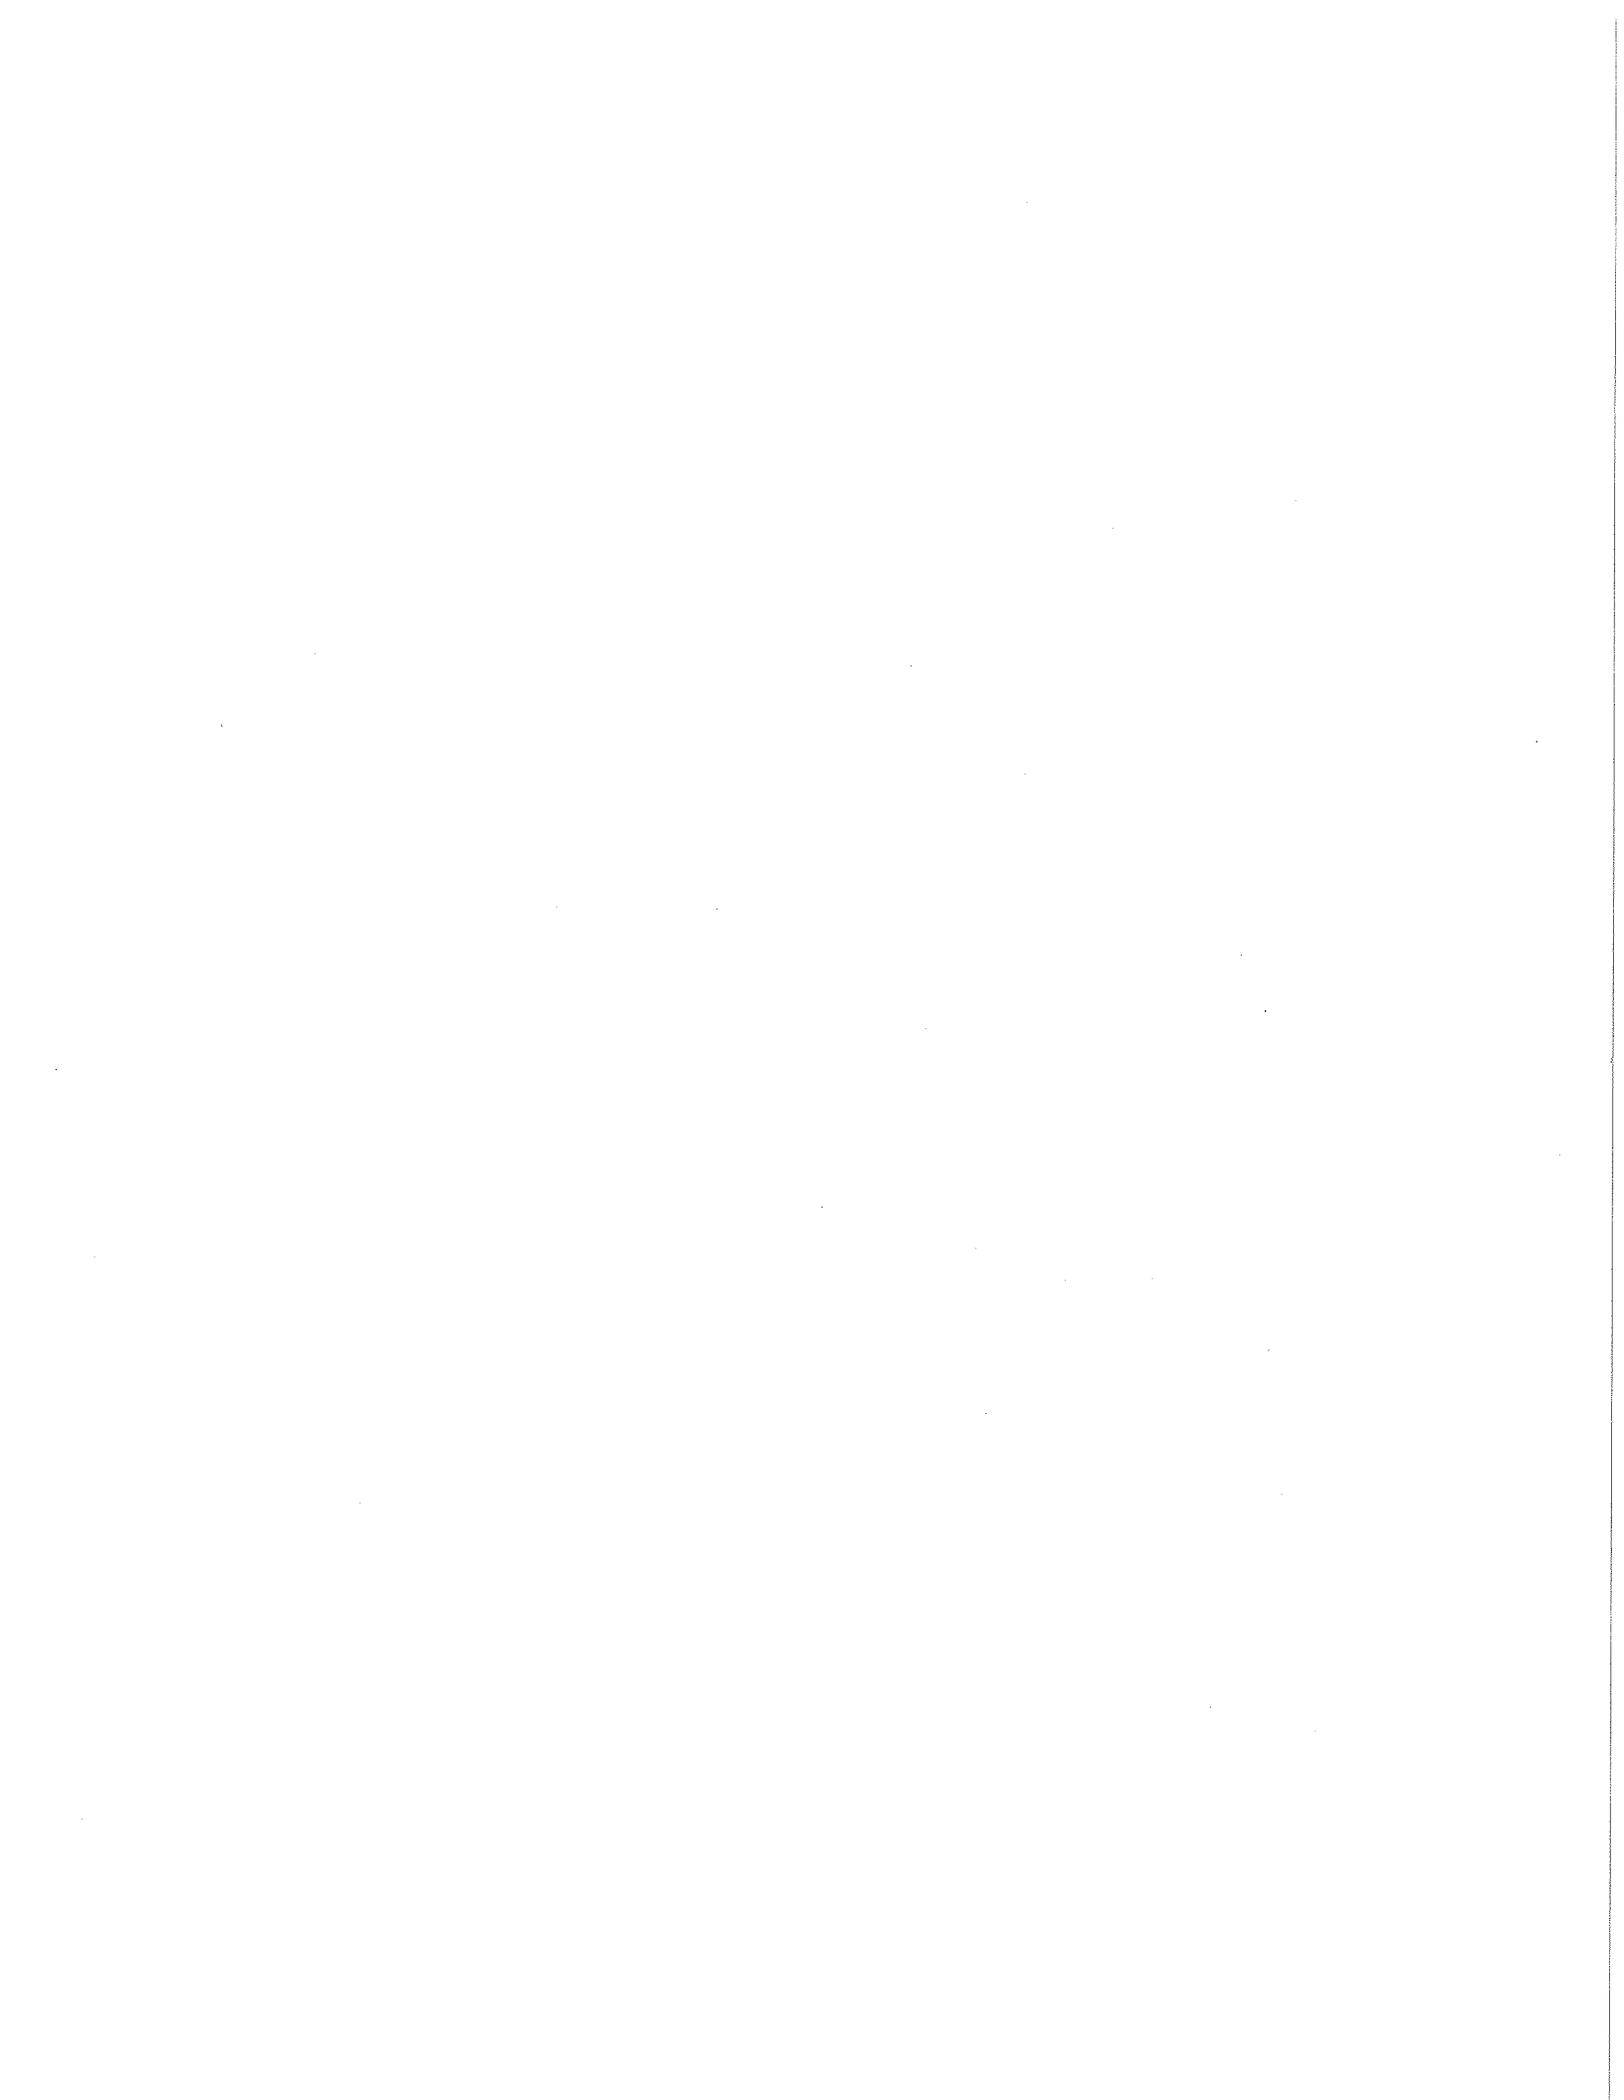

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

BUREAU OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 11864 1926**

Supersedes ^{Temporary} Certificate of Occupancy No. 10923

To the owner or owners of the building: New York **Dec. 13, 1926**

THIS CERTIFIES that the building located on Block **1279**, Lot **24**

known as **341 Madison Avenue N.E.C. 44th Street**

under a permit, Application No. **256 Front 409 N.E. of 125**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **business** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Boiler room
1st Story	120	20	10	30	Stores
2nd "	120	30	15	45	Offices
3rd to 19th Story	60 on each	30	15	45 on each	Offices

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 16, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but, if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

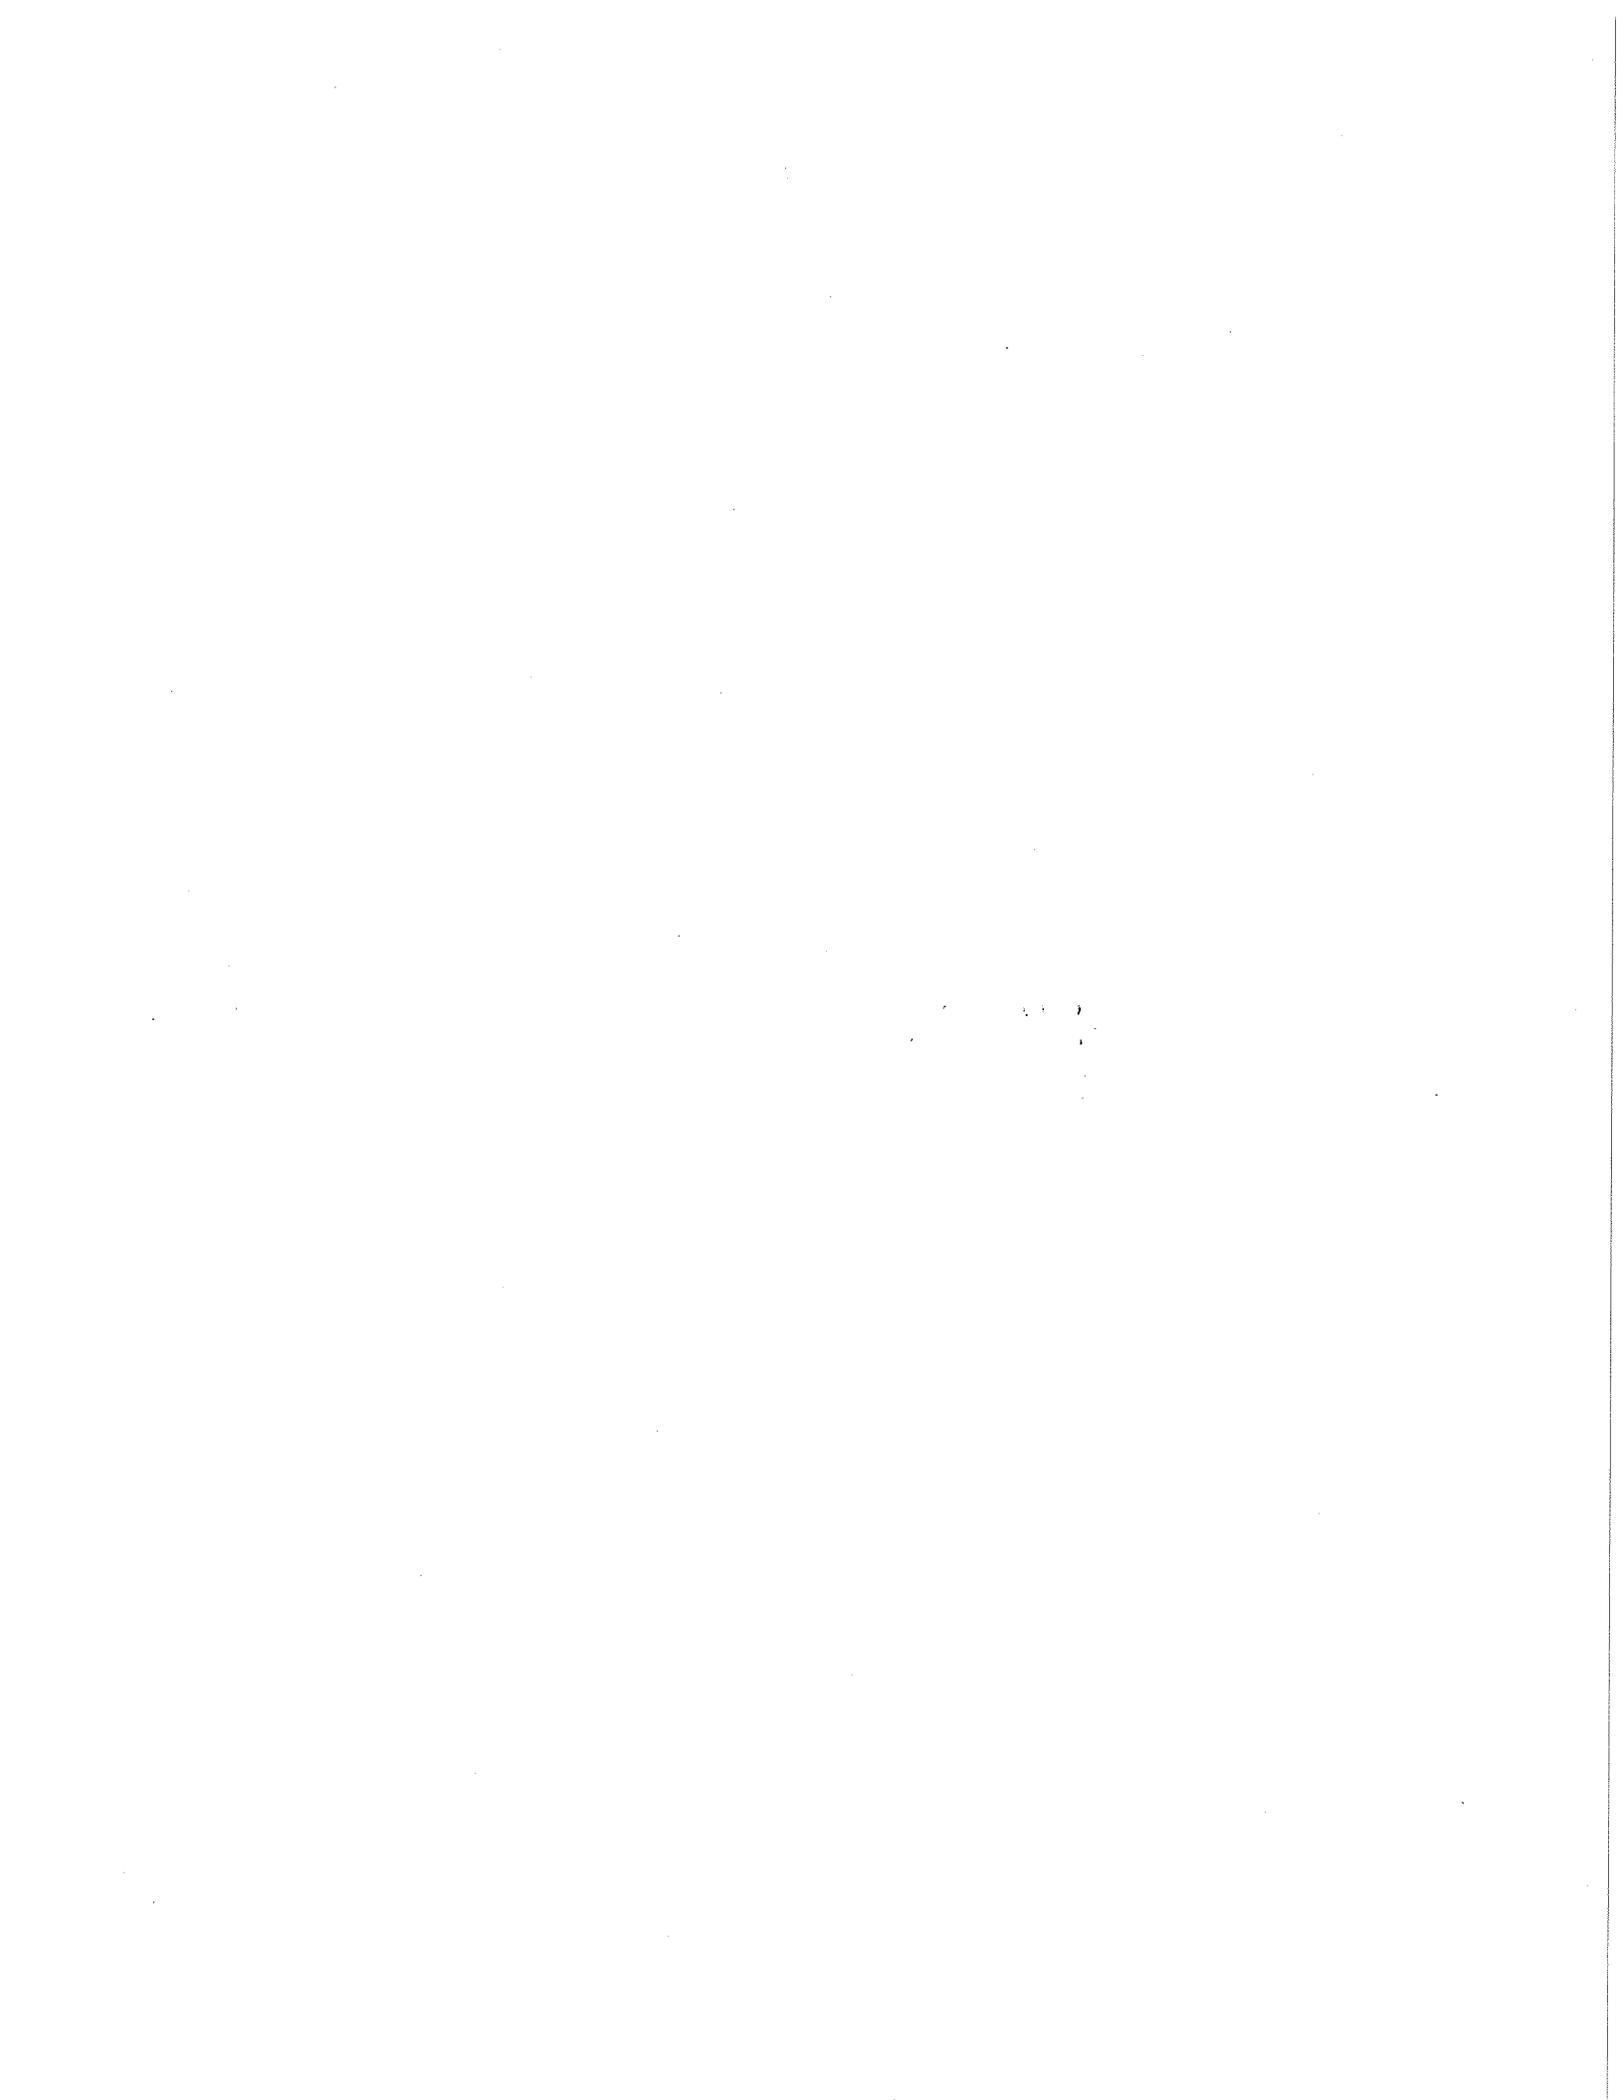

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code

BUREAU OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** **10923** **1926**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York **April 17,** 19 **26**

THIS CERTIFIES that the building located on Block **1279**, Lot **24**
 known as **341 Madison Avenue N.E.C. 44th Street**
25'6" front

under a permit, Application No. **409 N.B. of 1925**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **business** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Boiler room
1st Story	120	20	10	30	Stores
2nd "	120	30	15	45	Offices
3rd to 19th Story	60 on each	30	15	45 on each	Offices

A permanent Certificate of Occupancy will be issued when automatic gas shut-off has been installed.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1205 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but, if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school; or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

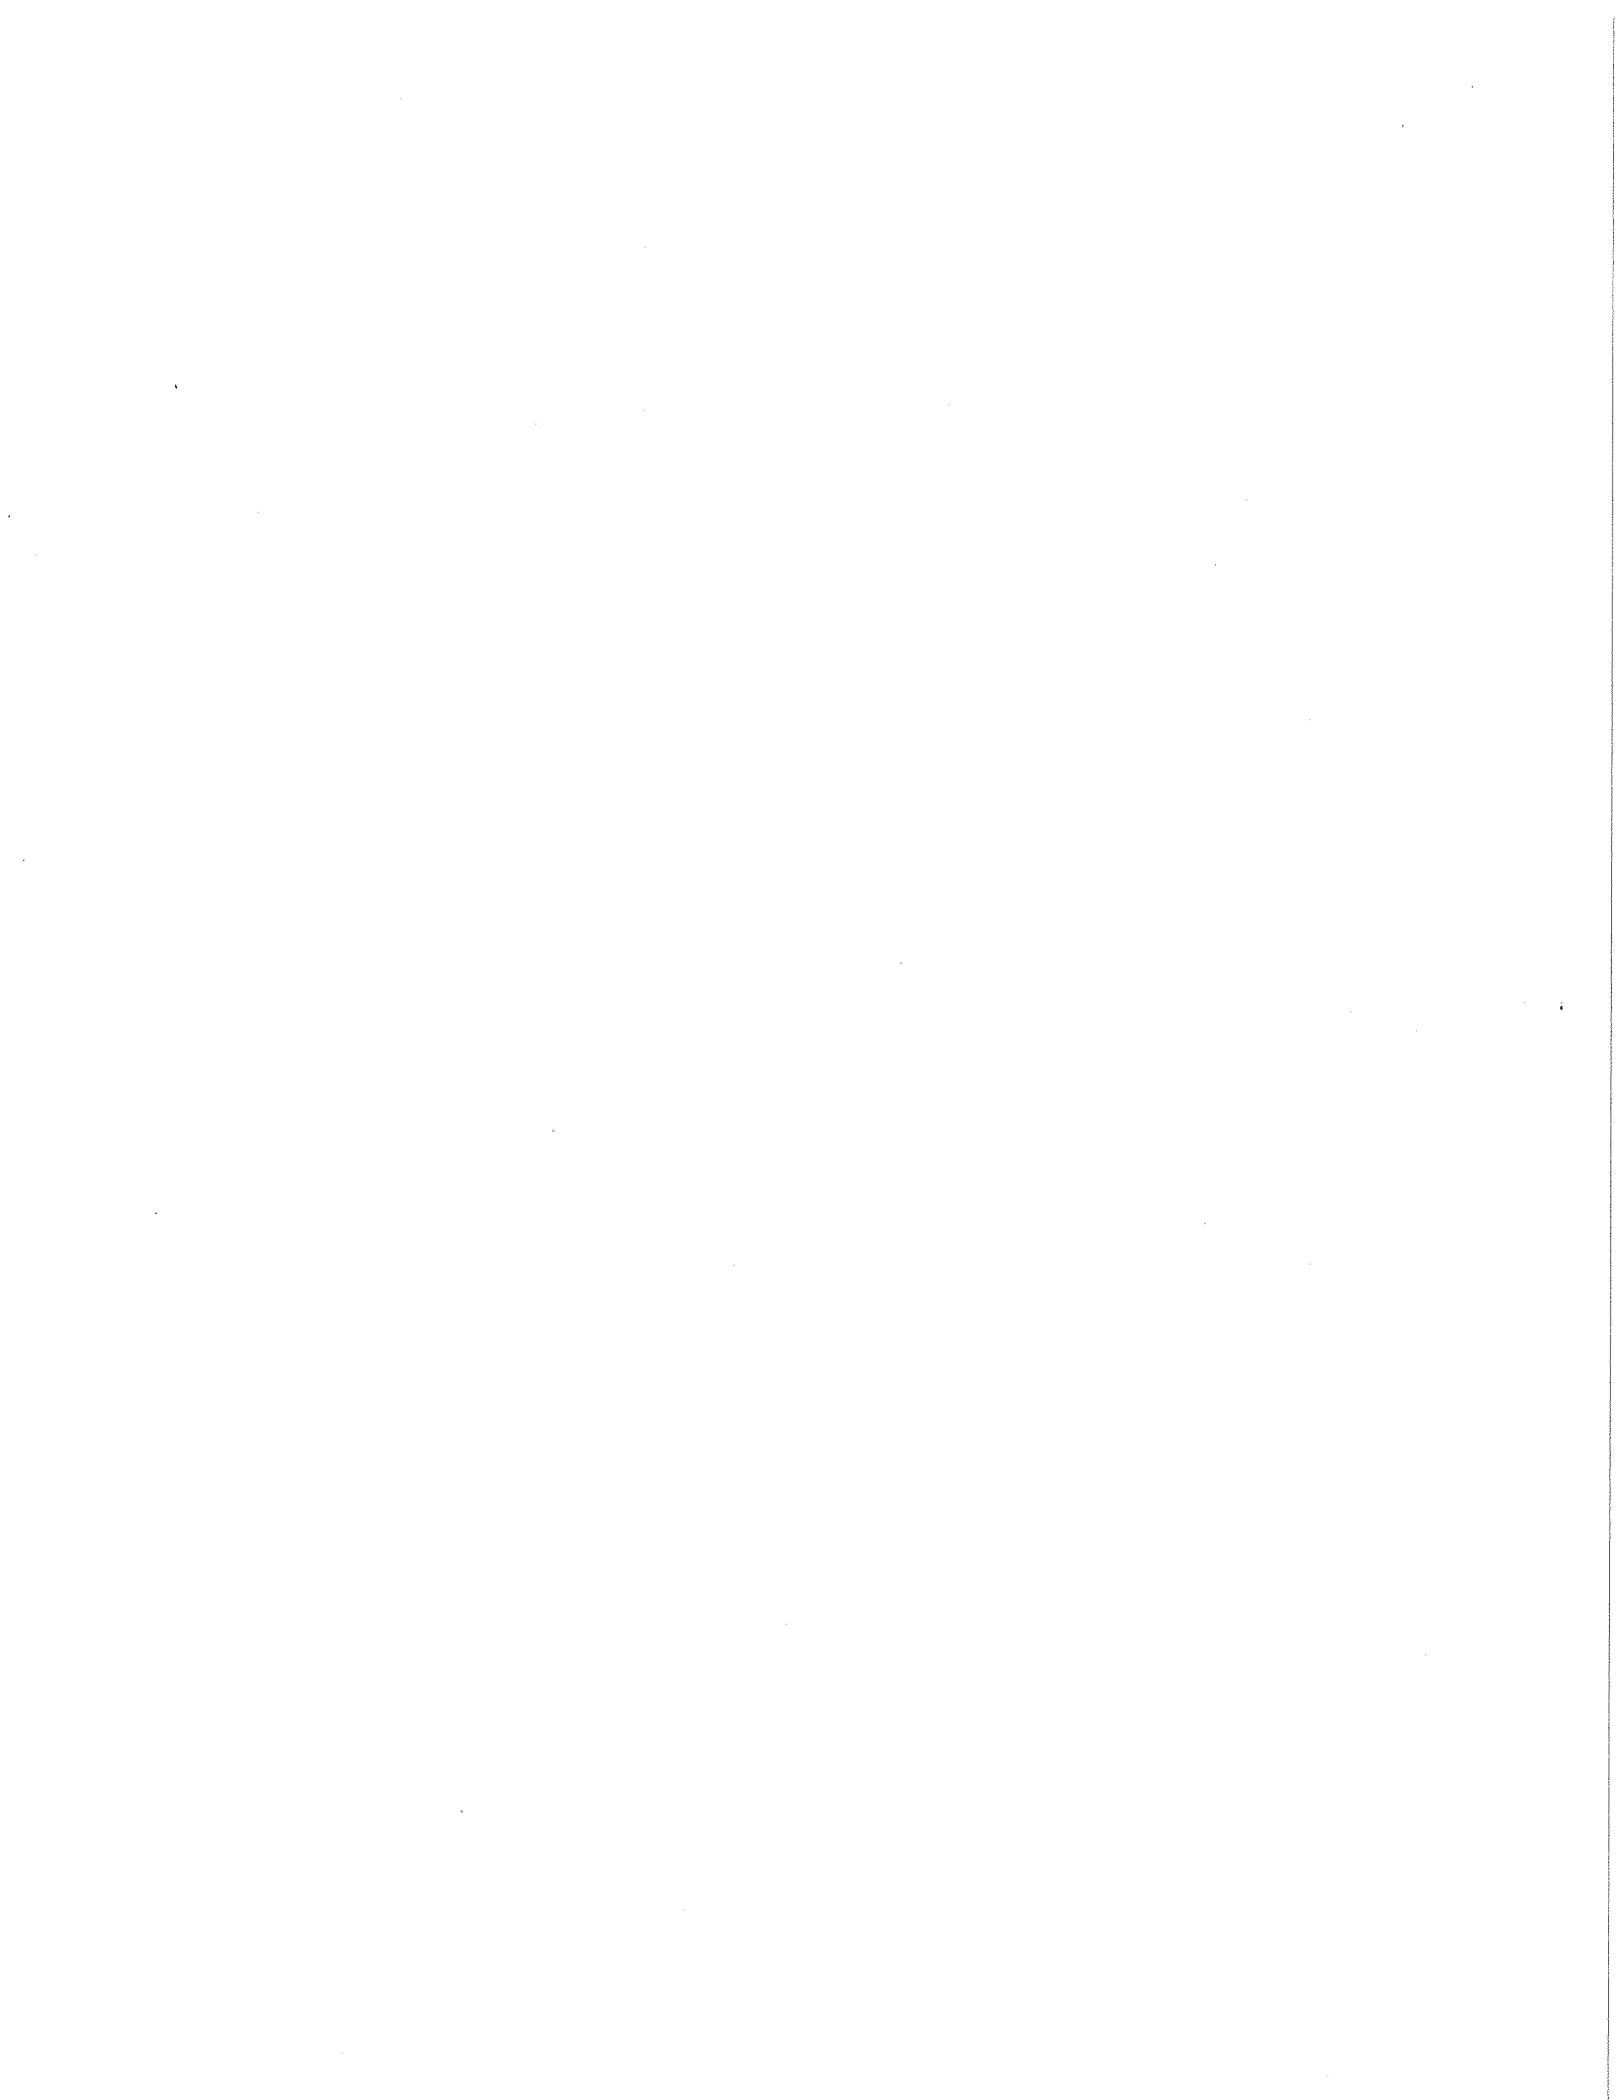

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "alone" as used in this certificate refers to the classification of building.

Re: Freedom of Information Request
343 Madison Avenue, Manhattan, New York
Block: 1279 Lot: 23

Dear Ms. Bryant:

Our firm has been retained to prepare a Phase I Environmental Site Assessment (ESA) for the above-referenced property.

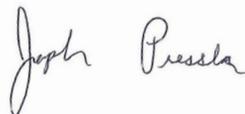

We are respectfully requesting information regarding any flammable storage permits, chemical or petroleum storage, spills, registered above or underground storage tanks, air discharge permits, investigations of environmental concern (e.g. asbestos, lead paint), etc. for the facility.

We agree with the department's decision to omit any health or personal identification in records provided.

If you require additional information to respond to this request or if there are costs associated with same, please do not hesitate to contact me. Thank you for your cooperation.

Sincerely,

VHB Engineering, Surveying and Landscape Architecture, P.C.

From: [New York DEC Support](#)
To: [Pressler, Joe](#)
Subject: [External] FOIL Request :: W070359-071020
Date: Friday, July 10, 2020 5:49:14 PM

Dear Joe:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 7/10/2020 and given the reference number FOIL #W070359-071020 for tracking purposes. You may expect the Department's response to your request no later than **8/10/2020**.

Record Requested: **I am requesting any information regarding the following spills in New York, NY 11714: NYSDEC Spill Nos.: 19-02445, 13-01250, 00-10574, 00-06666, 15-01047, 15-01044, 10-05321, and 99-12831.**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

Contact: Joe Pressler

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Vanasse Hangen Brustlin, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 24 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 17 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/10/2020 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/07/2020 has revealed that there are

EXECUTIVE SUMMARY

97 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 13 NY UST sites within

EXECUTIVE SUMMARY

approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 3 NY VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/07/2020 has revealed that there are 66 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 433 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 11 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 62598
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H00 - Tank Leak Detection - None
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
I01 - Overfill - Float Vent Valve
E12 - Piping Secondary Containment - Double-Walled (AG only)
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
G04 - Tank Secondary Containment - Double-Walled (Underground)
B00 - Tank External Protection - None
F00 - Pipe External Protection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 08/23/2001
Capacity Gallons: 6000

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 54911
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

K00 - Spill Prevention - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
L00 - Piping Leak Detection - None
H00 - Tank Leak Detection - None
A01 - Tank Internal Protection - Epoxy Liner
J02 - Dispenser - Suction Dispenser
I05 - Overfill - Vent Whistle
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 01/01/1950
Capacity Gallons: 12500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 08/08/2009

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 148748: 15 gallons of an unknown oil mixed with 100 gallons of water on the concrete floor of the structure. There is a drain in the floor but it is clogged. Sewer connection could not be verified, structure does not show up on conduit plate. Oil absorbent pads were placed on the spill as initial cleanup action. Cleanup to start as soon as resources are available. D Pontecorvo # 85413 reports that he re-calculated the amount of the oil spill to 5 gallons. He also stated that he is going to ask cig to request an investigation from the dep industrial waste hotline, due to the fact that the oil seems to have been dumped into the vault, (possibly from a nearby restaraunt). He also agrees with the initial report that the oil is possibly cooking oil. Lab Sequence Number: 03-04979-001 Insufficient amount of sample extracted to perform oil identification. Lab Sequence Number: 03-04980-001 PCB <1 ppm 6/21/03 21:10 R. Bracco # 12609 of the I&A called to report that the cleanup was completed at 18:30. The structure was double washed with degreaser. The flush truck removed all debris & liquid."

tanker complete. In accordance with I&A OS P. Renzulli, this job was completed using a hard copy dated in February from E2MIS incident #123221. The hard copy showed the spill was <49ppm. However, final sample results were not yet received from this job at time of final cleanup. The I&A discovered this at 5-11-99. 5-11-99 09:15 While I & A planner A. Johnson #81226 was updating spill that occurred in V3686, it was discovered that PCB sample results were not yet received. This was verified with the I&A OS involved in the job. The identification sample results posted stated that there was not enough of a sample to identify. 5-11-99 Chem Lab stated that the lab sequence number for the PCB analysis would be 99-04779, the results were not yet posted and within a half an hour the Chem Lab could tell us when the sample would be posted. 5-11-99 09:30 Astoria Transp., tanker might be on way to Bklyn, how will try to catch it before it gets there and put the tanker on hold. 5-11-99 09:35 Flush advised us that the truck that flushed the spill location was #60533. The truck dumped its load from last night this morning at approx. 08:30 in the W 28 St. WOL PCB pit. They will contact driver of the truck and put the truck on hold in W. 28th St. yard. 5-11-99 09:40 Pump and waste treatment facility at W 28th St. WOL shut down. 5-11-99 09:45 Called Chem Lab for status on ext.4123- was told that the chain of custody requests only a 4 day turn around, not an emergency turn-around. I&A Planner explained circumstances and requested an escalation to immediate results. 5-11-99 09:50 Chem Lab supervisor, Lima Jones contacted and agreed to escalate sample results. 09:55 Astoria tanker is on hold in Astoria until sample results received. 10:05 No further notification required at this time. We need to page him back as soon as sample results are received. He verified the waste treatment facility was shut down as soon as the lack of an official hard copy was discovered. 14:00 Chem Lab results received. Lab Seq#99-04779 Aroclor, none PCB <1ppm 5-11-99 14:10 All involved departments and managers listed in this note were advised of sample results. Hold was taken off flush pit, waste treatment plant, flush truck, and Astoria tanker."

VAULT #5705 (Continued)

S106018892

gallon of transformer oil had leaked from the transformer down the side and onto dirt on the concrete floor in vault V5705. He found the dirt soaked with oil. The oil never migrated to the sump pit. The source of the spill is the transformer and the cause is a leak from the top of the transformer probably caused by corrosion. One liquid sample taken for PCB. Initial cleanup action taken by placing absorbent pads down. This will not be classified as a 24 hr. spill since the transformer is being condemned and requested OOE Cat II. There is scaffolding over the vault, which needs to be removed in order to remove the transformer & perform the final cleanup. The transformer is a G.E. 1,000 kVA unit with Serial #F529854. The fluid capacity is 385 gallons. The transformer was pressure tested and it failed. The transformer must be de-energized in order to perform a cleanup. 10/10 @ 20:44 Lab Sequence Number: 03-08409-001 TOTAL PCB 18 ppm Update 01/07/04 Transformer 5705 has been drain & disconnected wait for scaffold to be removed 07/30/05 04:15 E.Hulser#39723,Cable Supervisor, notified the control center on 07/30/05 at 03:40hrs. to report the cleanup in V5705 was completed, this was a final cleanup. There were no solids removed and no drums or barrels were used. There was liquids removed Via vactor truck from V5705. The method used to clean was double washed with simple green. The yellow environmental tag numbered #17505 was removed from V5705. The cleanup crew were; G.Rosario#11464 and A.D'ateno#20237. The source of the spill, a leaking transformer, was removed and replaced with a new unit in V5705. The cleanup was completed on 07/30/05 at 03:30HRS."

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 216717
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
K01 - Spill Prevention - Catch Basin
C01 - Pipe Location - Aboveground
J02 - Dispenser - Suction Dispenser
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
B00 - Tank External Protection - None
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 01/01/1989
Capacity Gallons: 3600

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "156775. On 1/4 @ 12:30 L Roman # 27270 of I&A reported to me that while at 16 E 47 st in V-1677 he discovered a Dielectric leak of approx 1 pint from the Transformer unit and 100 gallons of water in the structure. He was working on Feeder 25M51. No sewer/waterways affected, no private property affected, no fire/smoke involved, no injuries and weather did not contribute. The source and cause of the spil is a FIN on the Transformer. There is no movement on the standing water, No sewer connection, there is a concrete sump, but the drain is clogged. There are no substantial cracks. The Unit will need to be taken off line (out of service) to start the Cleanup. Environmental tag # 17567 was hung. Two samples for PCB and ID will be taken. The Chain of Custody # DD 15231 will be used. The Finder will call the courier and will give him the Order Release #

----- ***** R. Bruns # 21106 ***** 2/12/05
11:15 E. Hulser Cable/Cleanup supervisor called to report that at
11:30 the cleanup was completed. During the midnight shift the I&A
drained the unit via a tanker & cut the gap. The cable crew then
removed the transformer & double washed the structure with simple
green. All debris & liquid was picked up by the flush truck. The
spill tag # 17567 was removed. Moises Chacon # 19531 did the cleanup.
***** R. Bruns # 21106 ***** 02/14/05 01:10
Update : M.Lyons#88777, I& A Supervisor, notified the control center
on 02/14/05 at 00:05hrs. to report the information on the draining of
the transformer in V1677. The unit in V1677 was drained on 02/12/05
in the A.M. and 265 gallons of oil was drained from the transformer
via Tanker. Logger : M.Casalta #12684 "

Remarks: "1 pint of material and clean up has not begun yet. No to 5
Questions. Leaked from a Transformer unit, Con ed# 156775"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "09/6/13-Zhune spoke to Mark Salamack 718-624-4842 from Petroleum Tank Cleaners. As per Mark they received a call from Bill Bailey (Building Mnager) 212-557-0610 requesting to pump out the oil from the 7500 gallons # 2 fuel AST at 317 Madison Ave. Mark also said

there are 6 of oil on the floor in the tank room. The Fire Department is on the scene. 09/6/13- Zhune spoke to Bill. He said the oil is contained in the tank room. There is no release outside the containment of the tank. The building is a commercial building. There is no odors in the building. He also said the building went on fire and the Fire Department asked him to pump out the oil from the tank. He assumed that CON-Ed touched the tank with a wire and made a hole while doing work on their structure. They had the last delivery couple of years ago because they run the boiler on Con-Ed gas. 1/22/15 TJD File review. WCD Group has submitted a closure report consisting of 710 pages summarizing the results of a geophysical investigation associated with the redevelopment of 4 separate buildings encompassing 43,313 sq ft. The closure report indicates the spill was reportedly contained within the concrete AST vault room and cleaned up immediately. The heating system at the source property has been converted to natural gas and the AST is currently out of service. A soil and groundwater investigation was performed which did not identify any VOC's or SVOC's above unrestricted use SCO's. Based upon the above information, no further action is required associated with the reported petroleum discharge affecting the tank room. Closure report has been uploaded to DECDOCS. Spill closed." "There is 6 inches of oil on the floor of the oil room in the basement. Clean up is pending crew arrival."

Material Name: #2 fuel oil (on-site consumption)

Tank Number: 02
Tank Id: 278537

Equipment Records:

A01 - Tank Internal Protection - Epoxy Liner
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
G12 - Tank Secondary Containment - Double-Walled (AG only)
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
J01 - Dispenser - Pressurized Dispenser
L00 - Piping Leak Detection - None
C01 - Pipe Location - Aboveground

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - In Place
Pipe Model: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "e2mis no 155879 On 10/19 @ 11:46 Tamez # 88368 reported that she noticed approx 1 qt of an unknown oil atop 35 gallons of water. No sewer/waterway affected. There is a sump pump in the hole and it was not running upon arrival. The pump was immediately unplugged. There is an oil minder attached. She pressure tested the Transformer and it held pressure. At this time it seems that the spill is not our equipment. The spill is in the concrete structure. Diapers will be put down to try and soak up this spill. The spill could not be completely soaked up. Environmental tag # 33581 was hung.. Three samples will be taken for PCB and ID and Flash point. Cleanup will commence when test results are evaluated by the Chem Lab and returned to the Environmental desk. Update 10-19-04 @ 18:00 L Roman #27270 reports that a partial cleanup is complete at this time. A final cleanup will have to wait for lab results due to excessive mud in the structure. 150 gallons of water removed by tanker(L Roman states there was no visible oil). Cleanup crew and supervisor are listed in the event involved person screen. Oct 20, 2004 21:02 Lab Sequence Number: 04-08538-001 Analysis indicates the presence of a transformer oil. TOTAL PCB 13 ppm Flash Point, PMCC > 140 deg F UPDATE:LIVE END CAPPED,DRAINED & DISCONNECTED. STATUS CODE CHANGED TO PTRAN FVROMANO MEHS 98384 Nov 3, 2004 A partial clean-up was done of 11-2-2004. 100 gal. of water/oil mixed was removed w/tanker. Unit was double washed w/slix. Unit is condemn. Source of spill is the transformer. Clean-up will be completed at a later date. See clean-up crew on person screen. E2MIS 30-AUG-2005 11:51:31 Page 3 of 6 -----Original Message----- From: Martin, Garrett T. Sent: Monday, February 14, 2005 7:48 AM To: Pellegrino, Robert Environmental Detailed Incident Report Cc: Davis, Horace; Pettenato, Robert; Byrne, Gregory F; Martin, Garrett T. Subject: 1 East 45 Street Bob, The cleanup in vault 3822, feeder 25m44 at 1 East 45 Street is complete. This cleanup was completed on the midnight shift, 2/2/05. The Supervisor was Greg Byrne and the mechanics were Robert Stiles # 3740 and Brian Curtin # 19713.The PCB count was 13 PPM and the Spill sign was removed. Based on the above information this incident can be closed. -----Original Message----- From: Martin, Garrett T. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Con Ed e2mis #149136: 07/08/03 05:10 hrs M Anderson # 18962 of Manhattan F.O.D reported to N Muldoon # 18723 that @ 04:35 hrs while trouble shooting on Feeder 25 M 44 in manhole 33831 located at the N/E/C E 45 St & 5 Ave discovered approx 1 pint of cable oil had leaked from a lead joint onto dirt on the concrete floor. Spill is contained. The source of the spill is a lead joint. The cause is a leak. There is oil filled equipment in the structure - primary cable and lead joints. There is no water in the structure just a lot of dirt and debris. A sewer connection, concrete sump and any substantial cracks could not be verified due to the amount of dirt. No sump pump running. Spill tag # 33529 was installed. Two wipe samples were taking one for PCB and one for OIL ID on a priority E basis. Chain of Custody # CC19979 was used. Initial cleanup action taken by placing absorbent pads and taking samples and hanging tag. #9 was notified about the leaking joint and is on its way to the location. Account 40134 is being used. Cleanup pending evaluation of feeder from # 9. UPDATE 07/08/03 06:20 hrs Shift Manager J Mejias request this incident be changed to a new spill because of the amount of work to be done on the feeders and would not be done with in 24hr

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 148695 6-11-03 @ 16:35 M Milano # 68073 reports he discovered 5 gallons of unknown oil mixed with 2 gallons of water and dirt had spilled onto the concrete floor of the structure. It is possibly transformer oil due to a hole in the unit. There was smoke and fire involved, there is now just light smoke. Verification of sewer or waterway is unverified at this time. There is a sump, sump pump was found disconnected upon arrival. Further investigation is pending safe access and an i&a crew. Update 6-11-03 @ 17:30 P Arroyo #15642 states that he will dispatch an I & A crew to v8770 to investigate the trap for a release and do an initial cleanup. P Arroyo reported @ 18:50 hrs that there is no sign of release of oil into the trap in the structure. Also a partial cleanup and a drain and disconnect of the unit has been scheduled for 23:00 hours using an over 50 tanker which has been ordered. Lab Sequence Number: 03-04882-001 PCB 17 ppm. 6/12/03 05:00 hrs the partial cleanup was complete. Approx 35 gallons of oil and water mix was removed from the floor of the vault and 80 gallons of oil was removed from the unit. The capacity of the unit is 295 gallons. I asked Mr Liguori if he checked the trap for oil and he stated the trap was clean of any oil. Absorbent was put down and final cleanup will be done after the unit is removed. The initial discovery was 5 gallons oil and 2 gallons water. During the partial cleanup 35 gallons of oil & water mix was removed and 80 gallons of oil was drained from the transformer. There is approx. 180 gallons of oil unaccounted for. According to Supervisors Arroyo & Liguori there was no evidence of oil in the trap and, therefore, no release to sewer. 6/13/03 cleanup is complete as of 18:55. Double washed with slix and flushed. UPDATE: New transformer installed 6/23/2003."
Remarks: "cleanup in progress fire involved in transformer con ed 148695"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE See also 0203738. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 12/30/10 - Raphael Ketani. A new spill case was called into DEC on 12/22/10. It was assigned #1010077. The spill consisted of the seepage of several gallons of oil through the walls of the #7 subway line tubes. It is a reoccurrence of a historical spill that has been going on for over 10 years and is being managed through active spill case #0010754. As there is an older active spill case for the site, I have closed spill case #1010077. 1/4/11 - Raphael Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message. Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to mop up the seep with pads. Otherwise, nothing else has changed. 4/24/14 - Obligado - I emailed Sherry Bulkey to get an update on this spill. 9/2/14-Vought-DEC Obligado out of office and Vought received email that Jeffrey and Santosh, There is an ongoing 3rd party spill that has been impacting the Steinway Tube (subway) on Track C-1. I am trying to locate the historic spill number, and will send it to you when I retrieve it. Many inspectors, including one of my staff will be going out tonight to walk the tracks and try and identify at least the point of entry. I am extending an invitation to the DEC to see if anyone would like to join. Please keep in mind the DEC representative needs to be track qualified. It is my current understanding that there will be no power (third rail will be off) during the inspection. I will call Jeffrey about the message that was left Friday. Please see the invitation below (11:30 to 2am at Vernon-Jackson Tool Booth). Thank you, Francine. Vought sent reply that Francine, After our phone conversation, I was able to locate the open Spill Number referenced above and the case is currently assigned to Andre Obligado in my Spills Remediation Unit. Andre is out of the office on vacation and is also not NYCT track qualified. Myself and Santosh, however, are certified and will meet you at the Jackson Avenue station at 11:30pm. I also have the advantage of having personal experience with the prior cleanup efforts including personal observations of the fuel oil formerly seeping from the tunnel ceiling and walls as well as OM&M of our former recovery system. After discussing the site with Randy (copied above), who is also historically familiar with the site, we are hoping NYCT can provide some information on how long the current seepage event has been occurring. Also our contractor has recently changed and as such may not be NYCT certified which may take time and such, pending the schedule, it may be more feasible for NYCT to perform the initial cleanup. We can discuss further when we meet your team tonight. With respect to Ray Favis's note that DEC should investigate the source of the spill after all these years, DEC performed thorough searches of

MAP FINDINGS

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

adjacent spills and PBS sites and had not been able to locate any direct sources. Unfortunately due to the depth of the seepage (bedrock at least 50' down), it is not cost feasible (as was determined by Central Office) to perform bedrock fracture trace analysis, borehole geophysics or other bedrock surveys over such a wide area. As such the decision was made by Central Office to use Spill Fund monies for remediation only and not further investigation. Finally, just a logistical note: When DEC and NYCT mobilized site and seepage location during my prior years, it was via the entrance by a doorway adjacent to the FDR at the base of the United Nations (that included a seven story stairway down that opened directly onto the location). Is this more feasible to avoid the long walk from the Queens side? Regardless, Santosh and I look forward to meeting your team at Jackson Avenue at 11:30pm unless we hear otherwise. Thanks 9/3/14-Vought-Site visit to inspect track with DEC Mahat and MTA team including Capital Project Management and Systems Safety (Richard Iyasere) and seepage at same location that Vought observed in prior years. Impact also to sump pump room #2. Vought spoke with RSE and due to logistical difficulties associated with work (eg general work orders, insurance requirements and training requirements), if seepage persists, DEC may ask MTA to use Spill Fund monies for the cleanup as they can use there contractors and only submit work plans and results to DEC. Vought called and spoke to MTA Maibauer and forwarded her photos from site visit and Maibauer noted MTA would perform the initial cleanup via simple green and barrels and will also clean Sump Pump #2. They will monitor and maintain after and if problem persist will approach DEC with either using a State contractor or making a claim to the Fund for cleanup costs. 9/10/14 - Obligado - C.Sastry to inquire about the status of the fuel entering the subway and the clean up. I left a message to call back the DEC. 9/12/14 - Obligado - Mr. Sastry called back and provided me with the phone number for Francine Maubuer who is the System Safety Manager and is in charge of the project. I spoke to Francine. She said MTA had an internal meeting yesterday and were not inclined to hire their own remediation contractor but rather train the DEC and DEC's contractor on track safety and request we do the work. We will schedule a conference call to discuss the issue further. She said she would provide 7 line tube as built drawings. 9/23/14 - Obligado- We (Obligado,Vought, and Austin) had a conference call with NYCT, including Francine Maubaier, Eric Jones, and others as well as CPM, the contractor who will be doing construction work in the tunnl. According to transit, the seepage is very slow,minor . They inspect he rail regularly. They have put socks in the sump to recover oil. According to NYCT they inspect the track weewekly. The August appearance of free product is the first time its been seen in several years according to NYCT. NYCT was not inclined to do the cleanup, and would rather DEC hire contractor. We discussed the scope moving forward. DEC contractors will do the initial cleaning. Following the cleaning, NYCT will inspect and monitor the area for additional seepage to determine if we need to reactivate the recovery system. DEC stated that if the amount of product is small, as it appears to be, it may not warrant restart of the full system and other recovery methods could be used. DEC and NYCT discussed potentail sealing/grouting the tunnel walls to prevent further infiltration. DEC and NYCT set up a tentative dates of October 18th, 25, Nov, 8 to do the cleaning. There is a General Order on those weekends for CPM's work so the DEC contractor could piggy back on those GOs to do the cleaning. 10/6/14 - Obligado

S104881203

- I had email discussions with Francine regarding the inspection and cleaning. I suggested doing the initial inspection on the 18th and then do the cleaning on the 25th of October. Francine responded that she would not be able to get all Miller personnel track trained until mid Nov, so the cleaning would have to wait until mid Nov. However she agreed to move the initial inspection to the 18th. 10/8/14 - Obligado - PIN Callout for Miller, signed by Austin and sent to Rob Ferguson. 10/13/14 - Obligado - Obligado and Vought attended a pre-General Order (GO) meeting at NYCTransit offices with NYCT, in particular, Francine Maibauer, to discuss logistics for the 18th site visit. DEC PIN Contractor Miller environmental attended as well. Tentative inspection time/date of 10AM Sat 10/18. 10/17/14 - Obligado - Email from Francine, inspection scheduled for 7AM October 18 meeting at the Grand Central platform. 10/17/14 - Obligado - I reviewed desing drawings of subway tunnels provided to me by transit to pin point the location of the seep. The reported seep locations I have in my file at 43 + 25, 44 +60 and 45 + 10, which based on the drawings provided puts the seep under the east river. I emailed Francine to see if their are more updated drawings with different survey markers. 1/17/15 - GO tube cleaning and wall sealing Ao on site 645 Miller full crew on-site 720. 725 H and S meeting 730 ready to go. 740 talk to richard. Still waiting for flaggers. 7328488420 yu 6464631390 rich Flagger #14681 800 start work train 815 stop work train, still on platform Miller has one crew cleaning oil from trench with pads. Another crew scaling and gring solidified oil from the walls and ceiling. Once cracks are exposed Miller applies epoflex. 1/18/15 - GO tube cleaning and wall sealing AO Onsite at 935. Walk out to c1 wprktrain. Oil intrusion at the ceiling has gotten considerably worse. Oil slowly dripping from the Oil going right through the epoflex. Overnight flowed downWork train set up below leak area. Naminder subeda onsite for transit. We asked trNsit to provide another cement material DAN yu onsite as well. 1500 hours identify major oil infiltration 11 ties south of 432c wall oil seep. Oil flowing down trench. There is seepage at wall at that point but doesnt flow into the trench. Meaning oik may coming ing from the bottom of the trench. Miller cleans up additional oil with pads. Adjusts water capture shield device to capture dripping oil to prevent it from falling on the track. 1600 exit tunnel 1/25/15 -GO tube cleaning and wall sealing Work train on c2 6 Miller guys Cameron is the foreman dan yu from nyct 745 work train starts 800 drop trench guys down track to pad and bag 815 start scraping c2 seep area 10 ft east of 4450 10 am, walked the C2 trench. I identified another large seep in the trench at signal 461c. Oil actively seeping out the bottom of wood rail ties directly into trench Complete surface prep of C2 wall seep. 1015 break 1030 resume work. Crew starts to walk c1 trench I walk c1 trench. Signal 432 c 37 ties west of nyct marker 44 00. 1st smal seep 19 ties west of major seep. Oil still seeping. Walked to the second seep area on C1 north of major seep, appromimately 200 ft north. Primed and sealed areas were seeping oil through seal. Small seeps, approximately 4 or 5. 12pm finish 2nd coat 1/28/15 830 AM Inspect 300 East 40th Street Miker Tarku not on-site, at Jury Duty The assistant super showed me around I saw the abandoned 40,000 gallon #6 oil tank. The UST is located in the very bottom of the parking garage. The manhole was sealed shut. Photographs taken. The assistant showed me the current tank. Its an AST in the boiler room. The tank is shown to contain #2 fuel oil. According to the assistant, this tank is a temporary tank for when temperatures go

S104881203

below -10 F, otherwise, the boiler runs on gas. The system was converted last year. I asked him to show me the fill ports for both the old tank and the new tank. The fill port for the new tank is located on 40th St. I asked him where the old fill was, he did not know. We went into his office and he showed me paperwork, no info was available on the old fill port, but he showed me a letter from the withdrawing notice of complaint with regard to overdue tightness test, stating that no tightness testing was required. He called his supervisor Mike Tarku. I asked Mike what happened to the old fill line. He said it was in the same location as the new. They took the old line out and put a new fill port. 930 Andre Off-site. 12:28 - I emailed Mr. Lazarri and requested tank abandonment report. I later identified a closed spill report for 300 East 40th St due to a hole in the 40,000 gallon UST. Spill No. 0801691 closed by Vought. The 40,000 gallon tank had a cracked seam identified during the tank closure. A limited investigation was performed. 6 Borings were advanced with a concrete coring machine on the sides of the tank. The borings were advanced to the tank at the midpoint depth. Laboratory samples of the soils reported no contamination. I later emailed Mr. Lazarri and notified him that I found additional information in my files and that I did not need the abandonment report at this time but I would let him know if I needed additional info. 1/29/15 - I measured the elevation of the platform by counting steps - 101 steps. Each step is approximately 7.25 inches, equals 61 ft down to the north (aka east) side of the #7 platform. According to GIs, the elevation of the top of the stairwell is 37 ft above msl. I inspected The Woodstock building on 42nd street. Pbs # 2-116440. The pbs lists a 10,000 gallon #6 oil tank. I met the super AI on-site. He showed me the tank. It was in a concrete vault with access to inspect concrete floors. No staining or evidence of spills. They switched to #2 oil last year. I advised him that his registration was not current and he should update the records with the DEC. He showed me the fill pipe, which runs above ground in the basement until it goes through the basement wall to the sidewalk fill port. No staining or spills were evident at the entry point. The schist bedrock was exposed at the north basement wall. The tank was installed in 1979. Prior to the use of the tank, the heating equipment ran on city steam. HE showed me the old steam pipes which were disconnected. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. 1/31/15 - AO onsite 645 Miller onsite 7 AM As of 8 AM, still waiting for NYCIT flaggers 830. Start walking trench. Measure off from edge of platform to 1st seep on C2. 687.1 ft to start of first major bench seep. Identified a location where the bench was broken. 2 pipes run inside the trench. Suspect oil migrating through pipes east of the bench seep location and emptying at the trench seep area, where 2 pipes enter the trench 126.1 ft from edge of paint to first trench seep. Rob Cameron and helper apply final coat to the left side of C2 bench and epoxy to right side of C2 bench. Other crew switches up pads on C2. Francine will not let us keep pads in the trench due to fire hazard. All pads picked up. Bags from C2 brought to the GC 7 platform temporarily. Finish up C2 work, move to C1 to switch pads along C1 trench and apply another top coat to the wall seeps. Major seep at C1 ceiling is 579.9 ft from edge of platform. 1017 ft to smaller wall seep area on the south wall of C1. Significant oil still in trench at certain locations. Heavy oil accumulation in trench at 879.5 ft. Miller collects a product sample from the trench at this

MAP FINDINGS

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

location for oil ID. We are not able to store bags of waste near system as planned. Francine spoke with another transit worker who said the system area is outside the assigned flagging area. Miller would need to take the bags back with them, however, they don't have a waste transporting vehicle. 2 guys will need to go back to the shop to get a truck to bring back. 2/2/14 - Obligado - Inspect 801 2nd Ave, PBS #2-600069. See spill number 1410622. 2/13/15 - Obligado - DEC Vought and Obligado inspect neighboring properties and pbs facilities around the seep location. PBS # - 2-6005823 - 212 East 42nd Street, Westen Hotel. - Met with Javier Reyes and Raphael. We inspected the 2 ASTs in the sub basement. The ASTs are 20,000 gallon #4 oil tanks in a large concrete vault. The tanks are on racks with the concrete bottom visible for inspection. A slight oil drip was observed from the union fitting above Tank #1, which dripped down the side of the tank, and formed a couple small stains on the tank vault floor. Other than this slight drippage, no evidence of significant oil spills was apparent in the vault. The vault was generally clean and well kept. The oil drip from the union was brought to the attention of Mr. Reyes. According to Mr. Reyes, this facility predominantly uses natural gas, and the #4 fuel oil tanks are back up fuel supplies. They have not run the boilers on #4 oil since last year. When they did use oil, according to Raphael, the oil was delivered by Hess, 10-13 K gallons every 10 days approximately. We inspected the sumps, and no oil was apparent. We inspected the remote fill. There are 2 remote fill ports, 1 for each tank, in the sidewalk on 41st street. The fill lines run under the sidewalk. We advised Mr. Reyes that his registration needs to be updated and the certificate needs to be displayed. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-315484 - 333 East 41st street - We met the super, Aden Nefjalic. According to the super, they switched to #2 oil approximately 2 years ago. They have a dual fuel gas/#2 oil system. The #2 is a backup fuel. Prior to the switch, according to Aden, they used #4. We inspected the tank vault. Vought entered the vault. The tank is a rectangular with the bottom in direct contact with the vault floor. No oil spills were apparent in the vault. We inspected the sumps, which were dry. We inspected the boiler room which was clean. We inspected the fill port, which ran aboveground attached to the building wall. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #2-359122 - Essex Owners Corp, 325 E. 41st Street. We met Louie Nieves, the super on site. The site has a 7500 gallon #2 fuel oil AST in a vault. We entered the vault and inspected around the tank. The tank is cylindrical in shape and the invert of the tank rests directly on the vault room floor, so it was not possible to see completely beneath the tank. However, there were no oil spills apparent anywhere on the tank vault floor. According to Louis, they had the tank completely cleaned out when they switched fuels. We inspected the pump room sump and found no oil. We inspected the remote fill, which was in the sidewalk on 41st street. According to Mr. Nieves, they have been running solely on gas since the switch, as they have a contract agreement to run gas only for 5 years after conversion. We advised Mr. Nieves that the building needs to update their PBS registration and display the certificate. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. .

304 East 42nd Street - The Hilton Manhattan East. While walking on 41st street, a fill port and vent pipe was observed in the back of the building. We entered inside the building to inspect. They had a 275 gallon Diesel AST in the basement on a concrete floor. No significant spillage was observed. We inspected the basement sumps and elevator sumps. No oil was present in sumps. No current or historic source of #4 or #6 oil is present at this facility. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #604594 - The News Building - 220 East 42nd Street. We met with Frank Paselli, the building manager. We inspected the sub basement and 3 sump pits. All pits were free of oil. We inspected the 1000 gallon diesel tank. The tank room was clean with no spills. The tank is for the emergency generator. We asked if they ever had oil intrusion, he said no, but they do get water seepage in some areas of hot water. The building is heated by Coned supplied Steam. We advised Mr. Paselli that his PBS certificate needs to be displayed. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-610034 - Pfizer Building - We met Mr. Paul Bryne, the Chief Engineer and Mr. Everett Jackson, the building manager. We inspected the basement sumps - no oil in the sumps. We inspected the diesel AST and it was in a vault and extremely clean with no oil spillage. The AST is for the emergency generator. The building runs on Coned supplied Steam. We asked if they every had any oil seepage into the basement. They said no. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 675 3rd Ave/ 201 -205 E 42nd - These buildings do not have a PBS ID, however we inspected them anyway. According to the building manager, Angelo Maniello, they have no oil tanks and they have never used #4 or #6 to his knowledge. The 2 buildings are connected and have the same ownership. We inspected both basements. There was no oil storage in the basement. We inspected the sumps and found no evidence of oil in sumps. Both building heating systems run on Coned supplied steam. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 2/28/15 - AO onsite for track cleaning and tunnel sealing. Miller onsite as well as NYCT system safety - Richard and NYCT Structural inspector to inspect integrity of the tunnel ceiling. We inspected the ceiling seeps and found the flow decreased significantly from previous visit. Miller wiped of oil, cleaned the ceiling and applied a top coat of epoxy. I collected product samples from 3 different seep locations, 1 from the Track C1 Tunnel Ceiling SEep, 1 from the Track C1 South Wall seep area, and one from TRack C2 wall seep. Miller applied plug and seal to wall seeps on C1. We also inspected track C2 - Significant oil seepage through the prior epoxy layers. Oil puddles were evident on the floor. 3/1/15 - Obligado - returned to the Tunnel for additional track cleaning and sealing. DEC Obligado, Miller Crew, and NYCT Dan Yu. Inspect the ceiling seep. 3 Miller guys go down track with pads. 10 to 11 small drips of oil over night. Wiped the oil of and Miller applied plug and dyke at each seep point. Covered with shield. Inspected down gradient wall seep. No oil

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

seep apparent over night. Estimated less than a 1 oz of oil seeped over 24 hours. 1 boom set down gradient of all seeps. On track c2 there is significantly more oil intrusion. One crew sets 3 booms. 1 down gradient from bench seep. 1 down gradient from trench seep. 1 down gradient of all oil in trench. Crew works to try to seal trench. Oil/water could be seen trapped in bubbles under epoxy seal - not permanent seal. When pierced oil and water seeps out. Prior to cement application, water flows in continuous stream out of a weep hole in the seam with a drop of oil every 10-20 seconds or so. Miller grinds out the whole length of bench seam. Applies an alternate hydraulic cement product to the seam. Upon leaving the site, no oil seep however water seeps present and oil likely to be able to bleed through eventually. 6/1/15 - Obligado - I emailed Francine regarding continuing clean up activities. We were trying to coordinate a date to get on both tracks to do a clean-up of any additional oil seepage since our last visit. NYCT responded that we would not be able to get on both tracks, but only one, since there is no GO. Also, any oil or oil impacted material removed from C2 would not be able to be stored in the system area and would need to be taken out of the tunnel the same day through Grand Central terminal. After discussion with Vought and Austin, I sent email to NYCT notifying them that we would perform clean up going forward on an as needed basis based on NYCT inspections. 7/17/15 - Obligado - I called Francine to inquire about the oil seepage and left a message on her voicemail. 7/24/15 - Obligado - I received an email from Francine - According to Francine, Hydraulics division has not indicated that there is an issue with the oil intrusion. 8/27/15 - Obligado - Inspection of Tunnel C2 scheduled for 9/9/15 3/22/17 - Obligado - As per NYCT System Safety's Daniel Yu, Hydraulics Staff inspected the tunnel on 3/16/17 and did not observe any recurring oil seepage. 8/10/17 - Obligado - Discussion with DEC Austin and Vought about the P&T system status in the subway and whether the System should be dismantled and removed due to the absence of oil intrusion for 2 years. Austin recommended investigate whether the system was properly decommissioned (all electrical equipment properly disconnected). It was agreed I would review the Spill and PIN file for documentation of proper system decommissioning. 9/8/17 - Obligado - No documentation of proper decommissioning was found. As per Austin, I sent an email to NYCT transit Michael Mandac, cc to Austin, Vought, and NYCT Daniel Yu inquiring about the status of the system and asking whether the electrical to the system and pumps had been disconnected by NYCT. 9/19/17 - Obligado - Email from Michael Mandac. I was able to get MOW to walk the Steinway tube on the 15th. It looks like oil seepage has stopped, the pumps removed, and electrical systems de-energized. Would this be enough to close out this spill? Thank you! 9/21/17 - Obligado - I emailed Michael Mandac that in order to close out the spill the DEC will need to decommission and remove the system. I requested access for DEC contractors to remove the system during an upcoming GO. 9/22/17 - Obligado - Work Authorization signed by DEC Austin sent to Miller to decommission, break down, remove, and dispose of former system. 10/2/17 - Obligado - Closed out work Authorization to Miller since they do not have current NYCT track training and will not likely get the training in time for the upcoming GO. 4/30/18 - Obligado - I received an email from Daniel Yu, who indicated that the oil seepage had returned and the oil has entered the track bed and sump pump room. I requested the NYCT provide access to inspect and clean up the oil spill. 5/2/18 -

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

Obligado - I received notification that there would be a General Order shut down on the weekend of May 11. 5/9/18 - Obligado - I attended a GO planning meeting at the NYCT offices. The 7 line train will be shutdown and access and flaggers will be provided for the DEC and our contractor WRS. It was indicated that up to 2500 feet of track on both the C1 and C2 were impacted in oil. 5/15/18 - Obligado - During the weekend of 5/12/18 through 5/14/18, the DEC mobilized our contractor WRS to perform cleanup of oil and contaminated sediment from the Steinway Tunnel. During the weekend, over 25 cubic yards of contaminated sediment/oil/water mixture was removed from the tunnel. Upon excavating the trench, at least 3 active oil seeps were observed entering the trench on both C1 and C2 tunnels. Additional remediation will be required during future GOs. 5/24/18 - Obligado - Meeting at NYSDEC offices with System Safety - Michael Mandac, Daniel Yu, and Dorein Boatwain. DEC attendees were Randall Austin and Andre Obligado. WRS Patrick McCloughlin also attended. We discussed the remediation which was performed and some obstacles to completing the remediation over the weekend. Specific issues which were discussed included the presence of construction debris in the trench which DEC's contractor did not have capability to remove dispose of at the time. Also, work trains were delayed 6.5 hours and flagmen were missing for several hours, resulted in lost time. DEC requested an additional weekend GO and to be provided access to 2 work trains, each Vactron unit and additional flat bed on each train for steel/concrete debris transport. Ms. Boatwain indicated that she would raise the issue up to the VP of System Safety and request special access to be provided and discuss diverting WRS personnel and equipment from the SAP project to the DEC Spill clean up. It was also stated that considering the active and on-going oil seepage, the DEC and WRS may need additional GOs to complete the work. We also discussed setting up a short weeknight GO recover free floating oil and change out absorbents as an interim remedial measure. Other issues raised included the status of the former remedial system. Additional access will need to be provided towards that effort, but that is lower priority. It was agreed that in order to maximize sediment removal and minimize water generation, water will be decanted and run through carbon filter socks prior to discharge back to trench. 6/6/18 - Obligado - I emailed Michael Mandac to inquire if any progress had been made on providing site access. He said the subject has been raised to upper management and he is awaiting a response. 8/15/18 - Obligado - Mobilized with WRS to perform interim oil clean up in the subway tunnel during an overnight GO. Approximately 30 bags of oiled absorbents and booms were removed from the tunnel."

Remarks:

"CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP "

active spill case #0010754. As there is an older active spill case for the site, I have closed spill case #1010077. 1/4/11 - Raphael Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message. Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to mop up the seep with pads. Otherwise, noting else has changed. 4/24/14 - Obligado - I emailed Sherry Bulkey to get an update on this spill. 9/2/14-Vought-DEC Obligado out of office and Vought received email that Jeffrey and Santosh, There is an ongoing 3rd party spill that has been impacting the Steinway Tube (subway) on Track C-1. I am trying to locate the historic spill number, and will send it to you when I retrieve it. Many inspectors, including one of my staff will be going out tonight to walk the tracks and try and identify at least the point of entry. I am extending an invitation to the DEC to see if anyone would like to join. Please keep in mind the DEC representative needs to be track qualified. It is my current understanding that there will be no power (third rail will be off) during the inspection. I will call Jeffrey about the message that was left Friday. Please see the invitation below (11:30 to 2am at Vernon-Jackson Tool Booth). Thank you, Francine. Vought sent reply that Francine, After our phone conversation, I was able to locate the open Spill Number referenced above and the case is currently assigned to Andre Obligado in my Spills Remediation Unit. Andre is out of the office on vacation and is also not NYCT track qualified. Myself and Santosh, however, are certified and will meet you at the Jackson Avenue station at 11:30pm. I also have the advantage of having personal experience with the prior cleanup efforts including personal observations of the fuel oil formerly seeping from the tunnel ceiling and walls as well as OM&M of our former recovery system. After discussing the site with Randy (copied above), who is also historically familiar with the site, we are hoping NYCT can provide some information on how long the current seepage event has been occurring. Also our contractor has recently changed and as such may not be NYCT certified which may take time and such, pending the schedule, it may be more feasible for NYCT to perform the initial cleanup. We can discuss further when we meet your team tonight. With respect to Ray Favis's note that DEC should investigate the source of the spill after all these years, DEC performed thorough searches of adjacent spills and PBS sites and had not been able to locate any direct sources. Unfortunately due to the depth of the seepage (bedrock at least 50' down), it is not cost feasible (as was determined by Central Office) to perform bedrock fracture trace analysis, borehole geophysics or other bedrock surveys over such a wide area. As such the decision was made by Central Office to use Spill Fund monies for remediation only and not further investigation. Finally, just a logistical note: When DEC and NYCT mobilized site and seepage location during my prior years, it was via the entrance by a doorway adjacent to the FDR at the base of the United Nations (that included a seven story stairway down that opened directly onto the location). Is this more feasible to avoid the long walk from the Queens side? Regardless, Santosh and I look forward to meeting your team at Jackson Avenue at 11:30pm unless we hear otherwise. Thanks 9/3/14-Vought-Site visit to inspect track with DEC Mahat and MTA team including Capital Project Management and Systems Safety (Richard Iyasere) and seepage at same location that Vought observed in prior

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

years. Impact also to sump pump room #2. Vought spoke with RSE and due to logistical difficulties associated with work (eg general work orders, insurance requirements and training requirements), if seepage persists, DEC may ask MTA to use Spill Fund monies for the cleanup as they can use their contractors and only submit work plans and results to DEC. Vought called and spoke to MTA Maibauer and forwarded her photos from site visit and Maibauer noted MTA would perform the initial cleanup via simple green and barrels and will also clean Sump Pump #2. They will monitor and maintain after and if problem persists will approach DEC with either using a State contractor or making a claim to the Fund for cleanup costs. 9/10/14 - Obligado - C.Sastry to inquire about the status of the fuel entering the subway and the clean up. I left a message to call back the DEC. 9/12/14 - Obligado - Mr. Sastry called back and provided me with the phone number for Francine Maubauer who is the System Safety Manager and is in charge of the project. I spoke to Francine. She said MTA had an internal meeting yesterday and were not inclined to hire their own remediation contractor but rather train the DEC and DEC's contractor on track safety and request we do the work. We will schedule a conference call to discuss the issue further. She said she would provide 7 line tube as built drawings. 9/23/14 - Obligado- We (Obligado, Vought, and Austin) had a conference call with NYCT, including Francine Maubaier, Eric Jones, and others as well as CPM, the contractor who will be doing construction work in the tunnel. According to transit, the seepage is very slow, minor. They inspect the rail regularly. They have put socks in the sump to recover oil. According to NYCT they inspect the track weekly. The August appearance of free product is the first time it's been seen in several years according to NYCT. NYCT was not inclined to do the cleanup, and would rather DEC hire contractor. We discussed the scope moving forward. DEC contractors will do the initial cleaning. Following the cleaning, NYCT will inspect and monitor the area for additional seepage to determine if we need to reactivate the recovery system. DEC stated that if the amount of product is small, as it appears to be, it may not warrant restart of the full system and other recovery methods could be used. DEC and NYCT discussed potential sealing/grouting the tunnel walls to prevent further infiltration. DEC and NYCT set up a tentative dates of October 18th, 25, Nov, 8 to do the cleaning. There is a General Order on those weekends for CPM's work so the DEC contractor could piggy back on those GOs to do the cleaning. 10/6/14 - Obligado - I had email discussions with Francine regarding the inspection and cleaning. I suggested doing the initial inspection on the 18th and then do the cleaning on the 25th of October. Francine responded that she would not be able to get all Miller personnel track trained until mid Nov, so the cleaning would have to wait until mid Nov. However she agreed to move the initial inspection to the 18th. 10/8/14 - Obligado - PIN Callout for Miller, signed by Austin and sent to Rob Ferguson. 10/13/14 - Obligado - Obligado and Vought attended a pre-General Order (GO) meeting at NYCTransit offices with NYCT, in particular, Francine Maibauer, to discuss logistics for the 18th site visit. DEC PIN Contractor Miller environmental attended as well. Tentative inspection time/date of 10AM Sat 10/18. 10/17/14 - Obligado - Email from Francine, inspection scheduled for 7AM October 18 meeting at the Grand Central platform. 10/17/14 - Obligado - I reviewed design drawings of subway tunnels provided to me by transit to pin point the location of the seep. The reported seep locations I have in my file at 43 + 25, 44 +60 and 45 + 10, which based on the

drawings provided puts the seep under the east river. I emailed Francine to see if there are more updated drawings with different survey markers. 1/17/15 - GO tube cleaning and wall sealing AO on site 645 Miller full crew on-site 720. 725 H and S meeting 730 ready to go. 740 talk to Richard. Still waiting for flaggers. 7328488420 you 6464631390 rich Flagger #14681 800 start work train 815 stop work train, still on platform Miller has one crew cleaning oil from trench with pads. Another crew scaling and grinding solidified oil from the walls and ceiling. Once cracks are exposed Miller applies epoflex. 1/18/15 - GO tube cleaning and wall sealing AO Onsite at 935. Walk out to c1 work train. Oil intrusion at the ceiling has gotten considerably worse. Oil slowly dripping from the Oil going right through the epoflex. Overnight flowed down Work train set up below leak area. Remainder subeda onsite for transit. We asked trNsit to provide another cement material DAN you onsite as well. 1500 hours identify major oil infiltration 11 ties south of 432c wall oil seep. Oil flowing down trench. There is seepage at wall at that point but doesn't flow into the trench. Meaning oil may be coming in from the bottom of the trench. Miller cleans up additional oil with pads. Adjusts water capture shield device to capture dripping oil to prevent it from falling on the track. 1600 exit tunnel 1/25/15 -GO tube cleaning and wall sealing Work train on c2 6 Miller guys Cameron is the foreman dan you from nyct 745 work train starts 800 drop trench guys down track to pad and bag 815 start scraping c2 seep area 10 ft east of 4450 10 am, walked the C2 trench. I identified another large seep in the trench at signal 461c. Oil actively seeping out the bottom of wood rail ties directly into trench Complete surface prep of C2 wall seep. 1015 break 1030 resume work. Crew starts to walk c1 trench I walk c1 trench. Signal 432 c 37 ties west of nyct marker 44 00. 1st small seep 19 ties west of major seep. Oil still seeping. Walked to the second seep area on C1 north of major seep, approximately 200 ft north. Primed and sealed areas were seeping oil through seal. Small seeps, approximately 4 or 5. 12pm finish 2nd coat 1/28/15 830 AM Inspect 300 East 40th Street Miker Tarku not on-site, at Jury Duty The assistant super showed me around I saw the abandoned 40,000 gallon #6 oil tank. The UST is located in the very bottom of the parking garage. The manhole was sealed shut. Photographs taken. The assistant showed me the current tank. It's an AST in the boiler room. The tank is shown to contain #2 fuel oil. According to the assistant, this tank is a temporary tank for when temperatures go below -10 F, otherwise, the boiler runs on gas. The system was converted last year. I asked him to show me the fill ports for both the old tank and the new tank. The fill port for the new tank is located on 40th St. I asked him where the old fill was, he did not know. We went into his office and he showed me paperwork, no info was available on the old fill port, but he showed me a letter from the withdrawing notice of complaint with regard to overdue tightness test. stating that no tightness testing was required. He called his supervisor Mike Tarku. I asked Mike what happened to the old fill line. He said it was in the same location as the new. They took the old line out and put a new fill port. 930 Andre Off-site. 12:28 - I emailed Mr. Lazarri and requested tank abandonment report. I later identified a closed spill report for 300 East 40th St due to a hole in the 40,000 gallon UST. Spill No. 0801691 closed by Vought. The 40,000 gallon tank had a cracked seam identified during the tank closure. A limited investigation was performed. 6 Borings were advanced with a concrete coring machine on the sides of the tank. The

EPA ID Number

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

borings were advanced to the tank at the midpoint depth. Laboratory samples of the soils reported no contamination. I later emailed Mr. lazarri and notified him that I found additional information in my files and that I did not need the abandonment report at this time but I would let him know if I needed additional info. 1/29/15 - I measured the elevation of the platform by counting steps - 101 steps. Each step is approximately 7.25 inches, equals 61 ft down to the north (aka east) side of the #7 platform. According to GIs, the elevation of the top of the stairwell is 37 ft above msl. I inspected The Woodstock building on 42nd street. Pbs # 2-116440. The pbs lists a 10,000 gallon #6 oil tank. I met the super AI on-site. He showed me the tank. It was in a concrete vault with access to inspect concrete floors. No staining or evidence of spills. They switched to #2 oil last year. I advised him that his registration was not current and he should update the records with the DEC. He showed me the fill pipe, which runs above ground in the basement until it goes through the basement wall to the sidewalk fill port. No staining or spills were evident at the entry point. The schist bedrock was exposed at the north basement wall. The tank was installed in 1979. Prior to the use of the the tank, the heating equipment ran on city steam. HE showed me the old steeam pipes which were disconnected. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. 1/31/15 - AO onsite 645 Miller onsite 7 AM As of 8 AM, still waiting for NYCIT flaggers 830. Start walking trench. Measure off from edge of platform to 1st seep on C2. 687.1 ft to start of first major bench seep. Identified a location where yhe bench was broken. 2 pipes run inside the trench. Suspect oil migrating through pipes east of the bench seep location and emptying at the trench seep area, where 2 pipes enter the trench 126.1 ft from edge of paint to first trench seep. Rob Cameron and helper apply final coat to the left side of C2 bench and epoxy to right side of C2 bench. Other crew switches up pads on C2. Francine will not let us keep pads in the trench due to fire hazard. All pads picked up. Bags from C2 brought to the GC 7 platform temporarily Finish up C2 work, move to C1 to switch pads along c1 trench and apply another top coat to the wall seeps. Major seep at C1 ceiling is 579.9 ft from edge of platform. 1017 ft to smaller wall seep area on the south wall of C1. significant oil still in trench at certain locations. Heavy oil accumulation in trench at 879.5 ft. Miller collects a product sample from the trench at this location for oil ID. We are not able to store bags of waste near system as planned. Francine spoke with another transit worker who said the system area is outside the assigned flagging area. Miller would need to take the bags back with them, however, they don't have a waste transporting vehicle. 2 guys will need to go back to the shop to get a truck to bring back. 2/2/14 - Obligado - Inspect 801 2nd Ave, PBS #2-600069. See spill number 1410622. 2/13/15 - Obligado - DEC Vought and Obligado inspect neighboring properties and pbs facilities around the seep location. PBS # - 2-6005823 - 212 East 42nd Street, Westen Hotel. - Met with Javier Reyes and Raphael. We inspected the 2 ASTs in the sub basement. The ASTs are 20,000 gallon #4 oil tanks in a large concrete vault. The tanks are on racks with the concrete bottom visible for inspection. A slight oil drip was observed from the union fitting above Tank #1, which dripped down the side of the tank, and formed a couple small stains on the tank vault floor. Other than this slight drippage, no evidence of significant oil spills was apparent in the vault. The vault was generally clean

MAP FINDINGS

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

and well kept. The oil drip from the union was brought to the attention of Mr. Reyes. According to Mr. Reyes, this facility predominantly uses natural gas, and the #4 fuel oil tanks are back up fuel supplies. They have not run the boilers on #4 oil since last year. When they did use oil, according to Raphael, the oil was delivered by Hess, 10-13 K gallons every 10 days approximately. We inspected the sumps, and no oil was apparent. We inspected the remote fill. There are 2 remote fill ports, 1 for each tank, in the sidewalk on 41st street. The fill lines run under the sidewalk. We advised Mr. Reyes that his registration needs to be updated and the certificate needs to be displayed. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-315484 - 333 East 41st street - We met the super, Aden Nefjalic. According to the super, they switched to #2 oil approximately 2 years ago. They have a dual fuel gas/#2 oil system. The #2 is a backup fuel. Prior to the switch, according to Aden, they used #4. We inspected the tank vault. Vought entered the vault. The tank is a rectangular with the bottom in direct contact with the vault floor. No oil spills were apparent in the vault. We inspected the sumps, which were dry. We inspected the boiler room which was clean. We inspected the fill port, which ran aboveground attached to the building wall. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #2-359122 - Essex Owners Corp, 325 E. 41st Street. We met Louie Nieves, the super on site. The site has a 7500 gallon #2 fuel oil AST in a vault. We entered the vault and inspected around the tank. The tank is cylindrical in shape and the invert of the tank rests directly on the vault room floor, so it was not possible to see completely beneath the tank. However, there were no oil spills apparent anywhere on the tank vault floor. According to Louis, they had the tank completely cleaned out when they switched fuels. We inspected the pump room sump and found no oil. We inspected the remote fill, which was in the sidewalk on 41st street. According to Mr. Nieves, they have been running solely on gas since the switch, as they have a contract agreement to run gas only for 5 years after conversion. We advised Mr. Nieves that the building needs to update their PBS registration and display the certificate. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. . 304 East 42nd Street - The Hilton Manhattan East. While walking on 41st street, a fill port and vent pipe was observed in the back of the building. We entered inside the building to inspect. They had a 275 gallon Diesel AST in the basement on a concrete floor. No significant spillage was observed. We inspected the basement sumps and elevator sumps. No oil was present in sumps. No current or historic source of #4 or #6 oil is present at this facility. No obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS #604594 - The News Building - 220 East 42nd Street. We met with Frank Paselli, the building manager. We inspected the sub basement and 3 sump pits. All pits were free of oil. We inspected the 1000 gallon diesel tank. The tank room was clean with no spills. The tank is for the emergency generator. We asked if they ever had oil intrusion, he said no, but they do get water seepage in some areas of hot water. The building is heated by Coned supplied Steam. We advised Mr. Paselli that his PBS certificate needs to be

MAP FINDINGS

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

displayed. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures were apparent at this location which would indicate this facility is the source of the spill #0010574. PBS # 2-610034 - Pfizer Building - We met Mr. Paul Bryne, the Chief Engineer and Mr. Everett Jackson, the building manager. We inspected the basement sumps - no oil in the sumps. We inspected the diesel AST and it was in a vault and extremely clean with no oil spillage. The AST is for the emergency generator. The building runs on Coned supplied Steam. We asked if they every had any oil seepage into the basement. They said no. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 675 3rd Ave/ 201 -205 E 42nd - These buildings do not have a PBS ID, however we inspected them anyway. According to the building manager, Angelo Maniello, they have no oil tanks and they have never used #4 or #6 to his knowledge. The 2 buildings are connected and have the same ownership. We inspected both basements. There was no oil storage in the basement. We inspected the sumps and found no evidence of oil in sumps. Both building heating systems run on Coned supplied steam. This site has no current or historic #4 or #6 oil storage/use and there were no obvious signs of spills or tank/line failures which were apparent at this location which would indicate this facility is the source of the spill #0010574. 2/28/15 - AO onsite for track cleaning and tunnel sealing. Miller onsite as well as NYCT system safety - Richard and NYCT Structural inspector to inspect integrity of the tunnel ceiling. We inspected the ceiling seeps and found the flow decreased significantly from previous visit. Milelr wiped of oil, cleaned the ceiling and applied a top coat of epoxy. I collected product samples from 3 different seep locations, 1 from the Track C1 Tunnel Ceiling SEep, 1 from the Track C1 South Wall seep area, and one from TRack C2 wall seep. Milelr applied plug and seal to wall seeps on C1. We also inspected track C2 - Significant oil seepage through the prior epoxy layers. Oil puddles were evident on the floor. 3/1/15 - Obligado - returned to the Tunnel for additional track cleaning and sealing. DEC Obligado, Miller Crew, and NYCT Dan Yu. Inspect the ceiling seep. 3 Miller guys go down track with pads. 10 to 11 small drips of oil over night. Wiped the oil of and Miller applied plug and dyke at each seep point. Covered with shield. Inspected down gradient wall seep. No oil seep apparent over night. Estimated less than a 1 oz of oil seeped over 24 hours. 1 boom set down gradient of all seeps. On track c2 there is significantly more oil intrusion. One crew sets 3 booms. 1 down gradient from bench seep. 1 down gradient from trench seep. 1 down gradient of all oil in trench. Crew works to try to seal trench. Oil/water could be seen trapped in bubbles under epoxy seal - not permanent seal. When pierced oil and water seeps out. Prior to cement application, water flows in continuous stream out of a weep hole in the seam with a drop of oil every 10-20 seconds or so. Miller grinds out the whole length of bench seam. Applies an alternate hydraulic cement product to the seam. Upon leaving the site, no oil seep however water seeps present and oil likely to be able to bleed through eventually. 6/1/15 - Obligado - I emailed Francine regarding continuing clean up activities. We were trying to coordinate a date to get on both tracks to do a clean-up of any additional oil seepage since our last visit. NYCT responded that we would not be able to get on both tracks, but only one, since there is no GO. Also, any oil or

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

oil impacted material removed from C2 would not be able to be stored in the system area and would need to be taken out of the tunnel the same day through Grand Central terminal. After discussion with Vought and Austin, I sent email to NYCT notifying them that we would perform clean up going forward on an as needed basis based on NYCT inspections. 7/17/15 - Obligado - I called Francine to inquire about the oil seepage and left a message on her voicemail. 7/24/15 - Obligado - I received an email from Francine - According to Francine, Hydraulics division has not indicated that there is an issue with the oil intrusion. 8/27/15 - Obligado - Inspection of Tunnel C2 scheduled for 9/9/15 3/22/17 - Obligado - As pre NYCT System Safety's Daniel Yu, Hydraulics Staff inspected the tunnel on 3/16/17 and did not observe any recurring oil seepage. 8/10/17 - Obligado - Discussion with DEC Austin and Vought about the P&T system status in the subway and whether the System should be dismantled and removed due to the absence of oil intrusion for 2 years. Austin recommended investigate whether the system was properly decommissioned (all electrical equipment properly disconnected). It was agreed I would review the Spill and PIN file for documentation of proper system decommissioning. 9/8/17 - Obligado - No documentation of proper decommissioning was found. As per Austin, I sent an email to NYCT transit Michael Mandac, cc to Austin, Vought, and NYCT Daniel Yu inquiring about the status of the system and asking whether the electrical to the system and pumps had been disconnected by NYCT. 9/19/17 - Obligado - Email from Michael Mandac. I was able to get MOW to walk the Steinway tube on the 15th. It looks like oil seepage has stopped, the pumps removed, and electrical systems de-energized. Would this be enough to close out this spill? Thank you! 9/21/17 - Obligado - I emailed Michael Mandac that in order to close out the spill the DEC will need to decommission and remove the system. I requested access for DEC contractors to remove the system during an up coming GO. 9/22/17 - Obligado - Work Authorization signed by DEC Austin sent to Miller to decommission, break down, remove, and dispose of former system. 10/2/17 - Obligado - Closed out work Authorization to Miller since they do not have current NYCT track training and will not likely get the training in time for the upcoming GO. 4/30/18 - Obligado - I received an email from Daniel Yu, who indicated that the oil seepage had returned and the oil has entered the track bed and sump pump room. I requested the NYCT provide access to inspect and clean up the oil spill. 5/2/18 - Obligado - I received notification that there would be a General Order shut down on the weekend of May 11. 5/9/18 - Obligado - I attended a GO planning meeting at the NYCT offices. The 7 line train will be shutdown and access and flaggers will be provided for the DEC and our contractor WRS. It was indicated that up to 2500 feet of track on both the C1 and C2 were impacted in oil. 5/15/18 - Obligado - During the weekend of 5/12/18 through 5/14/18, the DEC mobilized our contractor WRS to perform cleanup of oil and contaminated sediment from the Steinway Tunnel. During the weekend, over 25 cubic yards of contaminated sediment/oil/water mixture was removed from the tunnel. Upon excavating the trench, at least 3 active oil seeps were observed entering the trench on both C1 and C2 tunnels. Additional remediation will be required during future GOs. 5/24/18 - Obligado - Meeting at NYSDEC offices with System Safety - Michael Mandac, Daniel Yu, and Dorein Boatswain. DEC attendees were Randall Austin and Andre Obligado. WRS Patrick McCloughlin also attended. We discussed the remediation which was performed and some obstacles to completing the

Map ID
Direction
Distance
Elevation

GRAND CENTRAL STATION -NYCT (Continued)

S104881203

remediation over the weekend. Specific issues which were discussed included the presence of construction debris in the trench which DEC's contractor did not have capability to remove dispose of at the time. Also, work trains were delayed 6.5 hours and flagmen were missing for several hours, resulted in lost time. DEC requested an additional weekend GO and to be provided access to 2 work trains, each Vactron unit and additional flat bed on each train for steel/concrete debris transport. Ms. Boatwain indicated that she would raise the issue up to the VP of System Safety and request special access to be provided and discuss diverting WRS personnel and equipment from the SAP project to the DEC Spill clean up. It was also stated that considering the active and on-going oil seepage, the DEC and WRS may need additional GOs to complete the work. We also discussed setting up a short weeknight GO recover free floating oil and change out absorbents as an interim remedial measure. Other issues raised included the status of the former remedial system. Additional access will need to be provided towards that effort, but that is lower priority. It was agreed that in order to maximize sediment removal and minimize water generation, water will be decanted and run through carbon filter socks prior to discharge back to trench. 6/6/18 - Obligado - I emailed Michael Mandac to inquire if any progress had been made on providing site access. He said the subject has been raised to upper management and he is awaiting an response. 8/15/18 - Obligado - Mobilized with WRS to perform interim oil clean up in the subway tunnel during an overnight GO. Approximately 30 bags of oiled absorbents and booms were removed from the tunnel."

Remarks: "CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP "

	DEC Memo:	<p>"On 10/25 @ 13:17 J Rodriguez rorted to me that while working in V-8901 located @ 511-5 Fifth Av doing phase checks on Feeder 4M61 he discovered approx 6 gallons of an unknown oil in the structure. No sewer/waterway affected, no fire/smoke involved, no injuries, weather did not contribute, No private property was affected. The source and the cause of the spill is unknown at this time. The spill was on the concrete structure floor. There is no standing water. Upon inspection by the finder no piping was seen Environmental tag # 34588 was hung. Chain of Custody # CC 16683 will be used for the samples for PCB and ID. The courier has been called for pick-up. I@A will respond to location to make a determination as to whether the Transformer is the source . Logger R Pagano # 4870 10/25 @ 13:45 Spoke to T Marcinek # 87549 of CIG @ 13:43 Logger R Pagano # 48703 10/25 @ 14:40 After inspection by I&A it has been determined that there is a bottom leak from the Transformer. On conduit plate # 26-H-4 there is no designation for V-8901. The partial cleanup will be scheduled as soon as possible. The vault will be contained by plugging up the weep-hole in the Vault and absorbent pads and granules will be placed to soak up existing leakage and prevent further leakage. The Unit cannot be</p>

drained until the Feeder is taken out of service and then the partial cleanup will be completed and crews will be available. Looger R Pagano # 48703 NOTE::: Spoke to Marcinek of CIG @ 16:20 and informed him of change of incident status. Logger R Pagano # 48703 UPDATE 10/25/03 19:20 R Hardin # 18320 reported to N Muldoon #18723 that a partial cleanup was completed at 19:05 hrs absorbent and pads were placed along with the weep holes were plug up and there was no release to any other structure. Final cleanup is pending removal of unit. Cleanup persons can be found in the Event Involved Screen. Lab Sequence Number: 03-08748-001 TOTAL PCB 15 ppm UPDATE 10/25/03 Lab Sequence Number: 03-08750-001 Analysis indicates the presence of a substance similar to a dielectric fluid. 10/25 @ 14:25 Gilson # 17065 of I&A reported to me that the partiala cleanup hass been completed . The solid waste has benn appropriately bagged and disposed of. The Tanker removed 450 gallons of mixed liquid. The E nvironemntal tag has been left in place. NOTE::: Transformer drained and disconnected Final cleanup pending Transfomer removal: 02/15/05 04:15 G.Byrne#81264, Cable supervisor, notified the control center on 02/15/05 at 03:30hrs. to report the clean up in V8901 was completed. This was final cleanup. There were no solids removed and no drums or barrels were used. G.Byrne#81264 states the only liquids removed were from the flush truck. The method used to clean was double washed with slix. A yellow environmental tag #34588, was removed from V8901. The clean up crew was G.Byrne#81264, as the cleanup supervisor and G.Rosario#11464 and W.Holder#85940 as the cleanup crew. The old transformer was removed and a new unit was installed in V8901. The clean up was on 02/15/05 atn 03:15hrs."

Tank Info:

Tank Number: 001
Tank Id: 60063
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
F00 - Pipe External Protection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1998
Capacity Gallons: 10000
Tightness Test Method: NN

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "e2mis 149289 7/14/03 Mike Reiter #27277, I&A South, reported that he found approx. 150 gallons of transformer oil in vault V0538 located at 38 West 43 Street between 5th and 6th Ave. The source of the spill is the transformer and the cause is a possible bottom leak due to very heavy rust. The oil was found in a concrete vault. Mr. Reiter stated that it appears to be all oil and no water. He is working under account no. 80484. The feeder associated with this vault is Feeder 5M80. There is no evidence at this time of any release to sewer or waterway. Once the vault is drained the drain connection will be checked. Samples will be taken for PCB and Oil ID. No initial cleanup action was taken due to the amount of oil in the vault. Cleanup is pending an Over 50 Tanker and crews. Update: Lab

Reasults, Mon 7/14/2003 20:27 hrs Lab Sequence Number: 03-05802-001
TOTAL PCB 17 ppm Update: 7/14/03 @ 21: 20 hrs. Joe Cumberbatch, I&A
South Operating Supervisor, reported at 21:00 hrs. that 620 gallons
of oil was removed from the transformer. The transformer is an Allis
Charmers with a total capacity of 780 gallons. Therefore, 160 gallons
of oil leaked into the vault. The floor drain was checked and found
clogged. He reported no release to sewer. A second sample was taken
from the transformer. The vault floor was double washed with Slix and
rinsed with the Vactor truck. Oil absorbent granules were placed
around the transformer. The drain was plugged with absorbent pigs.
These pigs were also placed around the drain. The partial cleanup was
completed at 21:00 hrs. Final cleanup is pending transformer removal.
7/15/03 @ 07:23 hrs. Lab Sequence Number: 03-05807-001 TOTAL PCB 20
ppm Lab Sequence Number: 03-05803-001 Analysis indicates the presence
of a substance similar to a dielectric fluid. UPDATE 07/25/03 05:10
hrs V Mirance # 58484 Operating Supervisor Manhattan Cable reported
to N Muldoon #18723 that the cleanup was completed 100% @ 04:00 hrs.
The structure was double washed with slix and 55 gallons of wash
water and all debri was removed by the flush truck. UPDATE: A new
transformer was installed 8/1/2003."

Remarks: "Above material discovered at above location. Samples have been taken
and cleanup is pending crew response. Con Ed# 149289."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/31/2016: Rashad NRC 1157788 EMIS 250342 During maintenance a Con Ed tech discovered oil/water mix in an underground transformer vault. The sump pump was running when the tech entered the structure, he immediately turned off the pump however the impact to the sewer system is unknown. Con Ed is estimating about 10 gallons of oil may have entered the sewer system. Due to the vaults location 5th Ave and 43 street in Manhattan, repairs will most likely be done at night. Oil/water is contained in structure as sump pump is off and vault was noted to be in good condition. 10/24/16 - Austin - Con Ed removed the leaking transformer and replaced it - They contained and cleaned up the spill - See document files for further information - Spill closed - end"

Remarks: "equipment repairs pending equipment"

Tank Info:

Tank Number: 001
Tank Id: 65464
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
L09 - Piping Leak Detection - Exempt Suction Piping
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
G01 - Tank Secondary Containment - Diking (Aboveground)
H05 - Tank Leak Detection - In-Tank System (ATG)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 12/01/2002
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 08/28/2012
Register: True

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: D000
. Waste name: Not Defined

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: NONE
. Waste name: None

. Waste code: X002
. Waste name: POLYCHLORINATED BIPHENOLS (PCBs)

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 1993-10-29 00:00:00.0
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

- . Waste code: B002
- . Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

- . Waste code: B007
- . Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

- . Waste code: D001
- . Waste name: IGNITABLE WASTE

- . Waste code: D002
- . Waste name: CORROSIVE WASTE

- . Waste code: D006
- . Waste name: CADMIUM

- . Waste code: D007

with Metro North Rail Road to renovate the elevator, everything to be taken out. The bleeder valve was taken out prematurely and about 50 gallons of hydraulic oil leaked out onto the elevator pit. The pit is in concrete and was designed to take care of minor leak. The oil did not go anywhere. They applied SpeedyDry and absorbent pads to clean up the oil. Some SpeedyDry/granular still in place and will be drummed by the end of the day. About 1 and half drums were generated. CycleChem is their contractor to take care of the waste. Photos were taken. DEC required a report documenting the spill details, the work has been done to clean up the spill and the photos to be sent. 1/20/2017 - Feng - Received Spill Report. Spill has been cleaned up and no further action is required. Spill is closed. "bleeder valve removed and leaking Clean is in progress"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
