

**NEGATIVE DECLARATION (Use of this form is optional)**

**Statement of No Significant Effect**

Pursuant to Executive Order 91 of 1977, as amended, and the Rules of Procedure for City Environmental Quality Review, found at Title 62, Chapter 5 of the Rules of the City of New York and 6 NYCRR, Part 617, State Environmental Quality Review, the Department of City Planning, acting on behalf of the City Planning Commission assumed the role of lead agency for the environmental review of the proposed project. Based on a review of information about the project contained in this environmental assessment statement and any attachments hereto, which are incorporated by reference herein, the lead agency has determined that the proposed project would not have a significant adverse impact on the environment.

**Reasons Supporting this Determination**

The above determination is based on information contained in this EAS, which finds that the proposed project: and related actions sought before the City Planning Commission would have no significant effect on the quality of the environment. Reasons supporting this Determination are noted below.

**Land Use, Zoning and Public Policy**

1. This EAS includes a Land Use, Zoning and Public Policy section, which analyzes the potential significance of the proposed action on land use, zoning and public policy in the study area. The proposed action would map a C2-4 commercial overlay within an R5 residential district to facilitate the legalization of an existing nonconforming commercial use. The project area is predominantly characterized by a diverse mix of uses including residential, industrial, commercial, and community facility. The analysis concludes that no significant adverse impacts related to Land Use, Zoning and Public Policy would result from the proposed action.

**Noise**

2. This EAS includes a mobile source noise assessment using two different methodologies; direct comparison of field data and projections based on existing AADT data. Both methods concluded that project-generated vehicular trips would not result in a significant increase to the general external noise exposure. Accordingly, no noise-related impacts are anticipated as a result of the proposed action.

No other significant effects upon the environment that would require the preparation of a Draft Environmental Impact Statement are foreseeable. This Negative Declaration has been prepared in accordance with Article 8 of the New York State Environmental Conservation Law (SEQRA).
