HCS2000: Signalized Intersections Release 4.1f

Analyst: C
Agency: Ethan C. Eldon Associates, Inc
Date: 4/9/2007
Period: AM Peak
Project ID: Existing Condition AM Peak (7:30-8:30 AM)
E/W St: 72nd Street

Inter.: 1st Ave/72nd St
Area Type: All other areas
Jurisd:
Year : 2007
N/S St: 1st Avenue

SIGNALIZED INTERSECTION SUMMARY

	Eastbound			Westbound			Northbound			Southbound		
	L	T	R	L	T	R	L	T	R	L	T	R
No. Lanes	0	2	0	0	2	0	1	4	0	0	0	0
LGConfig		LT			TR		L	TR				
Volume	125	303			224	78	147	1556	112			
Lane Width		9.0			9.0		10.0	10.0				
RTOR Vol						0			0			

Duration 0.25 Area Type: All other areas

Signal Operations

Phase Combination	1	2	3	4		5	6	7	8
EB Left	P				NB Left	P			
Thru	P				Thru	P			
Right					Right	P			
Peds	X				Peds	X			
WB Left					SB Left				
Thru	P				Thru				
Right	P				Right				
Peds	X				Peds	X			
NB Right					EB Right				
SB Right					WB Right				
Green	35.0					45.0			
Yellow	3.0					3.0			
All Red	2.0					2.0			

Cycle Length: 90.0 secs

Intersection Performance Summary

Appr/ Lane Grp	Lane Group Capacity	Adj Sat Flow Rate (s)	Ratios v/c	Ratios g/C	Lane Group Delay	Lane Group LOS	Approach Delay	Approach LOS
Eastbound								
LT	815	2096	0.58	0.39	24.8	C	24.8	C
Westbound

APPENDIX A

Hospital for Special Surgery Traffic Study

Soft-Site Information

MEMORANDUM

To: Joon Park, NYCDOT
From: Chunyuan Li
Date: January 8, 2008
Re: HSS DEIS/Traffic

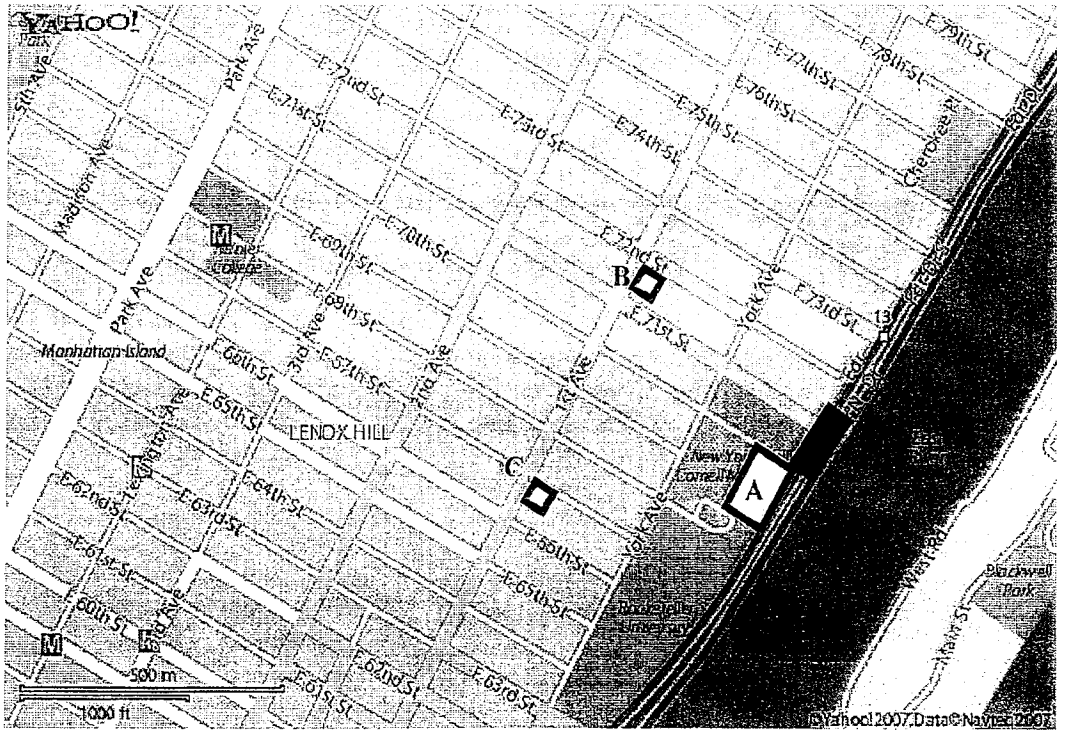
This technical memorandum is prepared for the above referenced project regarding soft-site generated vehicular trips for the traffic study. As shown in the DEIS Chapter 16/Traffic and Parking, there are three soft-sites within a 1/2-mile radius area of the project site. The 3 soft-site locations are presented in attached figure.

The soft-site #1 (New York Presbyterian Hospital-Modification) is located between York Avenue and FDR Drive, and between East 68th and 70th Streets. The soft-site generated vehicular trips are below the CEQR threshold of 50 (see attached copy of the EAS).

The soft-site #2 (New York Presbyterian Hospital-Dormitory Building) is located on the southeast corner of 1st Avenue and East 72nd Street. This soft-site is an as-of-right development. NYC DCP has no further information.

The soft-site #3 (400 East 67th Street) is located on the southeast corner of 1st Avenue and East 67th Street. The development is a 125-unit apartment building which is below the CEQR threshold of 200.

The three soft-site locations are approximately 1,000 feet apart. The soft-site generated vehicular trips have been included in the background growth (0.5% annually) as shown in the DEIS Charter 16. It is unlikely that the 3 soft-sites would have significant accumulative effect on the traffic.



Soft-Site Locations:
A. New York Presbytarian Hospital-Modification Project
B. New York Presbytarian Hospital-As-of-Right Project
C. 400 East 67th Street Project

Action Description
SEE CEQR MANUAL SECTIONS 2A &2B

3a. NAME OF PROPOSAL SMART Building, Greenberg Pavilion, and Technology Building / Infill Development

3b. DESCRIBE THE ACTION(S) AND APPROVAL(S) BEING SOUGHT FROM OR UNDERTAKEN BY CITY (AND IF APPLICABLE, STATE AND FEDERAL AGENCIES) AND, BRIEFLY, DESCRIBE THE DEVELOPMENT OR PROJECT THAT WOULD RESULT FROM THE PROPOSED ACTIONS(S) AND APPROVAL(S):

The *Proposed Action* is a minor modification of the special permit (C 840900 ZSM) associated with the existing New York Presbyterian Hospital (NYPH) Large-Scale Community Facility Development (LSCFD) that would enable the utilization and redistribution of unused floor area and lot coverage that had been allocated by prior approvals to other buildings within the LSCFD. The modification would allow the otherwise as-of-right construction of: 1) a 34,871 g.s.f (18,219 z.s.f.), 4-story building (the "Technology Building") in an interior courtyard; 2) a 142,805 g.s.f. (102,184 z.s.f.), 13-story building (the "SMART (Site for Medically Advanced Research and Therapeutics) Building") in a courtyard fronting on East 70th Street, as well as a 3,982 g.s.f (3,982 z.s.f.) addition to the adjacent "N Building" to which the SMART Building would be connected; 3) a 44,512 g.s.f. (37,282 z.s.f.), 13th floor addition to the Greenberg Pavilion (the "Greenberg Pavilion Addition,"); and 4) a 25,702 g.s.f. (12,337 z.s.f.) addition to the "YY Building" (hereinafter collectively referred to as the *Proposed Project*). The total floor area of the Proposed Project is 251,872 g.s.f. (174,004 z.s.f.), of which 88,007 g.s.f. (56,981 z.s.f.) has already been approved but not used. The Proposed Action would require the Dormitory Authority of the State of New York's (DASNY's) authorization of the issuance of tax-exempt bonds, the proceeds of which will be used to finance the development and construction of the Proposed Project.

The developments that comprise the Proposed Project include two currently unimproved courtyard locations on the north and east side of the NYPH's Baker Building and additions to three existing buildings located within the LSCFD, which is generally bounded by York Avenue, East 71st Street, the East River, and former East 68th Street (see Figure EAS 1, Project Location Map). To facilitate the construction of these new projects, NYPH proposes to allocate, from the balance of the existing approved LSCFD floor area, a total of 163,865 g.s.f. (117,023 z.s.f.). The resulting total built floor area would be increased from 2,804,128 z.s.f. to 2,921,151 z.s.f., leaving 676,739 z.s.f. of allowable floor

while solid and medical waste volume will grow, facility constraints may result in generation over a lengthier period.

Solid waste generation from the 163,865 g.s.f. (117,023 z.s.f.) floor area not previously approved under M840900 (H)ZSM is approximately 62,200 lbs/week. Although this is greater than the 10,000 lb/week CEQR threshold for a detailed analysis, it will not result in significant adverse impacts since solid waste that does not require special handling would be removed, transported, and disposed by private carters, and would not represent an additional demand on the City municipal waste handling services.

The development would be constructed as part of an existing hospital facility, which has in-place procedures for collecting and disposing of materials used in medicine that require special handling. Specifically, Hazardous materials and chemical wastes are regulated under New York State Hazardous Waste Regulations (6 NYCRR Parts 370-374) and, depending on the type of waste, handled by a licensed waste transporter to a permitted disposal facility. Radioactive materials are handled in accordance with the NYC Health Code (Title IV, Article 175).

IMPACT CATEGORY N: ENERGY

The *CEQR Technical Manual* reserves detailed technical assessment of energy for actions that would affect transmission or generation of energy, or that may generate substantial indirect consumption of energy.

According to the *CEQR Technical Manual* the construction of new buildings would not require a detailed energy assessment, as they are subject to the New York State Energy Conservation Code, which is reflective of State and City energy policy. No further evaluation is therefore required and no significant adverse impacts are anticipated as a result of the Proposed Project.

IMPACT CATEGORY O: TRAFFIC AND PARKING

The *CEQR Technical Manual* establishes a screening technique to determine whether a detailed technical assessment of traffic and parking is required. The screening procedure utilizes a threshold projected peak hour trip generation of fifty vehicle trips as an indicator of whether additional analyses are needed.

A trip generation analysis was prepared for the project to determine the net additional vehicle trips that would be associated with the Proposed Action. This evaluation is provided in Attachment 4 to this EAS. The greatest volume of new vehicle trips would occur in the PM, where project-generated peak-hour vehicle trip generation would be 48, consisting of 30 autos and 18 taxis. Since this incremental increase would be below the 50-vehicle CEQR threshold, no significant adverse impacts are anticipated, and a detailed traffic evaluation is not required.

In the 1993 CPC Report (pages 9-10) and the FEIS for the New York Hospital Modernization Project (CEQR No. 91-010M) dated January 8, 1993 (pages 3.8-80 to 3.8-84), it was determined that a total of 13 intersections would require traffic mitigation. Nine of the affected intersections would be mitigated by adjusting the signal timing to redistribute one second of "green" time among the northbound/southbound and eastbound/westbound approaches. Three intersections would be mitigated by daylighting the intersection approach. Thirteen existing parking meters would also be eliminated to provide additional travel lanes. Finally, the westbound East 68th Street approach (i.e., the exit from the main hospital entrance) would require daylighting along the northerly curbside to provide additional capacity for the outbound traffic movement from the facility. Mitigation measures have been implemented (see Appendix 2).

Introduction

The Proposed Action consists of the addition of the SMART and Technology Buildings as well as the construction of a 13th Floor to the Greenberg Building, designated as Greenberg Floor 12A. The construction of the SMART and Technology Buildings as well as the N building addition (181,658 gsf) would result in the relocations of several outpatient departments from existing hospital buildings into the newly constructed buildings. In addition, the space left vacant as a result of the relocation would accommodate the expansion of the departments remaining in their original locations. The end result of these relocations would be that the departments would be provided more space as well as being modernized to increase efficiency and therefore patient volumes. The Greenberg floor addition would result in the construction of 70,214 gsf to house additional inpatient beds and support staff offices.

The Proposed Action would relocate a portion of some of the clinical departments currently located in different sites on the New York-Presbyterian Weill Cornell Medical Center campus in the Technology and Smart Buildings, allow for the expansion of these departments into the vacated space and provide new beds in Greenberg Floor 12A. Absent the Proposed Action, the project sponsor would maintain these departments in their current locations. This attachment describes the characteristics of both the existing clinical departments (which are housed in existing hospital wings), the proposed building programs and Greenberg Floor 12A and then compares the results to criteria set forth in the 2001 *New York City Environmental Quality Review (CEQR) Technical Manual* to determine if the project would result in significant adverse traffic, parking, transit, or pedestrian impacts.

As described below, the number of person, vehicle, and transit trips associated with the Proposed Action would fall below the threshold for a detailed analysis in accordance with CEQR guidelines and therefore would not result in significant adverse impacts to traffic, parking, transit, or pedestrian conditions.

Trip Generation Assumptions

Based on the programmed space for the proposed SMART and Technology Buildings, it is anticipated that the new floor area would attract two patron groups: patients and visitors, as well as employees. Based on previously conducted trip making surveys, patients and visitors display similar trip making characteristics, while employees have their own distinct travel characteristics. The trip-making characteristics of patients/visitors and employees were assessed individually.

As a conservative estimate, the existing patient and employee volumes for the departments relocating to the SMART and Technology Buildings were determined based on existing hospital data. It should be noted that these existing patient and employee volumes included the entire department, some of which would be relocating to the SMART and Technology buildings, while other portions of the departments would expand to the vacated area or be housed in other buildings, including the N building. The

existing patient and employee volumes were compared against the projected future clinical patient and employee volumes. These patient volumes were based on detailed program summary information provided by New York-Presbyterian Hospital. Existing patient and employee volumes were determined to be 240 and 520 persons per weekday, respectively. Future patient and employee volumes, also determined from the program summary, were estimated to be 353 and 693, respectively per weekday. In addition, the number of existing and future visitors was determined. Based on information regarding outpatient visitors gathered from a survey conducted in conjunction with the Final EIS for the New York Hospital Program and Facility Development Plan (January 8, 1993) it was concluded that outpatients received 1 visitor per day.

A summary of existing and future patient/visitor and employee volumes is shown in Table J-1. This table shows the existing number of patients and employees in the programs that have a portion of the department moving to the SMART and Technology Buildings. These volumes also include patients, visitors and employees currently in the hospital but expanding to the available space being created by the SMART and Technology relocations. Future patient and employee numbers are based on the Proposed Action's building program and expected patient and employee growth rate.

Table J-1
SMART-Technology Programs Existing and Future Patient and Visitor Volumes

	Patients/Visitors		Employees

3 – New York-Presbyterian Hospital SMART and Technology Building Departmental Program Projections

The trip making characteristics for patients, visitors and employees are based on information presented in the Weill College of Medicine Ambulatory Care Building (referred to as the York Building) EAS, December 13, 2002. This EAS analyzed the impacts of a 13-story medical facility located at York Avenue and 70th Street. The York Building EAS was used because of the similarities between the York Avenue facility and the proposed SMART and Technology Buildings: both are clinics serving similar patient populations and both are located on 70th Street on the East Side of Manhattan.

The data from the York Building EAS were applied to these incremental patient, visitor, and employee volumes. Tables J-2 through J-4 outline the temporal distribution, modal split and vehicular occupancy that were derived from surveys of employees and patients of Weill Cornell and utilized in the York Building EAS. The York Building EAS assumed that patients, visitors and employees all made two trips per day.

Table J-2
York Building Temporal Distribution

The proposed Greenberg Floor 12A is included in the Proposed Action, but represents a completely separate program from the SMART and Technology buildings. The new floor would house inpatient rooms and hold 54 beds. Thirteen of these beds are currently in the Greenberg building and are being relocated, resulting in a total of 41 new beds. To be conservative, it was assumed that each of these beds would be occupied by 1 patient per day. The number of visitors for inpatients differs from the number for outpatients, due to the length of stay and use of private rooms. Based on information from the

hospital, which provides two visitor sessions per day, with 2 people typically attending, it was determined that 4 visitors per patient would be generated.

The number of employees was determined based on the patient/visitor to employee ratio stated in the York Avenue EAS, which was determined from the actual patient/visitor to employee ratio in that facility. The York Avenue EAS data was used as opposed to the SMART/Technology ratios due to the differences in uses of the facilities. An employee/patient ratio for the research and diagnostic intensive uses of the SMART/Technology buildings would be more significant than the typical hospital use of inpatient beds in Greenberg 12A. The ratio from the York Avenue EAS equated to approximately 3 patients/visitors per employee. Table J-5 below, shows a summary of the new patient, visitor and employee volumes.

Table J-5
Greenberg 12A Future Patient, Visitor and Employee Volumes

	Patients/Visitors		Employees
	Patients	Visitors	
Proposed	41[1]	164[2]	73[3]

Sources: 1 – Based on the proposed number of new beds
2 – Based on information from the NYPH and the number of sessions per day (4 visitors per inpatient)
3 – *WMC York Avenue Ambulatory Care Building EAS Patient/Visitors to Staff Ratio*

The same assumptions used for the SMART and Technology programs, including generation rates, modal splits, temporal splits, and auto occupancies, were used for the trip generation for the Greenberg Building Floor 12A addition.

TRIP GENERATION RESULTS

The trip generation analysis considered the 12-hour period from 7 am to 7 pm. The morning peak would be from 9 am to 10 am, the midday peak from 12 pm to 1 pm, and the evening peak from 5 pm to 6 pm. The evening peak hour would also be the period during which the greatest number of trips would enter and exit the proposed building.

Incremental Clinical Service Volumes

The incremental number of clinical patients, visitors and employees were applied to the data in Tables J-2 through J-4. The number of new employees projected to be generated as a result of the SMART and Technology Building programs is 173. The projected increase in patients and visitors as a result of the SMART and Technology Buildings is 226. The total number of incremental person and vehicle trips calculated for NYPH clinical services is shown in Tables J-6 and J-7.

Table J-6
Incremental Peak Hour Person Trips

		Auto		Medivan		Taxi		Subway		Bus		Walk		Total		
Peak Hour	User Group	In	Out	In	Out	In	Out	In	Out	In	Out	In	Out	In	Out	Total

	Employees	10	0	0	0	1	0	24	0	11	0	8	0	54	0	
MD	Patients	7	9	1	1	5	7	5	6	3	4	3	3	24	30	55
	Employees	0	0	0	0	0	0	0	1	0	0	0	0	0	1	
PM	Patients	4	8	0	1	3	6	3	5	2	4	2	3	14	27	122
	Employees	0	15	0	0	0	2	0	36	0	16	0	12	0	81	

Table J-7
Incremental Peak Hour Vehicle Trips

		Auto				Medivan		Taxi		Total		Overall Total		
Peak Hour	User Group	In (P)	Out (P)	In (D)	Out (D)	In	Out	In	Out	In	Out	In	Out	Total
AM	Patients	2	1	0	0	0	0	2	2	4	3	13	4	17
	Employees	8	0	0	0	0	0	1	1	9	1			
MD	Patients	3	4	1	1	0	0	3	3	7	8	7	8	15
	Employees	0	0	0	0	0	0	0	0	0	0			
PM	Patients	2	3	1	1	0	0	3	3	6	7	8	20	28
	Employees	0	11	0	0	0	0	2	2	2	13			

Note: (P) is vehicles that park. (D) is vehicles that pick up/drop off.

Auto trips have been separated between people who drive to the site and park (P) versus people who are dropped off (D). This is important since parking constitutes only one trip during the hour of arrival. A drop-off constitutes two trips since the vehicle comes to the site and leaves immediately after the drop-off (one trip to the site and one trip away during the same one hour). Medivans (or ambulettes) operate in the same manner since they do not wait for a patient.

Taxi trips are calculated in the same manner as a vehicle drop-off with one exception. A private vehicle dropping off at the site will leave immediately after the drop-off. However, it is likely that some taxis will pick-up other fares that would have been in the area regardless of the project. As a result, half of the taxi trips leaving the site are credited as having occurred regardless of the project and do not count toward additional trips.

Based on discussions with NYPH, no additional truck trips are expected to be generated by the proposed action. All existing truck trips would be able to service the new buildings

As shown in Table J-7, the most critical hour of analysis is during the PM peak hour, with 122 person trips generated, which equates to 28 vehicle trips generated.

During the evening peak hour, there would be a total increment of 39 person trips by vehicle, 44 subway trips, 22 bus trips, and 17 walk-only trips. The 39 person trips by vehicle equates to a total of 28 incremental vehicle trips. Of these, 18 would be by auto, 10 by taxi, and 0 by medivan. There would be no increase in truck trips during this hour.

Greenberg Floor 12A

Tables J-8 and J-9 show the incremental trips generated by the additional 41 beds proposed in Greenberg Floor 12A. Based on a review of the SMART and Technology Building, the PM peak hour will be the most critical time period of analysis. The

proposed Greenberg Floor 12A is expected to generate a peak total of 72 person trips (14 in and 58 out) during the PM peak hour.

Table J-8
Incremental Increase in Person Trips

		Auto		Medivan		Taxi		Subway		Bus		Walk		Total		
Peak Hour	User Group	In	Out	In	Out	In	Out	In	Out	In	Out	In	Out	In	Out	Total

	Employees	0	0	0	0	0	0	0	0	0	0	0	0	0	0	
PM	Patients	4	7	0	1	3	5	3	5	2	3	2	3	14	24	72
	Employees	0	6	0	0	0	1	0	15	0	7	0	5	0	34	

Table J-9
Incremental Increase in Vehicle Trips

		Auto				Medivan		Taxi		Total		Overall Total		
Peak Hour	User Group	In (P)	Out (P)	In (D)	Out (D)	In	Out	In	Out	In	Out	In	Out	Total
AM	Patients	2	0	0	0	0	0	2	2	4	2	7	2	9
	Employees	3	0	0	0	0	0	0	0	3	0			
MD	Patients	2	3	1	1	0	0	3	3	6	7	6	7	13
	Employees	0	0	0	0	0	0	0	0	0	0			
PM	Patients	2	3	1	1	0	0	3	3	6	7	7	13	20
	Employees	0	5	0	0	0	0	1	1	1	6			

Note: (P) is vehicles that park (D) is vehicles that pick up/drop off

During the PM peak hour, the Greenberg Floor 12A is expected to generate 27 person-trips by vehicle, 23 subway trips, 12 bus trips and 10 walk-only trips. The 27 person-trips by vehicle generate 20 vehicle trips. These 20 vehicles trips include 12 auto trips, 0 medivan trips and 8 taxi trips.

Total Proposed Action (SMART, Technology and Greenberg Floor 12A)

Table J-10 shows the total incremental person-trips developed with the addition of the SMART and Technology Buildings as well as additional beds associated with the Greenberg Floor 12A. Table J-11 shows the total incremental vehicles trips generated as a result of the entire proposed action. It is also shown in Table J-11 that the peak traffic generated occurs during the PM peak hour. A total of 48 vehicle trips are generated during this period, with 15 arriving and 33 departing.

Table J-10

APPENDIX A

Hospital for Special Surgery Traffic Study

Survey Data

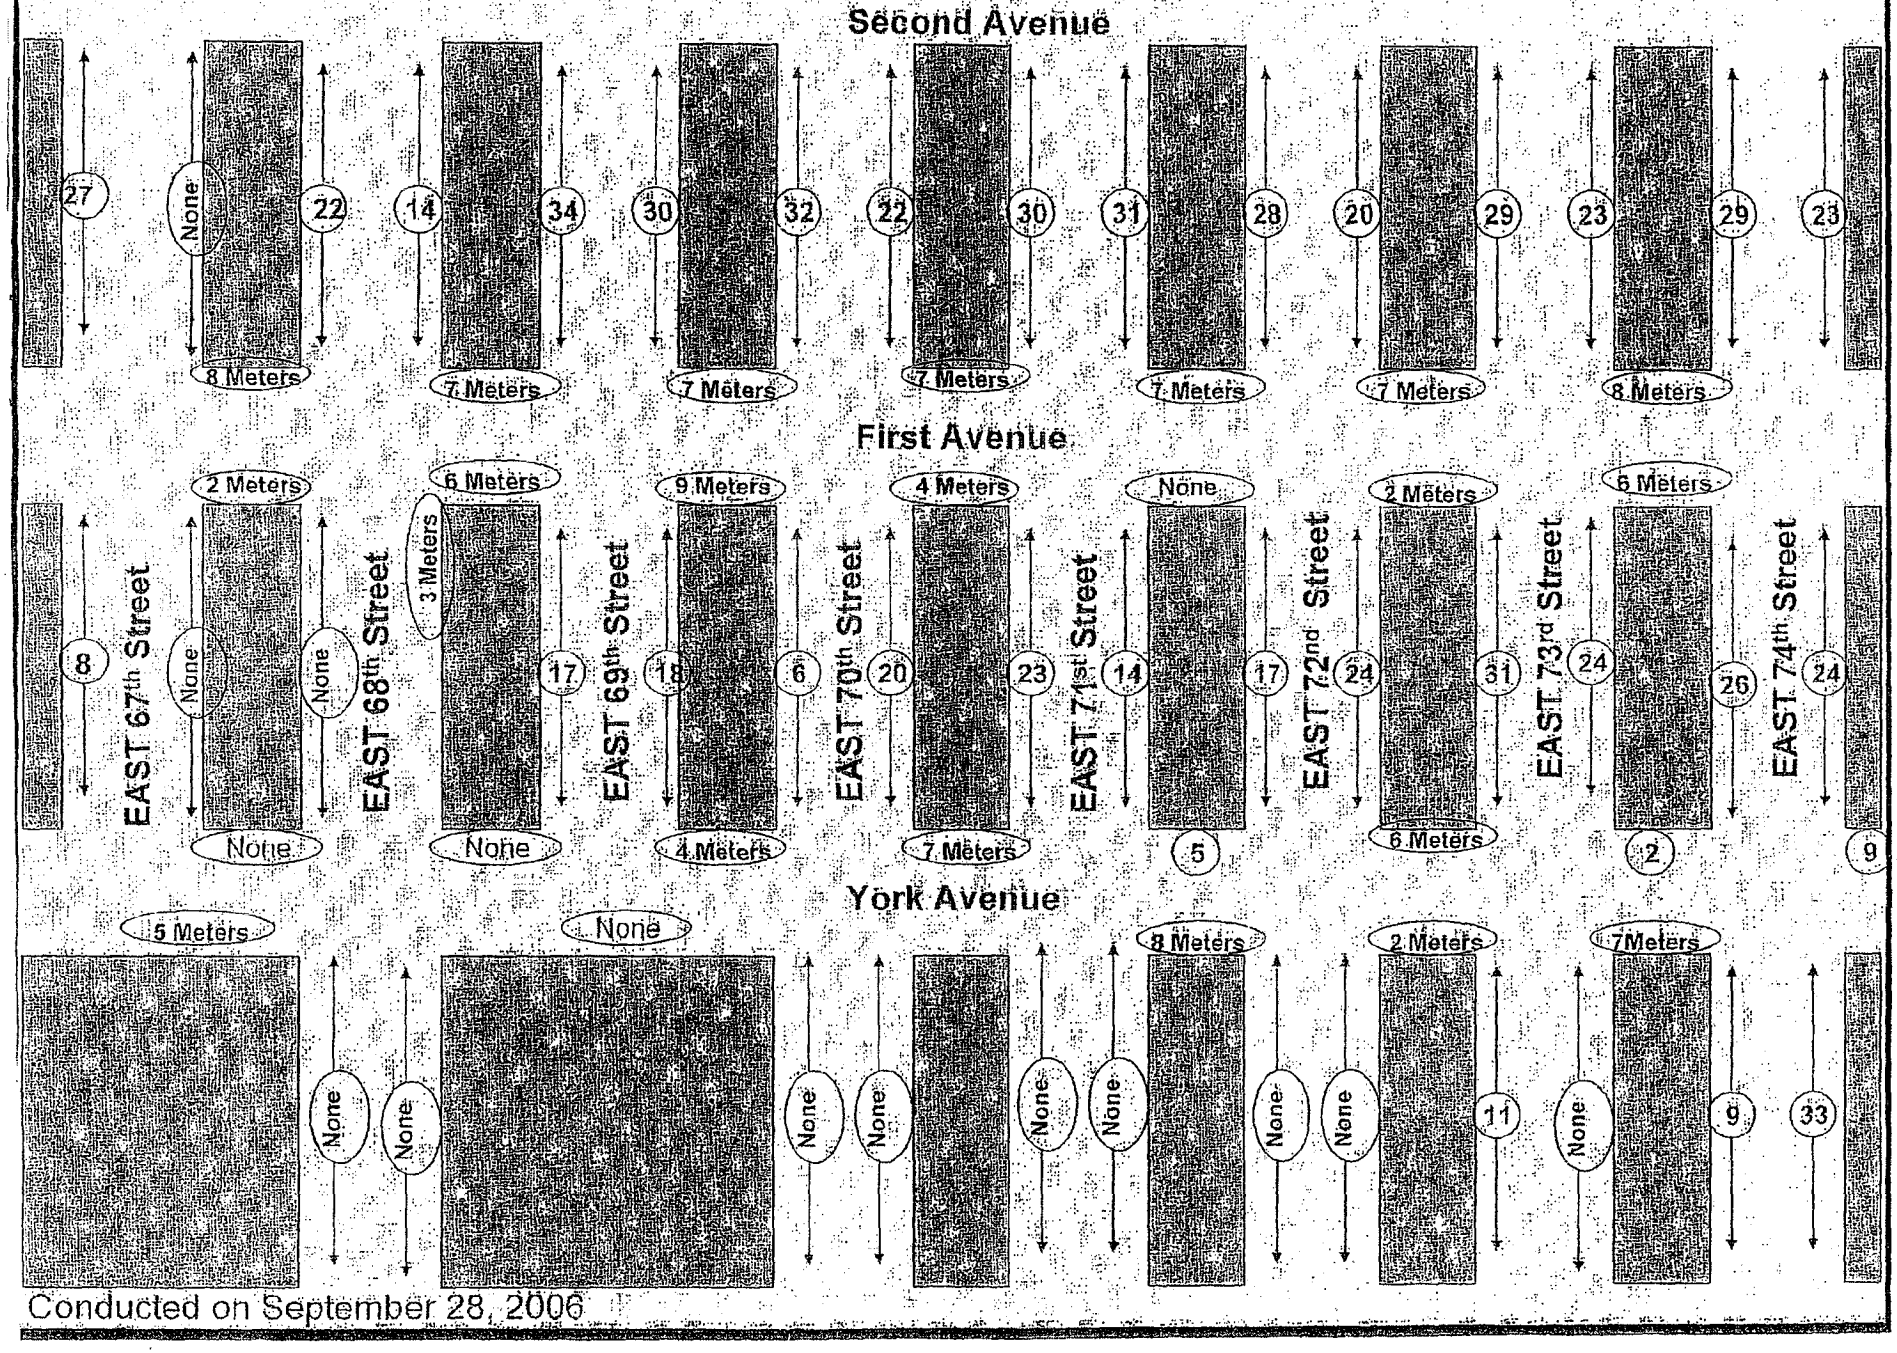
CEQR SCREENING ANALYSIS

The *CEQR Technical Manual* provides screening criteria to determine if detailed traffic, parking, transit, and pedestrian analyses are necessary. These criteria compare the estimated trips generated by a Proposed Action to accepted impact thresholds. Typically, projects that fall below these thresholds are considered unlikely to result in significant adverse transportation impacts.

The screening analysis considers the incremental increase in trips from the proposed building as compared to the existing buildings on the New York Hospital campus.

Traffic

The *CEQR Technical Manual* specifies that a detailed analysis of a project's potential impacts to the operation of nearby streets and intersections is typically warranted if an action would generate more than 50 peak hour vehicle trips. As shown in Table J-11, the maximum incremental increase in project-generated trips during a peak hour would be 48 vehicles between 5 pm and 6 pm. Since this volume is below the CEQR threshold, no further analysis is required, and the project would not result in significant adverse traffic impacts.



Conducted on September 28, 2006

Survey Conducted on November 9, 2006

Hospital for Special Surgery Pedestrian Analysis

Pedestrian Capacity Analysis

PEDESTRIANS AT SIGNALIZED INTERSECTIONS WORKSHEET

General Information		Site Information	
Analyst	C.	Intersection/Corner	NE corner of York Ave and 71st St
Company	Ethan Eldon Assoc.	Peak Hour	AM
Date Performed	5/23/2007 14:44	Analysis Year	2007
Analysis Period	Peak 15-min.	Conditions	Existing

Inputs				Geometric Inputs	
Cycle length, C	120			Width of Sidewalk on Minor-street W_a	12
Minor-street red phase, R_{mi}	59			Width of Sidewalk on Major-street W_b	20
Major-street red phase, R_{mi}	73			Radius of Corner	12
Minor-street effective green, g_i	61			Width of Minor-street L_c	33
Major-street effective green, g_j	47			Width of Major-street L_d	60
	Flow, p/15-min	Flow, p/15min * 1/60 = p/s	Flow, p/s*C	Minor-street crosswalk Inbound	32
v_{ci}	32	0.04	4	Major-street crosswalk Inbound	62
v_{co}	66	0.07	9	Minor-street crosswalk Outbound	66
v_{cf}	62	0.07	8	Major-street crosswalk Outbound	37
v_{do}	37	0.04	5	Corner pedestrian cross traffic	19
$v_{a,b}$	19	0.02	3	Minor-street crosswalk width W_c	16
v_{tot}	216	0.24	29	Major-street crosswalk width W_d	13

Street Corner Time-Space Analysis	
Total time-space, TS (ft^2-s) $TS = C(W_aW_b - 0.215R^2)$	25084.8
Time spent by pedestrians crossing major street, Q_{tdo} (p-s) $Q_{tdo} = v_{do} R_{mi}^2/2C$	72.52083
Time spent by pedestrians crossing minor street, Q_{tco} (p-s) $Q_{tco} = v_{co} R_{mi}^2/2C$	199.84
Total time-space available, TS_c (ft^2-s), $TS_c = TS - [5(Q_{tdo} + Q_{tco})]$	23723.01
Circulation area per pedestrian, M (ft^2/p), $M = TS_c/4v_{tot}$	204.5
LOS (Exhibit 18-3)	A
LOS - Platoon (Exhibit 18-4)	B

Crosswalk Time-Space Analysis		
Average Pedestrian Delay at Signalized Intersections	**Crosswalk D**	**Crosswalk C**
Average delay, d_p (s), $d_p = 0.5(C-g)^2/C$	22.20	14.50
LOS at signalized intersection (Exhibit 18-9)	C	B
Number of pedestrians arriving during Don't Walk or red indication,[1] N_{ped} (p)	3.04	4.43
Average pedestrian walking speed, S_p (ft/s)	4.0	4.0
Total crossing time,[2] t (s)	18.6	12.4
Total time-space, TS (ft^2-s), $TS = LW(WALK + FDW - L/2S_p)$	30810	30030
Total crosswalk occupancy time, T (p-s) $T \approx (v_i + v_o)t$	242	162
Number of conflicting right-turning vehicles, N_{tv} (veh)	4.8	0.2
Time-space of right-turning vehicles, TS_{tv} (ft^2-s), $TS_{tv} = 40N_{tv}W_E$	2496	128
Effective time-space, TS_E (ft^2-s), $TS_E = TS - TS_{tv}$	28314	29902
Circulation area per pedestrian, M (ft^2/p), $M = TS_E/T$	117.0	184.8
LOS (Exhibit 18-3)	A	A
LOS - Platoon (Exhibit 18-4)	B	B

Notes

1. Number of people in the subject movement who arrive before the WALK or concurrent green indication and exit the curb during the WALK or concurrent green indication. $N_{ped} = v_{co}$ or v_{do} (C-G)/C

2. If W > 10 ft, $t = 3.2 + L/S_p + (2.7 N_{ped}/W)$; but if W <= 10 ft, $t = 3.2 + L/S_p + (0.27 N_{ped})$

Analyst	C.	Intersection/Corner	SE corner of York Ave and 70th St
Company	Ethan Eldon Assoc.	Peak Hour	PM
Date Performed	5/23,2007 13:48	Analysis Year	2010
Analysis Period	Peak 15-min.	Conditions	No-Build

Inputs				Geometric Inputs	
Cycle length, C	120			Width of Sidewalk on Minor-street W_a	13
Minor-street red phase, R_{mi}	53			Width of Sidewalk on Major-street W_b	20
Major-street red phase, R_{mj}	79			Radius of Corner	12
Minor-street effective green, g_i	67			Width of Minor-street L_c	34
Major-street effective green, g_j	41			Width of Major-street L_d	60
	Flow, p/15-min	Flow, p/15min * 1/60 = p/s	Flow, p/s*C	Minor-street crosswalk Inbound	79
v_{ci}	79	0.09	11	Major-street crosswalk Inbound	18
v_{co}	90	0.10	12	Minor-street crosswalk Outbound	90
v_{di}	18	0.02	2	Major-street crosswalk Outbound	89
v_{do}	89	0.10	12	Corner pedestrian cross traffic	55
$v_{a,b}$	55	0.06	7	Minor-street crosswalk width W_c	13
v_{tot}	331	0.37	44	Major-street crosswalk width W_c	13

Street Corner Time-Space Analysis	
Total time-space, TS (ft^2-s) TS = $C(W_aW_b - 0.215R^2)$	27484.8
Time spent by pedestrians crossing major street, Q_{tdo} (p-s) $Q_{tdo} = v_{do} R_{mi}^2/2C$	140.45
Time spent by pedestrians crossing minor street, Q_{tco} (p-s) $Q_{tco} = v_{co} R_{mi}^2/2C$	312.05
Total time-space available, TS_c (ft^2-s), $TS_c = TS - [5(Q_{tdo} + Q_{tco})]$	25222.3
Circulation area per pedestrian, M (ft^2/p), $M = TS_c/4v_{tot}$	143.3
LOS (Exhibit 18-3)	A
LOS - Platoon (Exhibit 18-4)	B

Crosswalk Time-Space Analysis		
Average Pedestrian Delay at Signalized Intersections	Crosswalk D	Crosswalk C
Average delay, d_p (s), $d_p = 0.5(C-g)^2/C$	26.00	11.70
LOS at signalized intersection (Exhibit 18-9)	C	B
Number of pedestrians arriving during Don't Walk or Red indication, N_{ped} (p)	7.90	5.30
Average pedestrian walking speed, S_p (ft/s)	4.0	4.0
Total crossing time,[2] t (s)	19.3	12.8
Total time-space, TS (ft^2-s), TS = LW(WALK + FDW - L/2S_t)	26130	27735.5
Total crosswalk occupancy time, T (p-s) $T = (v_i + v_o)t$	270	294
Number of conflicting right-turning vehicles, N_{tv} (veh)	4.9	2.0
Time-space of right-turning vehicles, TS_{tv} (ft^2-s), $TS_{tv} = 40N_{tv}W_E$	2548	1040
Effective time-space, TS_E (ft^2-s), $TS_E = TS - TS_{tv}$	23582	26695.5
Circulation area per pedestrian, M (ft^2/p) $M = TS_E/T$	87.4	90.7
LOS (Exhibit 18-3)	A	A
LOS - Platoon (Exhibit 18-4)	C	B

Notes

1. Number of people in the subject movement who arrive before the WALK or concurrent green indication and exit the curb during the WALK or concurrent green indication. $N_{ped} = v_{co}$ or v_{do} (C-G)/C

2. If W > 10 ft, t = 3.2 + L/S_p + (2.7 N_{ped}/W), but if W <= 10 ft, t = 3.2 + L/S_p + (0.27 N_{ped})

Street Corner Time-Space Analysis	
Total time-space, TS (ft^2-s) TS = $C(W_eW_t - 0.215R^2)$	20284.8
Time spent by pedestrians crossing major street, Q_{tdo} (p-s) $Q_{tdo} = v_{do} R_{mi}^2/2C$	58.52083
Time spent by pedestrians crossing minor street, Q_{tco} (p-s) $Q_{tco} = v_{co} R_{mi}^2/2C$	364.06
Total time-space available, TS_c (ft^2-s), $TS_c = TS - [5(Q_{tdo} + Q_{tco})]$	18171.9
Circulation area per pedestrian, M (ft^2/p), $M = TS_c/\Sigma v_{tot}$	89.1
LOS (Exhibit 18-3)	A
LOS - Platoon (Exhibit 18-4)	C

Crosswalk Time-Space Analysis		
Average Pedestrian Delay at Signalized Intersections	**Crosswalk D**	**Crosswalk C**
Average delay, d_p (s), $d_p = 0.5(C-g)^2/C$	26.00	11.70
LOS at signalized intersection (Exhibit 18-9)	C	B
Number of pedestrians arriving during Don't Walk or red indication,[1] N_{ped} (p)	3.29	6.18
Average pedestrian walking speed, S_p (ft/s)	4.0	4.0
Total crossing time,[2] t (s)	19.1	13.6
Total time-space, TS (ft^2-s), TS = LW(WALK + FDW - $L/2S_p$)	20100	26302.5
Total crosswalk occupancy time, T (p-s) $T = (v_i + v_o)t$	458	286
Number of conflicting right-turning vehicles, N_{rv} (veh)	5.7	**0.0**
Time-space of right-turning vehicles, TS_{rv} (ft^2-s), $TS_{rv} = 40N_{rv}W_E$	2280	0
Effective time-space, TS_E (ft^2-s), $TS_E = TS - TS_{rv}$	17820	26302.5
Circulation area per pedestrian, M (ft^2/p), $M = TS_E/T$	38.9	92.0
LOS (Exhibit 18-3)	C	A
LOS - Platoon (Exhibit 18-4)	D	B

Notes

1. Number of people in the subject movement who arrive before the WALK or concurrent green indication and exit the curb during the WALK or concurrent green indication. $N_{ped} = v_{co}$ or v_{do} (C-G)/C

2. If W > 10 ft, $t = 3.2 + L/S_p + (2.7 N_{ped}/W)$; but if W <= 10 ft, $t = 3.2 + L/S_p + (0.27 N_{ped})$

Appendix C
Waterfront Revitalization Program
Consistency Assessment Form

For Internal Use Only:
Date Received: _____

WRP no. _____
DOS no. _____

NEW YORK CITY WATERFRONT REVITALIZATION PROGRAM
Consistency Assessment Form

Proposed actions that are subject to CEQR, ULURP or other local, state or federal discretionary review procedures, and that are within New York City's designated coastal zone, must be reviewed and assessed for their consistency with the *New York City Waterfront Revitalization Program (WRP)*. The WRP was adopted as a 197-a Plan by the Council of the City of New York on October 13, 1999, and subsequently approved by the New York State Department of State with the concurrence of the United States Department of Commerce pursuant to applicable state and federal law, including the Waterfront Revitalization of Coastal Areas and Inland Waterways Act. As a result of these approvals, state and federal discretionary actions within the city's coastal zone must be consistent to the maximum extent practicable with the WRP policies and the city must be given the opportunity to comment on all state and federal projects within its coastal zone.

This form is intended to assist an applicant in certifying that the proposed activity is consistent with the WRP. It should be completed when the local, state, or federal application is prepared. The completed form and accompanying information will be used by the New York State Department of State, other state agencies or the New York City Department of City Planning in their review of the applicant's certification of consistency.

A. APPLICANT

1. Name: Ethan C. Eldon Associates, Inc. for Hospital for Special Surgery
2. Address: 1350 Broadway, Suite 612, New York, NY 10018
3. Telephone: 212-967-5400 Fax: 212-967-2747 E-mail: eceaethan@aol.com
4. Project site owner: New York Society for Ruptured and Crippled

B. PROPOSED ACTIVITY

1. Brief description of activity:

New construction of a platform within the air space over the FDR Drive along the north side of 71st Street, with a 103,010 SF new hospital building constructed over it. Expansion of the existing hospital's East wing with new construction of 53,500 SF. The new building would be 12-stories and called the "River" building. The East wing would be 11-stories when the proposed 3-story addition is completed.

2. Purpose of activity:

Modernization of the facility to expand operating room capacity, inpatient beds, ambulatory surgery, diagnostic imaging services, sports medicine rehabilitation and physician offices. To allow the facility to accomodate high utilization and volume increases in surgeries and patients.

3. Location of activity: (street address/borough or site description):

535 East 70th Street, Manhattan, NY 10021
The existing building is located on the north side of East 70th Street between York Avenue and the FDR Drive and over the FDR Drive. The new River building would be constructed on the north side of East 71st Street over the FDR Drive

Proposed Activity Cont'd

4. If a federal or state permit or license was issued or is required for the proposed activity, identify the permit type(s), the authorizing agency and provide the application or permit number(s), if known:

5. Is federal or state funding being used to finance the project? If so, please identify the funding source(s).

Yes. United States Department of Housing and Urgan Development (FHA) and Dormitory Authority of State of New York (DASNY) funding.

6. Will the proposed project require the preparation of an environmental impact statement?
Yes x No _____ If yes, identify Lead Agency:

New York City Department of City Planning

7. Identify city discretionary actions, such as a zoning amendment or adoption of an urban renewal plan, required for the proposed project.

Special Permit for new construction in the air space over the FDR Drive; Modification of existing Special Permit for the East and West wings; Elimination, discontinuance and closing, and convey-ance to erect columns and footings on the East River Esplanade; Approval for building over the FDR Drive; Approval for construction plans; Approval for support columns on the East River Esplanade; Approval from Art Commission for construction over the FDR Drive; NYCDOT approval.

C. COASTAL ASSESSMENT

Location Questions:	Yes	No
1. Is the project site on the waterfront or at the water's edge?	x	
2. Does the proposed project require a waterfront site?		x
3. Would the action result in a physical alteration to a waterfront site, including land along the shoreline, land underwater, or coastal waters?		x

Policy Questions	Yes	No
The following questions represent, in a broad sense, the policies of the WRP. Numbers in parentheses after each question indicate the policy or policies addressed by the question. The new Waterfront Revitalization Program offers detailed explanations of the policies, including criteria for consistency determinations. Check either "Yes" or "No" for each of the following questions. For all "yes" responses, provide an attachment assessing the effects of the proposed activity on the relevant policies or standards. Explain how the action would be consistent with the goals of those policies and standards.		
4. Will the proposed project result in revitalization or redevelopment of a deteriorated or under-used waterfront site? (1)		x
5. Is the project site appropriate for residential or commercial redevelopment? (1.1)		x
6. Will the action result in a change in scale or character of a neighborhood? (1.2)		x

Policy Questions cont'd	Yes	No
7. Will the proposed activity require provision of new public services or infrastructure in undeveloped or sparsely populated sections of the coastal area? (1.3)		X
8. Is the action located in one of the designated Significant Maritime and Industrial Areas (SMIA): South Bronx, Newtown Creek, Brooklyn Navy Yard, Red Hook, Sunset Park, or Staten Island? (2)		X
9. Are there any waterfront structures, such as piers, docks, bulkheads or wharves, located on the project sites? (2)		X
10. Would the action involve the siting or construction of a facility essential to the generation or transmission of energy, or a natural gas facility, or would it develop new energy resources? (2.1)		X
11. Does the action involve the siting of a working waterfront use outside of a SMIA? (2.2)		X
12. Does the proposed project involve infrastructure improvement, such as construction or repair of piers, docks, or bulkheads? (2.3, 3.2)		X
13. Would the action involve mining, dredging, or dredge disposal, or placement of dredged or fill materials in coastal waters? (2.3, 3.1, 4, 5.3, 6.3)		X
14. Would the action be located in a commercial or recreational boating center, such as City Island, Sheepshead Bay or Great Kills or an area devoted to water-dependent transportation? (3)		X
15. Would the proposed project have an adverse effect upon the land or water uses within a commercial or recreation boating center or water-dependent transportation center? (3.1)		X
16. Would the proposed project create any conflicts between commercial and recreational boating? (3.2)		X
17. Does the proposed project involve any boating activity that would have an impact on the aquatic environment or surrounding land and water uses? (3.3)		X
18. Is the action located in one of the designated Special Natural Waterfront Areas (SNWA): Long Island Sound- East River, Jamaica Bay, or Northwest Staten Island? (4 and 9.2)		X
19. Is the project site in or adjacent to a Significant Coastal Fish and Wildlife Habitat? (4.1)		X
20. Is the site located within or adjacent to a Recognized Ecological Complex: South Shore of Staten Island or Riverdale Natural Area District? (4.1and 9.2)		X
21. Would the action involve any activity in or near a tidal or freshwater wetland? (4.2)		X
22. Does the project site contain a rare ecological community or would the proposed project affect a vulnerable plant, fish, or wildlife species? (4.3)		X
23. Would the action have any effects on commercial or recreational use of fish resources? (4.4)		X
24. Would the proposed project in any way affect the water quality classification of nearby waters or be unable to be consistent with that classification? (5)		X
25. Would the action result in any direct or indirect discharges, including toxins, hazardous substances, or other pollutants, effluent, or waste, into any waterbody? (5.1)		X
26. Would the action result in the draining of stormwater runoff or sewer overflows into coastal waters? (5.1)		X
27. Will any activity associated with the project generate nonpoint source pollution? (5.2)		X
28. Would the action cause violations of the National or State air quality standards? (5.2)		X

Policy Questions cont'd	Yes	No
29. Would the action result in significant amounts of acid rain precursors (nitrates and sulfates)? (5.2C)		x
30. Will the project involve the excavation or placing of fill in or near navigable waters, marshes, estuaries, tidal marshes or other wetlands? (5.3)		x
31. Would the proposed action have any effects on surface or ground water supplies? (5.4)		x
32. Would the action result in any activities within a federally designated flood hazard area or state-designated erosion hazards area? (6)	x	
33. Would the action result in any construction activities that would lead to erosion? (6)		x
34. Would the action involve construction or reconstruction of a flood or erosion control structure? (6.1)		x
35. Would the action involve any new or increased activity on or near any beach, dune, barrier island, or bluff? (6.1)		x
36. Does the proposed project involve use of public funds for flood prevention or erosion control? (6.2)		x
37. Would the proposed project affect a non-renewable source of sand ? (6.3)		x
38. Would the action result in shipping, handling, or storing of solid wastes, hazardous materials, or other pollutants? (7)		x
39. Would the action affect any sites that have been used as landfills? (7.1)		x
40. Would the action result in development of a site that may contain contamination or that has a history of underground fuel tanks, oil spills, or other form or petroleum product use or storage? (7.2)		x
41. Will the proposed activity result in any transport, storage, treatment, or disposal of solid wastes or hazardous materials, or the siting of a solid or hazardous waste facility? (7.3)		x
42. Would the action result in a reduction of existing or required access to or along coastal waters, public access areas, or public parks or open spaces? (8)		x
43. Will the proposed project affect or be located in, on, or adjacent to any federal, state, or city park or other land in public ownership protected for open space preservation? (8)	x	
44. Would the action result in the provision of open space without provision for its maintenance? (8.1)		x
45. Would the action result in any development along the shoreline but NOT include new water-enhanced or water-dependent recreational space? (8.2)		x
46. Will the proposed project impede visual access to coastal lands, waters and open space? (8.3)	x	
47. Does the proposed project involve publicly owned or acquired land that could accommodate waterfront open space or recreation? (8.4)		x
48. Does the project site involve lands or waters held in public trust by the state or city? (8.5)		x
49. Would the action affect natural or built resources that contribute to the scenic quality of a coastal area? (9)		x
50. Does the site currently include elements that degrade the area's scenic quality or block views to the water? (9.1)	x	

Policy Questions cont'd	Yes	No
51. Would the proposed action have a significant adverse impact on historic, archeological, or cultural resources? (10)		x
52. Will the proposed activity affect or be located in, on, or adjacent to an historic resource listed on the National or State Register of Historic Places, or designated as a landmark by the City of New York? (10)		x

D. CERTIFICATION

The applicant or agent must certify that the proposed activity is consistent with New York City's Waterfront Revitalization Program, pursuant to the New York State Coastal Management Program. If this certification cannot be made, the proposed activity shall not be undertaken. If the certification can be made, complete this section.

"The proposed activity complies with New York State's Coastal Management Program as expressed in New York City's approved Local Waterfront Revitalization Program, pursuant to New York State's Coastal Management Program, and will be conducted in a manner consistent with such program."

Re: **Hospital for Special Surgery Expansion Project – Phase II testing**
CEQR No. 05DCP061M
DEP No. 06DEPTECH190M

Dear Mr. Karnovsky:

This letter reflects our understanding and commitment with respect to the performance of a Phase II Environmental Site Assessment ("Phase II testing") and any remediation required in connection with the environmental review for the Hospital's expansion project.

The Hospital has several applications pending before the City Planning Commission ("CPC") to facilitate the construction of a new building in previously demapped air space over the FDR Drive (the "River Building"). The River Building would be supported by columns that would penetrate property currently owned by the City within the East River Esplanade and on the west side of the FDR Drive within the sidewalk between the Hospital's Caspary Building and the southbound service road of the FDR Drive.

Pursuant to the City Environmental Quality Review ("CEQR") regulations, the Hospital prepared a draft Draft Environmental Impact Statement ("DEIS"), which the New York City Department of City Planning ("DCP"), as lead agency, forwarded to DEP for review. Due to the proposed soil disturbance, and based on a Phase I Environmental Site Assessment conducted by Ethan C. Eldon Associates, Inc., the New York City Department of Environmental Protection ("DEP") determined that Phase II testing was necessary to adequately identify and characterize the surface and subsurface soils of the subject parcels prior to on-site soil disturbance, which testing would be performed pursuant to a DEP-approved investigative Phase II Protocol Workplan. *See attached comment letter from DEP to DCP dated August 22, 2007.*

The Hospital agrees that, during the time between publication of the DEIS and that of the Final Environmental Impact Statement (the "FEIS") the Hospital and its representatives will make best and good faith efforts to:

- Develop a Phase II Protocol Workplan and submit the same to DEP for review and approval (the "Workplan").

535 East 70th Street
New York, NY 10021
tel 212.606.1000

- Obtain any necessary approvals from the Department of Transportation and/or the Department of Parks and Recreation to perform Phase II testing in accordance with the Workplan on the East River Esplanade and on the west side of the FDR Drive within the sidewalk between the Hospital's Caspary Building and the southbound service road of the FDR Drive.

- Perform Phase II testing pursuant to the DEP-approved Workplan and submit results to DEP.

- If the results of the Phase II testing reveal the presence of contamination, identify measures necessary to avoid impacts with respect to hazardous materials and public health.

- As necessary, prepare and submit to DEP for its review and approval a Remediation Action Plan ("RAP") and a Construction Health and Safety Plan ("CHASP").

The results of the Phase II testing and the identification of necessary mitigation measures, if applicable, would be disclosed in the FEIS. If, by the time of publication of the FEIS, a RAP and CHASP have not been reviewed and approved by DEP, the FEIS will, at a minimum describe the critical elements of the proposed mitigation measures.

Notwithstanding the foregoing, if, despite best and good faith efforts, the Hospital and its representatives are not able to commence or complete the Phase II testing by publication of the FEIS due to difficulties in securing access to the testing sites or for other reasons beyond the Hospital's control, the Hospital agrees that DEP's requirements regarding any outstanding work shall be made binding conditions of the land use approvals in a form acceptable to DEP, including but not limited to incorporation thereof as conditions of any CPC approval of the demapping action for the columns (C 060440 MMM), as well as in the related mapping agreement. The Hospital understands that the mapping agreement or other instrument would contain provisions making the completion of DEP's requirements a condition to the issuance of a building permit and/or temporary certificate of occupancy, among any other appropriate enforcement measures.

The Hospital will revise the DEIS to reflect the above, and will provide Alison McCabe at DCP and Mitchell Wimbish at DEP with a written weekly update with respect to its efforts and progress in completing the above-identified steps. The first such update will include a schedule showing how the Hospital intends to complete all of these steps consistent with the FEIS schedule. Subsequent updates will measure progress against that schedule.

The Hospital is committed to performance of the above-identified steps in accordance with this letter and acknowledges that DCP will make its determination whether to issue a Notice of Completion for the FEIS based in part on whether the agency requirements for Phase II testing set forth herein are satisfied.

Sincerely,

Lisa Goldstein
Executive VP and COO

Re: **Hospital for Special Surgery**
Block 1482, Lots 20 and 9020; Block 1483, Lots 23 and 33
05DCP061M/ 06DEPTECH190M

Dear Mr. Dobruskin:

The New York City Department of Environmental Protection Bureau of Environmental Planning and Analysis (DEP) has reviewed the Preliminary Draft Environmental Impact Statement (PDEIS) prepared by Ethan C. Eldon Associates, Inc. for the above referenced project. It is our understanding that the applicant, the Hospital for Special Surgery (HSS), is proposing to enlarge the East Wing with a three-story addition, containing 48,548 square feet for hospital use, and the West Wing would be completed with 5th through 9th floors. Additionally, a 12-story 93,929 square foot hospital building (River Building) is proposed within the air space over the FDR Drive between East 71st Street and the mid-block between East 71st St and East 72nd Street. There would also be a new pedestrian bridge constructed at the third-floor level connecting the East Wing of the existing Main Hospital to the River Building. Construction is expected to be completed by 2008. Portions of the existing Caspary building (Block 1483, Lot 23) and Belaire building (Block 1483, Lot 33), and East and West Wings of the Main Hospital Building would be renovated. The proposed action requires special permits, modification to special permits, and other approvals by the New York City Department of City Planning.

Air quality analyses have been performed using line source, volume source, and area source dispersion modeling for carbon monoxide (CO) only. The analysis results, as summarized in Table 18-5 of the document, show compliance with the applicable CO standards; therefore the project would not be likely to result in a significant adverse CO impact. However, it should be noted that the pertinent backup materials for these analyses was not submitted to confirm the results.

Please include DEP tracking number 06DEPTECH190M on all future correspondence and submissions for this project. If you have questions or comments, please contact Mr. Mitchell Wimbish at 718-595-4451.

Sincerely,

Terrell Estesen
Director, Office of City Project Review

Re: **Hospital for Special Surgery**
Block 1482, Lots 20 and 9020
Block 1483, Lots 23 and 33
05DCP061M/ 06DEPTECH190M

Dear Mr. Dobruskin:

The New York City Department of Environmental Protection Bureau of Environmental Planning and Analysis (DEP) has reviewed the Preliminary Draft Environmental Impact Statement (PDEIS) prepared by Ethan C. Eldon Associates, Inc. for the above referenced project. It is our understanding that the applicant, the Hospital for Special Surgery (HSS), is proposing to enlarge the East Wing with a three-story addition, containing 48,548 square feet for hospital use, and the West Wing would be completed with 5th through 9th floors. Additionally, a 12-story 93,929 square foot hospital building (River Building) is proposed within the air space over the FDR Drive between East 71st Street and the mid-block between East 71st St and East 72nd Street. There would also be a new pedestrian bridge constructed at the third-floor level connecting the East Wing of the existing Main Hospital to the River Building. Construction is expected to be completed by 2008. Portions of the existing Caspary building (Block 1483, Lot 23) and Belaire building (Block 1483, Lot 33), and East and West Wings of the Main Hospital Building would be renovated. The proposed action requires special permits, modification to special permits, and other approvals by the New York City Department of City Planning.

According to the PDEIS, Sanborn maps show that there may be potential hazardous materials issues related to the Garbage Dump that existed in 1892 in the location of the proposed River building; as well as auto service that existed in 1951 in the location of the existing Caspary Research building. The HSS has an active registered aboveground storage tank and is used for the storage of diesel fuel for the emergency generator. A review of the federal and state environmental databases indicates that HSS is registered as a small quantity hazardous waste generator facility and has generated non-halogenated solvents. The PDEIS also outlines the potential to encounter contaminated fill material during excavation activities for the support columns in the East River Esplanade for the concrete foundation.

Based upon our review of the submitted documentation, we have the following comments/ recommendations:

- A Phase II Environmental Site Assessment (Phase II) is necessary to adequately identify and characterize the surface and subsurface soils of the subject parcels prior to on-site soil disturbance for any proposed renovation, new construction, trenching, surface drainage upgrades, etc. This will ensure protection of human health and the environment by requiring that suspected hazardous materials associated with these lots would be mitigated before future construction on these parcels. An investigative Phase II Protocol Workplan (Workplan) summarizing the proposed drilling and soil/groundwater sampling activities should be submitted to DEP for review and approval. The Workplan should include blueprints and/or site plans displaying the current surface grade and sub-grade elevations and a site map depicting the proposed soil boring locations. Soil and groundwater samples should be collected and analyzed by a New York State Department Of Health Environmental Laboratory Approval Procedure-Certified laboratory for the presence of volatile organic compounds by Method 8260; semi-volatile organic compounds by method 8270; pesticides/ polychlorinated biphenyls (PCBs) by method 8081/8082 and Target Analyte List metals. An investigative Health and Safety Plan (HASP) should also be submitted to DEP for review and approval. Soil disturbance should not occur without DEP's written approval of the Workplan and HASP.

- All known or found underground storage tanks (including dispensers, piping, fill-ports etc.) must be properly removed and closed in accordance with applicable New York State Department of Environmental Conservation Regulations.

- Suspected lead-containing paint, suspected Asbestos Containing Material, and/or fluorescent lighting fixtures containing ballasts that are suspected to contain PCBs may be present within the existing structures. These materials should be properly removed from the site prior to the start of any demolition/conversion activities and disposed of in accordance with all federal, state and local regulations. An appropriate HASP for the handling and removal of these materials should also be implemented during the demolition phase of this project.

- The air quality and noise materials are under review by DEP. We will forward comments as soon as they are available.

The results of the Phase II investigation, as well as any necessary remedial measures to avoid significant adverse hazardous materials impacts, should be disclosed in the Environmental Impact Statement.

Please include DEP tracking number 06DEPTECH190M on all future correspondence and submissions for this project. If you have questions or comments, please contact Mitchell Wimbish at 718-595-4451.

Sincerely,

Terrell Estesen

Re: *Hospital for Special Surgery's (the "Hospital") Phase II Testing*
05DCP061M/06DEPTECH190M/060440MMM

Dear Mr. Karnovsky,

The Department of Environmental Protection is requiring that the Hospital perform soil and groundwater testing where the columns for the proposed Hospital's new "River" building will be located. These columns are proposed to be located on City property between the ramp of the existing pedestrian bridge and within the sidewalk abutting the service road on the west side of the FDR Drive between E. 71st and E. 72nd Streets. The Hospital proposes to enter into an agreement pursuant to which Phase II testing would be conducted following special permit approval and transfer of the property in question to the Hospital via the mapping agreement. For the reasons set forth below, we believe that this would be preferable to performing soil and groundwater testing at this time.

In order to collect soil and groundwater samples without undertaking excavation, a geoprobe, a direct push drill rig, which pushes a coring device into the soil to retrieve core test samples would be needed, The geoprobe would break through the existing concrete in order to drill a boring to the required depth. A geoprobe, which will be mounted on a track vehicle (a small tank like vehicle) would be the most efficient means to perform the testing and would most likely be employed. The track mounted geoprobe is approximately six feet wide, ten feet long and will require at least a ten foot clearance for the drill. The geoprobe will drill in the exact location where the proposed columns for the "River" building will be placed. During the delivering and placement of the track mounted geoprobe, it is expected that the public use of the Esplanade will be disrupted and due to the close proximity of the site to the FDR Drive, it would likely be necessary to close a portion of a northbound lane and southbound service road of the Drive for a short period of time. These closures will occur at times of reduced traffic, as has been allowed by the Department of Transportation in the past. Given the potential level of disruption, and the need to secure multiple permissions from a variety of agencies, we believe that it would be preferable for Phase II testing to take place only if the special permit has been approved.

It is also our opinion that geoprobe testing is not as efficient or as thorough as soil testing performed during excavation. Therefore, the Phase II testing would be more appropriate if accomplished during the excavation for the placement of the columns for the new "River" building, which can take place only after the special permit has been approved. Conduct of the Phase II testing at this time would allow the Hospital to coordinate testing with FDR and Esplanade closures required for construction purposes, thereby reducing the amount of closure time from what would be required if closures took place both before and after special permit approval.

Because the Hospital does not currently own the property which is the subject of the Phase II testing , it is not possible to embody a commitment to perform Phase II testing in a Restrictive Declaration. The Hospital therefore proposes that the requirement to perform the Phase II testing be a term and condition of the mapping agreement. At this time, the Hospital would enter into a Memorandum of Understanding with DEP acknowledging that such terms will be incorporated into the mapping agreement. We understand that the Department of City Planning is also prepared to require, as a condition of its Resolution approving the City Map Amendment, that the mapping agreement include such provisions.

Please feel free to contact me with any questions.

Very truly yours,

Ethan Eldon

Re: *Hospital for Special Surgery's Phase II Testing*
05DCP061M/06DEPTECH190M/060440MMM

Dear Mr. Karnovsky,

The Department of Environmental Protection is requiring that the Hospital for Special Surgery perform soil and groundwater testing where the columns for the proposed Hospital's new "River" building will be located. These columns are proposed to be located on City property between the ramp of the existing pedestrian bridge and within the sidewalk abutting the service road on the west side of the FDR Drive between E. 71st and E. 72nd Streets. The Hospital proposes to enter into an agreement pursuant to which Phase II testing would be conducted following special permit approval and transfer of the property in question to the Hospital via the mapping agreement.

The Hospital has previously conducted Phase II testing for the construction of the development directly south of the proposed project. The results of the tests concluded that soils to be excavated were not contaminated and no further action was required.

Additionally, a geotechnical survey was completed in 2005 to collect structural borings. Ethan C. Eldon Associates, Inc. reviewed the laboratory analysis report (see attached) prepared by Environmental Testing Laboratories, Inc. for the composite soil sample that was collected by Mueser Rutledge Consulting Engineers from six (6) soil borings at 0'-32.5' below grade. The soil sample was submitted to the laboratory for extraction by TCLP method and analysis for Volatile Organic Compounds, Semi volatile Organic Compounds, 8 RCRA metals, Pesticides and Herbicides. The laboratory analytical results do not indicate the presence of any concentrations of contaminants exceeding the regulatory levels for hazardous waste.

In order to conduct additional testing at this time, a track mounted geoprobe would be needed to drill borings in order to collect samples. The geoprobe will drill in the exact location where the proposed columns for the "River" building will be placed (See Attached core location diagram. One of the locations where a soil sample would need to be collected is currently obstructed by the public pedestrian bridge. In order to collect the sample in that location, partial disassembly

of the bridge would be required which would cause additional blocking of public access to the esplanade.

Further, the locations where borings would have to be taken are on land presently owned by the City. Obtaining such an approval would further delay this critically needed expansion of patient treatment facilities.

For all of the reasons enunciated above, we request that the CEQR and ULURP processes be allowed to go forward expeditiously by permitting further testing to be conducted following special permit approval and transfer of the property in question to the Hospital via the mapping agreement

Please feel free to contact me with any questions.

Sincerely,

Ethan Eldon

Amanda Burden, AICP
Chair
New York City Planning Commission
22 Reade Street
New York, NY 10007

Re: Hospital for Special Surgery Expansion Project - FDR Drive

Dear Chair Burden:

The New York City Department of Transportation (the "Department") has met with the Hospital for Special Surgery (the "Hospital") in regard to the Hospital's proposed modernization and expansion and has reviewed materials submitted in connection with the construction of a new building that will span the FDR Drive (the "River Building"). The Department is aware that the Hospital's construction of the River Building requires the elimination, discontinuance, and closing of volumes of the FDR Drive to install support columns for the River Building. The Department is further aware that, prior to authorizing such construction and related support structures, the New York City Planning Commission ("CPC") must make the following findings with respect to the FDR Drive pursuant to a 1973 agreement between the City and the Hospital: that such construction will not substantially interfere with the vehicular and pedestrian use of the FDR Drive or the Streets (defined in the aforementioned agreement as E. 63rd and E. 70th Streets between the east side of York Ave and the west side of the FDR Drive, and E. 71st Street between a point 417.5' east of the east side of York Avenue and the west side of the FDR); and that with respect to the FDR Drive all requirements imposed by federal and state law shall be complied with by the Hospital. There must also be separate findings with respect to the placement of support columns, including, but not necessarily limited to, the fact that the columns must not substantially impede vehicular use of the FDR Drive, East 63rd, East 70th or East 71st Streets.

The Hospital has presented its proposed construction program, methods to be employed, and an estimate of the duration of construction. The Department understands that the River Building would be supported by columns; the foundations (grade beams and pile caps) for which would be installed both on the west side of the FDR Drive within the sidewalk between the Hospital's Caspary Building and the southbound service road of the FDR Drive, and on the east side of the FDR Drive within the East River Esplanade. We recognize that the installation of these new grade beams on both sides of the FDR Drive would require temporary closures of FDR travel lanes, exit and entrance ramps and the southbound service road of the FDR Drive. These closures during construction would occur at times of reduced traffic as defined by the Department, and as directed by our Department in accordance with all applicable laws and regulations.

The Department believes that such temporary closures would not substantially interfere with vehicular use of the FDR Drive. Furthermore, the proposed locations of the support columns do not encroach on traffic lanes, and the columns, once installed, would not impede the free flow of traffic on the FDR Drive, its service road, or East 71st Street. Any temporary closures of the FDR Drive required for future maintenance and inspection of the columns or their foundations would be coordinated with the Department including the issuance of a work permit.

In addition, the Hospital will obtain approvals on the proposed construction plans from the Department including the Bridges Division, Highway Design Unit, Arterial Maintenance Unit, and OCMC, prior to applying for a work permit. The Hospital must also obtain approval from the New York State Department of Transportation and the New York City Department of Environmental Protection, prior to starting construction.

Notwithstanding the above, the Department is concerned about the difficulty in obtaining biennial inspection reports from the Hospital pursuant to a Memorandum of Agreement dated December 17, 1993, between the Hospital and the City of New York regarding a similar structure. In fact, the Hospital failed to transmit such reports until after repeated requests by the Department with the first and only report being transmitted to the Department in December, 2007. As such, the Department requires further assurances that the Hospital will meet all its inspection obligations regarding its structures which span the roadway. Accordingly, the Department will not approve any permits associated with the construction of the River Building until the Hospital provides written assurances, in a form acceptable to the Department, that the Hospital will timely inspect and transmit biennial inspection reports regarding its structures which span the roadway.

Please let me know if you require any further clarification on the above, or any additional assistance.

Very truly yours,

Margaret Forgione
Borough Commissioner

Re: Hospital for Special Surgery Expansion

Dear Chair Burden,

The New York City Department of Parks & Recreation ("Parks") has been working with the Hospital for Special Surgery ("HSS") on its proposed modernization and expansion. In conjunction with this project, the Hospital has provided us with details of their proposed construction over the FDR Drive as it relates to the East River Esplanade ("esplanade"). Our primary concern has been the temporary closure of the esplanade—HSS has assured us they'll make every effort to limit the closure to four to six months and to open the esplanade during weekends when no construction activities would prevent them from doing so. We are also encouraging HSS to coordinate their construction project with the New York City Department of Transportation's planned reconstruction of the East 78th and East 81st Street pedestrian bridges. We are pleased HSS has made an effort to respond to our concerns and, with your support in holding the hospital to these terms, we have no objections to hospital's proposed modernization and expansion proceeding.

Sincerely,

Joshua Laird

New York City Police Department
Headquarters, 1 Police Plaza
New York, NY 10038

October 25, 2004

Re: Hospital for Special Surgery Expansion

Dear Mr. McCarthy

Our firm is preparing a Draft Environmental Impact Statement (DEIS) for the Hospital for Special Surgery expansion. The Hospital for Special Surgery (HSS) is proposing a major renovation and expansion for modernization of its existing facility located between East 70th Street, East 72nd Street, York Avenue, and the Franklin Delano Roosevelt (FDR) Drive, in the Borough of Manhattan, New York County, New York, 10021.

The Hospital for Special Surgery proposes to renovate 74,955 SF in the East and West Wings of the Main Hospital Building, Caspary Building, and Belaire Building. In conjunction with the renovation, the proposed expansion plan consists of the new construction of 217,344 SF of new space in three locations: 64,820 SF on the East Wing to complete the 8th floor and add the 9th through 11th floors with a roof-top mechanical equipment room, 49,494 SF on the West Wing to complete the 5th through 8th floors and add a 9th floor with a roof-top mechanical equipment room, and 103,010 SF for the new 12-story River Building with a roof-top mechanical equipment room to be constructed on a platform within the air space over the FDR Drive along the north side of East 71st Street. Access to the River Building would be provided by walking through the 2nd floor of the adjacent Caspary Building. There would also be a new pedestrian bridge constructed at the 3rd floor level connecting the East Wing of the Main Hospital Building to the New River Building. (See Figure 1.2, Site Plan)

The new construction consists of both the infilling of partially built out floors and the addition of new floors. The document that we are preparing for the New City Department of Planning should include a determination of the following questions:

1. Is the ratio of Police Officers to residents in the area sufficient?
2. On average how many calls does19th Precinct respond to calls?
3. How many Police Officers serve in the 19th Precinct?
4. Which Precincts would respond if additional Manpower and equipment are need for a call to HSS?

We need your assistance in answering these questions in order to complete the DEIS. If you have any questions, please call me. If you care to send your response by fax please use 212-967-2747 after 11/01/04. The above fax number is useable until 10/31/04.

Sincerely,

Mr. Barry Bowman
Geologist, MS.

Brooklyn, New York 11201

Re: Hospital for Special Surgery Expansion

Dear Mr. Cassano

Our firm is preparing a Draft Environmental Impact Statement (DEIS) for the Hospital for Special Surgery expansion. The Hospital for Special Surgery (HSS) is proposing a major renovation and expansion for modernization of its existing facility located between East 70th Street, East 72nd Street, York Avenue, and the Franklin Delano Roosevelt (FDR) Drive, in the Borough of Manhattan, New York County, New York, 10021.

The Hospital for Special Surgery plans a renovation and expansion of existing facilities that will be completed in 2006. The expansion is allowed under the terms of the 1973 Agreement and the 1983 Amendment to the 1973 Agreement between the City of New York, Hospital for Special Surgery, New York Presbyterian Hospital and Rockefeller University. The Hospital for Special Surgery proposes to renovate 74,955 SF in the East and West Wings of the Main Hospital Building, Caspary Building, and Belaire Building. In conjunction with the renovation, the proposed expansion plan consists of the new construction of 217,344 SF of new space in three locations: 64,820 SF on the East Wing to complete the 8th floor and add the 9th through 11th floors with a roof-top mechanical equipment room, 49,494 SF on the West Wing to complete the 5th through 8th floors and add a 9th floor with a roof-top mechanical equipment room, and 103,010 SF for the new 12-story River Building with a roof-top mechanical equipment room to be constructed on a platform within the air space over the FDR Drive along the north side of East 71st Street. Access to the River Building would be provided by walking through the 2nd floor of the adjacent Caspary Building. There would also be a new pedestrian bridge constructed at the 3rd floor level connecting the East Wing of the Main Hospital Building to the New River Building. (See Figure 1.2, Site Plan)

The new construction consists of both the infilling of partially built out floors and the addition of new floors. The document that we are preparing for the New City Department of Planning should include a determination of the following questions:

1. Is the water main in the area have sufficient pressure to satisfy the water demands of the expansion?
2. Is the ratio of Firefighters to residents in the area sufficient?
3. On average how many calls do the fire Stations in the area respond to calls?
4. How many stations are in the 19th Precinct area to respond to calls?
5. Which Fire Station would be the first to respond to a call from HSS?
6. How many Firefighters serve in the 19th Precinct area?
7. Which stations would respond if additional Manpower and equipment is need for a call to HSS?

We need your assistance in answering these questions in order to complete the DEIS. If you have any questions, please call me. If you care to send your response by fax please use 212-967-2747 after 11/01/04. The above fax number is useable until 10/31/04.

Sincerely,

Mr. Barry Bowman

Re: **535 East 70th Street**
New York, New York 10021, Block 1482, lot 20; Block 1483, Lot 23.

Dear Gina:

After our research the above site is not listed on the New York City or Federal Registers of Historic Places. Enclosed are copies of the Site drawing, land use map with 400 foot radius, sanborn map, and photos for the above site for you to perform archaeological, architectural and historical surveys.

Project Description

The site is "The Hospital for Special Surgery" (HSS). HSS proposes to renovate approximately 75,000 sq. ft. in the East and West Wings of its Main Building (67,380 sq. ft.) and in its Caspary and Belaire Buildings (7,575 sq. ft.), and to construct approximately 201,000 sq. ft. of new space in three locations: The East Wing (64,820 sq. ft.) by adding floors on the existing building; The West Wing (49,494 sq. ft.) by adding floors to the existing building; and a new construction over the F.D.R. Drive (86,860 sq. ft., block 1483, lot 23)

Please provide us with your determination of historical archeological significance at the above site.

If you have any further questions, please do not hesitate to contact me at (516) 229-2325.

Sincerely,

Barry Bowman

PROJECT REVIEW COVER FORM

Please complete this form and attach it to the top of any ***and all information submitted to this office*** *for review. Accurate and complete forms will assist this office in the timely processing and response to your request.*

☐ This information relating to a previously submitted project
PROJECT NUMBER ____PR_____
(Previous number assigned to this project by this office)

If you have checked this box and noted the previous Project Review (PR) number assigned by this office you do not need to continue unless any of the required information below has changed.

☒ This is a new project

If you have checked this box you will need to complete ALL of the following information.

Project Name Hospital For Special Surgery Expansion and Modernization

Location 535 East 70th Street
You MUST include street number, street name and/or County, State of Interstate route number if applicable

City/Town/Village New York (Manhattan)
List the correct municipality in which your project is being undertaken. If in a NON-INCORPORATED hamlet/village you must also provide the name of the town.

County New York

If your project covers multiple communities/counties please attach a list defining all municipalities/counties included.

TYPE OF REVIEW REQUIRED/REQUESTED

1. Is this project being developed using New York State funds ? ☒ Federal funds ? ☐

If you checked either or both of these boxes list the New York State and/or Federal Agency or Program that is providing the funding:
Dormitory Authority of the State of New York

2. Does this project requires a New York State permit ? ☐ Federal permit ? ☐

If you checked either or both of these boxes list the New York State and/or Federal Agency or Program that is providing the permit and the type of permit being requested:

3. SEQRA ☐ New York State Environmental Quality Review Act

4. Information Request ☐ No state or federal funding or permit(s) involved

The Historic Preservation Review Process in New York State

In order to insure that historic preservation is carefully considered in publicly-funded or permitted undertakings, there are laws at each level of government that require projects to be reviewed for their potential impact/effect on historic properties. At the federal level, Section 106 of the National Historic Preservation Act of 1966 (NHPA) direct the review of federally funded, licensed or permitted projects. At the state level, Section 14.09 of the New York State Parks, Recreation and Historic Preservation Law of 1980 performs a comparable function. Local environmental review for municipalities is carried out under the State Environmental Quality Review Act (SEQRA) of 1978.

Project review is conducted in two stages. First, the Field Service's Bureau assesses a property to determine whether or not is listed in the New York State or National Registers of Historic Places. If not, it is reviewed to determine whether or not it meets the criteria to be included in the registers. If listed or determined eligible for listing, then the second stage of the review is undertaken. This portion of the review determines whether or not the proposed action/project will have an impact on the qualities of the property that make it eligible.

ALL PROJECTS SUBMITTED FOR REVIEW SHOULD INCLUDE THE FOLLOWING MATERIAL(S).

☑ **Project Description**

Attach a full description of the nature and extent of the work to be undertaken as part of this project. Relevant portions of the project applications or environmental statements may be submitted.

☒ **Maps Locating Project**

Include a map locating the project in the community. The map must clearly show street and road names surrounding the project area as well as the location of all portions of the project. Appropriate maps include tax maps, Sanborn Insurance maps, and/or USGS quadrangle maps.

☑ **Photographs**

Photographs may be black and white prints, color prints, or color laser/photo copies; standard (black and white) photocopies are NOT acceptable.

- *If the project involves rehabilitation*, include photographs of the building(s) involved. Label each exterior view to a site map and label all interior views.

- *If the project involves new construction*, include photographs of the surrounding area looking out from the project site. Include photographs of any buildings (more than 50 years old) that are located on the project property or on adjoining property.

Re: Hospital for Special Surgery
535 E. 70th Street
Upper East Side, Manhattan, NY 10021

Dear Ms. Kelpin:

We are preparing an air quality analysis for the above referenced project. We have identified manufacturing uses at the following locations within a 400-foot study radius. We need emissions information for these buildings in order to assess the potential air quality impacts to our project. Please provide us with emissions information and locations of stacks/vents at the following properties:

- Con Edison 74th Street Plant, 503 E. 74th Street
- New York Department of Sanitation, 540 E. 74th Street
- New York Presbyterian Hospital – Annex Building, 523 E. 70th Street

If you have any questions please call me at (516) 229-2325.

Thank you for your assistance in this matter.

Sincerely,

Ted Rosati

Mr. Barry Bowman
Ethan C. Eldon Associates, Inc.
50 Charles Lindbergh Boulevard
Suite 400
Uniondale, New York 11553

Dear Mr. Bowman:

I am responding on behalf of Deputy Commissioner McCarthy regarding your recent letter in which you requested answers to a series of questions involving the 19th Precinct and related police issues in and around the vicinity of the Hospital for Special Surgery.

1. Is the ratio of Police Officers to residents in the area sufficient?

I would like to begin by pointing out that allocation of police resources is not based solely on population, but includes other factors such as calls for service and crimes. Therefore the ratio of police officers to the population of the Precinct is not the most effective measure of police service. However, crime is down in the19th Precinct by 73% over the last eleven (11) years and continues to decline for 2004 by 2.72%, as compared with 2003. This long term decrease in crime indicates that the Department has effectively allocated resources to the 19th Precinct.

2. On average, to how many calls does the 19th Precinct respond?

Over the past three (3) years, 19th Precinct Personnel have responded to 83,731 calls for service, an average of 229 calls for service per day.

3. How many Police Officers serve in the 19th Precinct?

At the present time, the 19th Precinct has a total of 254 Police Officers and supervisors assigned.

4. Which precincts would respond if additional manpower and equipment are needed for a call to HSS?

In most cases, the 19th Precinct is capable of handling any call that might arise at the Hospital for Special Surgery. However, if for any reason additional resources were needed, the Department can draw upon other patrol units, as well as such units as the Borough Task Force, Emergency Services Unit, and other specialized units as needed.

I thank you for allowing me the opportunity to answer your questions, and once again assure you of the Police Department's commitment to maintain the improved quality of life that has been achieved in and around the Hospital for Special Surgery.

Sincerely,

Dear Sir:

I have tried to answer all of your questions concerning the referenced project. The Fire Department will have no problem in supporting the proposed development. This letter is not Fire Department approval for this proposal, as we have not received plans for review. The companies that will serve the area and the type of equipment are:

1st Engine Company – Engine Company 44
1st Ladder Company – Ladder Company 16

These units are located at: 221 East 75th Street, New York, New York 10021

2nd Engine Company – Engine Company 39
2nd Engine Company – Ladder Company 13

These units are located at: 157 East 67th Street, New York, New York 10021

The Fire Department has no plans to make any changes in stations or equipment in the area. If there are any questions, please call Captain Paul Conlon at (718) 855-8571.

Sincerely yours,

Salvatore J. Cassano,
Chief of Operations

March 2, 2005

Mr. Robert Dobruskin
Director, Evironmental Assessment and Review
Department of City Planning, Room 4E
22 Reade Street
New York, NY 10007-1216

Dear Dr. Dobruskin:

In the matter of the application of the Hospital for Special Surgery expansion that is beyond the terms of the 1973 agreement, as amended in 1983, as described in the Environmental Impact Statement and ULURP application please be advised of the following issues.

The proposed project consists of 156,510 SF of new construction including 53,500 SF for three additional floors on the East Wing of the Main Hospital and 103,010 SF for the addition of a new 12-story River Building to be constructed on a platform in the air space over the FDR Drive on the north side of East 71st Street. A new pedestrian bridge would also connect the East Wing of the Main Hospital and the new River building.

Alternative locations to the one adjacent to the existing HSS facility over the FDR Drive would not work as they would not allow for the kind of fully integrated medical services, immediate staff response capability and both staff and technology interaction that is vital for patient well being. Similarly, a smaller building scenario would not permit HSS to provide the services necessary for state-of-the-art surgical treatment needed to maintain the level of first rate medical care for which our institution is world renowned.

A smaller build alternative would not provide sufficient improvement in order to financially justify the construction of a platform over the FDR Drive.

Sincerely,

Lisa Goldstein

MEMORANDUM

To: Robert Dobruskin

From: Jennifer Kao

CC: Celeste Evans, Joshua Laird, Colleen Alderson

Date: June 26, 2008

Subject: Hospital for Special Surgery – Expansion Project

Parks has reviewed the Draft Environmental Impact Statement (DEIS) for the above-referenced project. Pages 1-17 and 5-6 of the DEIS state that in the event that the East River Esplanade is closed for longer than six months, mitigation measures would be explored in consultation with Parks between the Draft and Final EIS to develop suitable measures to offset the temporary closure of public open space—please note that we have not yet discussed mitigation measures to offset the closure of the esplanade beyond six months and request that this dialogue take place before the FEIS is published. Please find our more specific comments on the DEIS below.

1-16. Open Space

The text in the second paragraph should clarify that the proposed project is decreasing the nonresidential daytime passive open space ratio from 0.154 acres per 1,000 workers, which above City Planning's guideline of 0.15 acres per 1,000 workers. to 0.139 acres per 1,000 acres, which is below City Planning's guideline.

5-3-5-4, 5.3.1. Inventory of Open Space Resources

The second paragraph should specify that the public plazas are privately-owned publicly accessible plazas. The last paragraph should include information regarding the condition and use level of each of the open spaces described.

5-7, Table 5-2 Open Space Inventory

The Table should include information regarding the condition and use level of each of the open spaces listed. Please add basketball and handball courts to the list of features for John Jay Park.

5-7, 5.5.2. Quantitative Analysis – Indirect Impacts

The text should clarify that the proposed project is decreasing the nonresidential daytime passive open space ratio from 0.154 acres per 1,000 workers, which above City Planning's guideline of 0.15 acres per 1,000 workers. to 0.139 acres per 1,000 acres, which is below City Planning's guideline.

5-9. Table 5-4 Summary of Existing, With, and Without the Proposed Project

The title of this table should be changed to "Adequacy of Open Space Resources" or another title—the current one appears to be missing some text. Additionally, City Planning's guidelines for each of the open space ratios should be added to the table.

6-2-6-3, 6.3 The Future With the Proposed Project - 2010
The text for each of the analysis periods should describe the affected features as recommended in the CEQR manual.

20-2, 20.2.2 Platform Construction
The text should mention the platform support columns and their associated impacts.

20-3, 20.5.1 Land Use
The third sentence states that the construction of the River Building may require closure during certain unsafe construction activities—Chapter 5 and it's our understanding that the esplanade will be closed during certain periods of construction!

20-4, 20.5.4 Open Space
The first sentence is inaccurate and contradicts the second sentence.

Margaret Forgione
Borough Commissioner
Manhattan Division
New York City Department of Transportation

New York, NY 10038

March 16, 2007

Ms. Amanda Burden
Chairperson
Department of City Planning
22 Reade Street
New York, NY 10007

Re: Hospital for Special Surgery Expansion Project

Dear Chair Burden,

The New York City Department of Transportation (the "Department") has had meetings with representatives from the Hospital for Special Surgery (the "Hospital") with regard to the Hospital's proposed modernization and expansion. The Hospital has explained to the staff of our Department, in detail, their proposed construction program, including methods to be employed and an estimate of the construction's duration.

We understand that stipulations regarding maintenance and protection of traffic, roadway signage, striping, and new under-deck lighting will be complied with and are acceptable to the Department's Office of Construction, Mitigation and Coordination ("OCMC").

The Department finds acceptable the Hospital's plan to support the proposed River Building with columns and foundations (grade beams and pile caps) in the East River Esplanade which are separate and independent from the columns and foundations (grade beams and pile caps) which support the ramps for the East 71st Street pedestrian bridge providing access over the FDR Drive to the East River Esplanade. We understand that the addition of a new, independent grade beam for the Esplanade ramps of the pedestrian bridge, that may require sheeting along the east side of the FDR Drive, will require temporary closures of one northbound lane of the FDR Drive. OCMC approves of the addition of the new grade beam and accepts the need for the temporary closures of one northbound lane the FDR Drive.

The Hospital has also informed the Department that biennial inspections, which have been required by the Division of Bridges, will be performed by an outside firm retained by the Hospital, which is a licensed professional engineer. This outside firm must be acceptable to the Division of Bridges. If required, the

Hospital will provide a copy of the long term contract to the Department. The design for the underside of the River Building, including lighting, clearance, and safety measures, conforms to the guidelines as set forth in the NYS Bridge Inspection Manual and a copy of the inspection report for both the River Building deck and the existing deck to the south between E. 70th and E. 71st Streets will be forwarded the Division of Bridges on a biennial basis by the outside firm.

Also, the Department approves of the project being presented to the Art Commission for their conceptual review.

Attached to this letter is a detailed statement including plans, renderings and drawings from the Hospital, responding to all the issues raised by the Department in our September 8, 2006 letter to the Department of City Planning. The Hospital's responses to these issues are either acceptable to the Department or will be resolved by the time final plans are submitted prior to construction. The Department will work closely with the Hospital prior to construction to make any necessary changes to the plan or adjust it as conditions warrant.

Very truly yours,

Margaret Forgione.

Mr. Robert Dobruskin
Director, Environmental Assessment and Review Division
Department of City Planning
22 Reade Street, Room 4E
New York, New York 10007-1216

Re: **Hospital for Special Surgery**
Block 1482, Lots 20 and 9020; Block 1483, Lots 23 and 33
05DCP061M/ 06DEPTECH190M

Dear Mr Dobruskin:

The New York City Department of Environmental Protection Bureau of Environmental Planning and Analysis (DEP) has reviewed the July 2008 Phase II Environmental Site Investigation Report (Phase II), Remedial Action Plan (RAP) and Health and Safety Plan (HASP) prepared by Ethan C. Eldon Associates, Inc. for the above referenced project. The project site is currently developed with three buildings: the Hospital for Special Surgery's Main Building, which consists of the 7-story East Wing built on a deck over the FDR Drive and the 8-story West Wing; the 8-story Caspary Research building; and the 14-story Belaire building (a mixed use residential and hospital building). It is our understanding that the applicant, the Hospital for Special Surgery, is seeking special permits, modification to special permits, and other approvals by the Department of City Planning. Under the proposed action the East Wing (Block 1482, Lot 20) would be enlarged with a three-story addition, containing 48,548 square feet for hospital use, and the West Wing would be completed with 5th through 9th floors (48,548 square feet). Additionally, a 12-story 93,929 square foot hospital building (River Building) would be constructed on a platform within the air space over the FDR Drive between East 71st Street and the mid-block between East 71st St and East 72nd Street. There would also be a new pedestrian bridge constructed at the third floor level connecting the East Wing of the existing Main Hospital to the new River Building. Portions of the existing Caspary building (Block 1483, Lot 23) and Belaire building (Block 1483, Lot 33), and East and West Wings of the Main Hospital Building would be renovated.

The Phase II results show that volatile organic compounds (VOCs), PCBs, and pesticides were not detected in the soil samples at concentrations exceeding New York State Department of Environmental Conservation (NYSDEC) Technical and Administrative Guidance Memo (TAGM) Recommended Soil Clean-up Objectives (RSCOs). Semi-volatile organic compounds (SVOCs) and metals were detected in soil samples at concentrations exceeding TAGM RSCOs and/or Eastern United States Background levels. In addition, groundwater metals were detected at concentrations exceeding NYSDEC Technical & Operational Guidance Series (TOGS).

According to the RAP, corrective measures of the site include soil excavation to a depth of approximately 35 feet for installation of the support columns. All soils within that area will be removed and disposed of in accordance with all applicable regulations. Soil removed from the site will be trucked to a landfill facility licensed to accommodate such waste. Once excavation is complete, proper capping with concrete will be performed around the support columns. Thus no uncapped areas will result from the proposed excavation activities and there would be no pathways of exposure from the development.

DEP finds the RAP and HASP acceptable. DEP has concluded that the applicant may proceed with construction, provided that a Remedial Closure Report, certified by a Professional Engineer, is submitted once all remedial requirements have been properly implemented. This report should demonstrate that all remediation activities were properly implemented.

The Final Environmental Impact Statement should include a summary Phase II investigation findings and necessary remedial measures. With the implementation of the above measures, DEP has concluded that the proposed action would not result in any significant adverse hazardous materials impacts.

If you have questions or comments, please contact Mitchell Wimbish at 718-595-4451.

Sincerely,

Terrell Estesen
Director, Office of City Project Review

Re: Soil Borings
FDR Drive at 71st Street

Borough of Manhattan

LETTER OF STIPULATIONS

This is in response to your May 12, 2008 letter and May 28, 2008 application requesting a lane closures permit for the FDR Drive southbound Service Road and FDR Drive northbound for the purpose of Soil Boring Operations.

You are required to secure a permit insofar as it affects FDR Drive at 71st Street from the Central Permit Office, 220 Church Street, New York, New York 10013, Ground Floor. The issuance of said permit will be subject to the posting of the proper insurance and bonds in accordance with the rules, regulations and requirements of the New York City Department of Transportation, and the following stipulations:

1. This permission shall be in effect as of **June 29, 2008.**

2. The Permittee is hereby advised that this permit DOES NOT grant permission to access or take borings on the esplanade adjacent to the FDR. A separate permit is required from the New York City Dept. of Parks & Recreation.

3. The Permittee MUST obtain a permit from the Overweight/Overdimension Unit of the NYCDOT prior to securing a permit from the NYCDOT Central Permit Office, for overweight/overdimension vehicles on the FDR, or certify that his vehicles are not overweight or overdimension.

4. This permission and a valid permit must be present on site when the approved work is being performed.

5. The Permittee may close the right lane in the northbound direction of the FDR Drive to traffic as follows:

a) Sunday mornings from 7:00 AM to 11:00 AM.

while maintaining two lanes open to traffic.

6. This Permission is limited to ONE SUNDAY ONLY, either June 29, 2008 or July 13, 2008, for operations utilizing a "Bob Cat" MT-52, 36" Wide, 93" long,weighting 2,500 lbs. for 3"X15' borings.

7. The closures of the exit and entrance ramps and lane closures on the FDR Drive shall conform to the attached New York State Dept. of Transportation, Region 11 Design Guide Sheets, 619-1, 2 & 3 which are an integral part of this permit

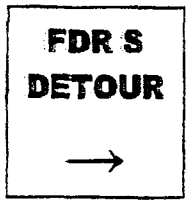
8. The Permittee may completely close the southbound FDR Service Road between 73rd St. and 71st St. and the southbound FDR Drive Exit Ramp at 73rd St. and Entrance Ramp at 71st St., on Sundays between 7:00 AM to 9:00 AM and detour traffic to 63rd Street in accordance with Stipulations #9, #10 and #11.

9. The Permittee shall place a variable message sign at the 71st Street Entrance Ramp to Southbound FDR Drive informing the traveling public of the closure date and times, seven days prior to work operations. See "A" below for screen texts. During the closure for the ramp, relocate the variable message sign and revise its text. See "B" below from screen texts.

A.	Screen #1	71 ST ENTRANCE RAMP	Screen #2	CLOSED SUN JUN 29 7AM – 9AM
B.	Screen #1	71 ST ENTRANCE RAMP	Screen #2	CLOSED USE 63 ST

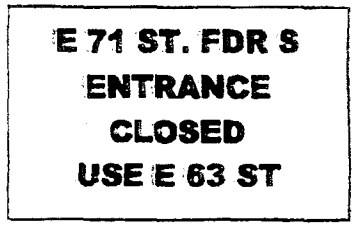
10. Letter size on street detour signs shall be 6" minimum. Signs shall be hinge or flip-type and folded when the work they pertain to is not in progress. The signs shown below shall be posted at the locations indicated on the attached detour plan. Arrows shall be oriented properly.

A.



B.

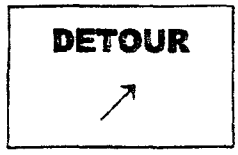
C.



11. The Permittee shall place a variable message sign at 71st Street/FDR South Service Road, informing the traveling public that the exit ramp will be closed, seven consecutive days prior to work operations with the texts shown below. During the closure of the ramp, the variable message sign shall be repositioned to be visible from the mainline. At the 63rd Street exit, place a sign with text "D".

Screen #1	73rd ST EXIT CLOSED	Screen #2	SUN JUN 29 7AM – 9AM USE 63 ST

D.



12. The Permittee shall insure that the existing pedestrian bridge foundations are not adversely affected by the boring operations.

13. Existing concrete barrier, curbs, etc. damaged during this operations shall be restored in kind. Photographs shall be taken prior to start of work.

14. The Permittee MUST provide notification detailing each week's work scheduled to the Office of Construction Mitigation and Coordination (OCMC Fax: 212-513-1146). This report shall be due the Tuesday in advance of the scheduled work.

15. Section 24 - 224, Administrative Code Variance is hereby granted for hours and days stipulated above.

16. No staging and/or storage sites are authorized or will be permitted unless approved in writing by the New York City Department of Transportation's Division of Arterial Maintenance and/or the New York City Department of Parks and Recreation (if park land is involved). Changes in the site or limits can only be made by an amendment to this permit. A detailed drawing must be submitted and will become an attachment to the amendment. A DPR Permit shall constitute written approval from the Parks Dept.

17. The Permittee agrees to assume all responsibility for injury or damages to private and/or City property caused through the operations of the permit and to save and hold harmless the City of New York and the New York City Department of Transportation from all claims and suits which may arise therefrom.

18. The Permittee shall be responsible to provide notification to the local Community Board and Borough President's Office prior to the commencement of work. Additionally notification shall be made to the local Councilman's office. Proof of notification must be filed with the OCMC prior to the commencement of work.

19. The Permittee shall notify the New York City Dept. of Transportation's Situation Room at (718-433-3340), the NYPD Traffic Management Center at (718 706-6082), the Chief of Emergency Medical Services at (Via Fax: 718 999-0497) and the local fire house **two (2) hours** prior to his/her proposed traffic lane reductions or street closings for any purpose. The Permittee shall also **immediately** notify the Situation Room & JTOC upon reopening and in the event of an emergency condition.

20. The Permittee shall adhere to all pertinent rules and regulations of the New York City Department of Transportation relative to the use and occupancy of street space, the provisions of his agreement and the performance of his work.

21. This Permit is limited to activity performed in conformance with this agreement with the New York City Department of Transportation and does not permit any other activities, which could be a hazard or distraction to the roadway user.

22. No deviation or departure from these stipulations will be permitted without the prior written approval of the New York City Department of Transportation. Requests for such modifications shall be submitted to the OCMC a minimum of ten (10) days in advance for consideration.

23. To ensure a traffic flow at all times storage of materials and equipment shall not be permitted within the traveled way of the highway. Storage areas shall be separated from the traveled way by a clear space of 30 feet minimum width, unless such storage is placed behind concrete barrier or permanently installed bridge railing.

24. Any commercial vehicles required by the Permittee's operations shall enter the FDR Drive at the nearest entrance to an individual work site and leave the FDR Drive at the nearest exit thereafter. This Permit shall constitute permission by the Commissioner of the Department of Transportation for the operation of a commercial vehicle "on a parkway" for construction purposes. The Permittee is advised that there may be **HEIGHT** and/or **WEIGHT** restrictions for structures on the Parkway/Drive. The Permittee shall assure that his/her vehicles do not exceed these restrictions.

25. Concurrent with construction work of this contract, if other projects on this and/or adjacent highways are under construction then the Permittee is to become familiar with the scheduling of those projects and schedule his activities accordingly. To facilitate the flow of traffic, the permissible work hours may be modified as deemed necessary by the New York City Department of Transportation.

26. In order to provide an adequate transition for the safe flow of traffic, when the Permittee's (or another Permittee's) work sites are in two (2) different lanes in the same direction, those work sites shall be separated by a distance of at least two (2) miles.

27. Warning signs and traffic safety devices shall be provided, installed, maintained and removed by the Permittee in accordance with the New York State Department of Transportation's "Manual of Uniform Traffic Control Devices". The Permittee shall provide the appropriate channelization for traffic approaching and leaving his/her worksite. The Permittee shall provide flagpersons, cones, barricades, etc. as required for public safety. The Permittee is responsible for the adequacy of the safety devices.

28. Operation of a crane, derrick, shovel or other similar equipment for any and all work within the streets shall be carried out by the Permittee in accordance with the Rules, Regulations and Requirements of the New York City Department of Transportation and the New York City Department of Buildings and shall comply with all provisions of the New York City Noise Control Code. In addition, if this equipment is to be placed so that any part of the load will be superimposed on the sidewalk or roadway, the Permittee must file, with the New York City Department of Transportation, Office of Construction Mitigation and Coordination, a statement by a Professional Engineer, licensed by the State of New York, certifying the following;

(a) That the sidewalk or roadway area and the supporting subgrade can safely bear the crane load. Should the condition of the sidewalk or roadway area require that the crane load be distributed over a larger area than afforded by the elements of the crane, the engineer shall furnish the full dimensioned details of the load distribution;

(b) That the Engineer has taken all necessary measures to ascertain that there is no vault or subway tunnel underneath the sidewalk area or that if a vault or subway tunnel does exist its roof is sufficiently strong to support the load to be superimposed thereof;

(c) That the sheeting or retaining walls supporting any excavations adjoining the sidewalk or roadway area required to carry a load have been examined by the Engineer and have been found to be sufficiently strong to support the area carrying the crane load. Should the crane be employed making any excavation adjacent to the crane, the Engineer shall specify the sheeting or retaining wall reinforcement required to support the crane.

29. The Department of Parks and Recreation's conditions, terms and special conditions as presented in their Permit # _____ is an integral part of this Permit.

30. Boring holes shall be back-filled with sand and compacted. In sidewalks, the last six-(6) inches of the holes shall be restored with concrete. In paved areas the last six (6) inches shall be restored with concrete and/or asphalt to match the existing. On structural decks, holes shall be restored in kind.

31. The Permittee shall comply with the Industrial Code of the State of New York Part (Rule No.) 53 relating to Construction, Excavation and Demolition Operations at or near underground facilities. Additionally, the Permittee shall similarly notify the owners of overhead cables or other electrical or street lighting equipment in the area covered by the Permit.

32. When a contractor performs work at night, the work site shall be illuminated to the satisfaction of the Engineer-In-Charge (EIC). The EIC shall be the sole judge of when illumination is required.

33. The contractor shall be responsible for identifying his/her construction signage. The identification shall include the contracting agency, the contractor's name and the contract number. This identification shall be placed on the back of all signs.

34. The Permittee shall, at it's own expense, be under absolute obligation to determine the location of and provide protection from damage or loss for all subsurface facilities and overhead structures in the permit area. In the event of any damage or loss to such subsurface facilities and overhead structures, the Permittee shall promptly replace or repair such facilities and structures, as directed by the New York City Department of Transportation or other City agency having jurisdiction thereof or by the owner thereof.

35. The City makes no representation as to the character of the fill in the streets, and voids therein, or the condition of the sidewalks. The Permittee accepts full responsibility and liability for any disturbance or damage, which may be caused to adjoining pavements, sidewalks or structures by or in connection with the permit activity. All damaged sidewalk or roadway pavements shall be restored (to the nearest full flag for sidewalks) in conformance with the Standard Specifications of the New York (City/State) Department of Transportation.

36. The Permittee's vehicles shall not exceed the posted weight and/or height restrictions for any street, highway, bridge or viaduct section that he/she must travel upon.

37. Roads used for the hauling of materials shall be kept free from debris and maintained by the Permittee and left in a condition satisfactory to the engineer-in- charge (EIC).

38. On roadways/streets where rush hour parking and/or standing regulations are posted, the Permittee shall modify his schedule to conform to those (rush hour) restrictions.

39. The Permittee shall not park his equipment or store material overnight where it is deemed to be a safety hazard to the traveling public.

40. The Permittee shall not obstruct fire hydrants, crosswalks, pedestrian ramps, fire alarm boxes, bus stops or any public utility while performing his/her work. The Permittee may not move or remove "Bus Stop" signs without prior written approval from both the New York City Department of Transportation and the New York City Transit.

41. This is not a parking permit. The Permittee shall obey all traffic laws and regulations.

42. This Permission may be amended to cover new or unforeseen conditions at the discretion of the New York City Department of Transportation, after consultation with the Permittee. The New York City Department of Transportation reserves the right to cancel this permit at any time for any valid reason.

43. This Permission (provided a valid permit is secured), unless terminated at the discretion of the New York City Department of Transportation, will expire on July 13, 2008.

Very truly yours,

Jay Jaber, P.E.

CEQR No. 05DCP061M – ULURP Nos. 060333ZSM, M910485(A)ZSM, 060440MMM, 070145ZRM, N070146CMM, N070168CMM, N070169CMM, N070170CMM – SEQRA Classification: Type I – Community District 8

LEAD AGENCY: City Planning Commission
22 Reade Street, 1W, New York, NY 10007

CONTACT PERSONS

Robert Dobruskin, Director, 212-720-3423
Environmental Assessment and Review Division
New York City Department of City Planning

The City Planning Commission, acting as lead agency, issued a Notice of Completion on April 4, 2008 for a Draft Environmental Impact Statement (DEIS) for the proposed Hospital for Special Surgery Expansion in accordance with Article 8 of the Environmental Conservation Law. A public hearing on the DEIS will be held on Wednesday, July 2, 2008 at 10 AM at 22 Reade Street, New York, New York 10007. Comments are requested on the DEIS and will be accepted until Monday, July 14, 2008.

The DEIS analyzes a proposal by Hospital for Special Surgery (HSS) to undergo a major renovation and expansion for modernization of its existing facility located between East 70th Street, East 72nd Street, York Avenue, and the Franklin Delano Roosevelt (FDR) Drive in Community Board 8 of Manhattan, New York. The proposed project is a Type I Action.

The applicant, HSS, seeks discretionary approvals, which require environmental review under the City's Environmental Quality Review (CEQR) procedures. The proposed project would require the following New York City City Planning Commission (CPC) ULURP actions: 1) Special Permit for new construction in the air space over the FDR Drive for the new River building pursuant to Zoning Resolution §74-682; 2) Modification of the existing Special Permit (C910485ZSM, approved February 24, 1992) for the East Wing of the Main Hospital pursuant to Zoning Resolution §74-682; 3) Zoning Text Amendment to ZR section 74-682 (Developments Over Streets) to modify off-street loading requirements to allow loading berths to be located anywhere within the HSS campus without regard for zoning lot lines for zoning lots adjacent to air space that has been closed, demapped and conveyed by the City to non-profit institutions in R9 or R10 districts, pursuant to State enabling legislation enacted in 1971; 4) City Map Amendment to eliminate, discontinue and close portions of the FDR Drive right-of-way and the disposition of real property related thereto, to allow for the placement of columns and footings associated with construction of the proposed River Building on the sidewalk at the west edge of the FDR Drive and east of the roadway of the FDR Drive, in the East River Esplanade; 5) Approval by the CPC for building over the FDR Drive under the 1973 Agreement, Article 15, as amended, among the City of New York, The Society of New York Hospital, The New York Society for the Relief of the Ruptured and Crippled maintaining The Hospital for Special Surgery, and The Rockefeller University; 6) Approval by the City Planning Commission under Article 13 of the 1993 Amendment, for placement of support structures on the East River Esplanade; and 7) Waterfront Revitalization Program consistency determination from the City Coastal Commission, which is the New York City Planning Commission.

The proposed project would require the following City Planning Director of the New York City Department of City Planning action: 1) Under the 1973 Agreement, Article 12B, as amended, approval by the City Planning Director of the New York City Department of City Planning for construction plans relating to construction phases, the EIS, landscape plan, lighting plan, security plan, ventilation plan, noise quality plan, and plans for closing the FDR Drive, East River Esplanade and public pedestrian bridge at East 71st Street over the FDR Drive during construction.

The proposed project would require approval by several other New York City agencies, including: 1) Approval from the New York City Department of Transportation (NYCDOT) of any construction plans as they related to closures of streets, highways or individual lanes and diversions or rerouting of traffic; 2) Approval from the New York City Art Commission for construction over a City highway (the FDR Drive); and 3) Permits from the Department of Parks and Recreation associated with construction and tree removal.

The proposed project would require the following New York State actions: 1) Certificate of Need (CON) from the New York State Department of Health (NYSDOH). The CON application was approved in November 2004 (not subject to SEQRA/CEQR); 2) Health facilities approval from the New York State Department of Health - Office of Health Systems Management (not subject to SEQRA/CEQR); and 3) Issuance of bonds by the Dormitory Authority of the State of New York (DASNY), a discretionary action subject to SEQRA/CEQR review.

The proposed project would require the following Federal actions: 1) Federal construction loan insurance guarantee is needed from the Federal Housing Administration (FHA). An application for federal insurance of the construction loan, under the FHA-241 mortgage insurance program, was filed in December 2004. FHA is an agency of the Department of Housing and Urban Development (HUD).

With discretionary approval of the proposed actions, HSS proposes the new construction of 137,869 SF of zoning floor area of new space in two locations: 50,998 SF of zoning floor area on the East/West Wing (the elevators servicing the East Wing would be constructed in the West Wing) to add the 9th through 11th floors with a roof-top mechanical equipment room in the East Wing and 86,869 SF of zoning floor area for a new 12-story River Building with a roof-top mechanical equipment room to be constructed on a platform within the air space over the FDR Drive along the north side of East 71st Street. Access to the River Building would be provided by walking through the second floor of the adjacent Caspary Building. There would also be a new pedestrian bridge constructed at the third floor level connecting the East Wing of the existing Main Hospital to the new River Building. The project site is located in an R9 zoning district, which is a general residence district allowing residential use and community facility use. The maximum floor area ratio (FAR) for an R9 district is 10.0 for community facility use and 7.52 for residential use.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary ..... **Page 3**

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports ..... **Page 4**

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. ..... **Page 8**

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 HOSPITAL FOR SPECIAL SURGERY 535 EAST 70TH ST NEW YORK, NY 10021 EDR ID #1000347793 EPA #NYD981561301
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	YES - p4
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	YES - p5
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	YES - p6
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	YES - p7
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	4

WASTE MANAGEMENT

RCRIS: Resource Conservation and Recovery Act Information
Source: EPA
Telephone: 800-424-9346
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/23/2004 — Date of Last EDR Contact: 11/24/2004
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 03/28/2005

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/01/2001 — Date of Last EDR Contact: 12/13/2004
Database Release Frequency: Biennially — Date of Next Scheduled Update: 03/14/2005

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 — Date of Last EDR Contact: 12/06/2004
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 03/07/2005

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/15/2004 — Date of Last EDR Contact: 12/07/2004
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 03/07/2005

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-564-3887
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 09/30/2004 — Date of Last EDR Contact: 02/23/2005
Database Release Frequency: Annually — Date of Next Scheduled Update: 05/09/2005

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-413-0223
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/14/2004
Date Made Active at EDR: 02/08/2005
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 12/21/2004
Elapsed ASTM Days: 49
Date of Last EDR Contact: 12/21/2004

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-413-0223
As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Date of Government Version: 12/14/2004
Database Release Frequency: Quarterly
Date of Last EDR Contact: 12/21/2004
Date of Next Scheduled Update: 03/21/2005

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 02/02/1994
Elapsed ASTM Days: 56
Date of Last EDR Contact: 02/22/2005

NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State
Source: Department of Environmental Conservation
Telephone: 518-402-9622
State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/01/2003

NY SWF/LF: Facility Register
Source: Department of Environmental Conservation
Telephone: 518-457-2051
Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
Source: Department of Environmental Conservation
Telephone: 518-402-9564
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 09/01/2002
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 02/28/2005
Date of Next Scheduled Update: 05/30/2005

NY MANIFEST: Facility and Manifest Data
Source: Department of Environmental Conservation
Telephone: 518-402-8651
Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

As an authorized representative of the above named facility, I affirm under penalty of perjury that the information displayed on this form is correct to the best of my knowledge. Additionally, I recognize that I am responsible for assuring that this facility is in compliance with all sections of 6 NYCRR Parts 612, 613 and 614, and applicable sections of 6 NYCRR Subpart 360-14 (used oil tanks only), not just those cited below:

- The facility must be re-registered if there is a transfer of ownership.
- The Department must be notified within 30 days prior to adding, replacing, reconditioning, or permanently closing a stationary tank.
- The facility must be operated in accordance with the code for storing petroleum, 6 NYCRR Part 613.
- Any new facility or substantially modified facility must comply with 6 NYCRR Part 614.
- **This certificate must be posted on the premises at all times.** Posting must be at the tank, at the entrance of the facility, or the main office where the storage tanks are located.
- Any person with knowledge of a spill, leak or discharge must report the incident to DEC within two hours (1-800-457-7362).

Existing Platform Air Volumes

Technical Memorandum

2007 Existing Condition

Air flow from the north portal of the existing platform (East 68th – East 71st Streets):

(5038 veh/hr x 406 cu ft/veh)/60 min/hr = 34,090 cfm

Air flow from the south portal of the existing platform (East 68th – East 71st Streets):

(5634 veh/hr x 406 cu ft/veh)/60 min/hr = 38,123 cfm

The total air flow onto the Esplanade can be found by using the following equation:

Air Flow = A x (VPH/3x60) x TL x Area

Where A = Leakage rate of air (33%)
VPH = Vehicles per hour
TL = Tunnel length
Area = Area of vehicle
60 = Hour to minute
3 = Number of lanes

Air flow leaking onto the Esplanade from the existing platform (750 feet in length) is:

Air flow = 0.33 x 5038 veh/hr/(3 x 60 min/hr) x 750 ft x 20.3 sq ft = 140,623 cfm

The air flow from the ventilation system of the existing platform is 120,000 cfm. The air flow rates for the existing platform are summarized in the attached table.

2010 No-Build Condition

Air flow from the north portal of the existing platform (East 68th – East 71st Streets):

(5114 veh/hr x 406 cu ft/veh)/60 min/hr = 34,605 cfm

Air flow from the south portal of the existing platform (East 68th – East 71st Streets):

(5719 veh/hr x 406 cu ft/veh)/60 min/hr = 38,699 cfm

Air flow leaking onto the Esplanade from the existing platform (750 feet in length) would be:

Air flow = 0.33 x 5114 veh/hr/(3 x 60 min/hr) x 750 ft x 20.3 sq ft = 142,745 cfm

The air flow from the ventilation system of the existing platform is 120,000 cfm. The air flow rates for the existing platform under the No-Build condition are summarized in the attached table.

2010 Build Condition

The air flow rates for the Build condition for the existing platform are the same as those for the No-Build condition and presented in the attached table.

The proposed platform (103 feet in length) would not have ventilation system. Air flow from the north portal of the proposed platform:

(5114 veh/hr x 406 cu ft/veh)/60 min/hr = 34,605 cfm

Air flow from the south portal of the proposed platform:

(6135 veh/hr x 406 cu ft/veh)/60 min/hr = 41,514 cfm

Air flow leaking onto the Esplanade from the proposed platform (103 feet in length) is:

Air flow = 0.33 x 5114 veh/hr/(3 x 60 min/hr) x 103 ft x 20.3 sq ft = 19,604 cfm

The air flow rates for the Build condition for the proposed platform are summarized in attached table.

HSS Air Flow Volumes and Emission Rates

Location	Existing - 750' Platform		No-Build/Build-750' Platform		Proposed 103' Platform	
	Air, cfm	Fraction	Air, cfm	Fraction	Air, cfm	Fraction

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

```

**MODELOPTs:
CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

- -

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

**MODELOPTs:
CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:
CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

**MODELOPTs:
CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

**MODELOPTs:
CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 48 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 48 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 58 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 58 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

  -- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for   58 Source(s).
  The Urban Population =   1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
          1. Stack-tip Downwash.
          2. Model Accounts for ELEVated Terrain Effects.
          3. Use Calms Processing Routine.
          4. Use Missing Data Processing Routine.
          5. "Upper Bound" Values for Supersquat Buildings.
          6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 58 Source(s);   1 Source Group(s); and   60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
        Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
        Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
                                                                m for Missing Hours
                                                                b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) =   0.00 ; Decay Coef. =   0.000   ; Rot. Angle =   0.0
                 Emission Units = GRAMS/SEC   ; Emission Rate Unit Factor =   0.10000E+07
                 Output Units   = MICROGRAMS/M**3

**Approximate Storage Requirements of Model =   1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

CONC   DFAULT ELEV   FLGPOL

                                  *** MODEL SETUP OPTIONS SUMMARY ***
- -

**Model Is Setup For Calculation of Average CONCentration Values.

  -- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for   58 Source(s).
  The Urban Population =   1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
          1. Stack-tip Downwash.
          2. Model Accounts for ELEVated Terrain Effects.
          3. Use Calms Processing Routine.
          4. Use Missing Data Processing Routine.
          5. "Upper Bound" Values for Supersquat Buildings.
          6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR   8-HR

**This Run Includes: 58 Source(s);   1 Source Group(s); and   60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
        Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
        Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
                                                                m for Missing Hours
                                                                b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) =   0.00 ; Decay Coef. =   0.000   ; Rot. Angle =   0.0
                 Emission Units = GRAMS/SEC   ; Emission Rate Unit Factor =   0.10000E+07
                 Output Units   = MICROGRAMS/M**3

**Approximate Storage Requirements of Model =   1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 58 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 58 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

CONC DFAULT ELEV FLGPOL

*** MODEL SETUP OPTIONS SUMMARY ***

- -

**Model Is Setup For Calculation of Average CONCentration Values.

-- DEPOSITION LOGIC --
**Model Uses NO DRY DEPLETION. DDPLETE = F
**Model Uses NO WET DEPLETION. WDPLETE = F
**NO GAS DRY DEPOSITION Data Provided.

**Model Uses URBAN Dispersion Algorithm for the SBL for 58 Source(s).
The Urban Population = 1500000.0 ; Urban Roughness Length = 1.000 m

**Model Uses Regulatory DEFAULT Options:
1. Stack-tip Downwash.
2. Model Accounts for ELEVated Terrain Effects.
3. Use Calms Processing Routine.
4. Use Missing Data Processing Routine.
5. "Upper Bound" Values for Supersquat Buildings.
6. No Exponential Decay for URBAN/Non-SO2

**Model Accepts FLAGPOLE Receptor Heights.

**Model Calculates 2 Short Term Average(s) of: 1-HR 8-HR

**This Run Includes: 58 Source(s); 1 Source Group(s); and 60 Receptor(s)

**The Model Assumes A Pollutant Type of: CO

**Model Set To Continue RUNning After the Setup Testing.

**Output Options Selected:
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs Tables of Overall Maximum Short Term Values (MAXTABLE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours
m for Missing Hours
b for Both Calm and Missing Hours

**Misc. Inputs: Base Elev. for Pot. Temp. Profile (m MSL) = 0.00 ; Decay Coef. = 0.000 ; Rot. Angle = 0.0
Emission Units = GRAMS/SEC ; Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 1.3 MB of RAM.

**Detailed Error/Message File: ERRORS.OUT

**MODELOPTs:

CEQR Garage AQ

HSS FDR Platform Dispersion Analysis (1)

Project location: 68th to 71st Streets FDR Platform
Site: 2007 Existing Condition

Step	Symbol	Inputs and Formula	Units	Rec A	Rec B	Rec C
		Emission Inputs				
1	NBVOL	1-hour autos at peak hour		5038	5038	5038
2	SBVOL	1-hour autos at peak hour		5201	5201	5201
3	SRVOL	1-hour autos at peak hour		433	433	433
5	TD	Mean travel distance	ft	750.0	750.0	750.0
6	GSF	Gross square feet of the garage area	sq. ft.	64500	64500	64500
7	T	Ambient temperature	°F	50	50	50
8	NBEF	FDR N/B emission factor	g/mile	8.31	8.31	8.31
9	SBEF	FDR S/B emission factor	g/mile	8.05	8.05	8.05
10	SREF	FDR Service Rd emission factor	g/mile	9.49	9.49	9.49
11	f	Effective emission factor (2)		0.639	0.639	0.639
12	NBEM	NBVOL*NBEF*TD/(5280*3600)	g/s	1.0556	1.0556	1.0556
13	SBEM	SBVOL*SBEF*TD/(5280*3600)	g/s	1.0556	1.0556	1.0556
14	SREM	SRVOL*SREF*TD/(5280*3600)	g/s	0.1036	0.1036	0.1036
15	Qa	1-hr emission: (NBEM+SBEM+SREN)/GSF	g/m^2-s	3.696E-04	3.696E-04	3.696E-04
		Dispersion Inputs				
16	PF	8-hr meteorological persistence factor		0.7	0.7	0.7
17	Xu	Distance from receptor to upwind edge	ft	93	757	920
18	Xd	Distance from receptor to downwind edge	ft	7	7	170
19	Xo	Virtual distance	m	19.9	19.9	19.9
20	Ru	Ru = Xu + Xo	m	48.2	250.6	300.3
21	Rd	Rd = Xd + Xo	m	22.0	22.0	71.7
22	u	wind speed	m/s	1.0	1.0	1.0
23	a	Empircal constant		0.5	0.5	0.5
24	b	Empircal constant		0.77	0.77	0.77
		Dispersion Computation				
25	χ_1	$\chi u/Q_a = 0.8[Ru^{(1-b)} - Rd^{(1-b)}]/[a(1-b)]$	ppm	0.90	3.43	2.34
26	χ_8	$\chi u/Q_a = 0.8[Ru^{(1-b)} - Rd^{(1-b)}] * PF/[a(1-b)]$	ppm	0.6	2.4	1.6

Note:
(1) This analysis follows the CEQR Technical Manual - Air Quality Appendix.
(2) Effective emission factor is fraction of total emission because 36.1% emsissions go through ventilation.
(3) χ_1 is 1-hour concentration at the receptor and χ_8 is calculated with persisitance factor.
(4) Traffic volumes are based on the highest 1-hour peak in each bound.

HSS FDR Platform Dispersion Analysis (1)

Project location: 68th to 71st Streets FDR Platform
Site: 2010 No-Build and Build Conditions

Step	Symbol	Inputs and Formula	Units	Rec A	Rec B	Rec C
		Emission Inputs				
1	NBVOL	1-hour autos at peak hour		5038	5038	5038
2	SBVOL	1-hour autos at peak hour		5201	5201	5201
3	SRVOL	1-hour autos at peak hour		433	433	433

MODEL RESULTS

REMARKS : In search of the angle corresponding to the maximum concentration, only the first angle, of the angles with same maximum concentrations, is indicated as maximum.

WIND ANGLE RANGE: 0.-360.
