Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality No-Build/105' Jets RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 4 Julian: 1
end date: 12/31/ 4 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2004
Upper Air Sta. Id & Yr = 94703 2004

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 4 and 2004.

Urban mixing heights were processed.

In 2004, Julian day 1 is a Thursday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 3.10 PPM OCCURRED AT RECEPTOR REC33.

JOB: HSS FDR Air Quality No-Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

General Information

Run start date: 1/ 1/ 0 Julian: 1
end date: 12/31/ 0 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2000
Upper Air Sta. Id & Yr = 94703 2000

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 0 and 2000.

Urban mixing heights were processed.

In 2000, Julian day 1 is a Saturday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/No Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/NO JETS

General Information

Run start date: 1/ 1/ 1 Julian: 1
end date: 12/31/ 1 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2001
Upper Air Sta. Id & Yr = 94703 2001

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 1 and 2001.

Urban mixing heights were processed.

In 2001, Julian day 1 is a Monday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 3.80 PPM OCCURRED AT RECEPTOR REC38.

JOB: HSS FDR Air Quality Build/No Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/NO JETS

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/No Jets RUN: FDR DRIVE BET E 67TH-75TH STS/NO JETS

General Information

Run start date: 1/ 1/ 2 Julian: 1
end date: 12/31/ 2 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2002
Upper Air Sta. Id & Yr = 94703 2002

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 2 and 2002.

Urban mixing heights were processed.

In 2002, Julian day 1 is a Tuesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 4.10 PPM OCCURRED AT RECEPTOR REC38.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

Program terminated normally

DATE : 7/18/ 8
TIME : 10:42:31

JOB: HSS FDR Air Quality Build/No Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/NO JETS

General Information

Run start date: 1/ 1/ 3 Julian: 1
end date: 12/31/ 3 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2003
Upper Air Sta. Id & Yr = 94703 2003

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 3 and 2003.

Urban mixing heights were processed.

In 2003, Julian day 1 is a Wednesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 4.50 PPM OCCURRED AT RECEPTOR REC34.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/No Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/NO JETS

General Information

Run start date: 1/ 1/ 4 Julian: 1
end date: 12/31/ 4 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2004
Upper Air Sta. Id & Yr = 94703 2004

CAUTION: The input years for the Run and Meteorological data
differ. The respective values are: 4 and 2004.

Urban mixing heights were processed.

In 2004, Julian day 1 is a Thursday.

The patterns from the input file
have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

MAXIMUM 8-HOUR RUNNING NONOVERLAPPING AVERAGE CONCENTRATIONS
IN PARTS PER MILLION (PPM),
INCLUDING AMBIENT BACKGROUND CONCENTRATIONS.

JOB: HSS FDR Air Quality Build/35' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

General Information

Run start date: 1/ 1/ 0 Julian: 1
end date: 12/31/ 0 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2000
Upper Air Sta. Id & Yr = 94703 2000

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 0 and 2000.

Urban mixing heights were processed.

In 2000, Julian day 1 is a Saturday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 6.60 PPM OCCURRED AT RECEPTOR REC39.

JOB: HSS FDR Air Quality Build/35' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/35' Jets RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

General Information

Run start date: 1/ 1/ 1 Julian: 1
end date: 12/31/ 1 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2001
Upper Air Sta. Id & Yr = 94703 2001

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 1 and 2001.

Urban mixing heights were processed.

In 2001, Julian day 1 is a Monday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 5.80 PPM OCCURRED AT RECEPTOR REC39.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/35' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

General Information

Run start date: 1/ 1/ 2 Julian: 1
end date: 12/31/ 2 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2002
Upper Air Sta. Id & Yr = 94703 2002

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 2 and 2002.

Urban mixing heights were processed.

In 2002, Julian day 1 is a Tuesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/35' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

General Information

Run start date: 1/ 1/ 3 Julian: 1
end date: 12/31/ 3 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2003
Upper Air Sta. Id & Yr = 94703 2003

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 3 and 2003.

Urban mixing heights were processed.

In 2003, Julian day 1 is a Wednesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 5.80 PPM OCCURRED AT RECEPTOR REC39.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/35' Jets RUN: FDR DRIVE BET E 67TH-75TH STS/35' JETS

General Information

Run start date: 1/ 1/ 4 Julian: 1
end date: 12/31/ 4 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2004
Upper Air Sta. Id & Yr = 94703 2004

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 4 and 2004.

Urban mixing heights were processed.

In 2004, Julian day 1 is a Thursday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/70' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

General Information

Run start date: 1/ 1/ 0 Julian: 1
end date: 12/31/ 0 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2000
Upper Air Sta. Id & Yr = 94703 2000

CAUTION: The input years for the Run and Meteorological data
differ. The respective values are: 0 and 2000.

Urban mixing heights were processed.

In 2000, Julian day 1 is a Saturday.

The patterns from the input file
have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 4.30 PPM OCCURRED AT RECEPTOR REC40.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/70' Jets RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

General Information

Run start date: 1/ 1/ 1 Julian: 1
end date: 12/31/ 1 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2001
Upper Air Sta. Id & Yr = 94703 2001

CAUTION: The input years for the Run and Meteorological data
differ. The respective values are: 1 and 2001.

Urban mixing heights were processed.

In 2001, Julian day 1 is a Monday.

The patterns from the input file
have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 4.10 PPM OCCURRED AT RECEPTOR REC39.

JOB: HSS FDR Air Quality Build/70' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/70' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

General Information

Run start date: 1/ 1/ 2 Julian: 1
end date: 12/31/ 2 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2002
Upper Air Sta. Id & Yr = 94703 2002

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 2 and 2002.

Urban mixing heights were processed.

In 2002, Julian day 1 is a Tuesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 4.10 PPM OCCURRED AT RECEPTOR REC39.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

Program terminated normally

DATE : 7/18/ 8
TIME : 14:35:50

JOB: HSS FDR Air Quality Build/70' Jets RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

General Information

Run start date: 1/ 1/ 3 Julian: 1
end date: 12/31/ 3 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2003
Upper Air Sta. Id & Yr = 94703 2003

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 3 and 2003.

Urban mixing heights were processed.

In 2003, Julian day 1 is a Wednesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

Program terminated normally

DATE : 7/18/ 8
TIME : 14:58:39

JOB: HSS FDR Air Quality Build/70' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/70' JETS

General Information

Run start date: 1/ 1/ 4 Julian: 1
end date: 12/31/ 4 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2004
Upper Air Sta. Id & Yr = 94703 2004

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 4 and 2004.

Urban mixing heights were processed.

In 2004, Julian day 1 is a Thursday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 0 Julian: 1
end date: 12/31/ 0 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2000
Upper Air Sta. Id & Yr = 94703 2000

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 0 and 2000.

Urban mixing heights were processed.

In 2000, Julian day 1 is a Saturday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 3.40 PPM OCCURRED AT RECEPTOR REC42.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 1 Julian: 1
end date: 12/31/ 1 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2001
Upper Air Sta. Id & Yr = 94703 2001

CAUTION: The input years for the Run and Meteorological data
differ. The respective values are: 1 and 2001.

Urban mixing heights were processed.

In 2001, Julian day 1 is a Monday.

The patterns from the input file
have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 3.20 PPM OCCURRED AT RECEPTOR REC38.

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

DATE : 7/19/ 8
TIME : 11:34:20

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 2 Julian: 1
end date: 12/31/ 2 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2002
Upper Air Sta. Id & Yr = 94703 2002

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 2 and 2002.

Urban mixing heights were processed.

In 2002, Julian day 1 is a Tuesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 3 Julian: 1
end date: 12/31/ 3 Julian: 365

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2003
Upper Air Sta. Id & Yr = 94703 2003

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 3 and 2003.

Urban mixing heights were processed.

In 2003, Julian day 1 is a Wednesday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

THE HIGHEST CONCENTRATION OF 3.80 PPM OCCURRED AT RECEPTOR REC39.

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

==========
Output Section
==========

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

Program terminated normally

DATE : 7/19/ 8
TIME : 12:14:24

JOB: HSS FDR Air Quality Build/105' Jets

RUN: FDR DRIVE BET E 67TH-75TH STS/105' JETS

General Information

Run start date: 1/ 1/ 4 Julian: 1
end date: 12/31/ 4 Julian: 366

A Tier 2 approach was used for input data preparation.

The MODE flag has been set to C for calculating CO averages.

Ambient background concentrations are included in the averages below.

Site & Meteorological Constants

VS = .0 CM/S VD = .0 CM/S Z0 = 175. CM ATIM = 60.

Met. Sfc. Sta. Id & Yr = 72503 2004
Upper Air Sta. Id & Yr = 94703 2004

CAUTION: The input years for the Run and Meteorological data differ. The respective values are: 4 and 2004.

Urban mixing heights were processed.

In 2004, Julian day 1 is a Thursday.

The patterns from the input file have been assigned as follows:

Pattern # 1 is assigned to Monday.
Pattern # 1 is assigned to Tuesday.
Pattern # 1 is assigned to Wednesday.
Pattern # 1 is assigned to Thursday.
Pattern # 1 is assigned to Friday.
Pattern # 1 is assigned to Saturday.
Pattern # 1 is assigned to Sunday.

NOTES PERTAINING TO THE REPORT

1. THE HIGHEST AVERAGE IN EACH OF THE FIRST TWO COLUMNS OF EACH TABLE BELOW ARE SUFFIXED BY AN ASTERISK (*). FOR PM OUTPUT, THERE IS ONLY ONE COLUMN AND ASTERISK FOR THE ANNUAL AVERAGE/PERIOD OF CONCERN TABLE.

2. THE NUMBERS IN PARENTHESES ARE THE JULIAN DAY AND ENDING HOUR FOR THE PRECEDING AVERAGE.

3. THE NUMBER OF CALM HOURS USED IN PRODUCING EACH AVERAGE ARE PREFIXED BY A C.

PRIMARY AVERAGES.

Re: **Hospital for Special Surgery Expansion**
CEQR No. 05DCP061M;
Comments on Draft Environmental Impact Statement

Dear Chairperson Burden and the Honorable Members of the Planning Commission:

These written comments are submitted on behalf of the residents of the Edgewater Building, located at 530 East 72nd Street (the "Edgewater"), regarding the above-referenced Draft Environmental Impact Statement ("DEIS") prepared in connection with the Hospital for Special Surgery's ("Applicant") expansion project ("Project"). They supplement the oral testimony presented to the Commission at its July 2, 2008 Public Hearing on the DEIS ("July 2nd Hearing"). Incorporated herein in their entirety, and also an integral part of the Edgewater's comments on the DEIS, are the written comments and annexed Exhibits of Ernest Hutton, of Hutton Associates ("Hutton Comments"), and John Canning of Adler Consulting ("Canning Comments").

As presented at the July 2nd Hearing, the Applicant's DEIS fails to adequately consider critical areas of environmental concerns related to the Project, as well as offers little meaningful discussion of reasonable alternatives, which could avoid or mitigate the identified adverse environmental impacts. The Edgewater's comments are offered in the spirit of cooperation, and will hopefully assist the New York City ("City") Planning Commission ("Commission") in requiring the Applicant to explore and implement design and other changes to the Project, which will achieve a positive outcome for all the affected stakeholders.

THE DEIS IS THE STARTING POINT IN THE REVIEW OF THE PROJECT AND THE DEVELOPMENT OF REASONABLE ALTERNATIVES AND MITIGATION

Initially, the Edgewater emphasizes, as the Commission must appreciate, that the State Environmental Quality Review Act ("SEQRA"), and its governing regulations, envisions the DEIS as only a "starting point" for the analysis and mitigation of this ambitious development proposal:

> The DEIS is a starting point. It is a document which should analyze the significant environmental effects of a proposed action and identify how those effects can be avoided or minimized. When a DEIS is accepted as complete, it is complete for the purposes of commencing formal review of the proposal. *The opportunities for public comment, formal review and public hearings are all part of the SEQRA process established to fill in gaps and to provide updated information and analysis in the DEIS in order that an informed decision may ultimately be made regarding the proposal.*

In re Amenia Sand & Gravel, 1997 WL 1879249, at *8 (N.Y.S. D.E.C. June 16, 1997) (Rulings of the Administrative Law Judge on Party Status and Issues) (emphasis added), appeal denied, 1997 WL 628371 (N.Y.S. D.E.C. Aug. 27, 1997) (Interim Decision of Deputy Commissioner); see also N.Y. Envtl. Conserv. L. § 8-105(8) (defining a DEIS to be "a preliminary statement prepared pursuant to [SEQRA]" (emphasis added)).

The Commission is still at a relatively early point in the SEQRA process. It is not only possible, but imperative, to meaningfully reform the Project at this stage to avoid its significant adverse impacts, including through the development of reasonable alternatives. As several members of the Commission indicated at the July 2nd Hearing, however, the Commission's ability to make "informed decisions" regarding the Project and to correct its course are hamstrung by the incomplete and inaccurate information provided to date by the Applicant.

We trust the following comments will help the Commission fill in the gaps in the present record so that the Commission can fulfill its substantive obligations herein.

THE APPLICANT MUST CONSIDER MAJOR PROJECT REVISIONS

The Applicant's analysis of its expansion Project violates the letter and the intent of the Zoning Code of the City of New York ("Zoning Code"), the Agreement among, inter alia, the City of New York and the Hospital for Special Surgery, dated March 22, 1973 ("Air Rights Agreement"), as amended, including the March 17, 1993 Amendment ("1993 Amendment"),

SEQRA, the City Environmental Quality Review ("CEQR"),[1] and the National Environmental Policy Act ("NEPA").[2]

A. Zoning Code Requirements Dictate Significant Project Revisions

1. The Project Is Not A "Good Site Plan"

Even under ordinary zoning standards, the Applicant would be compelled to reconsider its Project. As with any Special Permit application, the Commission here must consider whether "the hazards or disadvantages to the community at large through the location of such use at the particular site are outweighed by the advantages to be derived by the community from the grant of such special permit use." (Zoning Code, § 74-31(a).) As set forth herein, the current Project's adverse impacts to the community manifestly outweigh any of its advantages.

The unique legal and geographical context of the Project, however, impose even higher standards than usual. Section 74-682 of the Zoning Code establishes a unique threshold requirement for this Project. The Commission must consider whether this Project "in relation to the *existing buildings . . . in the area*, the location and distribution of new bulk result[s] in a *good site plan.*" (Emphasis added). Thus, while in the ordinary case the Commission might not be compelled to consider view corridors from private residences,[3] for example, the Code's requirement that the Commission consider the Project's relationship to "existing buildings" compels the Commission to consider the impacts that the Project would have on residents not

---

[1] As the Commission is aware, SEQRA authorizes municipalities to adopt individualized procedures to implement SEQRA. 6 N.Y.C.R.R. § 617.14(b). New York City has adopted CEQR to implement SEQRA. See 62 R.C.N.Y. § 5-01, et seq. Both processes apply to the instant matter. See Nash Metalware Co., Inc. v. Council of City of N.Y., 14 Misc.3d 1211(A), 2006 WL 3849065, at *2 (Sup. Ct. N.Y. Co 2006) (holding that "[b]ecause the rezoned land is located in the City, both SEQRA and CEQR apply to the process"). The two overlapping procedures are often referenced together in land uses cases. See, e.g., Chinese Staff & Workers Ass'n v. City of N.Y., 68 N.Y.2d 359, 509 N.Y.S.2d 499, 502 (1986). References herein to "SEQRA" encompass both SEQRA and CEQR.

[2] It also appears that the Project is subject to the regulations encompassed in the National Environmental Protection Act ("NEPA"). The Applicant is seeking federal construction loan insurance from the Federal Housing Administration ("FHA") under its FHA-241 mortgage insurance program. The authorization of such federal funds is sufficient to bring a project under the ambit of NEPA. See Wilson v. Lynn, 372 F. Supp. 934, 935 (D.C. Mass. 1974) (holding that the decision by U.S. Department of Housing and Urban Redevelopment (now the FHA's parent Agency) to make federal mortgage insurance available constituted a "'major federal action'" under NEPA). Indeed, under the FHA regulations relating to its Mortgage Insurance For Hospitals Program, funding decisions could be subject to review under NEPA. See 24 C.F.R. § 242.79. None of the potential NEPA impacts are reflected in the DEIS.

[3] See CEQR Technical Manual, at 3G-1.

only when they are using the East River Esplanade ("Esplanade"), and the 72nd Street Overlook park ("72nd Street Overlook"), but also from the perspective of their residences. This latter requirement is of special relevance here where the new bulk would be located literally inches from the Edgewater.

Moreover, the "good site plan" requirement must be read in conjunction with the overall goals established by the Zoning Code for Residence Districts and the Waterfront Area. See N.Y. Statutes § 221(b) (establishing that laws that are *in pari materia*[4] "are to be construed together as though forming part of the same statute").

The City Zoning Code establishes that the general goals of Residence Districts "include, among others, the following specific purposes":

> (b) ... To protect residential areas against . . . against offensive noise, vibration . . . glare, *and other objectionable influences.*
>
> (c) To protect residential areas, as far as possible, *against heavy traffic* and against through traffic of all kinds.
>
> (d) To protect residential areas against congestion, as far as possible, *by regulating the density of population and the bulk of buildings in relation to the land around them* and to one another, and by *providing for off-street parking spaces*; to require the provision of open space in residential areas wherever practicable; and to encourage the provision of additional open space by permitting moderately higher bulk and density with better standards of open space, in order to *open up residential areas to light and air*, to provide open areas for rest and recreation, and to *break the monotony of continuous building bulk, and thereby to provide a more desirable environment for urban living in a congested metropolitan area.*
>
> (e) To *protect the character of certain designated areas of historic and architectural interest*, where the scale of building development is important, *by limitations on the height of buildings.*
>
> (f) To *provide for access of light and air to windows and for privacy, as far as possible, by controls over the spacing and height of buildings and other structures.*

---

4 "Relating to the same matter." Black's Law Dictionary, at 795 (7th Ed. 1999).

> (g) To provide appropriate space for . . . health, and similar facilities . . . which *do not create objectionable influences.*
>
> (h) To provide freedom of architectural design, in order *to encourage the development of more attractive and economic building forms.*"
>
> (i) To promote the most desirable use of land and direction of building development in accord with a well-considered plan, to *promote stability of residential development, to protect the character of the district and its peculiar suitability for particular uses, to conserve the value of land and buildings*, and to protect the City's tax revenues.

(Zoning Code, §21-00 (emphasis added).)

As set forth herein, as presently formulated, the Project's site plan cannot meet the requisite "good site plan" standard. Section 74-682 of the City Zoning Code specifically authorizes the Commission under these circumstances to impose "conditions and safeguards" in order to "improve the quality of the development and minimize adverse effects on the character of the surrounding area." (See also Zoning Code, § 74-31(a) (requiring the Commission to consider with respect to every Special Permit application "that the adverse effects, if any, on the privacy, quiet, light and air in the neighborhood of such use will be minimized by appropriate conditions governing location of the site, design and method of operation").)

2. The Project Is Inconsistent With The City's Goals For Waterfront Areas

The City Zoning Code sets forth additional planning requirements for Waterfront Areas, which the Applicant must satisfy in its development proposal, including, among other things:

> (a) to *maintain and reestablish physical and visual public access to and along the waterfront*;
>
> (b) to promote a greater mix of uses in waterfront developments *in order to attract the public and enliven the waterfront*;
>
> (c) to create a desirable relationship between waterfront development and the water's edge, public access areas and adjoining upland communities; [and]
>
> (d) to preserve historic resources along the City's waterfront.

(Zoning Code, §61-00 (emphasis added); see generally The New Waterfront Revitalization

Program (N.Y.C. Sept. 2002).)[5]

As demonstrated herein, the Project contradicts these goals, and is inconsistent with these established waterfront policies. The proposed bulk and positioning of the Project would, inter alia, severely narrow the views of the waterfront from the area's open spaces. This narrowing would also include the complete elimination of the view of the Queensboro Bridge - a national landmark - from the 72nd Street Overlook park.

In addition, imposition of a "hulking mass" upon the waterfront would completely alter public access areas and the adjoining upland communities. Several simulations included with the Hutton Comments demonstrate the significant diminishment of access to light and air from the Esplanade and nearby open spaces due to the "canyon effect" the Project would create. (See Hutton Comments, Pages 3-4).

As such, the Project as proposed cannot be considered to produce a "desirable relationship" between it and the water's edge.

3. The Project Would Exacerbate The Applicant's Present Zoning Nonconformance

The Applicant is already contravening the City's goals for off-street loading berths, and offers no justification for exacerbating such conditions.

The City Zoning Code's stated purpose for off-street loading berths is to maintain the safety of public streets and walkways by providing space removed from these areas where large deliveries and waste removal can be made. Properly designed and used loading docks help relieve traffic congestion in residential areas, and promote and protect public health, safety and general welfare. (See Zoning Code § 25-70).

As testimony at the July 2nd Hearing established, presently, the safety of passengers and pedestrians in the area is severely compromised by the already nonconforming loading berths. Trucks servicing the Hospital for Special Surgery idle, park and make deliveries in the neighboring residential streets as they cannot access the Hospital's purportedly existing and available loading berths. The current loading berth system at the Hospital has proven to be inadequate. The surrounding community is experiencing inadequate and dangerous traffic congestion, as well as increased potential exposure to hazardous substances. These unsafe conditions would only be exacerbated if the Project is approved without increased loading areas.

Section 25-72 of the Zoning Code provides that the Project would require at least one (1) new loading berth for the new construction and enlargement. The Applicant's conclusion in Drawing Number Z-005 of the DEIS that no additional loading berths are required is

---

[5] The area at issue is also within the protected Coastal Zone Boundary. (See CEQR Technical Manual, Figure 3K-1, at 3K-3.)

disingenuous, at best. It claims that Section 25-72 of the Zoning Code would only require additional loading berths if the Project created more than 600,000 square feet of floor area. Adherence to Section 25-72 does not support this conclusion. This Section allows 10,000 square feet of floor area without a requirement for a loading berth. For the next 290,000 square feet of floor area, a building is required to provide at least one loading berth. Each additional 300,000 square feet, or fraction thereof, requires at least one additional loading berth. Drawing Number Z-005 of the EIS depicts that the Project will total 497,188 square feet of floor area. Per Section 25-72, only projects of 10,000 square feet or less may be developed without including loading berths. Any project over 10,000 square feet would require at least one (1) loading berth to be included in the new construction. The formula provided in Section 25-72 of the Zoning Code as applied to the Applicant's calculated 497,188 square feet, requires that the Project include at least two (2) loading berths in its plans.

The Applicant's impropriety with regards to the required loading berths is extended to its assertion that the Project can utilize the existing loading berths at the Hospital for Special Surgery. The Hospital's 1992 Special Permit Application C 910485 ZSM contained a self-certification that the Project would contain four (4) loading berths. The existing facility, in fact, does not contain this number of berths.[6] At best, three (3) purported loading berths exist. Of the three (3), the loading berth closest to the F.D.R. Drive on East 71st Street (Berth 1) is wholly inoperable. It is encumbered by a permanently-installed trash compactor, which is affixed to a 40 inch high concrete slab. This apparatus extends to within 2 feet of the opening of the bay. The photographs attached as Exhibits 1, 3 & 4 to the Affidavit of Dennis Alex, sworn to July 12, 2008 annexed herein ("Alex Aff.") demonstrate that a truck cannot enter more than 18 inches into the bay. Trucks have been witnessed consistently parking outside of Berth 1 to load or unload. (See Alex Aff., ¶ 18 & Exhibits 3 & 4.)

Additionally, the two claimed westernmost loading berths on East 71st Street (Berths 2 and 3) can barely be deemed to be one, let alone two, loading berths. They constitute a single bay divided by a yellow line down the center of the floor. The entire bay measures only 19 feet wide. Section 25-74 of the Zoning Resolution requires that loading berths for hospital and related facilities measure at least 33 feet in length, 12 feet in width, and maintain a vertical clearance of 12 feet. Berths 2 and 3 only measure 9 1/2 feet wide. (See Alex Aff., ¶ 22). This area cannot accommodate two trucks, and their loading activities. Consistent with the street congestion caused by Berth 1, trucks attempting to deliver or retrieve materials from the Hospital at Berths 2 and 3 routinely park in East 71st Street. (See Alex Aff., Exhibits 5 & 6.) Use of Berths 2 and 3 is a violation of the Zoning Resolution, and may not be continued, especially for the proposed increased capacity of the Project.

---

[6] In contravention of Section 74-20 of the Zoning Code, the Applicant has apparently not supplied a site plan showing the location of all the loading berths that it asserts at now at its disposal. The Applicant should produce such a site plan and indicate on such plan which facilities are served by which loading berths. It is unclear, for example, which loading berth is used for the mixed-use Belair Building.

In further violation, Berths 2 and 3 do not satisfy the Zoning Resolution's minimum depth requirements. The available depth of the bay is approximately 20 feet, not the mandated 33 feet. There exists a knee wall at the rear of the Berth, which is attached to two attached steel loading docks. It is physically impossible for trucks to park in the boundaries of the Berth because of the impediment at the rear. Consequently, trucks unloading in the Berth extend over the sidewalk, completely blocking the pedestrian sidewalk, and protruding into vehicular traffic. (See Alex Aff., ¶¶ 26-28 & Exhibits 7, 8 & 8a .)

The claimed fourth loading berth is located on East 70th Street (Berth 4). The height of the entrance to Berth 4 is a mere 8 feet, barely half of the required 12 foot vertical clearance. The entrance to Berth 4 is blocked by steel poles bolted into a steel plate. Trucks cannot enter Berth 4 due to yet another impediment installed by the Applicant. (See Alex Aff., ¶¶ 36-38 & Exhibit 15.)

Not one of the Hospital's existing loading berths meets the minimum dimension requirements for off street loading berths. Yet, the Zoning Calculations provided for the Project in Z-005 claim that no additional loading berths are required.[7]

4. It Is Unclear Whether The Applicant Has Sufficient Development Rights to Accomplish The Project

It is also unclear whether the Applicant has sufficient unused floor area to accomplish its expansion Project. Section 74-682(b) of the Zoning Code establishes that the Project can "utilize[] only unused floor area from the portion of the adjoining zoning lot not within the demapped air space." In the first instance, the Applicant has not provided any detail demonstrating where it allocated unused floor area from.

Moreover, the Applicant appears to be relying on the improper transfer of development rights from a non-permitted use it is currently operating. The Applicant's facility includes a mixed-use building named the "Belaire." The Belaire's current Certificate of Occupancy permits "Hospital Staff Apartments" from the fifth through the thirteenth floor, and "Class A Apartments" from the fourteenth floor through the thirty-second floor. While it has been verified that the top nineteen floors are used for residential purposes, the floors designated for Hospital Staff Apartments appear to be used for transient hotel purposes. (See Alex Aff., ¶¶

---

[7] Manhattan Borough President Scott Stringer conditionally approved the Hospital's application. In doing so, he recognized: "[o]ff-street loading berths serve an important role in maintaining the efficient functioning of a city. They serve to reduce or eliminate interruption of pedestrian and vehicular traffic flow, and it is sound planning policy to protect the fee flow of traffic." He noted that HSS has four loading berths, but there is no indication that he considered the dimensions or the zoning requirements of the berths.

51-58.). Section 12-10 of the Zoning Code defines "Transient Hotel" as a building or part of a building in which:

> (a) living or sleeping accommodations are used primarily for transient occupancy, and may be rented on a daily basis;
>
> (b) one or more common entrances serve all such living or sleeping units; and
>
> (c) twenty-four hour desk service is provided, in addition to one or more of the following services: housekeeping, telephone, or bellhop service, or the furnishing or laundering of linens.

Transient Hotels are not permitted in the R9 District as-of-right or by special permit. As a non-permitted use, the Belaire does not, or at least the hotel portions of the building cannot, possess any development rights. The Zoning Calculations provided in the DEIS at Z-005 claim that the Project will receive 34,595.70 square feet of available development rights from the Belaire. The Applicant has crafted this figure by inappropriately classifying the Belaire as a Community Facility. The floor area ratio (FAR) of 10 that is utilized by the Applicant is reserved for Community Facility uses. Here, the building is, at best, mixed residential and non-conforming uses – not a "community facility." The Project does not have 34,595.70 square feet of development rights available from the Belaire.

B. The Air Rights Agreement Also Compels Project Redesign

The Project's proposed development over the FDR Drive could adversely impact the Esplanade and other area proximate sensitive land uses, such as the park at the end of East 72nd Overlook. The Air Rights Agreement flatly prohibits construction that "would penetrate, occupy, or obstruct" the wider of either: (a) the area between the eastern most edge of the FDR and the pierhead-bulkhead line; or (b) within twenty-five feet (25') west of the pierhead-bulkhead line. (1993 Amendment, ¶ 13.)

The Agreement creates a narrow exception, which the Applicant seeks to apply. The Agreement allows for "necessary and appropriate" support columns "*only if*" the Commission can find that the resulting "building area *shall not substantially*:

> (i) interfere with pedestrian use and enjoyment of the FDR Drive Existing Walkway,
>
> (ii) restrict light and air to the FDR Drive Existing Walkway,
>
> (iii) detract from the visual quality of the waterfront area, and

(iv) impede vehicular use of the FDR Drive, East 63rd, East 70th or East 71st Streets."

(Id. (emphasis added).)

Similarly, pursuant to Article 15 of the Air Rights Agreement, the Commission can only allow for the development of the subject area, provided, that it can find that "such construction will not substantially interfere with the vehicular and pedestrian use of the FDR Drive or the Streets," and that such construction shall otherwise "be in accordance with the provisions of this agreement." (See Air Rights Agreement, Article 15 & Exhibit H to the 1973 Agreement, ¶ e.)

As detailed below, the present Project design would produce numerous unmitigated adverse impacts that prevent the Commission from making the aforementioned necessary findings under the Air Rights Agreement.[8]

C. SEQRA and CEQR Mandate
A Meaningful Discussion Of Project Alternatives

As the Commission surely is aware, the search for possible alternatives to a proposed action has "been characterized as the 'heart of the SEQRA process." Shawangunk Mountain Envtl. Ass'n v. Planning Bd. of Town of Gardiner, 157 A.D.2d 273, 557 N.Y.S.2d 495, 497 (3d Dept. 1990), quoting Marsh, "Symposium on the New York State Environmental Quality Review Act Introduction--SEQRA's Scope and Objectives", 46 Alb L Rev 1097, 1111 (1982); see also 40 C.F.R. § 1502.14 (establishing that, under NEPA, the alternatives section is "the heart of the environmental impact statement"). SEQRA requires an applicant to describe and evaluate "the range of reasonable alternatives to the action that are feasible, considering the objectives and capabilities of the project sponsor." 6 N.Y.C.R.R. § 617.9(b)(5)(v).

The Commission here has independent review authority. It is not bound by the Applicant's unwillingness to consider reasonable alternatives. As the State Department of Environmental Conservation ("DEC") has made clear in its primary guidance document on the implementation of SEQRA, the Commission is charged with making an independent determination of whether the Applicant's objectives are reasonable, particularly in view of practicable alternatives:

---

[8] The Commission should also question whether the "V" shaped support columns at base level, and other purported support columns, are "necessary and appropriate," rather than being cosmetic elements. The "V" shaped columns, for example, would be far more intrusive that straight vertical columns.

> Why must alternatives be considered when the project sponsor has already decided what is the best project?
>
> The project sponsor develops the proposed action based on its goals and objectives. These goals and objectives are not always shared by the reviewing agencies and the public. Requiring that reasonable alternatives be discussed allows a reviewer to independently determine if the proposed action is, in fact, the best project when the environmental factors have been considered.

SEQR Handbook at 64 (DEC 1992)(emphasis added).[9]

Of special relevance to the subject proposal, "[t]he need to discuss alternatives depend[s] on the significance of the environmental impacts associated with the proposed action: The greater the impacts, the greater the need to discuss alternatives." SEQR Handbook at 64. SEQRA specifically contemplates that the "range of alternatives" to be considered includes differences in the "scale or magnitude" of the project. 6 N.Y.C.R.R. § 617.9(b)(5)(v)('c').

> The SEQRA Handbook goes on to explain that:
>
> Consideration of alternative scale or magnitude may be reasonable under the following circumstances:
>
> - The impacts of the action can be avoided or reduced by a change in project size.

---

[9] In a seminal case under the federal analogue to SEQRA, the National Environmental Policy Act ("NEPA"), Calvert Cliffs' Coordinating Committee, Inc. v. United States Atomic Energy Commission, 449 F.2d 1109, 1114 (D.C. Cir. 1971), the United States Court of Appeals explained that the alternatives requirement ensures that agencies weigh the environmental and economic pros and cons of different options for a particular project, before deciding which option to pursue. The Court specifically stated that the alternatives requirement is expansive, and critical to the underlying intent of NEPA, as it:

> seeks to ensure that each agency decision maker has before him and takes into proper account all possible approaches to a particular action (including total abandonment of the project) which would alter the environmental impact and the cost-benefit balance. Only in that fashion is it likely that the most intelligent, optimally beneficial decision will ultimately be made.

Id.; see also Dubois v. U.S. Dept. of Agriculture, 102 F.3d 1273, 1287 (1st Cir. 1996) ("*The 'existence of a viable but unexamined alternative renders an environmental impact statement inadequate'*." (emphasis added)).

- The change in project size does not reduce the project to the point where it will no longer serve its intended function (for example: a communication tower may require a minimum height for effective operation).

- The reduction in project may decrease potential profit but it does not make the project infeasible.

Id. at 65 (emphasis added).

The City's official guidance document for the implementation of CEQR, the CEQR Technical Manual, similarly indicates that the Applicant should be compelled to give far more serious consideration of alternatives than it has to date. The CEQR Technical Manual provides that an alternative design or configuration must be considered where a project, such as this one, would have adverse visual, bulk and other potentially significant impacts:

> An alternative design or configuration should be considered for actions where potential adverse impacts are related to the proposed action's bulk, visual character, contextual or direct effect on historic or other environmentally sensitive resources, or its physical relationship to another use . . . .

(CEQR Technical Manual, at 3U-1 to 3U-2.)

Particularly apt to the instant Application, the Manual recommends altering the design and configuration as required alternatives:

> changing a building footprint to reduce interference with a historic building . . . .[and] altering design elements such as setbacks, materials, and fenestration to relate the building(s) to the surrounding area.

(Id. at 3U-2; see also id. at 3E-20 (noting that "[a]lterntaives that reduce or eliminate shadow impacts include [r]eorientation of building bulk to avoid shadow increments on sensitive areas of open space"); id. at 3F-17 (establishing that "[r]edesign . . . is the preferred mitigation measure for significant adverse impacts on historic resources . . . When a proposed action will alter the setting of an architectural resource that is not actually physically affected, appropriate mitigation involves redesign of the proposal to be more compatible with the resource. . . . Possibilities include rearranging the proposed building's massing so that important views are not blocked . . . Particular attention to the fenestration, setbacks, rooflines, and massing of the new structure as well as other aspects of design is advised."); id. at 3G-7 ("Partial mitigation for visual impacts related to land use changes would be to alter some design elements. . . . The major way to reduce

or eliminate impacts on visual resources is through design or site configuration alternatives . . . For Visual character impacts, the project alternatives usually include a different physical design that would not result in the same impacts as the action as proposed. These physical changes may included a reduction in size, major alterations to the site plan, [or] changing the orientation of buildings . . . "); id. at 3K-11 (noting that alternatives to avoid waterfront impacts include "alternative design [such as] different building heights or site location to avoid a visual impact").).

The Applicant's superficial alternatives discussion, respectfully, cannot meet CEQR requirements. "When the alternatives are selected, each must be described adequately so its impacts can be considered." (Id. at 3U-3.) In particular, alternatives must:

> be described using text and graphics including such information as program elements and square footages, site plans, bulk drawings, elevations, axonometric drawings, discretionary actions and approvals additional to or different from those of the proposed action that might be required to implement the alternative, and any other information pertinent to its comparison with the proposed action.

(Id. at 3U-3.) While certainly "alternatives need not be assessed to the same level of detail as that of the proposed action," nevertheless, "it is usually appropriate to quantify the impact of the alternative, so that a comparison can be meaningful." (Id. at 3U-3); see also MYC New York Marina, L.L.C. v. Town Bd. of East Hampton, 17 Misc.3d 751, 842 N.Y.S.2d 899, 906 (Sup. Ct. Suffolk Co. 2007) ("To satisfy the 'hard look' test, the discussion of alternatives must be 'at a level of detail sufficient to permit a comparative assessment of the alternative discussed'" (citation omitted)).

Moreover, of special relevance, where, as here, there is an inconsistency with the City's Local Waterfront Revitalization Program ("LWRP") policies, "the lead agency *must* be able to certify that the following four requirements are satisfied to approve an action":

- *No reasonable alternatives exist* that would permit the action to be taken in a manner that would not substantially hinder the achievement of the policy;
- The action would minimize all adverse effects related to the policy inconsistency to the maximum extent practicable;
- The action would advance one or more of the other coastal policies; and
- The action would result in an overriding local public benefit.

19 N.Y.C.R.R. § 600.4; see also New Waterfront Revitalization Program at 8; CEQR Technical Manual at 3K-5. "According to the LWRP, the City cannot go proceed with an action if there is an LWRP inconsistency and the lead agency cannot make those findings." (CEQR Technical Manual at 3K-5.) The dearth of discussion in the DEIS about "reasonable alternatives" prevents the Commission from making the required certification.

As explained in greater detail below, the Project presents numerous impacts that are categorized as "significant" in various technical areas, each of which require the Applicant to engage in a meaningful consideration of design or configuration alterations. Such impact areas include traffic, urban design and visual resources, the waterfront, shadows, historic resources and neighborhood character.

The Commission, respectfully, must mandate that the Applicant seriously consider alternative sites or locations for its proposed Expansion Project. The CEQR Technical Manual indicates that alternative sites must be considered "where identified significant impacts could be reduced or eliminated on a different site without compromising project objectives." (Id. at 3U-2; see also id. at 3G-7 (discussing alternative site analysis gear to producing a project "that would not block important view corridors").)

D. The DEIS Is Flawed In Other Technical Areas

The Applicant's flawed environmental analysis, as discussed below and in the attached comments, respectfully prevents the Commission and the other Involved Agencies from having a rational basis upon which to make their individual Findings. See Sierra Club v. United States Army Corps of Engineers, 701 F.2d 1011, 1034 (2d Cir. 1983) ("Only if [a comprehensive EIS] is forthcoming can the public be appropriately informed and have any confidence that the decision makers have in fact considered the relevant factors and not merely swept difficult problems under the rug.").

Perhaps even more importantly, as described herein, the Project's significant adverse impacts demonstrate that it is not a "good site plan," as required by Zoning Code Section 74-682, is inconsistent with the City's LWRP polices, and prevents the Commission from making the requisite findings under the Air Rights Agreement and other statutes and corresponding regulations, which are also necessary for Project approval.

A. Traffic Impacts

Ultimately, the Applicant's DEIS cannot obscure the fact that the Project would clearly "substantially interfere with" and "impede" vehicular and pedestrian use of the FDR Drive and the local road network, including, but not limited to, East 71st Street. (See Air Rights Agreement, Article 15 & Exhibit H to the 1973 Agreement, ¶ e & 1993 Amendment, ¶ 13.) Indeed, the Project's failure "[t]o protect residential areas, as far as possible, *against heavy traffic* and against through traffic of all kinds" is prima facie proof that it is not "a good site plan." (See Zoning Code, §§21-00 & 74-682.)

To begin with, the DEIS's conclusion that the Project will produce "no significant traffic impacts, and therefore, no mitigation measures are warranted," does not comport with the existing conditions in the study area surveyed by the Applicants. The methodology employed by the Applicant to reach this conclusion is inconsistent with the technical guidelines set forth in the CEQR Technical Manual. As the Canning Comments make clear, the DEIS' analyses of level of service, trip generation and vehicular and traffic safety are critically flawed.

The CEQR Technical Manual identifies four "major technical areas" that any sufficient traffic analysis must evaluate. (CEQR Technical Manual, at 3O-1). They include: (i) traffic flow and operating conditions, where an evaluation of "the sufficiency of street and highway elements to adequately process the proposed action's expected traffic flow" is required, (ii) goods delivery, "including the capacity of the proposed loading areas to accommodate the expected volume of deliveries," and (iii) vehicular and traffic safety, which should identify impact on "existing high-accident locations or at locations that may become unsafe due to the proposed action." (Id.).

In performing such analyses, "[i]t is important that the existing conditions be defined precisely since this is a reflection of activity levels that actually occur today, and since existing conditions will serve as the baseline for future conditions analyses that require at lease some projection." (Id. at 3O-5). It is clear that the DEIS's definition of existing conditions are anything but precise. This calls into question the reliability of its conclusion that no mitigation measures are warranted.

The DEIS's analysis of traffic flow and operating conditions contains numerous inaccuracies as to the existing traffic operating and safety conditions in the study area. The DEIS claims traffic at the 71st Street FDR Drive Service Road, for example, runs at the optimal Level of Service ("LOS") A, with little or no delay. The photos supplied by Mr. Canning show an intersection operating at a LOS E and F, and demonstrate a considerably different reality. (See Canning Comments, Exhibits 1 and 2). Nor does the DEIS's analyses of travel on York Avenue reflect the testimony of residents who use this street on a daily basis. (See id. at Pages 2-3). Moreover, as the Canning Comments state, the DEIS's conclusion that not a single accident has occurred on the FDR Service Road is completely at odds with data collected for the surrounding intersections. Such inaccuracies between the DEIS's proposed "existing conditions" and the *actual* existing conditions on-site can hardly be considered "precise" under the CEQR Technical Manual standards.

The DEIS also fails to adequately predict future events that will impact existing conditions. If the Mayor's Congestion Pricing Plan is implemented, for example, the 71st Street exit off the FDR will experience a significant increase in traffic as the last exit in Manhattan before the tolls. See Canning Comments at Page 4. In addition, the DEIS appears to exclude in its baseline calculations the increased traffic and delivery activities of certain "as-of-right" renovations to be conducted simultaneously with the Project. (Id.).

The DEIS similarly fails to identify and examine several significant impediments

to the traffic flow that will exacerbate the existing problems in the area. Foremost is the "queue spillback" created by the insufficient size and placement of the Hospital's loading bays. (See id. at Page 4-5). Despite being a "major impact area" under CEQR, the current and potential future impacts of the Hospital's goods delivery system are unexamined in the DEIS.

Finally, the Canning Comments raise serious concerns that these conditions will increase the number of accidents in the vicinity of the FDR Drive, as well as the 71st Street FDR Drive Service Road. (See id. at Page 4). This includes a Project design that will create a "critical decision zone" under darkness on the Service Road, diminish the ability of the Service Road to function as a safe transition between a high-speed roadway and a low-speed roadway, and add enough traffic on the Service Road to back up on to the mainline of the FDR Drive.

The above establishes that conclusions contained in the DEIS are not supported by an accurate baseline to evaluate the level of impacts. Without an accurate baseline, we respectfully submit that the Commission is unable, in the first instance, to make a reasoned determination on the significance of the impacts identified in the DEIS. Moreover, the Canning Comments reveal that the Applicant has failed to identify and mitigate most, if not all, of the "major impact areas" identified by the CEQR Technical Manual.

As such, the Commission cannot accept the DEIS' unsubstantiated assertion that traffic mitigation measures are unnecessary. Moreover, respectfully, the Commission cannot approve the Project in its present form.

B. Urban Design and Visual Resources

The Project's location and bulk also clearly adversely impact "the land around" the Project site, including "existing buildings . . . in the area," by blocking "light and air," instituting a "monotony of continuous building bulk," and causing other "objectionable influences." (See Zoning Code, §§21-00 & 74-682.)

The DEIS trivializes these impacts. It summarily concludes that the proposed 12-story building over the FDR will only "partially" block views from the Esplanade, as well as only "block an additional increment of the view" from the 72nd Street Overlook park. (DEIS at 8-3). The DEIS likewise gives short shrift to the 1993 Amendment's required showing that the Project not substantially restrict light and air to the Esplanade or detract from the visual quality of the waterfront. Respectfully, the Commission should not accept the two sentence recitation of the standards as a sufficient showing that the provisions of the 1993 Amendment will be met.

Clearly, the Air Rights Agreement was meant to preserve public views of the waterfront from the numerous open spaces on 72nd Street. Utilizing the same views included in the DEIS, the Hutton Comments demonstrate that a dramatic loss of access to light and air would be caused by the 12-story addition to the waterfront. The result will be a "canyon effect" where the amount of sky that would provide ambient light would disappear. (See Hutton Comments at Page 3).

Moreover, the CEQR Technical Manual recognizes, "[a]n area's visual resources are its unique or important public view corridors, vistas, or natural or built features." (CEQR

Technical Manual, at 3G-1.) Thus, a "project [that] would significantly and permanently obstruct important views or vistas" adversely impacts visual resources. (Id. at 3G-6.) Where such impacts are identified, the Applicant, once again, must consider "design or site configuration alternatives" such as "a reduction in size, major alterations to the site plan, changing the orientation of buildings, or alterations to proposed street mappings or demappings." (Id. at 3G-7).

It is also well-settled law that aesthetics and potential impacts upon community characteristics are a "proper area of concern in [the SEQRA] balancing analysis" when determining if a project or activity will have a significant adverse effect. See generally, Matter of WEOK Broadcasting Corp. v. Planning Board, 79 N.Y.2d 373, 583 N.Y.S.2d 170 (1992) (indicating that consideration of "negative aesthetic impacts," such as the visual effect of radio transmission towers on the local community, can be an important factor in SEQRA review and can constitute a sufficient basis upon which to base SEQRA determinations); see also Scenic Hudson v. Town of Fishkill Town Board, 258 A.D.2d 654, 685 N.Y.S.2d 777 (2d Dept. 1999) (annulling Town Board rezoning, and indicating that EIS should have been prepared where proposed action would have a "significant negative impact on the region's visual environment," air quality and public health and safety, among other things); East Coast Development Co. v. Kay, 174 Misc.2d 430, 667 N.Y.S.2d 182 (Sup. Ct. Tompkins Co. 1996)(upholding City Planning Board's finding that a significant visual impact would occur by allowing petitioner to develop Wal-Mart store that would obstruct view of Cayuga Valley from a the main view station on local hiking trail).

According to the Hutton Comments, a serious examination of horizontal and vertical setbacks and shifts in bulk should be considered by the Applicant as mitigation. (See Hutton Comments, at Pages 4-5). Indeed, during the July 2nd Hearing, Commissioner Cantor echoed this same sentiment, calling for an evaluation of alternative locations to mitigate visual impacts. Incredibly, no serious consideration of alternative designs that would preserve light and air and the quality of the waterfront appears in the DEIS.

C. Waterfront

The Project also, respectfully, must be rejected in its present form because it is inconsistent with LWRP policies, including, but not limited to:

- does not "[p]reserve, protect and maintain existing physical, visual and recreational access to the waterfront;"
- impedes "visual access to coastal lands, waters and open space;"
- does not "minimize reduction of existing visual access caused by scale, design and location"
- does not preserve "the public interest in and use of lands and waters held in public trust by the state and city;"

- would impair "manmade scenic resources in the coastal area;"
- is incompatible with "existing scenic elements, such as landmarks;"
- fails to "[p]rotect designated historic resources."

(New Waterfront Revitalization Program 25-20; see also CEQR Technical Manual at 3K-15 to 3K-18, see also id. at 3G-6 (establishing that an adverse impact occurs "if the proposed action would significantly affect the public's enjoyment of waterfront views").

As indicated in the Hutton Comments, the Project would be inconsistent with LWRP policies, including, its adverse impacts to the Esplanade, 72nd Street Overlook park and other open spaces, as well as its adverse impacts on the scenic quality of the area and the public enjoyment of the landmark Queensborough Bridge.

D. Historic Resources

The lack of good site planning is further evidenced by the Applicant's failure to "protect the character of certain designated areas of historic and architectural interest." (See Zoning Code, §§21-00 & 74-682.)

According to the DEIS, the Project would not impact the public's ability to view the Queensboro Bridge,[10] as the "view is already obstructed by the [existing] East Wing." (DEIS at 8-4). This one sentence analysis is woefully inadequate to address the substantial obstruction of the public's view of this recognized historic resource that would result from the Project.

The CEQR Technical Manual establishes that adverse impacts include the "[e]limination or screening of publicly accessible views of [an architectural] resource." (CEQR Technical Manual, at 3F-15.) Notably, the Manual gives as an example:

> if a resource is located along the waterfront and is visible across the water, tall new buildings proposed between the architectural resource and the water that would block views of the resource could result in an adverse impact.

(Id.; see also id. at 3G-6 (establishing that an adverse impact occurs "if the proposed action would significantly affect the visual enjoyment of an historic resource (e.g., if the construction of a new building would impair the public's ability to view [a] historic resource").[11]

---

[10] The Queensboro Bridge has been listed on the National Register of Historic Places since 1978 for its architectural and engineering significance. See National Register of Historical Places, available at www.nationalregisterofhistoricplaces.com.

[11] The CEQR Technical Manual's standards are consistent with the DEC's internal policies for evaluating visual impacts. According to the DEC, "[s]ignificant aesthetic impacts are those that may cause a diminishment of the public enjoyment and appreciation of an inventoried resource, or one that impairs the character or quality of such a place." DEC Program Policy, Assessing and Mitigating Visual Impacts, dated 7/31/2000. Indeed, "it is the burden of the applicant to provide clear and convincing

The simulations contained in the Hutton Comments establish that the "hulking mass" of the proposed 12-story River Building would significantly impair the public's ability to view the Queensboro Bridge from the 72nd Street Overlook park. (See Hutton Comments at Page 4). These simulations contradict the DEIS' statement that views of this historic site will not be affected by the Project since views of the bridge are "already obstructed by the [existing] East Wing" building. As the Hutton's before-and-after visual analysis clearly illustrates, the existing view of the Bridge would be effectively eliminated.

E. Neighborhood Character

The Project also contravenes the most basic goal of Residence Districts of "provid[ing] a more desirable environment for urban living in a congested metropolitan area." (Zoning Code, § 21-00). The DEIS blithely concludes that the Project would "support the existing neighborhood character by supporting the major land use of the area." (DEIS at 9-5). Incredulously, the DEIS continues, "most of the factors that create the character of the neighborhood would be supported by the proposed project, while others would not be affected. Therefore the future with the proposed project would not change the character of the neighborhood." (Id. at 9-6).

The CEQR Technical Manual establishes that if "one of the defining features of the neighborhood's character would be significantly affected, then a significant impact would occur." (CEQR Technical Manual, at 3H-4.)[12] Alternatively, an action can result in a significant adverse impact on neighborhood character if it has moderate impacts on a number of defining features. (Id.). Also of particular relevance to this case, the CEQR Technical Manual establishes "a significant impact on neighborhood character could occur because of an increase in traffic on area roadways, even if that increase did not constitute a significant traffic impact." (Id. at 3H-4).

The Technical Manual recognizes that mitigations or alternatives intended to avoid adverse impacts in other technical areas may, but do not always, result in the avoidance of neighborhood character impacts. (Id. at 3H-4 to 3H-5). Thus, for example, signal timing adjustments might avoid a technical traffic impact, but not the related adverse impact increased traffic would have on community character. (Id. at 3H-5). In those circumstances, the Lead Agency must consider other mitigations or alternatives to directly address the neighborhood

---

evidence that the proposed design will not diminish the public enjoyment of the listed aesthetic resource." Id.

12 See also Chinese Staff and Workers Ass'n v. City of New York, 68 N.Y.2d 359, 509 N.Y.S.2d 499, 503 (1986) ("the impact that a project may have on population patterns or existing community character, with or without a separate impact on the physical environment, is a relevant concern in an environmental analysis since the [SEQRA] statute includes these concerns as elements of the environment"); N.Y. Envtl. Conserv. Law § 8-0105(6) (defining "environment" as "physical conditions which will be affected by a proposed action, including . . . existing patterns of population concentration, distribution, or growth, and existing community or neighborhood character").

character impacts.[13]

New York has long recognized that impacts upon community character are within the purview of SEQRA. See Chinese Staff & Workers Ass'n v. City of New York, 68 N.Y.2d 359, 509 N.Y.S.2d 499, 503 (1986)("[t]he potential acceleration of the displacement of local residents and businesses is a secondary long-term effect on population patterns, community goals and neighborhood character such that [SEQRA] requires these impacts on the environment to be considered in an environmental analysis"); see also Wal-Mart Stores, Inc v. Planning Board of North Elba, 238 A.D.2d 93, 668 N.Y.S.2d 774 (3d Dept. 1998)(upholding a local planning board's refusal to issue a conditional use permit and site plan approval solely on the basis of negative visual impacts and the anticipated effect of such visual impacts upon the "general character and ambiance of the community").

As is now abundantly clear, the Project would create numerous impacts on traffic, visual and historical resources, and the overall urban design, which would significantly alter the neighborhood character if approved as currently designed. Each impact taken individually undermines the Applicant's assertion that the Project will support this character. More important, however, is the devastating cumulative affect these impacts will have on the neighborhood if left unmitigated.

It must not be forgotten that the Applicant is proposing to squeeze a large, "hulking mass" of a commercial building within *inches* of a residential building in a residential district. The Edgewater, a building that reflects the core principles of the City's residential zoning goals, was built well before the Hospitals began building in the area. All the residents of the area and the Edgewater residents in particular, are entitled to more than a one sentence, conclusory statement that a major expansion project will not change the neighborhood character.

F. Shadows

The DEIS incorrectly asserts that the Project does not cause any significant adverse shadow impacts. As the CEQR Technical Manual states, "[t]here may be situations where a very small loss of sunlight is important (for example, in areas where older people sit)." (CEQR Technical Manual, at 3E-19.) The Project "would cover a larger area of the East River Esplanade" in shadows, whose duration would vary, depending upon the time of year. (DEIS at 6-3.) The Esplanade is a highly used public park, where the loss of sunlight would be felt

---

[13] Mitigations or alternatives intended to avoid neighborhood character impacts should not necessarily be discounted because they themselves might result in adverse impacts to other technical areas. The Lead Agency should instead consider how any impacts potentially caused by the neighborhood character impact mitigation can be mitigated. Thus, for example, re-routing traffic to avoid neighborhood character impacts could result in a traffic impact at a new intersection. In those circumstances, the Lead Agency must consider how that new traffic impact can be mitigated. (See CEQR Technical Manual at 3H-5.)

intensely. The Project would also cause shadow impacts over some portion of the 72nd Street Overlook at certain times of years. (Id.) The 72nd Street Overlook is used by the elderly, physically frail individuals, and many others for who even a purportedly "small loss of sunlight" would be a significant adverse impact. (See CEQR Technical Manual, at 3E-19.)

G Hazardous Materials

The DEIS appears to contemplate the improper deferral of potential subsurface hazardous waste issues on the site. It is well settled that by "deferring resolution" of potential environmental issues until after the conclusion of the SEQRA process, an agency "fail[s] to take the requisite hard look at area[s] of environmental concern." Penfield Panorama Area Cmty., Inc. v. Town of Penfield Planning Bd., 253 A.D.2d 342, 688 N.Y.S.2d 848, 854 (4th Dept. 1999) (annulling Planning Board's approval for, inter alia, deferring resolution of hazardous waste remediation issue).[14]

The DEIS indicates that the City Department of Environmental Protection ("DEP") required, by letter dated August 22, 2007, that the Applicant conduct Phase II testing, including, in connection with impacts related to the proposed support beam on the Esplanade. (DEIS at 11-5). Rather than conducting the requisite testing prior to the completion of the DEIS, so that the results and any necessary mitigation measures could be subject to public review, the Applicant states that "[b]etween the DEIS and FEIS, [the Applicant] will use best and good faith efforts to seek and obtain all necessary approvals . . . to perform the Phase II testing on . . . the East River Esplanade and within the sidewalk on the west side of the FDR Drive." (Id.) The Applicant then essentially concedes that it plans on deferring the resolution of the hazardous waste issue until after the close of the instant SEQRA process, stating:

> If the results of the Phase II testing reveal the presence of contamination, HSS will identify measures necessary to avoid any potential for significant adverse impacts with respect to hazardous materials and public health. If contaminated soil is found, the appropriate measures would be determined.

(Id.) This approach is "improper because it shields the remediation plan from public scrutiny" and otherwise evinces a "fail[ure] to take the requisite hard look at an area of environmental

---

14 See also In re AC I Shore Road, LLC v. Inc. Village of Great Neck, 43 A.D.3d 439, 422, 841 N.Y.S.2d 344, 347 (2d Dept. 2007), leave to appeal denied, (March 13, 2008) (holding that agency failed to take the requisite "hard look" where the "DGEIS and SEQRA findings statement simply concluded that the petitioner's property will be remediated in accordance with applicable residential standards and requirements, without examining whether the area can be remediated to residential standards"); Silvercup Studios Inc. v. Power Auth. of the State of New York, 285 A.D.2d 598, 729 N.Y.S.2d 47, 49 (2d Dept. 2001) (vacating negative declaration that "was issued before much of the documentation concerning [critical] areas of environmental concern was submitted to" the reviewing agency)

concern." Penfield Panorama, 688 N.Y.S.2d at 854.

H. Construction Impacts/Open Space

As set forth below, the Edgewater questions whether the Applicant can close the Esplanade to construct the Project without State Legislative approval. In any event, the DEIS fails to seriously consider the adverse impacts of this alienation.

Notwithstanding the fact that Project construction would block north-south passage along the Esplanade for an indeterminate amount of time, the DEIS states that Project construction "would not disrupt the Esplanade's or any other of the neighborhood's open space in terms of access or viability." (DEIS at 20-4.) Yet,"[p]ortions of the Esplanade will be temporarily closed during construction." (Id.) In particular, the Esplanade would be effectively severed. (See id. ("During installation of the columns and while the footings are being dug, the Esplanade will be closed between approximately E. 70th Street to just past the midblock point between E. 71st Street and E. 72nd Street.").)

The Applicant misleadingly states that it "will make every effort to limit the closure [of the Esplanade] to four to six months and would remain open on weekends when possible." (DEIS at 20-4.) In the first instance, the DEIS fails to offer any serious mitigation measures for the undisputed closure of such open space (Compare CEQR Technical Manual at 3S-7 (discussing potential mitigation measures "[i]f construction staging would require the use of open space or a loss of access to an open space").)

The DEIS's failure to consider mitigation measures for this purportedly "limited" alienation is exacerbated by the Applicant's deferral of consideration of how this closure would be mitigated if, as is likely, it actually exceeds six months. The DEIS states the obvious in conceding that if "the Esplanade remains closed longer than six months, there would be the potential for significant adverse impacts to the open space." (DEIS at 20-4.) The Applicant, however, improperly defers consideration of mitigation measures for this impact, stating, instead that such "measures will be explored in consultation with the Department of Parks and Recreation between the Draft and Final EIS." (Id.) SEQRA, once again, does not allow an Applicant to "shield [requisite mitigation measures] from public scrutiny" or otherwise frustrate a Lead Agency obligation to take a "hard look at an area of environmental concern." Penfield Panorama, 688 N.Y.S.2d at 854.

Moreover, the DEIS completely fails to account for the impacts to open space of other construction phases. The DEIS, for example, states that, for "a maximum of 6 months," platform construction would take place using "a barge in the East River containing a crane that would lift materials from the barge, over the esplanade, to the construction site." (DEIS at 20-2.) To put it mildly, during this period, it is reasonably foreseeable that use of the Esplanade would be disrupted while a crane carries "materials" over it. Nor does the DEIS consider how subsequent construction phases involving "the use of cranes [and] derricks" might impact use of

public open spaces. (See id.)

THE PROJECT CALLS FOR IMPROPER "SPOT ZONING"

The Applicant's request to amend the Zoning Code solely to enable it to exacerbate its inadequate loading berth condition is paradigmatic illicit spot zoning. "'[S]pot zoning' is the very antithesis of planned zoning." Rodgers v. Tarrytown, 302 N.Y. 115, 96 N.E.2d 731, 734 (1951) (citations omitted). It is "the process of singling out a small parcel of land for a use classification totally different from that of the surrounding area, for the benefit of the owner of such property and to the detriment of other owners." Id.; see also West Branch Conservation Ass'n v. Town of Ramapo, 284 A.D.2d 401, 726 N.Y.S.2d 137 (2d Dep't 2001).

The ultimate test on whether a proposal constitutes impermissible spot zoning, "is 'whether the change is other than part of a well-considered and comprehensive plan calculated to serve the general welfare of the community.'" Yellow Lantern Kampground v. Cortlandville, 279 A.D.2d 6, 716 N.Y.S.2d 786, 789 (3d Dep't 2000); see also West Branch Conservation Ass'n, 726 N.Y.S.2d 137 (rezoning vacated where it was inconsistent with duly adopted Comprehensive Plan). Basic zoning principles mandate "'that there be comprehensiveness of planning, rather than special interest, irrational ad hocery.'" Taylor v. Inc. Vill. of Head of the Harbor, 104 A.D.2d 642, 480 N.Y.S.2d 21, 23 (2d Dep't 1984), quoting Town of Bedford v. Vill. of Mt. Kisco, 33 N.Y.2d 178, 351 N.Y.S.2d 129, 136 (1973).

The Applicant's proposed zoning amendment seeks to reduce the safeguards currently in place, which are intended to assure that its proposal is a "good site plan." Section 74-682(c) now requires the Applicant to comply with all applicable loading berth requirements. Even though the Applicant maintains that no loading berths are required for the Project, it is requesting to satisfy any requirements under Section 25-72 by sharing loading berths with the connected buildings. The Applicant does not propose adding berths to the connected buildings. As set forth herein, the existing berths do not adequately serve the Applicant's existing facilities. (See Alex Aff., ¶¶14-40.) Allowing the subject zoning amendment would enable the Applicant to exacerbate the present inadequate loading berth condition, to the detriment of the surrounding community.

Nor does the Applicant identify any other property that could potentially take advantage of the proposed amendment.

This proposal represents the paradigmatic "spot" zoning change that would "benefit of the owner . . . to the detriment of other owners." See Rodgers, 96 N.E.2d at 734. It is not part of any "well-considered and comprehensive plan calculated to serve the general welfare of the community.'" See Yellow Lantern Kampground, 716 N.Y.S.2d at 789. The proposed amendment flatly contradicts the City's established goals of preventing development of the subject property over the FDR if it would "substantially interfere" with traffic and open spaces in

the area. (See 1993 Amendment, ¶ 13.) This blatant carve-out for the Project is the sort of customized zoning that well planned zoning is intended to prevent, and must be rejected.

CONSTRUCTION ON THE ESPLANADE CONSTITUTES PARKLAND ALIENATION

According to the DEIS, installation of the support columns for the new River Building platform would result in a closure of the FDR Esplanade for *at least* four to six months, and likely longer. (DEIS at 5-5). During this time a "dead end" will be created in the path, preventing the use of the Esplanade from 70th Street just past the midblock point of 72nd Street. (Id.). If, in fact, this disruption to the public's use of the Esplanade occurs, then New York sets forth specific requirements of the Applicant before final approval for the Project may be obtained, including State legislative authorization to alienate the public space, and the identification of substitute parkland.

New York courts have "time and again reaffirmed the principle that parkland is impressed with a public trust, requiring legislative approval before it can be alienated or used for an extended period of time for non-park purposes." Friends of Van Cortland Park v. City of New York, 95 N.Y.2d 623, 727 N.Y.S.2d 2, 5 (2001). Alienation occurs where there is a "substantial intrusion on parkland," which includes closures due to construction. Id. at 1054; c.f., Monroe County Conserv. Council, Inc. v. Adams, 566 F.2d 419, 424 (2d Cir. 1977), cert. denied 435 U.S. 1006, 98 S. Ct. 1876 (1978) (holding under Section 4(f) of the Department of Transportation Act that proposed highway constituted a constructive use of park where it would subject the park to the "unpleasantness which accompanies the heavy flow of surface traffic," and would restrict access to park from adjoining residential area).

The duration of any intrusion need not be prolonged in order to be deemed "substantial" by a court. The First Department recently affirmed that alienation can occur where parkland is used for non-park purposes "regardless of the duration." Gowanus Industrial Park, Inc. v. City of New York, 15 A.D.3d 311, 312, 790 N.Y.S.2d 443, 442-43 (1st Dep't 2005) (holding City did not have authority to remove a "paper street" from adjoining parkland without legislative approval); see also Chatham Green, Inc. v. Bloomberg, 1 Misc. 3d 434, 765 N.Y.S.2d 446 (Sup. Ct. NY Co. 2003)(holding New York City Police Department's use of James Madison Plaza for twenty three months as a temporary parking area was a "substantial intrusion").[15]

---

[15] Even if the Esplanade has not been expressly dedicated parkland, its creation, subsequent use and treatment by the City indicates that it has been impressed with a public trust. Land does not need to be formally dedicated as parkland in order to be impressed with a "public trust" by implication. "[A]n implied dedication may exist when a municipality's acts and declarations manifest a present, fixed, and unequivocal intent to dedicate." Riverview Partners, LP v. City of Peekskill, 273 A.D.2d 455, 710 N.Y.S.2d 601 (2d Dep't 2000). Where land is used for recreational purposes, such as here, courts will find an implied dedication. In Kenny v. Board of Trustees of the Incorporated Village of Garden City, 289 A.D.2d 534, 735 N.Y.S.2d 606 (2d Dep't 2001), for example, the Village acquired a 48.6 acre parcel

Many residents use the Esplanade for exercise and recreational walks on a daily basis. (See Alex Aff., ¶¶ 41-42.) The Air Rights Agreement set forth the City's mandate to require the Hospital to construct "an elevated pedestrian walkway along the western bank of the East River between 63rd and 72nd Street," which would be accessed by two ramps that would "provide[] public access." Such clear evidence of a public trust must not be ignored by the Applicant. Indeed, NYS Parks advises, "it is crucial that a municipality explore other alternatives prior to selling, conveying, leasing, or using parkland for anything other than recreation." (Handbook on the Alienation and Conversion of Municipal Parkland, at 19 (revised April 1, 2005).)

These alternatives should include seeking substitute lands, as well as identifying other locations, to accommodate the Project. (Id. at Appendix 2 – Checklist for Municipalities Considering Parkland Alienation, at 38). The Applicant must undertake such an investigation, before the Commission can accept the DEIS's construction impact analysis as sufficient.

THE MISSING ANALYSIS AND INFORMATION MUST BE SUBJECT TO FURTHER PUBLIC REVIEW

Respectfully, the public is owed some assurance that when and if the Applicant provides more complete and accurate information, including, reasonable development alternatives, the public will have an opportunity to comment upon this new information. Where, as here, significant new information is required subsequent to the filing of a DEIS, a supplemental environmental impact statement ("SEIS") may be required:

> The law recognizes that in situations in which significantly new information has been discovered subsequent to the filing of a draft EIS, which new information is relevant to the environmental impact of the proposed action, a supplemental EIS containing this information should be circulated to the relevant agencies so as to insure that the decision making authorities are well informed.

Horn v. Int'l Bus. Machines Corp., 110 A.D.2d 87, 493 N.Y.S.2d 184, 192 (2d Dept. 1985), appeal denied, 67 N.Y.2d 602, 499 N.Y.S.2d 1027 (1986); see also Environmental Impact Review in New York § 3.09[4], at 3-160 ("If the lead agency learns of important new issues about significant adverse environmental effects regarding the proposed action in the course of receiving public comments [on a DEIS], the lead agency must require the preparation of a

---

solely for recreational purposes. Despite the fact that such land was never officially dedicated as a park, its use as a recreational space was enough to instill a public trust upon it. See also New York State Office of Parks, Recreation and Historic Preservation ("NYS Parks") Handbook on the Alienation and Conversion of Municipal Parkland, at Page 9 (revised April 1, 2005) (advising that dedication can occur "when the common and accepted use of the land is as a park.") Indeed, NYS Parks includes "bike paths" as a recreational facility likely to be subject to the principles of alienation. Id.

supplemental EIS in order to solicit additional public comments on the new issues.") .

Information of critical interest to the public, including reasonable design alternatives, should not appear for the first time in a Final Environmental Impact Statement:

> [C]ourts have cautioned that the omission of required information from a draft EIS cannot be cured by simply including the required data in the final EIS since the abbreviated comment period for the final EIS "is not a substitute for the extended period and comprehensive procedures for public and agency scrutiny of and comment on the draft EIS."

Horn, 493 N.Y.S.2d at 192, quoting Webster Assoc. v. Town of Webster, 59 N.Y.2d 220, 228, 464 N.Y.S.2d 431 (1983).

CONCLUSION

The Edgewater, and area residents in general, trust that their comments will assist the Commission in its consideration of the Project. As Manhattan Borough President Scott Stringer stated, the Applicant should "work with affected neighbors, community stakeholders, and Community Board 8 to consider design and programmatic changes that minimize project impacts." Accordingly, the Edgewater sincerely hopes that the Applicant will accept the Commission's invitation at the July 2nd Hearing, re-examine its planning assumptions, and redesign its expansion plans.

Please do not hesitate to contact us should the Commission have any questions or comments, or would like the Edgewater to expand on any of the areas discussed in its submission.

Respectfully,

Michael D. Zarin

Re: Hospital for Special Surgery- FDR Drive Expansion
East 71st Street, New York, New York

Dear Chairperson Burden and the Honorable Members of the City Planning Commission:

Hutton Associates Inc. has been retained by the residents of the Edgewater Building, located at 530 East 72nd Street (herein the "Edgewater"), to evaluate the proposed FDR Drive Expansion project (the "Project") submitted by the Hospital for Special Surgery ("Applicant").

I am the principal of Hutton Associates, Inc., a New York City based planning and urban design firm. As a Fellow of the American Institute of Certified Planners (the professional institute of the American Planning Association), and an Associate of the American Institute of Architects, I have 38 years of planning and urban design experience. During this time, I have worked on hundreds of planning and urban design projects both for private clients, as well as government bodies. My work includes consulting on major expansion projects such as planning for what is now the Brooklyn Bridge Park, in which a major initial issue was the maintenance of views from the Brooklyn Heights Promenade, a major public space threatened by inappropriate development on the piers below. I base my comments upon such experience.

Hutton Associates has reviewed the impact analyses in the Draft Environmental Impact Study ("DEIS"), as well as the most recent set of surveys, zoning calculations and site plans that the Applicant has provided to the Commission. In conjunction with the Environmental Simulation Center, we have

used the Applicant's proposed designs to prepare illustrations of the Project from several vantage points in the area. An overview of Environmental Simulation Center's services is attached hereto as Exhibit 1 for the Commissions' reference.

These simulations were compared to the relevant requirements for waterfront and residential development set forth in the New York City Zoning Code, as well as the design criteria contained in the various agreements between the City and the Applicants for use of the site. Based on our comparative zoning analysis, we conclude that there are numerous impacts unidentified or insufficiently studied in the DEIS, and specific locations in the neighborhood - both public and private - that will be adversely impacted. The Project design as proposed does not reflect "good" site planning. As such, we urge the Commission to require the Applicant to conduct a comprehensive analysis of available alternative designs and other mitigation measures available to reduce these impacts.

A. Planning Standards

Our analysis began with identifying the specific design criteria applicable to the Project site.

Under New York City Zoning, a specific threshold showing that the design "in relation to the existing buildings on site and in the area, the location and distribution of new bulk result in a good site plan," is required. NYC Zoning Code § 74-682. This language is significant here. The question of whether the Project design constitutes a "good site plan" focuses both upon its impact upon abutting buildings, as well as the general distribution of bulk in the surrounding neighborhood.

Whether the Project follows "good" site planning principles is also dependent upon the City's development goals for the area. As a Residence District, it is important to note that City Zoning seeks to protect the area against congestion by regulating, amongst other items, "the bulk of buildings in relation to the land around them." NYC Zoning Code § 21-00. A key factor in such effort is to open up areas to "light and air." Id. In addition, as a waterfront area, the City seeks to "create a desirable relationship" between development and the waterfront's open spaces and upland communities. Id. at § 61-00. This also includes the desire to "preserve historic resources along the City's waterfront." Id.

Finally, our analysis incorporated the site-specific criteria contained in Agreements entered into between the Applicant and the City for use of space over the FDR Drive. According to the 1993 Amendment to the Agreement between the City of New York and the Applicant ("1993 Amendment"), the Project design must not "substantially" interfere with enjoyment of the FDR Drive Esplanade or "substantially" restrict air and light to the Esplanade. See 1993 Amendment ¶ 13. Nor may the Project substantially detract from the "visual quality of the waterfront." Id.

B. Impacts Identified

Using the above criteria, there are several key impact areas that we have identified, which the Applicant has failed to sufficiently address in the DEIS. As detailed below, these impacts, both individually and on a cumulative basis, demonstrate that the Project as proposed is not a "good site plan."

1. Significant Diminishment of Light and Air

"Light and air" refers not only to direct sunlight, but also to the amount of sky available for ambient light. 'Light and air' has been a basis for the NYC Zoning Code from its beginning, resulting in requirements such as building setbacks and massing restrictions. Buildings such as the instant proposal, which dramatically reduce the amount of sky, create a canyon effect, especially when wedged between the sun and the observer. In such cases, significant impacts will occur due to the loss of ambient light.

The simulations annexed hereto illustrate that the bulk of the Project will serve to isolate several surrounding areas in the immediate vicinity by cutting off a substantial amount of light and air currently available. The proposed massing of the Project creates the canyon effect that the Zoning Code and the 1993 seek to prohibit.

Exhibit 2 demonstrates the openness of the Esplanade without the Project's proposed new East River building. Exhibit 3, the 'after' montage, shows the imposition on the Esplanade space of the Project's building mass and its structural columns imposing itself on the light and air, as well as causing afternoon shadows of varying length from March to September (as pointed out in the DEIS). The result is a significant diminishment in the public's ability to use and enjoy the Esplanade.

The impact will be exponentially more significant upon the Edgewater, which clearly is an "existing building . . . in the area," within the meaning of Zoning Code Section 74-682. Exhibits 4 and 5 illustrate a situation that probably no other private building in the City will ever encounter. The Applicant proposes to locate the Project's building mass built out more than 100'-0 over the adjacent public right of way and only inches from the Edgewater. These photos, taken from a fifth floor apartment, show a skyline cut in half. This cannot be deemed to create a "desirable relationship" between the Project and its neighbors.

2. Substantial Loss to Visual Quality of Waterfront

The 72nd Street Overlook Park, is another public open space that will be significantly affected by the proposed Project. This Park currently provides panoramic views of the waterfront as demonstrated by Exhibit 6. The park is an important sunny outlook, especially for those who have no view of the water from their apartments or hospital rooms to sit, relax, and take in the full sweep of the waterfront from Roosevelt Island to the landmarked 59th Street Bridge. This is exactly the type of resource the Zoning Code, the City's Local Waterfront Revitalization Program (LWRP), and 1993 Amendment seek to protect.

Exhibits 6 and 7 illustrate how the existing southerly views will be replaced by a hulking mass. The Exhibit, which imposes the proposed new River Building on a duplicate photo from the DEIS, shows the impact on the view from the edge of the Overlook. From this vantage point it is clear that the entire southern view of the waterfront will be cut off. A fifty percent reduction in a panoramic view is certainly a "substantial" reduction in the visual quality of the waterfront.

3. Loss of Historic Resources

Exhibits 6 and 7 also illustrate that the existing view of the 59th Street Bridge from the 72nd Street Overlook Park will be completely eliminated. According to the New York City Department of Transportation, this Bridge is "one of the greatest cantilever bridges in the history of American Bridge design." See NYCDOT Bridges Information, available at http://www.nyc.gov/html/dot/html/bridges/bridges.shtml. The Queensboro Bridge is also listed on the National Registry of Historic Places.

4. Neighborhood Character

The simulations demonstrate that the Project will adversely affect a number of defining features of the neighborhood. The lack of sensitivity to neighborhood context, the destruction of the existing panoramic views of waterfront, and the curtailing of the enjoyment of historic features would result in a visual and urban design that is incompatible with the community surrounding the Project. The cumulative affect of each of the above impacts will combine to dramatically alter the use and enjoyment of the area's public spaces.

C. Conclusion

The Applicant's design simply does not reflect sound planning principles. It is inconsistent with the discretionary criteria with which the Commission is charged to use in evaluating the Project for approval, and will serve to create anything but harmony between the Hospital and its surrounding open spaces and residential buildings. We urge that the Commission find that the Project as proposed does not meet the "good site plan" standard.

There are clearly better alternatives available to the Applicant. Several different configurations might mitigate the Project's many design flaws. Horizontal and vertical setbacks, for example, could open views of sun, sky, waterfront, and the historic Queensboro Bridge. In addition, increased height or shifts in bulk could make up for these setbacks, either at the proposed building or on related adjacent sites.

It is presumptuous for us to suggest a specific redesign for this inappropriate and hulking proposal. This should have been undertaken by the Applicant's team from the beginning. A discussion of alternative designs and mitigation measures is the underpinning of a comprehensive DEIS. Not only are such critical discussions absent from the Applicant's DEIS, but the document fails to even identify the underlying impacts that make such considerations necessary.

Sincerely,
Hutton Associates. Inc.,

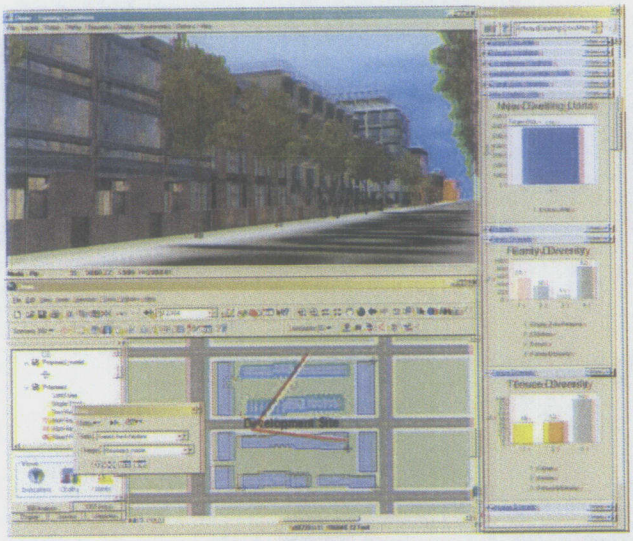
Simulating the Future

The Environmental Simulation Center (ESC) was established at the New School for Social Research in 1991. Since 1997, the ESC has been an independent not-for-profit organization practicing planning and urban design. The mission of the ESC is to improve the livability of communities through the application of information technology to the community planning, design and development process, thereby extending the capabilities of decision-makers and citizens.



The ESC's approach recognizes that our cities and towns are complex, constantly changing environments, which have resulted in planning and design techniques that are more reactive than proactive. We believe that new technologies are allowing planners and decision-makers to perform their jobs in ways that were never before possible. A planning office that embraces these technologies can both track and account for change as it occurs. This allows for radically up-to-date decision-making and for plans, guidelines, and policies that adapt and evolve like the places they are designed to manage. The ESC has pioneered the practice of planning in an information-rich, interactive computing environment, and assists clients who are transitioning to a technology-rich planning environment.

We use these techniques not only to illustrate designs, but to communicate and evaluate a design as it evolves. By integrating words, numbers and images in one simulation environment, the design, scope and physical impact of proposed projects can be assessed in real-time. In a technologically-mediated workshop setting, the ESC works with clients to interactively plan and design alternatives, formulate and test strategies and develop implementation techniques. This unique design approach enables open and informed decision-making and is instrumental in helping communities reach consensus.

At the ESC, solutions to complex planning and design issues are application-driven rather than technologically-driven. Solutions are tailored to the uniqueness of the place, circumstances, and client needs. We believe that technology serves as a means to an end – not an end in itself – and that the technological advances that the ESC has made are relevant only because they were developed in the context of real-world planning and design projects and responded to the greater needs of planning and design in the 21st century.

New York, NY 10007-1216

Re: Hospital for Special Surgery- FDR Drive Expansion
East 71sts Street, New York, New York

Dear Chairperson Burden and the Honorable Members of the City Planning Commission:

Adler Consulting has reviewed the transportation section of the Draft Environmental Impact Statement (DEIS) for the above-referenced proposal to expand the Hospital for Special Surgery at East 71st Street in Manhattan. Such expansion includes a proposal to construct a new building over the FDR Drive immediately north of East 71st Street (Project). Based on our review of the DEIS, we conclude that both the DEIS itself, as well as the project's overall design, contain serious flaws from a traffic flow and safety standpoint.

Just as the structural integrity of a building is dependent upon the quality of the foundation upon which it is built, so too are the conclusions of an environmental study. In the instant case, there are substantial inaccuracies in the DEIS's underlying assumptions relating to existing traffic conditions, which undermine its conclusion that there would be no significant adverse traffic impacts from the Project. More important, the Project as proposed creates several adverse conditions which will result in irreparable harm to the well being and safety of the general public.

It is our conclusion that such deficiencies require the Project to be either significantly revised or denied.

A. QUALIFICATIONS

Adler Consulting, a private consulting firm, specializes solely in the fields of traffic engineering and transportation planning. The firm provides these services to a range of clients in both the public and private sectors. Mr. Bernard Adler, P.E., the president of the firm,

has over 40 years of traffic engineering experience, is the former Commissioner of Traffic for the City of White Plains and is a Fellow of the Institute of Transportation Engineers.

John Canning, P.T.O.E., a senior associate with the firm, has over 20 years of traffic engineering experience. During this time, Mr. Canning developed traffic management programs, prepared interchange reconfiguration studies, and conducted environmental assessments and traffic impact studies for numerous, municipal and private clients. His work experience includes designing several transportation master plans for health care facilities in connection with proposed expansion projects.

B. INADEQUACY OF THE DEIS

A review of the information presented in the DEIS indicates that the most basic assumptions, which form the foundation of the transportation section of the DEIS, appear to be inaccurate. Sound engineering principles state that if there are fundamental errors in the first step of the evaluation process, they will be perpetuated through all subsequent steps, rendering the final conclusions invalid. In traffic assessments, if the baseline condition analysis is flawed, then future projections of impacts will be inaccurate. New York City stresses this principle in the City Environmental Quality Review Technical Manual ("CEQR Manual"). It establishes that existing conditions be "defined precisely" as these projections "will serve as the baseline for future condition analyses." CEQR Manual, Chapter 3O – Traffic and Parking, Page 3O-5.

Based upon visual reconnaissance during several staff site visits, as well as reviewing accounts from residents who experience area traffic conditions on a daily basis, the "baseline" analysis of existing traffic and safety conditions in the DEIS cannot be considered accurate. In addition, the DEIS's projected trip generation and estimated future traffic levels do not take into account certain basic facts. As a result, we urge the Planning Commission to discount the validity of the conclusions of the transportation section of the DEIS.

1. Existing Traffic Operating Conditions

In Section 16.2.6 entitled "Existing Condition Analysis Results," the DEIS states at page 16-18 that the intersection of East 71st Street with the FDR Drive Service Road "currently operates at LOS A in the AM, midday and PM hours, indicating effective intersection operation." The evidence we collected shows LOS conditions at dramatically lower levels.

According to the Highway Capacity Manual 2000 Intersection Level of Service Criteria listed in the CEQR Manual Traffic and Parking Appendix 2, in order for an unsignalized intersection (such as East 71st Street and the FDR Service Road) to operate at a LOS "A", there must be an average control delay of ten seconds or less. See CEQR Manual, Traffic and Parking Appendix 2. In contrast, where there are average control delays of thirty five to fifty seconds, the unsignalized intersection will operate at a LOS "E." Similarly, delays lasting longer than fifty seconds rise to a LOS "F." Id.

The photographs attached hereto as Exhibits 1 and 2 indicate that vehicles at this intersection experience well over ten second delays. The Exhibits illustrate an intersection that appears to be operating at LOS "E" and "F" conditions, respectively – i.e., it suffers from heavy, unacceptable delays. If the DEIS analysis concludes the operating conditions are as good as they can possibly be rated (i.e., at LOS A), while in reality they are as bad as they can possibly be rated (i.e., at LOS F), then there is something fundamentally wrong with the analyses.

We find a similar situation with the DEIS's analysis of traffic conditions on York Avenue between East 71st and East 73rd Streets. The DEIS indicates that it takes slightly less than one minute to travel southbound on York Avenue through the intersections of East 73rd Street, East 72nd Street and East 71st Street during the peak hours, and slightly more than one minute in the northbound direction. This is directly contradicted by the testimony in the record. At the Commission's public hearing conducted on July 2, 2008 a substantial number of local residents testified that it takes up to ten (10) minutes to make the journey at peak times. Furthermore, on June 10, 2008, the Community Board 8 Transportation Committee held a public hearing to discuss working with the community to alleviate existing severe traffic congestion, among other locations on York Avenue as well as on 71st Street, where the issue of the interference of deliveries and the inadequacy of loading bays was discussed.

2. Existing Safety Conditions

Extrapolating a project's impact on existing safety conditions requires establishing accurate existing conditions. This is the first, and most important, step in evaluating a project's safety impact. The DEIS's sparse treatment of existing traffic safety conditions does little to inspire confidence in the conclusion that mitigation measures are unnecessary.

In Section 17.2.5 - Vehicle and Pedestrian Safety - the DEIS states at page 17-22 that according to the NYC Department of Transportation not a single accident was reported at the intersection of East 71st Street with the FDR Service Road in a three year period. This strains the limits of credibility when one considers the number of accidents reported on nearby intersections. At the intersection of York Avenue with East 72nd Street, for example, 93 accidents were reported. Similarly, 70 accidents were reported at the intersection of York Avenue with East 71st Street, and 56 accidents were reported at the intersection of York Avenue with East 70th Street. Simple math and the law of averages dictate that at least a few accidents would have occurred at the intersection of East 71st Street with the FDR Service Road. This disparity suggests that the data for this intersection has been unreported or inadvertently omitted. Corroboration is required through updated field-testing and eyewitness reports.

3. Projected Trip Generation

The DEIS indicates in Table 16-3 of Section 16.4.2 - Project-Generated Traffic Volumes - that not a single employee will leave or arrive at the hospital expansion by car, taxi, subway or bus. This also strains the limits of credibility. The traffic impact of a project is

determined largely by the number of trips it would generate. If an applicant makes the assumption that a project's employees will not generate any trips during a certain period, then it is easy to see how one would conclude, albeit erroneously, that the project will not have any impact.

4. **Projected Changes in Future Conditions**

Just as a building constructed in an earthquake-prone zone should be built to withstand the inevitable "big one," so too should a DEIS account for anticipated changes in traffic operating conditions associated with projects other than the subject application. NYCDOT Commissioner Sadik-Kahn recently stated that it is not a matter of "if," but "when," congestion pricing south of 60th Street will arrive. For the residents in the vicinity of east 71st and East 73rd streets, this means a dramatic change in traffic patterns, which has not even been mentioned, let alone considered, in the DEIS. Motorists looking to avoid the $8 toll will specifically seek to get on and off the southbound FDR Drive at East 63rd Street. This will lead to considerable congestion at that exit, as well as a hunt for parking spaces in that neighborhood. The Mayor has indicated that he will push to institute on-street, resident-only parking in the effected neighborhoods. This and the increased congestion at 63rd Street will persuade motorists to try their luck at East 71st Street and East 73rd Street.

The Commission has already heard testimony from residents of the difficulty in getting onto the FDR Drive at 73rd Street because of traffic queuing to get off the FDR Drive at 71st Street (as shown graphically on Exhibits 1 and 2), and of congestion on York Avenue. It is not difficult to imagine how the increased traffic entering and exiting the FDR Drive at the 73rd and 71st Street exits, respectively, because of congestion pricing will cause even longer queues on 73rd Street. This traffic will spill back onto York Avenue, causing traffic on York Avenue to block the 71st Street intersection, resulting in gridlock. Commissioner Sadik-Kahn has indicated that congestion pricing is inevitable, yet how the 71st - 73rd Street neighborhood will cope with it or how the proposed expansion of the Hospital for Special Surgery will make it worse have never been considered in the DEIS.

In addition, Section 1.3 of the DEIS – Renovation and Expansion Plan – states that certain as-of-right construction is occurring that is separate and apart from the Project. According to the brief description in the DEIS, this construction included the expansion of several buildings, but their traffic and delivery activities were not included in the proposed Project. It is unclear from the subsequent discussion of trip generation how this work will affect traffic volumes.

C. IRREPARABLE HARM TO THE PUBLIC

Notwithstanding the obvious inadequacies of the DEIS, a review of the proposed design to expand the Hospital for Special Surgery also indicates that the Project would create numerous significant and unmitigated adverse impacts upon roadway conditions. Using the

relevant CEQR Manual "major technical areas" as a guide, it is clear that, as proposed, the Project design will decrease traffic flow and operating conditions, and would serve to increase the number of accidents in the vicinity of the FDR Drive and the FDR Drive Service Road at 71st and 73rd Streets. See CEQR Manual, Chapter 30, at 30-1.

1. Traffic Flow - Queue Spillback Onto the FDR Drive

The FDR Drive Service Road is intended to serve as a transition zone between the high-speed FDR Drive and the low-speed streets of Manhattan. On those occasions when queues on the service road spill back onto the FDR Drive itself, as shown on Exhibit 2, conditions exist where a vehicle traveling at 50 miles per hour could run into the back of a stopped or slow-moving vehicle. At best, this condition gives rise to congestion on the FDR Drive, which can also be seen in the background on Exhibit 2.

The DEIS indicates that the proposed action would add approximately 100 trips to the roadways surrounding the hospital during the peak hour, some of which would be added to the 71st Street exit, increasing queues on the service road. Remarkably, the DEIS projects that not a single vehicle will be added by the project to the 73rd street entrance to the FDR Drive.

The DEIS also indicates that the Project will add almost 90 pedestrian trips to East 71st Street between the FDR Service Road and York Avenue, but that none of them will use the Stop sign-controlled pedestrian crosswalk across East 71st Street, located just 120 feet from the service road. It is clear that the proposed action will increase pedestrian activity on this crosswalk, requiring vehicles to wait longer for pedestrians to cross and thereby increasing queues on the service road.

2. Goods Delivery

Quite apart from the fact that the dimensions of the Hospital's current loading docks on East 71st Street do not comply with Code requirements, an inspection of East 71st Street on any given day revels how invasive the delivery process is into the public environment, and how disruptive to traffic it is. The Hospital for Special Surgery receives deliveries on a street leading directly off of the FDR Drive. It currently contributes to congestion on the FDR Drive Service Road. Increasing deliveries without providing properly functioning loading docks will exacerbate this condition.

The Project's proposed loading areas are wholly inadequate to process the existing, let alone the future volume of deliveries without substantially interfering with vehicular traffic. As can be seen from Exhibit 3, when trucks use the loading bay closest to the service road, they completely block the sidewalk on the south side of the street and two of the three traffic lanes. Exhibit 4 further demonstrates that trucks using the next loading bay also block the sidewalk, as do trucks using the loading bay closest to York Avenue. Additionally, as can be seen from Exhibit 4, not one or two but four trucks sometimes stop on East 71st Street during the

height of the morning rush hour (8:00 a.m.) interfering with traffic flow. Exhibit 5 shows a similar scene viewed from the opposite direction.

Most importantly, perhaps, the DEIS indicates that the proposed action will add almost fifteen (15) deliveries per day to the Hospital. Yet the Hospital's loading facilities are inadequate and no new loading facilities are proposed. Increased traffic, pedestrian activity and deliveries on East 71st Street resulting from the proposed action will increase the number of instances when traffic on the service road will spill back onto the mainline of the FDR Drive as a result of the Project.

To the extent that the FDR Drive Service Road leading to 71st Street still retains any function as a Safety Transition between a high-speed roadway and a low-speed roadway system, the Project will completely eradicate it. The Hospital should be focusing on curing the current unsafe conditions it has created through its inadequate delivery procedures before it proposes to exacerbate this unsafe condition.

3. Vehicular Safety - Critical Decision Zone

In addition to exacerbating the existing unsafe conditions on the FDR Service Road at 71st Street through increased queue spillback, the Project will also exacerbate unsafe conditions at this intersection by significantly reducing visibility at a critical decision point for drivers using the 71st street FDR exit. As motorists approach East 71st Street on the FDR Drive Service Road, they must be prepared to stop if they encounter a queue spilling back from East 71st Street under the proposed new building. Much like turning a light off in a darkened room, it takes the human eye one or two seconds after the light has been turned off for the pupil to dilate and allow enough light to strike the retina to create an image.

As can be seen from the attached Exhibit 6 (which shows the current versus the proposed conditions), this critical decision point will be in deep shadow and motorists will have a very difficult time picking up such spillback as they pass from full sunlight into the relative darkness beneath the building. This condition is all the more concerning because of the poor alignment of the FDR Drive approaching the East 71st street exit. As can be seen from Exhibit 7, attached, because the highway veers left at the exit, someone unfamiliar with the roadway is liable to continue straight at the highway's operating speed onto the service road and into unperceivable congestion.

At the Hearing, it was suggested by one of the Commissioners that the Applicant might consider lighting to address this situation. If such an alternative were feasible, the Applicant must be required to study its implementation, as it is not a simple solution. Increasing ambient lighting to adequate levels in the underpass, for example, might require the use of extremely high intensity lights which could also result in temporary blindness if viewed directly. The fact remains, however, that because the Applicant pretends the Project will have no adverse traffic impacts, it fails to explore any potentially viable mitigation measures.

4. **Pedestrian Safety**

Although Figure 1-2 of the DEIS was practically illegible online, it appears that it proposes to support the new building over the FDR Drive on 2-foot thick columns. Quite apart from the fact that this would not appear to provide the lateral stability necessary to support the structure (the columns appear to be five feet long in the transverse direction), only 12 inches are available between the ramps descending from the pedestrian overpass of the FDR Drive to the Esplanade to accommodate the columns (see Exhibit 8). Thus, either the columns cannot be built or they will extend into the pedestrian walkway by 6 to 12 inches, depending on how they are situated. If the columns need to be thicker, which is the case with the existing building just to the south, the incursion into the pedestrian walkway will be greater. Given the minimal margin for error, the Applicant should have a structural engineer certify that the 2-foot columns will be adequate to provide the lateral stability necessary for the building.

On the opposite side of the FDR Drive, it appears that the column footings may reduce the sidewalk width from eight feet to four feet at the northwest corner of the intersection of East 71st Street with the FDR Drive Service Road. This would represent a reduction below the ADA-recommended minimum width for sidewalks of 5 feet.

D. CONCLUSIONS

Based on a review of the data available, it is our considered professional opinion that the building area will substantially impede vehicular use of the FDR Drive, as well as East 71st Street, and that the proposed columns will interfere with the pedestrian use of the ramps serving the FDR Drive Existing Walkway, both of which are contrary to the requirements of Article 13 of the Amended Agreement between the Hospital and the City of New York. We further conclude that the Project, as proposed, will do irreparable harm to the well being and safety of the general public using the FDR Drive in the vicinity of East 71st Street. For these reasons, the project should be either significantly revised or denied.

In addition, due to basic underlying errors, we find that certain of the conclusions of the transportation section of the DEIS are erroneous and should not be used in making any determinations relating to the subject Application.

Sincerely,
Adler Consulting,
Transportation Planning & Traffic Engineering, PLLC

John Canning, P.T.O.E.
Senior Associate

HOSPITAL FOR SPECIAL SURGERY : **AFFIDAVIT OF**
PROPOSED EXPANSION PLAN : **DENNIS ALEX**

:

----------x

STATE OF CONNECTICUT)
)ss:
COUNTY OF FAIRFIELD)

DENNIS ALEX, being duly sworn, hereby deposes and, under penalties of perjury, states, as follows:

1. My name is Dennis Alex. I reside at 530 East 72nd Street, New York, New York, which is immediately adjacent to the site contemplated for the Hospital for Special Surgery's proposed River Building.

2. I submit this Affidavit in opposition to the current application by the Hospital for Special Surgery (the "Applicant" or "Hospital") for, among other things, a special permit and an amendment to the Zoning Resolution (the "Application") to add approximately 137,869 square feet of floor area for hospital use, including in a new, twelve-story building over the FDR Drive between 71st and 72nd Streets ("River Building") and in additional floors added to the existing East Wing Building of the Hospital (collectively, the "Project").

3. I have reviewed the Draft Environmental Impact Statement for the Project.

4. The Project, as it is presently proposed, would adversely impact my health, safety and general welfare, as well as my use and enjoyment of area public spaces, the neighborhood, and my own residence.

5. The Hospital is located in a residential neighborhood where residents, as well as individuals from all over, enjoy recreating along the East River and enjoy the views of the unique panorama. Such visual and physical access is atypical in Manhattan and should be preserved.

6. The proposed River Building, however, would significantly impact the magnificent views of the East River that are unique to this neighborhood.

7. It would, for example, obstruct the view south from the park at the end of East 72nd Street, blocking views of the landmark Queensboro Bridge.

8. The Project would also exacerbate the problem of Hospital delivery trucks impeding the flow of traffic in the area.

9. The Project's extensive construction activities would also adversely impact me and other neighborhood residents.

10. The increased traffic from construction vehicles, medical waste trucks, explosive gas, catering and other delivery trucks will create pollution that will impact the quality of life in the surrounding neighborhood.

The New York City Planning Commission Should
Deny The Application As It Is Currently Presented

11. I have resided in the neighborhood for a little over a year. Over the past year I have witnessed, on a daily basis, severe traffic congestion on East 71st Street and gridlock on the entrance and exit ramps of FDR Drive due to the delivery trucks servicing the Hospital blocking the flow of traffic exiting the FDR Drive at 71st Street.

12. Periodically, beginning in May of 2008 through the date of this statement, I have documented the typical daily, traffic and pedestrian safety problems with photographs.

13. I was also able to verify the measurements of the Hospital's loading berths using a standard retractable tape measure.

14. The Hospital maintains that its facilities are serviced by four loading berths: the loading berth closest to the F.D.R. Drive on East 71st Street ("Berth 1"); the two loading berths west of Berth 1 on East 71st Street ("Berth 2" and "Berth 3"); and the loading berth located on East 70th Street ("Berth 4").

15. The reality, however, is that there is far less functional loading area at the Hospital than the Applicant represents. As a consequence, traffic conditions in the area are already problematic, to the detriment of the public health, safety, and welfare.

The Loading Docks on East 71st Street
Do Not Adequately Serve The Hospital Now

16. Initially, Berth 1's utility as a loading dock is suspect. It houses a large trash compacter affixed on top of a concrete slab that is approximately 40 inches high. (See Exhibits 1 and 2).

17. The concrete slab and compactor cover the area of the berth from the rear to within two feet of the sidewalk. This configuration makes it impossible for any trucks to park completely within the berth

18. I frequently see delivery trucks parked partially in Berth 1, with most of the truck extending over the sidewalk and into traffic lanes. (See Exhibits 3 and 4).

19. The other two purported loading berths on East 71st Street do not even provide sufficient space for one true loading dock.

20. Berths 2 and 3 share an entrance located immediately west of Berth 1.

21. While the berths share an entrance, the Hospital maintains that Berths 2 and 3 are individual berths because a painted yellow line extends down the center of the area. (See Exhibit 5).

22. I measured the width of the Berth 2 and 3 area to be approximately 19 feet yielding a width of 9 ½ feet for Berth 2 and Berth 3 respectively.

23. It appears that the width of Berth 2 and 3 is insufficient to allow two delivery trucks to use the berths at the same time.

24. Additionally, there is a knee wall and steel loading docks at the rear of the Berth 2 and 3 area, impeding parking. (See Exhibit 6).

25. The full area available for a truck to pull into Berths 2 and 3 is approximately 20 feet. Trucks cannot back completely into the bay. (See Exhibit 7).

26. Similar to the conditions of Berth 1, I frequently see delivery trucks parked partially in Berths 2 and 3, with most of the truck extending over the sidewalk and into traffic lanes.

Consequently, Loading Activities On East 71st Street Are Unsafe and Impede Traffic Flow

27. The Hospital's delivery trucks already create an unsafe environment for pedestrians, and block the flow of traffic on East 71st Street.

28. In addition to protruding from Berths 1, 2 and 3, trucks making deliveries to the Hospital park in the traffic lanes on both sides of East 71st Street. (See Exhibits 8, 9 and 10).

29. I have seen pedestrians having great difficulty crossing East 71st Street. Delivery trucks block the crosswalk, as well as pedestrians' view of traffic and drivers' view of the pedestrians. (See Exhibit 11).

30. The traffic and safety problems caused by delivery trucks parking on both sides of the street is worsened by the consistent practice of delivery people carrying deliveries across traffic lanes on East 71st Street. (See Exhibits 12, 13 and 14).

31. I have never seen deliveries being transported across East 71st Street in the Pedestrian Overpass.

32. The cars exiting FDR Drive cannot traverse 71st Street efficiently due to the delivery activities at the Hospital.

33. The congestion on East 71st Street prevents cars from exiting at the East 71st Street Exit of FDR Drive. There is regularly a line of cars waiting to exit FDR Drive extending from 71st street to, at least, 72nd Street. (See Exhibit 15).

34. The entrance to FDR Drive at East 73rd Street is also affected, as the entrance and the exit share the same lane.

The Loading Berth on East 70th Street Is Also Inadequate

35. The vertical clearance of Berth 4, which is on East 70th Street is only 8 feet.

36. I measured both the entrance, which is on East 70th Street, and the inside ceiling to be 8 feet high. (See Exhibit 16).

37. The entrance to Berth 4 is blocked by a steel pole, effectively preventing trucks from entering the berth.

38. Similar to the delivery practices I witnessed on East 71st Street for Berths 1, 2, and 3, I witness delivery people parking trucks outside of the bay and walking the deliveries into the berth.

39. This is dangerous, as there are no road markings, plantings, walls or screening to demark a safe delivery zone around the exterior of the Berth 4 entrance.

40. The Applicant should not be allowed to exacerbate the existing traffic problem it has created.

The Esplanade And The 72nd Street Overlook

41. The esplanade providing physical and visual access to the East River waterfront (the "Esplanade") is visible from my apartment windows. I also jog on the Esplanade an average of three times per week.

42. On a daily basis I observe what appears to be hundreds of people using the Esplanade for jogging, walking, pushing baby strollers, walking dogs, bicycling and just sitting on a bench, or the grass, reading or relaxing. (See Exhibits 17 and 18).

43. In the first instance, I understand that the Applicant proposes to shut down the Esplanade for an indeterminate period during construction.

44. Moreover, in its present form, the Project would loom over the Esplanade, detracting from its light and air, and covering it in shadows for much of the day.

45. I also frequently use the Park at the end of East 72nd Street, which overlooks the East River. (See Exhibit 19).

46. I am disturbed because the Project would substantially interfere with the viewsheds that I and other area residents enjoy from this Park.

The Belaire Hotel

47. It is unclear whether the Hospital actually has sufficient unused floor area to accomplish its expansion Project.

48. I understand that Section 74-682(b) of the Zoning Code establishes that the Project can "utilize [] only unused floor area from the portion of the adjoining zoning lot not within the demapped air space."

49. To the best of my knowledge, the Applicant has not provided any detail regarding its calculations of what "unused floor area" it may have.

50. It appears that the Applicant is improperly factoring in a nonconforming use into its calculations of the floor area it has available for the development of the Project.

51. The DEIS at Section 1.2 includes the Belaire Building as part of the Hospital's existing facility. However, it seems that the Belaire is a commercial use and not a community facility and, hence, should not have transferable development rights.

52. To the best of my knowledge and belief, The Belaire is a hotel available for public use as a transient hotel.

53. The Hotel Association of New York City, Inc.'s web site at http://www.hanyc.org/, lists hotels available in New York City.

54. The Belaire Building is listed as the "Belaire Guest Facility" on the Association's membership list.

55. The contact information for the Belaire is provided as follows: Belaire Guest Facility, 525 East 71st Street, Tel. (212) 606-1989, Electra Wiggerton, General Manager, wiggertone@hss.com.

56. Using the provided contact information, I called the Belaire on June 9, 2008 and sought to make a reservation for three days in July.

57. The front desk told me that rooms were available and that the rate for my stay would be $459.00 per night.

58. I was not asked if I was a patient or family member of a patient.

59. The DEIS illustrates that the Applicant is relying on the permitted use of the Belaire as a community facility to increase the floor area available for the development of the Project.

Conclusion

60. The Project presents significant adverse impacts that must be avoided or mitigated. Some of the information contained in the DEIS and Application appears to be incorrect.

61. For this reason, I respectfully request that the Commission deny the Application in its present form, and compel the Applicant to seriously study design and/or location alternatives if it wishes to pursue an expansion project.

Affidavit of Dennis Alex
Exhibit Index

Exhibits 1 and 2 Picture of Berth 1. No truck can enter this bay as it is fully occupied by a concrete slab and garbage compactor.

Exhibit 3 Looking west at a truck backed fully into Berth 1 picking up medical waste while blocking traffic. The dumpster in the picture is a fixture at this location.

Exhibit 4 Looking east from in front of the Belaire Building at two trucks backed as far as they can into Bay 1 and Bay 2. Sidewalks and traffic lanes are blocked.

Exhibit 5 Looking south at Bay 2, which the Hospital claims is Berth 2 and 3. The compact 15 foot long Mazda MPV car is pulled all the way in the bay.

Exhibit 6 The knee wall and steel loading docks located twenty feet inside Bay 2. Trucks cannot pull all the way in.

Exhibit 7 Trucks are parked in their usual positions. Hospital loading berths are behind the truck carrying the flammable materials. Bay 2 is occupied by a single truck that is backed fully into the bay. No other trucks can enter Bay 2.

Exhibit 8 Trucks parked on both sides of East 71st Street waiting to get into the loading berth. Only one truck is in Bay 2. A truck is parked on the north side of the street making deliveries to the Belaire Building.

Exhibit 9 Looking west from the pedestrian ramp. Delivery trucks are parked on the north side of the street. The Hospital's fork lift is parked on the road. One truck is in Bay 2 blocking the sidewalk.

Exhibit 10 Poland Spring truck parked and unloading in front of the Caspary Building on the North side of East 71st Street.

Exhibit 11 Looking west on East 71st Street. Pepsi truck making deliveries is parked in a traffic lane. Two ladies are trying to cross the street in a crosswalk.

Exhibit 12 Pepsi truck parked in the middle of East 71st Street unloading in traffic. Deliverymen are delivering across the street to the Belaire Building.

Exhibit 13 The Pepsi truck delivery men entering the Belaire Building.

Exhibit 14 Delivery trucks unloading in East 71st Street. Two trucks waiting in traffic lanes. No room for an additional truck in the Berth 2 and 3. Heavy traffic back up on East 71st Street.

Exhibit 15 Photo taken from the pedestrian overpass looking north at the East 71st Street exit ramp.

Exhibit 16 East 70th Street. Loading Bay no 4 with 8 foot clearance and blocked entrance.

Exhibit 17 Esplanade, looking south from the foot of the East 71st Street pedestrian ramp.

Exhibit 18 Esplanade, looking north from just north of the East 71st Street pedestrian ramp.

Exhibit 19 Elderly patients and individuals enjoying the Park at the end of 72nd Street.

MEMORANDUM

To: Robert Dobruskin

From: Jennifer Kao

CC: Celeste Evans, Joshua Laird, Colleen Alderson

Date: June 26, 2008

Subject: Hospital for Special Surgery – Expansion Project

Parks has reviewed the Draft Environmental Impact Statement (DEIS) for the above-referenced project. Pages 1-17 and 5-6 of the DEIS state that in the event that the East River Esplanade is closed for longer than six months, mitigation measures would be explored in consultation with Parks between the Draft and Final EIS to develop suitable measures to offset the temporary closure of public open space—please note that we have not yet discussed mitigation measures to offset the closure of the esplanade beyond six months and request that this dialogue take place before the FEIS is published. Please find our more specific comments on the DEIS below.

1-16. Open Space
The text in the second paragraph should clarify that the proposed project is decreasing the nonresidential daytime passive open space ratio from 0.154 acres per 1,000 workers, which above City Planning's guideline of 0.15 acres per 1,000 workers, to 0.139 acres per 1,000 acres, which is below City Planning's guideline.

5-3-5-4, 5.3.1. Inventory of Open Space Resources
The second paragraph should specify that the public plazas are privately-owned publicly accessible plazas. The last paragraph should include information regarding the condition and use level of each of the open spaces described.

5-7, Table 5-2 Open Space Inventory
The Table should include information regarding the condition and use level of each of the open spaces listed. Please add basketball and handball courts to the list of features for John Jay Park.

5-7, 5.5.2. Quantitative Analysis – Indirect Impacts
The text should clarify that the proposed project is decreasing the nonresidential daytime passive open space ratio from 0.154 acres per 1,000 workers, which above City Planning's guideline of 0.15 acres per 1,000 workers, to 0.139 acres per 1,000 acres, which is below City Planning's guideline.

5-9, Table 5-4 Summary of Existing, With, and Without the Proposed Project

The title of this table should be changed to "Adequacy of Open Space Resources" or another title—the current one appears to be missing some text. Additionally, City Planning's guidelines for each of the open space ratios should be added to the table.

6-2-6-3, 6.3 The Future With the Proposed Project - 2010
The text for each of the analysis periods should describe the affected features as recommended in the CEQR manual.

20-2, 20.2.2 Platform Construction
The text should mention the platform support columns and their associated impacts.

20-3, 20.5.1 Land Use
The third sentence states that the construction of the River Building may require closure during certain unsafe construction activities—Chapter 5 and it's our understanding that the esplanade will be closed during certain periods of construction!

20-4, 20.5.4 Open Space
The first sentence is inaccurate and contradicts the second sentence.

Re: Hospital for Special Surgery Expansion
CEQR No. 05DCP061M

Dear Ms. Evans:

This firm has recently been retained by the residents of the Edgewater Building, located at 530 East 72nd Street (the "Edgewater"), to monitor, assess and comment upon the above-referenced application ("Application"). To date, we, along with other interested members of the public, have not been granted access to the relevant file (the "Record").

Respectfully, it is incumbent upon the City Planning Commission ("CPC") to postpone the July 2nd hearing, and extend the corresponding July 14th written submission deadline, until interested stakeholders can have a full and fair opportunity to access the pertinent Record, and thoroughly review its contents. Alternatively, we would request that the CPC commit in advance to hold the public hearing open until after such records are available.

As you know, public notice of the July 2nd hearing appeared in the New York Times on June 17, 2008. See 6 N.Y.C.R.R. § 617.12(a). On Friday, June 20, 2008, an attorney in this firm telephoned Robert Dobruskin, Director of the Department of City Planning Environmental Assessment and Review Division, to gain access to the Record, and obtain copies of the full Draft Environmental Impact Statement ("DEIS"), and other substantive documents in the Record. One of the reasons for this request was to allow our experts to review the technical information in the Record prior to the July 2nd public hearing. Mr. Dobruskin, the listed contact person in the public notice, was out of the office. The outgoing message on his voicemail stated

that he was not due to return until July 1st. This is one day before the July 2nd hearing.

The message directed us to contact Deputy Director, James Morani, who was acting in Mr. Dobruskin's stead. After a brief discussion with Mr. Morani regarding accessing the Record, he directed us to contact Susan Wong, the Department of City Planning Librarian. We left a message for Ms. Wong regarding our request.

On Monday, June 23rd, Ms. Wong returned our call. She stated that we would have to file a formal request pursuant to New York's Freedom of Information Law ("FOIL") with the Records Access Officer, Wendy Niles. We immediately complied with this request via e-mail, a copy of which is attached. We also immediately telephoned and left a message for Mr. Morani, expressing our concern that a FOIL request was an overly burdensome procedure, considering the public hearing was scheduled for the following week.

Indeed, this entire process appears to violate both the letter and intent of Section 617.12 of the implementing regulations of the New York State Environmental Quality Review Act, providing that "[a]ll SEQRA documents ... must be maintained in files that are readily accessible to the public and made available upon request." 6 N.Y.C.R.R. § 617.12(b)(3). To date, Mr. Morani has not returned our telephone call, and Ms. Niles has still been unable to produce the full Record in response to our request.

Moreover, significant portions of the material contained in the DEIS on-line are illegible. It is impossible, for example, to identify measurements in the plans in order to obtain a meaningful understanding of the project's scope with any precision.

The hearing is less than a week away. Our experts, and the public in general, have been unable to review many of the documents supporting the DEIS contained in the Record. This includes the proposed site plans and surveys, analyses of potential impacts of the project submitted to other City Agencies, existing and requested special permits, and many other integral records that would provide the public with a basic understanding of the potential impacts of the project. It appears that the earliest we can expect to gain access to such documents will be upon the return of Mr. Dobruskin, which will be less than twenty four hours before the public hearing.

In order to ensure meaningful public participation, and the integrity of the review process, we would respectfully request that the CPC either postpone the July 2nd public hearing and extend the written submission deadline, or keep the public hearing open for further comment until *after* the public has had a reasonable opportunity to review the Record and process the pertinent information.

Respectfully,

Michael D. Zarin

Dear Ms. Niles,

Pursuant to the state open records act, I request access to, and copies of, the file regarding the draft environmental impact statement (CEQR No. 05DCP061M) regarding the Hospital for Special Surgery. The published notice of the public hearing on this matter states that the file is available for review.

I expect to pay no more than the statutory limit for duplication of the contract and any of its exhibits and appendixes.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act.

Thank you for your assistance.

Subject: Hospital for Special Surgery DEIS

Mr. Zarin:

I writing in response to your letter of earlier today.

The Draft Environmental Assessment Statement (DEIS) for the Hospital for Special Surgery Expansion (CEQR No. 05DCP061M) has been posted for public review on the Department of City Planning's website (www.nyc.gov/planning) since April 10, 2008.

Also, a hard copy of the DEIS is in the possession of our FOIL Officer, Ms. Wendy Niles, and is available for review in Room 2E of our offices at 22 Reade Street in Lower Manhattan. You, or a member of your staff, are welcome to view the document anytime on Monday afternoon. Please advise Ms. Niles of your estimated arrival time at 212-720-3208.

The record will remain open for ten days after the public hearing to receive comments on the DEIS.

Respectfully,

Re: **Hospital for Special Surgery Expansion**
CEQR No. 05DCP061M;
Comments on Draft Environmental Impact Statement

Dear Chairperson Burden and the Honorable Members of the Planning Commission,

On behalf of the many residents of East 72nd Street, I enclose petitions signed by over 200 individuals residing at 541, 530 and 520 East 72nd Street objecting to the Hospital for Special Surgery's proposed expansion plan.

I also enclose letters written to you by neighborhood residents who are concerned about pedestrian safety, additional traffic, increased congestion, loss of the unique views of the historic Queensboro Bridge, parkland alienation and the negative impact to light, air and privacy that will result if the Hospital's Application is granted.

We believe the Hospital has alternatives to this invasive proposal. We respectfully ask you to deny the application for special permits in its present form because it does not comply with the criteria for development in a residential neighborhood. If the Hospital is serious about its expansion proposal, it needs to truly engage the impacted community and explore reasonable design and other alternatives.

Respectfully submitted,

Dennis Alex

To: City Planning Commission:

Several years ago my husband who had a heart condition suddenly lost his breath and required immediate medical attention. I called his heart specialist who advised me to take him to Mt. Sinai Hospital immediately. It was early morning and I found a cab parked near the building. As we proceeded up 72 Street I noticed heavy traffic on York Avenue. Desperate I suggested to the driver to climb the sidewalk and proceed slowly and carefully until we could traverse the street. I assured him that this was an emergency and I would take responsibility for the action. Fortunately we broke through and my husband arrived in time for special treatment.

Since then the traffic situation has worsened by a multiple of at least ten. During the past two weeks I could not traverse York Avenue in a straight line at least four times. I could only make my way by circuitously moving around cars that were constantly shifting position.

Hospital authorities are being at the least disingenuous and at the worst deceitful when they claim their proposed project does not constitute a serious threat to the residents of this area.

I ask you please to give this dimension considerable weight as well as others in your deliberations

Thank you.

Sincerely yours,

Norma Pace

To The City Planning Commission:

We feel compelled to communicate to you an overwhelming sense of vulnerability brought about by the proposed aggressive expansion by the Hospital for Special Surgery (HSS). This is a residential neighborhood, where many people at all stages of life live amongst giant medical centers. HSS has already built a large Hospital over the FDR Drive. HSS now has designs for a new outpatient center to be built over the FDR Drive at 71st Street. Their plans exhibit a callous disregard for its neighbors in this community. We understand that hospitals have the right to expand as need for their services increases. It is very clear, after hearing their sales pitch to inhabitants of 530 E 72nd Street, that the hospital has not duly explored other options for alternative sites for outpatient services. It isn't operating rooms or hospital beds they lack. It is office space that can be placed anywhere in this community.

The Hospital for Special Surgery does not serve this community at large. Their patients are, for the most part, those affluent enough to afford their services. Most folks in the neighborhood can not supplement their insurance coverage to afford HSS's services. They do not provide emergency care for fractures or dislocations. Clearly they want offices with nice views of the East River to court the well heeled patients whom they primarily serve. They could modify their building named Caspary on 71st and FDR for this purpose. Moreover, there is alternative office space that can be found within walking distance of their hospital in this neighborhood.

The Hospital for Special Surgery does not have a realistic grasp of the consequences of their expansion on the added traffic congestion they will bring onto this area's already overtaxed streets and access roads to the Drive. I have lived and worked in this part of the city for 32 years, and know how overtaxed the entry and exit to the FDR is at 73rd and 71st Street, with many near misses and several accidents each year. Moreover, the FDR Drive is in a bad state of repair and needs prompt attention and work to keep it from falling apart further. Repair to this very popular and vital road should be a pre-requisite before licensing more building to occur. To hide the FDR under more buildings is to shun our responsibilities for maintaining the inner structure of one of the major thoroughfares of our city. Subsequent deterioration of the Drive will not be easy to spot and may not be carried out appropriately within the constraints of overhead buildings.

The noise pollution, the terrible air quality and increase in the number of rodents that will follow excavation in this neighborhood will represent a serious health hazard to all of us. Moreover, this neighborhood is terrified by yet more cranes going up about us with the potential for lethal danger we have seen displayed twice this year.

HSS will be building right next to the windows of the inhabitants of 530 East 72nd Street, permanently leaving many people without sunlight. And many more will see the value of their investments in their apartments plummet. There are many older folks in this building who will watch their nest egg disappear.

We all feel vulnerable and will suffer harm without compensation if this project is allowed to continue at the large scale that is proposed. HSS has to be advised to review other options. If no other options are available, which we doubt is true, they must be asked to tone down the massive monolith they are proposing. This is a community. This is a neighborhood. In a community there has to be a limit to the size an institution, no matter how wealthy, can be allowed to expand. They can rebuild Caspary at savings that will keep their renovation costs down. Moreover, less people will be irreversibly compromised by unnecessary expansion.

Finally, I see no reason that the City of New York should give special privileges to the Hospital for Special Surgery's Aggressive Expansion Plans. This Hospital serves the wealthy and the elite. It does not serve most New Yorkers. Accordingly, HSS should not be given license for aggressive expansion at the cost and risk of the citizens in this neighborhood

Sincerely,

Kathleen Sosa

New York City Planning Commission
New York, NY

Dear Ladies and Gentlemen:

The purpose of this letter is to express my serious concerns and disapproval of the Hospital for Special Surgery's proposed building plans for the 12-story River Building over the FDR Drive.

I strongly believe that this addition would have a negative impact on the neighborhood on several levels: traffic congestion, an adverse effect on the property values for many local residents and environmentally.

Currently, the weekday traffic, especially during peak hours, is already very congested on York Avenue between 68th and 73rd Streets. As both a driver and a passenger heading west from my residence at 530 East 72nd Street there have been many mornings when I've had to wait through several traffic light cycles to be able to pass through the intersection of 72nd Street and York Avenue. There have also been many times when there were extensive delays entering the FDR from East 73rd Street due to traffic backed up heading west on East 71st Street between the FDR and York Avenue. Frankly, this area is often a mess and I can only see this problem worsening with the addition of the River Building. If streets are closed during construction this will surely be a disaster.

Constructing a 12-story building above the FDR Drive at 71st Street will obscure the south East River views for the majority of residents in my building. This is highly detrimental to property values as well as mental and psychological health. Light will be diminished and the beautiful river views, a most compelling reason for purchasing in this building, will be lost. This is devastating.

With 464 more employees we have to assume that some portion may not use public transportation; there will also be more patients and visitors, thus more traffic. Environmentally, more traffic leads to more pollution.

While I definitely have a very favorable opinion of the Hospital for Special Surgery and highly value their service, I do not wish to see this particular expansion and most definitely the negative impact it will have on this neighborhood and my building.

Thank you for taking the time to read my letter and consider my opinion.

Very truly yours,

Madelyne Gray

New York City Planning Commission
New York, New York

Dear Commission Members,

I am an owner and resident of 530 East 72nd Street. The proposed construction for the Hospital of Special Surgery is a great hardship to our block.

Many mornings I have taken a cab on 73rd Street in order to get on the FDR to get to work. It has been backed up for at least five minutes at an additional cost of three dollars due to the back up on East 71st Street and the FDR. This backup is due to the unloading and loading of trucks at HSS. Constuction for the new HSS building will make it even worse.

In addition, every morning, my neighbors and myself walk our dear dogs at the 72nd Street Overpass Park. The Hospital proposed building and construction time will take away the beautiful views that we presently see. During the lunch hour many people, including those who work at HSS, sit on the park benches and enjoy the view. Those senior citizens who reside at Mary Manning Walsh also spend time enjoying the outdoors in our park. This will be lost with the proposed construction.

I understand that the construction will close the esplanade which I and many of my friends use daily for our walk/runs and needed exercise. The Mayor is proposing the greening of the land by the East River. How can this be when we are losing our part of it? We have enough stress in the city with the economic conditions in this country and cost of living skyrocking. We need our homes to remain in tact with the views and sunlight we presently enjoy.

I urge the City Council not to approve HSS's plans for expansion next to us and over the FDR. Please understand that a city is made up of its people and we the people on East 72nd Street will suffer great losses if this terrible construction comes into fruition.

Sincerely,

Felice Schwartzman

New York, NY 10021

Amanda M. Burden, Chairman of the Board
Department of City Planning
22 Reade Street
New York, NY 10007

We are writing this letter to voice our opposition to the currently proposed Hospital for Special Surgery (HSS) expansion project. On June 9, 2008, at the prior request of the President of our building (530 East 72nd Street), representatives from HSS gave a presentation to our building's board of directors and stakeholders regarding their future expansion project. As a long-time resident of 20+ years and a member of the board of directors, we understand the dynamics of this neighborhood. While HSS may have the need for another building, we feel that not enough prudence has been applied to their current design plans and building locations.

HSS's current design plans place their building within 6 inches of our lot line, which will cause numerous issues with our building. The proposed height of 13 feet per floor will cause their structure to completely obstruct sunlight and ventilation to the rear of our building. The lower quarter of their proposed building, which matches to approximately the 12-14 floor level of our building (we have10 foot floors), will be built to within 6 inches of the adjacent apartments, causing those apartments to suffer irreparable loss of property value. Furthermore, the tenants of those apartments will be required to replace the now clear glass windows with wire reinforced (generally semi opaque) fire lot line windows at their own expense. This combined with the loss in property value is a terrible price to pay simply in the name of progress.

HSS claims that they have performed "environmental" impact studies on traffic, air quality, shadows, and noise, on the time surrounding the construction period and beyond; however, their findings as presented at the meeting claimed that there will be no impact of these environmental parameters on the neighborhood or it's residents. This claim is terribly flawed for a variety of reasons. First and foremost, many of the residents of these buildings are elderly and children who may be more prone to suffering illness due to poor air quality. Secondly, HSS claims that they will have the authority to build between the hours of 12AM and 5AM (over the FDR Drive) as allowed by the City of New York. This is in addition to the 7AM to 6PM allowance for regular construction, setting the stage for possible 24-hour construction noise and congestion. Thirdly, traffic on the 71st street exit of the Harlem River drive is already very congested during midday hours.

Gwen and Paul Mavrovic
530 east 72 Street apt 17a
New York, NY 10021

Closing / diverting the exit will cause further gridlock at the 63rd and 96th street exits. In fact, on a daily basis the traffic on the exit ramp from 73rd street to 71st street is frequently backed up severely due to delivery trucks double-parked in front of the Hospital. Side effects of the slow traffic conditions are accidents on or near the exit ramp for 71st street that further exacerbate the situation. It frequently takes me more than 10 minutes to go from the 71st street exit ramp to the entrance of 72 street and York avenue due to the excessive traffic along the exit thoroughfare. These issues along with the planned Congestion Pricing proposals would cause further gridlock long the east side if the traffic on the 71 street exit was further impeded by the HSS project.

Lastly, the issue of safety should be carefully considered in light of several crane collapses that have already taken place in New York City in the past few months. The planned use of a crane on a barge in the East River will increase the possibility of an accident on the FDR drive while lifting steel to the HSS expansion project.

When we posed a question to the HSS representatives regarding why HSS did not consider building southward down the FDR drive next to the existing building, the response was that "there is an air rights issue in that direction". It appears that the only air rights they would be imposing upon would be their own. Our perception is that they would rather impose hardship on someone else's quality of life than inconvenience themselves to any great degree.

Another interesting question that comes to mind is: Why not build the proposed building so that it is connected to the current HSS building on the FDR drive now? In our opinion, by connecting the new building to their old building, HSS could easily build over the drive and not cause any harm to the residential buildings in the area. Please note that the current HSS design allows for ample room and preservation of river views between their own buildings quite certainly at our expense.

Overall, HSS seems to think that we should simply accept the environmental and financial burden of the project. To allow HSS to start the construction of this new building as it is currently planned will potentially destroy our homes and our quality of life. We sincerely hope that HSS's proposed design plans and environmental impact study can at least be carefully reviewed prior to the start of construction to possibly offer a reasonable compromise for those affected.

Regards,

Mr. Paul Mavrovic
Dr. Gwen Levy Mavrovic

SARAH DUDLEY PLIMPTON
541 EAST 72ND STREET
NEW YORK, NY 10021

Amanda M. Burden. Commissioner
New York City Dept. of Planning
22 Reade Street
New York, NY 10007-1216

July 2, 2008

Dear Commissioner Burden:

My name is Sarah Plimpton and I live at 541 East 72nd Street. There are fifty apartments in my building and due to the date and time of this meeting, my neighbors cannot be present to address this panel. So, they have asked me to represent them. I have also spoken to dozens of residents in this neighborhood who have asked me to speak for them as well.

Let me give you a picture of what it is like to live in this neighborhood. ***Since the mid-eighties, the residential and commercial capacity of this block has increased ten-fold.*** There used to be five apartment buildings and several loft warehouses which housed local artisans. That neighborhood is long gone. Now, we have three new 50-story towers and the Sotheby's headquarters added to this once-quiet residential block. On a dead-end street, no less! These high-rise towers house medical facilities and offices dedicated to the New York Hospital/Cornell/Special Surgery complex. The surrounding blocks are much the same, causing traffic on York Avenue to be gridlocked from eight in the morning until six or seven in the evening on weekdays. On any given day, this dead-end block is also gridlocked with Sotheby's trucks, taxis, private cars, buses and ambulances delivering and waiting for patients, medical personnel and high rise residents. Taxis regularly refuse to drive down this block because of the hospital congestion. Yesterday afternoon it took me twenty minutes to drive down the block.

Seventy-first street has conditions identical to Seventy-second, but in addition, it serves as a traffic exit off the FDR Drive and the loading zone for Sotheby's, Special Surgery, and all of the New York Hospital/Cornel complex. At any given time, it can take up to twenty minutes to enter the FDR at 73rd Street due to the backup from trucks loading on 71st Street. I regularly take cabs downtown and it is faster to drive up to 79th Street to enter the FDR than it is to enter on 73rd Street. If you check with the local precinct, they will confirm that there are at least ***two to three rear-end accidents in this two-block stretch every day***. I know, my apartment sits directly over the area in question and I hear the braking, crunch of metal and attendant sirens all day and night, not to mention the honking of horns from backup and accidents on the service road. Do you really want to add to this kind of congestion?

At the end of 72nd Street overlooking the East River, there is a small park which provides some relief from the congestion and over-use of this neighborhood. The nearest public park is five blocks north, also on the FDR Drive. This park is heavily used on a daily basis by neighborhood residents as well as hospital employees, patients, and nearby nursing home residents. Until the first Special Surgery building was erected over the FDR in the early 1990s, residents could sit in that park and catch a breeze off the river on a hot summer night or watch the Macy's fireworks on the Fourth of July all the way down the river on 34th Street. Today, that panorama is almost completely gone. The proposed construction will close off the river to the south and obliterate the view of the 59th Street bridge. The view of that bridge today, I might add, is mostly blocked by a depressing institutional box, discolored grey by the soot from the FDR, reminiscent of sixties-era Soviet architecture. Although the report states that the buildings will not cast a shadow on the park, it fails to take into consideration ***the vast expanse of wall that will close off the river panorama forever.***

All over Manhattan, city planners have made the laudable effort to reclaim waterfront access and provide a better quality of life for city residents. Why not here where the population density is so high? Does this neighborhood really need another tower blocking the river and snarling traffic even more than the current mess? Surely the Hospital for Special Surgery can find a better location for their support services.

Sincerely,

Sarah Dudley Plimpton

cc 72 River Tenants Association

July 2008

CITY PLANNING COMMISSION:

As a resident of 530 E. 72nd St., I am writing to urge you to REJECT the proposed plans by the Hospital for Special Surgery to build an 18-story building for out-patient services on E. 71st St. over the FDR Drive.

These plans should be disapproved because:

- The RIVERFRONT SHOULD BE PRESERVED for all to enjoy. Many people stroll to the end of E. 72nd St to enjoy the river views, which will be greatly obscured by this construction project. It will also interfere with the river walkway, which is used by many New Yorkers.

- The east 70s is primarily a RESIDENTIAL AREA, and many who purchased homes here did so to enjoy the river views. The constant construction by the Hospital for Special Surgery and New York Hospital is creating an industrial complex that is changing the residential character of the neighborhood. Does the city really want industrial complexes over the FDR and along the riverfront of Manhattan?

- The construction project will cause TRAFFIC HAVOC on the FDR. Traffic already frequently backs up on the FDR for people exiting onto E. 71st street. The hospital's claim that it takes only 1 minute to exit onto 71st street and York Av. is incorrect. On average, it takes 12 minutes. The construction of this building over the FDR will shut down automobile traffic and cause additional havoc on one of the city's major roadways.

- There is an ALTERNATIVE, which will preserve the riverfront. The Hospital for Special Surgery could locate the outpatient services it plans for this new 18-story building by buying the apartments in their own Belaire building, which can be accessed from both E. 71st and E. 72nd streets, as well as other buildings in the city.

Thank you for your consideration of this request.

Sincerely,

John Asiel
530 E. 72nd Street
New York, NY 10021

TO: CITY PLANNING COMMISSION July 10, 2008

In recent years this East 72nd Street neighborhood has endured endless construction and deconstruction of hospital, industrial and residential buildngs. The area has been overwhelmed with traffic, noise, dirt, air pollution and more pedestrians than the sidewalks can accommodate. Several times every day traffic on York Avenue and intersecting streets grinds to a complete halt. Trucks, busses, taxis, private cars, limos, ambulances and ambulettes are stuck, spewing exhaust fumes and endangering lives.

Now, Hospital for Special Surgery has plans to add floors to an already existing building, and construct yet another facility over the FDR drive. This will greatly increase all the problems and disturbances I have listed above. The neighborhood simply cannot sustain these HSS additions.

Please review this proposed project with great care and consider the adverse impact it would have on the area and its people. Surely HSS could find another site – one that would be less destructive to its surroundings.

Please do no let this project go forward. Thank you for your thoughtful attention to this serious matter.

Adele Paroni
530 East 72nd Street

From: Geraldine Baff <gbaff31@gmail.com>
Subject: **Hospital of Special Surgery Expansion**
Date: July 11, 2008 8:56:48 AM EDT
To: City Planning Commission

As a resident of the Edgewater Apartments I wish to express my deep concern as to the Hospital of Special Surgery's imminent plans to further their continuing expansion of the hospital complex, much to the detriment of our living space.

The lovely cul-de-sac that services so many, including the children from the Ronald McDonald House , the elderly from Mary Manning Walsh Nursing Home who a re wheeled down to observe the water, boats and view, as are many others children, and people from the area to simply enjoy the peaceful atmosphere.

Another consideration to take into your approval of this expansion is the increase in lack of parking for all these additional patients and visitors, no parking facilities are being planned for. Then there is also the noise and pollution. A very important concern is the recent building disasters surrounding the construction industries lack of supervision of their equipment. The increase in traffic is another problem, York Ave. is now a total mess, dangering pedestrians, especially the elderly, as well as motorists. Closing the exit at 71st on the drive will be an awful decision.

Not all so-called improvements are beneficial to everyone concerned. Please take all of these above comments into your careful decision before voting.

Respectfully yours, Geraldine Baff

This is highly detrimental to property values as well as mental and psychological health. Light will be diminished and the beautiful river views, a most compelling reason for purchasing in this building, will be lost. This is devastating.

With 464 more employees we have to assume that some portion may not use public transportation; there will also be more patients and visitors, thus more traffic. Environmentally, more traffic leads to more pollution.

While I definitely have a very favorable opinion of the Hospital for Special Surgery and highly value their service, I do not wish to see this particular expansion and most definitely the negative impact it will have on this neighborhood and my building.

Thank you for taking the time to read my letter and consider my opinion.

Very truly yours,

Madelyne Gray

July 13, 2008

New York City Planning Commission
New York, New York

Dear Commission Members,

I am an owner and resident of 530 East 72nd Street. The proposed construction for the Hospital of Special Surgery is a great heartship to our block.

Many mornings I have taken a cab on 73rd Street in order to get on the FDR to get to work. It has been backed up for at least five minutes at an additional cost of three dollars due to the back up on East 71st Street and the FDR . This backup is due to the unloading and loading of trucks at HSS. Constuction for the new HSS building will make it even worse.

In addition, every morning , my neighbors and myself walk our dear dogs at the 72nd Street Overpass Park. The Hospital proposed building and construction time will take away the beautiful views that we presently see. During the lunch hour many people, including those who work at HSS, sit on the park benches and enjoy the view. Those senior citizens who reside at Mary Manning Walsh also spend time enjoying the outdoors in our park. This will be lost with the proposed construction.

I understand that the construction will close the esplanade which I and many of my friends use daily for our walk/ runs and needed exercise. The Mayor is proposing the greening of the land by the East River. How can this be when we are losing our part of it? We have enough stress in the city with the economic conditions in this country and cost of living skyrocking. We need our homes to remain in tact with the views and sunlight we presently enjoy.

I urge the City Council not to approve HSS's plans for expansion next to us and over the FDR. Please understand that a city is made up of its people and we the people on East 72nd Street will suffer great losses if this terrible construction comes into fruition.

Sincerely,

Felice Schwartzman

Amanda M. Burden, Chairman of the Board
Department of City Planning
22 Reade Street
New York, NY 10007

We are writing this letter to voice our opposition to the currently proposed Hospital for Special Surgery (HSS) expansion project. On June 9, 2008, at the prior request of the President of our building (530 East 72nd Street), representatives from HSS gave a presentation to our building's board of directors and stakeholders regarding their future expansion project. As a long-time resident of 20+ years and a member of the board of directors, we understand the dynamics of this neighborhood. While HSS may have the need for another building, we feel that not enough prudence has been applied to their current design plans and building locations.

HSS's current design plans place their building within 6 inches of our lot line, which will cause numerous issues with our building. The proposed height of 13 feet per floor will cause their structure to completely obstruct sunlight and ventilation to the rear of our building. The lower quarter of their proposed building, which matches to approximately the 12-14 floor level of our building (we have10 foot floors), will be built to within 6 inches of the adjacent apartments, causing those apartments to suffer irreparable loss of property value. Furthermore, the tenants of those apartments will be required to replace the now clear glass windows with wire reinforced (generally semi opaque) fire lot line windows at their own expense. This combined with the loss in property value is a terrible price to pay simply in the name of progress.

HSS claims that they have performed "environmental" impact studies on traffic, air quality, shadows, and noise, on the time surrounding the construction period and beyond; however, their findings as presented at the meeting claimed that there will be no impact of these environmental parameters on the neighborhood or it's residents. This claim is terribly flawed for a variety of reasons. First and foremost, many of the residents of these buildings are elderly and children who may be more prone to suffering illness due to poor air quality. Secondly, HSS claims that they will have the authority to build between the hours of 12AM and 5AM (over the FDR Drive) as allowed by the City of New York. This is in addition to the 7AM to 6PM allowance for regular construction, setting the stage for possible 24-hour construction noise and congestion. Thirdly, traffic on the 71st street exit of the Harlem River drive is already very congested during midday hours.

Gwen and Paul Mavrovic
530 east 72 Street apt 17a
New York, NY 10021

Closing / diverting the exit will cause further gridlock at the 63rd and 96th street exits. In fact, on a daily basis the traffic on the exit ramp from 73rd street to 71st street is frequently backed up severely due to delivery trucks double-parked in front of the Hospital. Side effects of the slow traffic conditions are accidents on or near the exit ramp for 71st street that further exacerbate the situation. It frequently takes me more than 10 minutes to go from the 71st street exit ramp to the entrance of 72 street and York avenue due to the excessive traffic along the exit thoroughfare. These issues along with the planned Congestion Pricing proposals would cause further gridlock long the east side if the traffic on the 71 street exit was further impeded by the HSS project.

Lastly, the issue of safety should be carefully considered in light of several crane collapses that have already taken place in New York City in the past few months. The planned use of a crane on a barge in the East River will increase the possibility of an accident on the FDR drive while lifting steel to the HSS expansion project.

When we posed a question to the HSS representatives regarding why HSS did not consider building southward down the FDR drive next to the existing building, the response was that "there is an air rights issue in that direction". It appears that the only air rights they would be imposing upon would be their own. Our perception is that they would rather impose hardship on someone else's quality of life than inconvenience themselves to any great degree.

Another interesting question that comes to mind is: Why not build the proposed building so that it is connected to the current HSS building on the FDR drive now? In our opinion, by connecting the new building to their old building, HSS could easily build over the drive and not cause any harm to the residential buildings in the area. Please note that the current HSS design allows for ample room and preservation of river views between their own buildings quite certainly at our expense.

Overall, HSS seems to think that we should simply accept the environmental and financial burden of the project. To allow HSS to start the construction of this new building as it is currently planned will potentially destroy our homes and our quality of life. We sincerely hope that HSS's proposed design plans and environmental impact study can at least be carefully reviewed prior to the start of construction to possibly offer a reasonable compromise for those affected.

Regards,

Mr. Paul Mavrovic

NEW YORK, NY 10021

Amanda M. Burden. Commissioner
New York City Dept. of Planning
22 Reade Street
New York, NY 10007-1216

July 2, 2008

Dear Commissioner Burden:

My name is Sarah Plimpton and I live at 541 East 72nd Street. There are fifty apartments in my building and due to the date and time of this meeting, my neighbors cannot be present to address this panel. So, they have asked me to represent them. I have also spoken to dozens of residents in this neighborhood who have asked me to speak for them as well.

Let me give you a picture of what it is like to live in this neighborhood. ***Since the mid-eighties, the residential and commercial capacity of this block has increased ten-fold.*** There used to be five apartment buildings and several loft warehouses which housed local artisans. That neighborhood is long gone. Now, we have three new 50-story towers and the Sotheby's headquarters added to this once-quiet residential block. On a dead-end street, no less! These high-rise towers house medical facilities and offices dedicated to the New York Hospital/Cornell/Special Surgery complex. The surrounding blocks are much the same, causing traffic on York Avenue to be gridlocked from eight in the morning until six or seven in the evening on weekdays. On any given day, this dead-end block is also gridlocked with Sotheby's trucks, taxis, private cars, buses and ambulances delivering and waiting for patients, medical personnel and high rise residents. Taxis regularly refuse to drive down this block because of the hospital congestion. Yesterday afternoon it took me twenty minutes to drive down the block.

Seventy-first street has conditions identical to Seventy-second, but in addition, it serves as a traffic exit off the FDR Drive and the loading zone for Sotheby's, Special Surgery, and all of the New York Hospital/Cornel complex. At any given time, it can take up to twenty minutes to enter the FDR at 73rd Street due to the backup from trucks loading on 71st Street. I regularly take cabs downtown and it is faster to drive up to 79th Street to enter the FDR than it is to enter on 73rd Street. If you check with the local precinct, they will confirm that there are at least ***two to three rear-end accidents in this two-block stretch every day***. I know, my apartment sits directly over the area in question and I hear the braking, crunch of metal and attendant sirens all day and night, not to mention the honking of horns from backup and accidents on the service road. Do you really want to add to this kind of congestion?

At the end of 72nd Street overlooking the East River, there is a small park which provides some relief from the congestion and over-use of this neighborhood. The nearest public park is five blocks north, also on the FDR Drive. This park is heavily used on a daily basis by neighborhood residents as well as hospital employees, patients, and nearby nursing home residents. Until the first Special Surgery building was erected over the FDR in the early 1990s, residents could sit in that park and catch a breeze off the river on a hot summer night or watch the Macy's fireworks on the Fourth of July all the way down the river on 34th Street. Today, that panorama is almost completely gone. The proposed construction will close off the river to the south and obliterate the view of the 59th Street bridge. The view of that bridge today, I might add, is mostly blocked by a depressing institutional box, discolored grey by the soot from the FDR, reminiscent of sixties-era Soviet architecture. Although the report states that the buildings will not cast a shadow on the park, it fails to take into consideration ***the vast expanse of wall that will close off the river panorama forever.***

All over Manhattan, city planners have made the laudable effort to reclaim waterfront access and provide a better quality of life for city residents. Why not here where the population density is so high? Does this neighborhood really need another tower blocking the river and snarling traffic even more than the current mess? Surely the Hospital for Special Surgery can find a better location for their support services.

Sincerely,

Sarah Dudley Plimpton

cc 72 River Tenants Association

July 2008

CITY PLANNING COMMISSION:

As a resident of 530 E. 72nd St., I am writing to urge you to REJECT the proposed plans by the Hospital for Special Surgery to build an 18-story building for out-patient services on E. 71st St. over the FDR Drive.

These plans should be disapproved because:

- The RIVERFRONT SHOULD BE PRESERVED for all to enjoy. Many people stroll to the end of E. 72nd St to enjoy the river views, which will be greatly obscured by this construction project. It will also interfere with the river walkway, which is used by many New Yorkers.

- The east 70s is primarily a RESIDENTIAL AREA, and many who purchased homes here did so to enjoy the river views. The constant construction by the Hospital for Special Surgery and New York Hospital is creating an industrial complex that is changing the residential character of the neighborhood. Does the city really want industrial complexes over the FDR and along the riverfront of Manhattan?

- The construction project will cause TRAFFIC HAVOC on the FDR. Traffic already frequently backs up on the FDR for people exiting onto E. 71st street. The hospital's claim that it takes only 1 minute to exit onto 71st street and York Av. is incorrect. On average, it takes 12 minutes. The construction of this building over the FDR will shut down automobile traffic and cause additional havoc on one of the city's major roadways.

- There is an ALTERNATIVE, which will preserve the riverfront. The Hospital for Special Surgery could locate the outpatient services it plans for this new 18-story building by buying the apartments in their own Belaire building, which can be accessed from both E. 71st and E. 72nd streets, as well as other buildings in the city.

Thank you for your consideration of this request.

Sincerely,

John Asiel
530 E. 72nd Street
New York, NY 10021

TO: CITY PLANNING COMMISSION July 10, 2008

In recent years this East 72nd Street neighborhood has endured endless construction and deconstruction of hospital, industrial and residential buildngs. The area has been overwhelmed with traffic, noise, dirt, air pollution and more pedestrians than the sidewalks can accommodate. Several times every day traffic on York Avenue and intersecting streets grinds to a complete halt. Trucks, busses, taxis, private cars, limos, ambulances and ambulettes are stuck, spewing exhaust fumes and endangering lives.

Now, Hospital for Special Surgery has plans to add floors to an already existing building, and construct yet another facility over the FDR drive. This will greatly increase all the problems and disturbances I have listed above. The neighborhood simply cannot sustain these HSS additions.

Please review this proposed project with great care and consider the adverse impact it would have on the area and its people. Surely HSS could find another site – one that would be less destructive to its surroundings.

Please do no let this project go forward. Thank you for your thoughtful attention to this serious matter.

Adele Paroni
530 East 72nd Street

From: Geraldine Baff <gbaff31@gmail.com>
Subject: **Hospital of Special Surgery Expansion**
Date: July 11, 2008 8:56:48 AM EDT
To: City Planning Commission

As a resident of the Edgewater Apartments I wish to express my deep concern as to the Hospital of Special Surgery's imminent plans to further their continuing expansion of the hospital complex, much to the detriment of our living space.

The lovely cul-de-sac that services so many, including the children from the Ronald McDonald House , the elderly from Mary Manning Walsh Nursing Home who a re wheeled down to observe the water, boats and view, as are many others children, and people from the area to simply enjoy the peaceful atmosphere.

Another consideration to take into your approval of this expansion is the increase in lack of parking for all these additional patients and visitors, no parking facilities are being planned for. Then there is also the noise and pollution. A very important concern is the recent building disasters surrounding the construction industries lack of supervision of their equipment. The increase in traffic is another problem, York Ave. is now a total mess, dangering pedestrians, especially the elderly, as well as motorists. Closing the exit at 71st on the drive will be an awful decision.

Not all so-called improvements are beneficial to everyone concerned. Please take all of these above comments into your careful decision before voting.

Respectfully yours, Geraldine Baff

City Planning Commission
22 Reade St.
New York, N.Y.
July 2, 2008 Hearing

This statement is being made as a follow up to the City Planning Commission meeting to consider the HSS requests.

1. The traffic congestion in the neighborhood is impossible. Cars can't move easily. This does not take into account the new buildings that will open shortly (Weill-Cornell on York-70th St. and the new medical building on 1st Ave. & 72nd St.

2. It often takes 5-15 minutes to go from the 71st St. exit to my garage at 530 East 72nd St.

3. I have witnessed hundreds of accidents on the FDR going South between 72nd & 71st St. It appears the exit & the traffic congestion are the cause.

4. The hospital should consider alternatives to going over the FDR. They have alternatives but have chosen not to explore them

5. The hospital loading docks force trucks to stick out onto the street on 71st St. causing long delays getting off the FDR at 71st. St. The cause is the hospital has not complied with the requirements of a loading dock.

6. The current EIS is misleading, at the very least and the special permit issued to the hospital should be rescinded. The size of the existing loading docks does not comply with the requirements.

7. The Borough President has issued a Conditional approval which requires the HSS to work with the neighbors & the Edgewater has not been considered to date. The hospital should work with the Edgewater to come up with an alternative proposal to jointly satisfy regulatory issues and keep the community from being destroyed.

8.Congestion pricing will probably again be introduced and the 71st St. exit on the FDR will be adversely affected in a major way by increasing traffic as it is one of the last exits before the 60th Street cutoff.

9. I have asked for access to any responses HSS provides as a result of issues raised at the Public Hearing, and have been assured by the City Planning Commission that we will be give an opportunity to respond to the HSS written report.

10. I understand that the City Planning Commission is investigating the existing loading docks and may send staff members to review the size and conformity of the docks. We would appreciate an opportunity to review these findings.

11. The park on 72nd St. and the river will be affected in a major way from insufficient light which will affect huge numbers of people who use the park. They will no longer be able to view the 59th St. bridge as the new building will totally block it.

12. The suggestion by a City Planning Board commissioner of building in front of the Belaire is a very good start.

13. We welcome working with the HSS to come up with a comprehensive solution. The Borough President has stated that the hospital has to reach out to the community.

14. Hasty approval with a flawed plan to date could result in a dangerous outcome. Cranes are going to be used, accidents will increase and damage to the Edgewater could occur. The project is anticipated to be 2 inches from our building.

Thank you for your consideration.

Joel Hand

July 8, 2008

New York City Planning Commission
22 Reade Street
New York, N.Y.

Dear Commissioners;

It is with much sadness that I find an institution such as The Hospital for Special Surgery knowingly misrepresenting the facts in their bid for expansion. As a resident of 530 East 72nd Street, I am intimately aware of the traffic bottlenecks that result from HSS lacking proper loading dock space on East 71st Street.

The FDR Drive is consistently backed up from E.71 to the E.73 exit ramp and beyond. In the mornings when I take a taxi to work it is 10-15 minutes to get on the FDR southbound. This is almost always the result of trucks partially in or waiting to gain access to the one functioning loading dock at HSS.

This will only grow worse when the inevitable congestion pricing reaches fruition and the East 71st Street exit becomes the last "free" southbound exit to the FDR.

I believe it would be irresponsible to create a further deterioration of this situation by allowing a high rise out-patient facility to go up over the FDR Drive. The hospital is a business and its expansion should be tempered by its effect on the neighboring community. That HSS would knowing mis-represent to the Board that they have adequate loading docks and that their proposed expansion would not create significant increased traffic is shameful and should not be rewarded by the Boards approval.

Gentlemen,

I am writing regarding the proposed construction of an out patient facility by the Hospital for Special Surgery. The traffic and congestion in the area around 72nd St. and York Ave. are already intolerable and will be made much worse by the proposed influx of thousands of out patients coming both on foot and in cars - York Ave. and the side streets between 68th and 73rd St. are choked with traffic on weekdays. The situation is frustrating for motorists, dangerous for pedestrians and causes a great deal of air and noise pollution.

Please consider encouraging the hospital to use an alternate location for this proposed addition.

Sincerely,

Alain de la Chapelle, MD

July 9, 2008

New York City Planning Commission
22 Reade Street
New York City

Dear Commission,

I live in the Edgewater Apartments at 530 East 72nd Street. I am very disturbed by the proposed expansion of The Hospital for Special Surgery over the FDR Drive and to the lot line of our building. In fact, I spoke at a meeting in your offices concerning this matter.

Let me begin by saying that the officials of the Hospital came to our building for an explanation of the project. Their presentation was the most self- serving and evasive exercise, I have encountered in a long time. Their attitude was that this is a fait accompli and we have nothing to say. For them, the building over the Drive is an easy and inexpensive way of expanding their facility. Of course, they think that the City will back them completely because they will be creating new jobs and bringing business into New York. Of course, New York Hospital and Memorial Hospital have built many facilities in this area. They have accomplished the same goals without disturbing our neighborhood, consisting of many apartment houses on 72nd Street and the neighborhood park there. The Hospital for Special Surgery, like the other hospitals has deep pockets and can afford to buy property for development in another area. And most important, this new facility is for out patient care and doctor's offices, so it does not have to be connected to the main hospital Incidentally, the hospital has floors for these services plus a hotel in the adjacent apartment buildings.

Building their facility on our lot line will impinge on both the pr ivacy of the people in our building and the patients in theirs. Tenants here already can see into the hospital windows and vice- versa. Incidentally, there appears to be empty space in the hospital even now. And from an environmental point of view, it would be very bad since wind, especially when there is a nor easterwould be trapped between the buildings putting pressure on windows. And rain would also be trapped. Of course, sunlight would be eliminated just after Noon from 72nd Street and its park. No one could enjoy the park anymore. The little view toward the South, which exists now, would be totally eliminated.

As far as the traffic pattern is concerned, it would be a disaster . Coming off the FDR Drive on a week day can take as much as 20 minutes to get from the 73rd street exit to the traffic light at 71st street and York Avenue now . For a car or a taxi to discharge a patient at the Main Entrance of the Hospital now can be a nightmare of congestion, since 71st Street is often totally blocked with delivery trucks. And cars trying to get on the FDR Drive cannot do so because of all this blockage. Of course emergency vehicles and ambulances will be caught in this mess or have to go to 63rd Street and around. Also , because of the congestion on 70the Street delivery to New York Hospital is affected. Also, the NYH Emergency Room is there.

The East Side should take example from the West Side in blocking projects that interfere with life in the neighborhood i.e. the tower on the New York Historical Society building. The Westerners seem to be able to accomplish what the Easterners never seem to be able to do.

I believe I have covered this subject as thoroughly as I can and you will see that this project is ill advised. The goal of expanding The Hospital For Special Surgery can be accomplished in a much more satisfactory way.

Yours truly,

David Scal, M.D.

To: City Planning Commission
Subject: Hospital for Special Surgery Expansion Program, specifically "The River" building

The Hospital for Special Surgery presents any number of statements as facts which in fact may be otherwise. Community Board 8, impressed with these facts, passes the project along. The hospital's financial and legal assets are far greater than ours but we, the "little people" would like to be heard. And so, we are always playing defense.

1. I have lived in this apartment for almost nine years. Never during the day have I been able to access the East River Drive from 73rd Street without a considerable wait. The traffic from the Drive turning off to 71st Street spills over to the access road and we sit and wait until enough green lights move the traffic on 71st Street. And yet the hospital plans to fill this new building with hundreds of workers and hundreds of out patients each day. A very, very good reason not to ever consider building on this site.

2. The building will be so close to ours that there will be a complete loss of privacy. In addition the value of our apartments will greatly decrease. Both of these unpleasant conditions will deny that to which we are entitled in our building and which we presumed would be ours during our lifetimes.

3. Surely, there are other places nearby for the hospital to erect their building. That is exactly what they should do.

Dear Commissioners:

Subject: Draft Environmental Impact Statement (DEIS) for the HSS expansion proposal

I have been a resident of the Edgewater, 530 E. 72nd since 1970. I, along with many of my neighbors have indeed marveled at the transformation of E. 72 from York Ave. to the River, from a nondescript commercial area to a beautiful residential center of a community that is constantly improving.

The recommendation of the above draft statement (DEIS) submitted to the New York of City Planning, is full of half-truths and ignores the significant adverse effects of this project on the neighborhood. This includes health, well-being, and the enjoyment of the surrounding beautiful riverfront.

Would you please, after your investigation, do what is necessary to stop this project before it starts.

Sincerely yours,

Norman Barnett

7/9/08

New York City Planning Commission
22 Reade St.
N.Y., N.Y. 10021

Dear Commissioners:

Subject: Draft Environmental Impact Statement (DEIS-4/08) for HSS proposed expansion on E. 71st St

My husband and I have been residents of the Edgewater, 530 E. 72 St., since 1970. During this period we have watched this block—E. 72 from York Ave. to the East River—transformed from a bleak dead-end street to a beautiful cul de sac, ending with brick sidewalks, flowers, trees, public benches, London-style street lights, and a wide viewing area for any of the public to sit and watch the boats go by with an unobstructed sweep of the river, views both north and south. This area is a precious public space created by the City of New York for the enjoyment of its citizens . It provides a congenial area for people to sun, play with their dogs, lunch and bring their children to enjoy this unique view of river, boats, and at least six bridges in view. Elderly and handicapped people are routinely brought to this area, by surrounding nursing homes and hospitals, to enjoy the wonderful view and busy river traffic.

The Hospital of Special Surgery expansion proposal, recently submitted to the New York City Department of Planning (4/4/08) , outlines a plan which would destroy forever the E. 72 St cul de sac Park, and would have a significant adverse effect on the entire community. A brief review of the DEIS highlights just a few of these probable adverse effects:

*blocking of the riverfront views by obstructing the entire south sweep of the river and its landmark bridges;
*disrupting, for a minimum of six months, the riverside Esplanade between E.70th to E.73—interrupting the ability to walk, run, jog, push babies in strollers, etc along the river;
*destroying the unique pedestrian bridge over the FDR Drive to the Esplanade;
*creating noise control problems;
*creating serious, environmentally unsound ventilation and air pollution problems, caused by heavy traffic under the buildings day and night;
*significantly impacting the important "open space ratio";
*creating long shadows on the Esplanade and on the East River, caused by the additional tall buildings to be built over the Drive. As one example—the hours of sunshine on the Esplanade in the project area will be reduced from 10 hrs to 6 hrs on a typical summer day;
*opening up "hazardous materials" such as contaminated soil and ground water, due to an 1892 "garbage dump" being exposed, for the first time in over a century, by the construction. No one really knows the short and longterm impact on breathing.,as we remember the toxic air released into the air on 9/11.

These are just a few of the many significant adverse effects of this project on the community. And what does the HSS get in return? 28 beds! HSS has many other alternatives to meet their space needs, and these alternatives should be encouraged before we destroy precious and unique riverfront.

We would appreciate your prompt attention to this matter, and ask that you do everything possible to stop this bad idea before it is too late.

Sincerely yours,

Judith L. Barnett

"We, the undersigned, have grave concerns about the unmitigated proposal to build a major new building over the FDR. Although we recognize the laudable purpose of the Hospital for Special Surgery, we are concerned about the project's potential impacts upon:

- pedestrian use, public enjoyment, and light and air access for the FDR Esplanade and other public space between E. 69th and 72nd Streets, including One East River Park Place;
- the visual quality of the waterfront area; and
- traffic conditions in the area, including on E. 71st Street.

We urge the City Planning Commission to seek alternatives to the plan that will mitigate such impacts.

SAVE OUR PARK

We, the undersigned, strongly oppose the Hospital for Special Surgery's proposed construction of a 12-story building over the FDR Drive between 71st and 72nd Street.

In a *neighborhood already taxed to the limit* by hospital traffic, our small park overlooking the East River provides relief to hundreds of residents, patients, and hospital employees daily.

In 1994, Special Surgery construction over the FDR Drive at 71st Street destroyed much of the riverfront view with a hideous building.

Now, the Hospital for Special Surgery proposes to further wall in our park and block that entire panorama forever.

JULY 2, 2008
