ZONING MAP

THE NEW YORK CITY PLANNING COMMISSION

Major Zoning Classifications:
The numeric(s) and/or letter(s) that follows an R, C, or M District designation indicates use, bulk and other controls as described in the text of the Zoning Resolution.

- R - RESIDENTIAL DISTRICT
- C - COMMERCIAL DISTRICT
- M - MANUFACTURING DISTRICT
- SPECIAL PURPOSE DISTRICT
The numeric(s) and/or letter(s) that follows an S designation indicates the special purpose district as designated in the text of the Zoning Resolution.
- AREA(S) REZONED

Effective Date(s) of Rezoning:
08-08-2018 C-170350 7MA

Special Requirements:

For a list of rules subject to C.O.M. environmental requirements, see APPENDIX C.
For a list of lots subject to 70' restrictive dedications, see APPENDIX D.
For Individually Hearing designated and Mandatory/Inclusively Hearing green on this map, see APPENDIX F.

NOTE: Zoning information as shown on this map is subject to change. For the most up-to-date zoning information for this map, visit the Zoning section of the Department of City Planning website: www.nyc.gov/dcp/planning or contact the Zoning Information Desk at (212) 312-3531.

THE NEW YORK CITY PLANNING COMMISSION

Major Zoning Classifications:
The number(s) and/or letter(s) that follows an R, Q or M District designation indicates use, bulk and other controls as described in the text of the Zoning Regulation.

RESIDENTIAL DISTRICT

C = COMMERCIAL DISTRICT

M = MANUFACTURING; FICTITIOUS

SPECIAL PURPOSE DISTRICT
(The letter(s) within the shaded
area designates the special purpose
district as described in the text
of the Zoning Resolution.)

AREA(S) REFONET)

Effective Date(s) of Rezoning:

4-09-2019 C 1804B 2MM

Special Requirements:

For a list of lots subject to (L)GN environmental requirements, see appendix C.

For Inclusionary Housing designated areas and Mandatory Inclusionary Housing areas on this map, see APPENDIX F.

NOTE: Zoning information as shown on this map is subject to change. For the most up-to-date zoning information for this map, visit the Zoning section of the Department of City Planning website: www.nyc.gov/planning or contact the Zoning Information Desk at (212) 770-3261.

Metadata for Historical Zoning Maps:

Source:

These PDF maps were created from the set of past versions of each of the 126 zoning maps in the Technical Review Division's archive. This set includes map versions for each zoning map beginning with the original 1961 issue of the Zoning Resolution and ending with the current zoning map as posted in the Zoning section of the Department of City Planning website: www.nyc.gov/planning.

Scanning and Creation of Adobe PDF copies:

Maps in this archive from 1961 through Update #2 of the Zoning Resolution in 2003 are scans of actual printed zoning map. From Update #3 (2005) onwards, maps are direct PDF copies of the map revisions as printed in updates to the Zoning Resolution.

Notes on conversion of Amendment Numbers to CP (City Planning) or ULURP numbers:

On earlier zoning maps, an Amendment Number (e.g. A-629) is used to identify the area that has been rezoned. Commission reports and sketch maps for rezonings are referenced solely by CP or ULURP numbers. In order to request copies of reports or sketch maps it is necessary to know the CP or ULURP number. A conversion table (ANumber-CPNumberConversion.pdf) is available to translate the "A" numbers listed on the actual zoning maps to their corresponding CP or ULURP numbers. Use of the Amendment Number to identify zoning map changes has been discontinued.

Copyright:

These maps are copyrighted by the City of New York. This is indicated in the space below the map legend on each map.

FOIL #: 20-10-414
RE: 109 East 42nd Street, Manhattan, NY

Dear Mr. Nasiatka:

This will acknowledge receipt of your request for records under the Freedom of Information Law (FOIL), received by this office on October 26, 2020.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

A handwritten signature in black ink, appearing to read "Rosemarie Hewig". The signature is fluid and cursive, with a large initial "R" and "H".

Rosemarie Hewig, Esq.
Records Access Officer

Dear Adam:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 10/26/2020 and given the reference number FOIL #W074423-102620 for tracking purposes. You may expect the Department's response to your request no later than **11/24/2020**.

Record Requested: Phase I ESA Documents of Interest Phase I ESA Documents of Interest Phase I ESA Documents of Interest Any environmental documents that would be relevant pursuant a Phase I ESA including but not limited to: Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, drainage structure investigations, drainage structure remediation, environmental permitting and compliance, UST and AST records, tank investigations or removal reports, hazardous waste or petroleum storage/ records, etc for the following property: 109 East 42nd Street, Manhattan, NY (New York (Manhattan) Block 1280, Lot 30) the Site is currently occupied by the Grand Hyatt Hotel. The Site was historically the Commodore Hotel (circa 1919) which was renovated in 1990.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

RE: PUBLIC RECORDS REQUEST of 10/26/2020, Reference # W074423-102620

Date: 11/03/2020

Dear Mr. Adam Nasiatka,

I write in response to your Freedom of Information Law (FOIL) request seeking:

Phase I ESA Documents of Interest

Phase I ESA Documents of Interest Phase I ESA Documents of Interest Any environmental documents that would be relevant pursuant a Phase I ESA including but not limited to: Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, drainage structure investigations, drainage structure remediation, environmental permitting and compliance, UST and AST records, tank investigations or removal reports, hazardous waste or petroleum storage/ records, etc for the following property: 109 East 42nd Street, Manhattan, NY (New York (Manhattan) Block 1280, Lot 30) the Site is currently occupied by the Grand Hyatt Hotel. The Site was historically the Commodore Hotel (circa 1919) which was renovated in 1990.

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway, 14th Floor
Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at (718) 482-4912 and reference FOIL #W074423-102620, or simply reply to this email. Thank you.

Sincerely,

Region 2 FOIL Coordinator

Contact: Rachel Henke

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

| <u>Year</u> | <u>Scale</u> | <u>Details</u> | <u>Source</u> |
|-------------|--------------|----------------------------------|----------------------------------|

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Re: Summary of Sub-Slab Soil Vapor Investigation
Project Commodore
109 East 42nd Street, New York, New York
Block 1280, Lot 30

Dear Mr. Lowe:

Roux Environmental Engineering and Geology, D.P.C. (Roux) has prepared this letter on behalf of Commodore Owner LLC (referred to herein as "Commodore Owner") to summarize the results of the sub-slab soil vapor investigation in the basement of the Grand Hyatt Hotel of New York located at the above-referenced property (Site). The Grand Hyatt Hotel of New York has historically been identified as a Small Quantity Generator (SQG) of hazardous wastes. The waste codes identified were related to chlorinated solvents, which suggest the historical operation of dry cleaning at the Site. Dry cleaning operations involve the use of hazardous substances in their operation, and the release of these substances may negatively impact upon the environmental quality of the Site. While historic dry cleaning operations are believed to have occurred on the second level of the basement as noted on the Gruzen & Partners A-102 Lower Level 2 As-Built dated June 15, 1978 (not the lowest floor of the basement) and a release is not likely, Roux recommended that Commodore Owner investigate the quality of the sub-slab soil vapor at the Site as part of their due diligence.

A summary of the sub-slab soil vapor investigation and an analysis of the sampling results are provided in the sections below.

Sub-Slab Soil Vapor Investigation

Roux retained the services of Trinity Environmental Corp. (Trinity) of Deer Park, New York to complete the installation of the three soil vapor pins within the basement of the Grand Hyatt Hotel. On October 21, 2020, the three soil vapor points (SV-1 through SV-3) were installed using vapor pins at the locations shown on Figure 1. The vapor pins were installed by drilling through the concrete slab and placing a stainless-steel vapor pin into the borehole using a hammer drill and the manufacturer-provided vapor pin installation tool.

Following installation of each vapor pin, the integrity of each sampling point seal was checked via a helium gas tracer test. This step was conducted as a quality assurance/quality control (QA/QC) measure to verify that the soil vapor sample was not compromised by inadvertent introduction of ambient air into the sample. Soil vapor was purged from the point using an air pump calibrated to approximately 0.2 liters per minute while the sampling point was covered at the surface with a small enclosure that was partially filled with helium. The soil vapor discharging from the air pump and the air within the enclosure was continuously monitored for helium during purging. Helium was not detected from the sample tubing

greater than 10% of the helium detected in the enriched area (i.e., within the bucket); therefore, the helium tracer test verified the integrity of the surface seal of the vapor pin.

Prior to sample collection, each soil vapor point was purged of approximately three volumes of soil vapor using an air pump calibrated to approximately 0.2 liters per minute. The samples were collected using batch certified vacuum canisters equipped with laboratory-supplied, two-hour regulators. Vapor samples were analyzed for VOCs using USEPA Method TO-15.

Soil Vapor Sample Results

Results for the three soil vapor samples can be found on Table 1. Laboratory analytical reports are provided in Attachment 1.

All soil vapor samples contained detections of VOCs. Of the VOCs analyzed by the laboratory, only eight compounds have guidance values assigned by the New York State Department of Health (NYSDOH) for soil vapor and indoor air concentrations in decision matrices contained within the NYSDOH October 2006 (Rev. May 2017) Guidance for Evaluating Soil Vapor Intrusion (NYSDOH Guidance). The matrices provide guidance relative to carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, trichloroethene (TCE), tetrachloroethene (PCE), 1,1,1-trichloroethane, methylene chloride, and vinyl chloride.

Matrix A Compounds: carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, TCE

- Carbon tetrachloride, cis-1,2-dichloroethene, 1,1-Dichloroethene, and TCE were not detected in soil vapor.

Matrix B Compounds: PCE, 1,1,1-trichloroethane, methylene chloride

- PCE was detected in all three soil vapor samples ranging in concentration from 4.37 to 11.8 micrograms per cubic meter [$\mu\text{g}/\text{m}^3$].¹
- 1,1,1-Trichloroethane and methylene chloride were not detected in soil vapor.

Matrix C Compound: vinyl chloride

- Vinyl chloride was not detected in soil vapor.

The New York State Department of Environmental Conservation (NYSDEC) and NYSDOH do not currently have standards, criteria or guidance values for concentrations of petroleum compounds in soil vapor. Therefore, no comparative regulatory guidance values or cleanup concentrations are included in Table 1 for these compounds. There were low levels of petroleum VOCs including benzene, ethylbenzene, toluene, and xylene (BTEX), and 1,2,4- trimethylbenzene detected in one or more of the soil vapor samples.

Conclusion and Recommendations

The soil vapor results show detections of VOCs at each of the sampling locations. However, the concentrations detected do not warrant additional investigation according to NYSDOH Guidance.

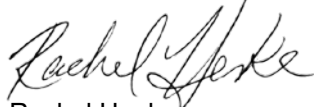

¹ The NYSDOH Soil Vapor/Indoor Air Matrix B recommends monitoring any points with PCE detections greater than 100 $\mu\text{g}/\text{m}^3$. Mitigative efforts are recommended if PCE concentrations exceed 1,000 $\mu\text{g}/\text{m}^3$.

Mr. Gregory Lowe

FIGURE

1. Soil Vapor Pin Locations

EAST 42ND STREET

1 SUBSURFACE EXPLORATION PLAN (LOWER LEVEL 3)
SCALE: 1"=10'

- GENERAL NOTES:**
- BACKGROUND FLOOR PLANS FOR GROUND LEVEL, LOWER LEVEL 1 AND 3 TAKEN FROM DRAWINGS T-102, T-101, T102 TITLED "EXISTING GROUND FLOOR PLAN", "EXISTING MEZZANINE FLOOR PLAN" AND "EXISTING PLATFORM FLOOR PLAN", BY SOM, RETRIEVED 23 APRIL 2020.
 - BACKGROUND FLOOR PLAN FOR LOWER LEVEL 2 TAKEN FROM DRAWING EX-099 TITLED "SUB-CELLAR", BY SOM, RETRIEVED 23 APRIL 2020.
 - BACKGROUND SURVEY INFORMATION TAKEN FROM A PLAN TITLED "TOPOGRAPHIC, BOUNDARY, AND UTILITY SURVEY" PREPARED BY LANGAN, LAST DATED AS A DRAFT ON 11 JULY 2019.
 - SURVEY INFORMATION FOR METRO NORTH LOWER AND UPPER LOOP TRACKS TAKEN FROM A SURVEY PERFORMED BY LANGAN TRANSMITTED AS AN ELECTRONIC FILE LAST DATED 23 SEPTEMBER 2019.
 - REFERENCES FOR SECTION OF LINE 7 T.A. STRUCTURE ON 42ND STREET TAKEN FROM A DRAWING TITLED "CROSS SECTION AT PLATFORM LEVEL" DRAWING NO T-12, NEW YORK TRANSIT SYSTEM CONTRACT A-30535.
 - APPROXIMATE ROCK CUT SHOWN ON THE NORTH OF THE PROPERTY TAKEN FROM RECORD DRAWINGS OF GRAND CENTRAL TERMINAL IMPROVEMENTS, PLAN TITLED "SURFACE PLAN 42ND TO 58RD STREET", DATED 14 AUGUST 1915.
 - ELEVATIONS SHOWN ON THIS PLAN ARE IN NORTH AMERICAN VERTICAL DATUM 1988 (NAVD88), WHICH IS 1.082 FT ABOVE NATIONAL GEODETIC VERTICAL DATUM 1929 (NGVD29), MEAN SEA LEVEL AT SANDY HOOK, NJ. 1929 REFERENCES FOR ELEVATIONS WERE RETRIEVED FROM AN ARCHITECTURAL SURVEY COMPLETED BY LEONARD J. STRANDER AND ASSOCIATES, DATED 10 AUGUST 2017.

- GEOTECHNICAL DRILLING NOTES AND PROCEDURES:**
- CONTRACTOR TO PLACE "ONE CALL" FOR UTILITY MARKOUT PRIOR TO DRILLING.
 - DRILLING WILL BE PERFORMED FROM THE EXISTING BUILDING SLABS USING A PORTABLE ELECTRIC DRILL RIG.
 - STEEL CASING (4-1/2 INCH OUTER DIAMETER) AND BENTONITE DRILLING FLUID OR REVERT WILL BE USED TO SUPPORT THE SOIL DURING DRILLING. A 2-1/2 INCH-OUTER-DIAMETER SPLIT SPOON SAMPLER WILL BE USED TO OBTAIN SOIL SAMPLES FOR CLASSIFICATION AND LABORATORY TESTING.
 - FOR THE TOP 10 FEET, THE CASING WILL BE ADVANCED IN 5-FOOT SECTIONS. THE BORING WILL BE DRILLED USING DRILLING FLUID AHEAD OF THE CASING TO ALLOW FOR CONTINUOUS SPLIT SPOON SAMPLING.
 - BELOW 10 FEET, SPLIT SPOON SAMPLES WILL BE OBTAINED AT 5-FOOT INTERVALS. THE CASING WILL BE ADVANCED TO ABOVE THE SAMPLE LOCATION. A 3-7/8 INCH-OUTER-DIAMETER THROAT ROLLER BIT WILL BE USED TO OBTAIN CLEAN SOIL CUTTINGS OUT OF THE CASING, AND A SAMPLE WILL BE OBTAINED FROM THE SOIL BELOW THE CASING.
 - IF THE CASING HITS AN OBSTRUCTION (I.E. BOULDER), THE OBSTRUCTION WILL BE DRILLED THROUGH USING APPROPRIATE MEANS AND METHODS, AND THE CASING WILL BE ADVANCED.
 - IF BEDROCK IS ENCOUNTERED, CASING WILL BE ADVANCED TO TOP OF ROCK AND BEDROCK WILL BE CORED IN 5-FT RUNS USING AN NX-SIZE CORE BARREL, WHILE MAINTAINING INTERNAL FLUSH RETURN.

- TEST PIT NOTES:**
- ALL TEST PIT LOCATIONS ARE APPROXIMATE.
 - TEST PIT WILL BE ABOUT 5 FEET BY 5 FEET TO ROCK OR TOP OF THE FOOTING WHICHEVER IS SHALLOWER.
 - TEST PIT SHALL ADVANCE NO MORE THAN 3 FEET BELOW GRADE BEFORE LAGGING IS INSTALLED.
 - TEST PIT SHALL ADVANCE NO MORE THAN 12 INCHES BEFORE EACH CONSECUTIVE RING OF LAGGING IS INSTALLED.
 - TEST PITS WILL BE BACKFILLED TO EXISTING GRADE USING THE EXCAVATED MATERIAL.
 - REPLACE EXISTING SLAB IN KIND AFTER BACKFILLING IS COMPLETE.

- LEGEND:**
- APPROXIMATE NYCT LIMITS
 - APPROXIMATE MNR LIMITS
 - APPROXIMATE VAULT SPACE

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

GLOSSARY

Acronyms

| | |
|----------|--|
| DL | - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| EDL | - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME). |
| EMPC | - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration. |
| EPA | - Environmental Protection Agency. |
| LCS | - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | - Laboratory Control Sample Duplicate: Refer to LCS. |
| LFB | - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LOD | - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| LOQ | - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) |
| MDL | - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| MS | - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values. |
| MSD | - Matrix Spike Sample Duplicate: Refer to MS. |
| NA | - Not Applicable. |
| NC | - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| NDPA/DPA | - N-Nitrosodiphenylamine/Diphenylamine. |
| NI | - Not Ignitable. |
| NP | - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil. |
| NR | - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests. |
| RL | - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |
| SRM | - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples. |
| STLP | - Semi-dynamic Tank Leaching Procedure per EPA Method 1315. |
| TEF | - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD. |
| TEQ | - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values. |
| TIC | - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations. |

Report Format: Data Usability Report

Project Name: COMMODORE
Project Number: 3255.0002Y000

Lab Number: L2045589
Report Date: 10/26/20

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. If a 'Total' result is requested, the results of its individual components will also be reported.

The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA, this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- F** - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- ND** - Not detected at the reporting limit (RL) for the sample.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.

Report Format: Data Usability Report

Project Name: COMMODORE
Project Number: 3255.0002Y000

Lab Number: L2045589
Report Date: 10/26/20

Data Qualifiers

- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Re: Preliminary Hazardous Building Materials Assessment Report
Project Commodore
109 E 42nd Street, New York, NY
Langan Project No.: 170579301

This memorandum presents the results from the preliminary Hazardous Materials investigation and summarizes recommendations in support of planned Project Commodore redevelopment project. .

1. FACILITY DESCRIPTION

The existing Grand Hyatt Hotel is a 26-story steel and glass building with foundations that penetrate the MTA mezzanine and platform levels below grade on the original Commodore Hotel site which opened in 1919 and subsequently renovated in 1990. The site is located on a 57,282 SF lot within Block 1280 – Lot 30, which is part of Zoning District C5-3, and within both the Special Midtown District and the Grand Central Core District.

The existing Hyatt building structure consists of steel columns, steel beams and girders encased in concrete for fire-proofing. The existing structural slab consists of light-weight concrete reinforced with draped wire mesh. The first three levels including a mezzanine contain the main amenity spaces of the hotel, equipped with a ground floor lobby, ballroom and convention center spaces (60,000 SF), and a restaurant that overhangs the sidewalk below. The Hotel holds approximately 1,300 guest rooms, 45 conference rooms and has two below grade levels for back of house spaces that provide support for the hotel day-to-day functions. A ventilation shaft at the northwest corner of the site goes through all floors of the Hyatt. The building contains an estimated gross building area of approximately 1 million square feet.

2. OBSERVATIONS & FINDINGS

Summary of Asbestos Containing Materials Findings

During the assessment, suspect materials observed in the building were documented and quantified. Sampling was limited to readily accessible suspect building materials which would have major remediation cost impact (i.e. wall plaster, gypsum board/joint compound, sprayed-on

fireproofing, etc.). Additionally, we reviewed any available existing building plans and included some of those key notes in our summary.

Suspect ACM was cataloged according to building material type: (1) Flooring Materials, (2) Wall Materials, (3) Ceiling Materials, (4) Structural Materials, (5) TSI Materials, (6) HVAC System Materials, (7) Electrical System Materials, (8) Miscellaneous Materials, and (9) Roofing Materials. The findings of these items are summarized as follows:

(1) Flooring Materials

In general, the floors in guest rooms and Hallways were covered with wall to wall carpet installed on cementitious flooring. Various 12-inch square vinyl floor tile were observed in supporting service and storage areas. Porcelain tile and granite flooring was observed in lobbies, restrooms and retail spaces.

Our review of the June 1978 renovation plans prepared by Gruzen & Partners (Gruzen) indicate the presence of approximately 2-inch light weight reinforced concrete topping and waterproofing membrane between the layers of concrete flooring throughout the building. The drawings also indicate presence of waterproofing membrane concealed under granite panels or leveling cement.

(2) Wall Materials

The partition and perimeter walls were mostly covered with gypsum board/joint compound. It is likely that, at select locations original plaster walls may exist concealed underlying the gypsum wall enclosures. Concealed plaster was inaccessible for sampling. Original plaster on walls was observed in mechanical spaces and staircases. Langan collected limited samples of the accessible plaster and gypsum materials. Analytical results confirmed these materials to be non-ACM. The exterior of the Penthouse walls were covered with stucco plaster. This material was also tested and confirmed to be non-ACM.

(3) Ceiling Materials

Guest rooms were observed to have concrete ceiling with a layer of plaster. Due to building occupancy, the plaster on the ceilings was inaccessible for sampling. The corridors were observed to have gypsum board drop ceilings.

The high ceiling in the lobby has suspended ceiling panels. These panels were inaccessible for sampling.

The Ballrooms have original plaster drop ceilings. Limited areas above the drop ceiling were accessible at the time of our site visits. Langan collected three samples of the smooth and gray ceiling plaster. Based on the laboratory testing data from the limited sampling, the ceiling plaster at this time is identified as non-ACM.

Ceiling panels were observed in select retail, storage and service areas. The ceiling panels were not tested, however, based on installation in 1990's, we do not expect the tiles to be ACM.

(4) Structural Materials

As discussed herein, the existing building structure consists of steel columns, steel beams and girders encased in concrete for fire-proofing. The existing structural slab consists of light-weight concrete reinforced with draped wire mesh. The Gruzen plans also indicate application of fireproofing on structural elements. The structural elements associated with the perimeter walls were inaccessible as they were concealed behind gypsum walls. Langan observed suspect fireproofing in accessible mechanical and storage spaces. Three samples of this material were collected and analyzed for asbestos using NYSELPA 198.1 methodology. Test results confirmed the fireproofing to contain Vermiculite. Since Vermiculite was identified in the fireproofing, the material will need to be resampled and analyzed for asbestos contamination using NYSELAP 198.8 methodology. At this time, the fireproofing in the building is assumed to be ACM.

The Gruzen plans also indicate installation of waterproofing materials on perimeter structural steel members.

(5 & 6) TSI and HVAC Systems

Most of the accessible heating, hot water and other utilities were either bare metal or were wrapped with non-suspect fiberglass insulation with suspect mudpack joint insulation. Eight samples of accessible mud-pack joint insulation was collected. Analytical results confirmed the mud-pack joint material to be non-ACM.

Pipes with original insulation were observed in the Ballroom plenum space. These pipes were not accessible for sampling. From distance the insulation appeared to be ACM. The remaining piping system was concealed in wall and ceiling cavities.

The HVAC to the guest rooms was provided by individual blowers supported by centralized heating and cooling systems. The pipes supporting these systems were concealed in wall cavities.

In the kitchen and associated spaces, the exhaust ducts were insulated with fiberglass and suspect joint material which is most likely ACM.

Currently, the heat to the building is provided by Con-Edison steam. A huge chimney stack is present in the building indicating that originally the heat was generated in house.

(7) Electrical System Materials

Limited original electrical panels were observed in the building. Suspect wires and backing panels with these panels were not accessible, and therefore, are assumed to contain ACM.

(8) Miscellaneous Materials

The building perimeter is enclosed with glass curtain walls. The caulk and glazing sealants were tested during our site visit and were confirmed to be non-ACM.

Select areas in the building were observed to have mirrors glued to doors or walls. The mastic with these mirrors is assumed to be ACM.

Most of the doors with the guest rooms are of wood construction. Suspect insulation may exist with the elevator, staircase and old Ballroom doors.

(9) Roofing Materials

The building was observed to have suspect bituminous roofing system. In lieu of testing, the roofing, flashing and sealants are assumed to be ACM.

Refer to Table 1 for a summary of asbestos assessment findings.

Laboratory testing of Samples

Langan collected 67 bulk samples of suspect materials during the assessment. Samples were analyzed by Atlas Environmental Lab, Corp. (Atlas) using the Polarized Light Microscopy (PLM) and transmission electron microscopy (TEM) analytical methodology in accordance with NYSELAP regulations.

According to USEPA, a material with an asbestos content greater than one (1) percent by weight is considered as an ACM. Suspect materials sampled during our site visit were confirmed to be non-ACM via laboratory testing.

Please note that the fireproofing which was sampled during our site visit was identified to contain Vermiculite. The fireproofing materials will need to be resampled and analyzed using ELAP method 198.8, to confirm asbestos contamination. For the purpose of this report, the fireproofing in the building is assumed to be ACM.

Analytical test results and chain-of-custody documentation are provided in Appendix A. Langan's and laboratory certifications are included in Appendix B.

PCBs in Caulk

The PCBs assessment involved a limited visual examination of the building and sampling of suspect caulking materials. As per the USEPA Code of Federal Regulations (40 CFR 761.3) a PCB-containing bulk product is any product which contains a concentration of PCB >50 PPM. Any product which contains <50 PPM PCB is considered a non-PCB product.

Three (3) composite samples of homogeneous caulking and glazing sealant materials were collected from the building and submitted for PCB analysis. Samples were analyzed using USEPA method 8082.

Test results confirmed the sampled caulk and glazing sealant to be non-PCBs containing. Refer to Table 3 in the attachments for a summary of test results.

3. CONCLUSIONS AND RECOMMENDATIONS

Based on these preliminary Hazmat findings, **\$38,000,000** should be budgeted for hazmat remediation including removal, handling, disposal and management of hazardous building materials identified in this report. The following items have huge remediating cost impact:

1. 2-inch light weight reinforced concrete topping and waterproofing membrane on every floor
2. Fireproofing/waterproofing on perimeter structural components

If the aforementioned items are tested and confirmed to be non-ACM, the preliminary remediation cost can be refined by \$20M. Therefore, Langan recommends performing floor and perimeter wall probes on alternate floors to sample these materials.

Refer to Table 2 for a breakdown of the remediation estimates.

A full protocol Hazmat survey was not performed as part of our scope of work. Prior to performing any planned renovation and/or redevelopment activities, a full protocol asbestos survey will be necessary to confirm the Hazmat findings.

TABLES

Table 1 - SUMMARY OF ASBESTOS SURVEY FINDINGS
109 E 42nd Street, New York, New York

| Material | Sample ID | Location | Survey Results | | Estimated Quantity of ACM | Notes/Comments |
|---|-----------|---|----------------|----|---------------------------|---|
| Assumed ACM | | | | | | |
| Built-up roofing, roof flashing, mastic and roof screed materials | --- | Roofs | Assumed ACM | -- | 63,000 SF | --- |
| Sprayed-on fireproofing materials - observed | --- | Mechanical Rooms, Ballroom Plenums & other Building Select Areas | Assumed ACM | -- | 25,000 SF | Laboratory results confirmed presence of Vermiculite in fireproofing. The fireproofing will need to be resampled and analyzed using ELAP Method 198.8 to confirm asbestos findings. |
| Sprayed-on fireproofing materials associated with perimeter structural steel as indicated on 1978 plans prepared by Gruzen & Partners | --- | Perimeter & Interior Pipe Chases, Shafts, Mullions, Ceiling Plenums | Assumed ACM | -- | 80,000 SF | |
| Lightweight reinforced concrete topping (2-inch), and waterproofing membrane concealed under granite panels or leveling cement as indicated on 1978 plans prepared by Gruzen & Partners | --- | Throughout The Building | Assumed ACM | -- | 900,000 SF | --- |
| Waterproofing materials associated with steel structural building members and perimeter walls - concealed | --- | Perimeter & Interior Pipe Chases, Shafts, Mullions, Ceiling Plenums | Assumed ACM | -- | 140,000 SF | --- |
| Concealed lining and insulation materials associated with Chimney stack | --- | Chimney Stack | Assumed ACM | -- | 14,000 SF | --- |
| Suspect flooring materials (i.e. 12-inch & 9-inch floor tales, mastic, felt, fill materials, etc.) | --- | Service & Storage Building Areas
Throughout The Building | Assumed ACM | -- | 18,000 SF | --- |
| Old pipe and pipe joint insulation (estimated to be concealed within inaccessible building spaces) | --- | Perimeter & Interior Pipe Chases, Shafts, Mullions, Ceiling Plenums | Assumed ACM | -- | 65,000 LF | Pipe insulation was observed within inaccessible Ballroom attic spaces as well as select basement areas. |
| Kitchen hood/duct insulation - exposed and concealed within wall cavities and ceiling plenums | --- | Kitchens and Adjacent Areas | Assumed ACM | -- | 10,000 SF | Suspect duct insulation with mudded seams were observed in 4th floor kitchen. |
| Waterproofing membrane underlying ceramic/quarry floor tiles | --- | Kitchens and Adjacent Areas | Assumed ACM | -- | 10,000 SF | --- |
| Waterproofing membrane underlying ceramic floor tiles | --- | Guest Rooms | Assumed ACM | -- | 65,000 SF | --- |
| Concealed mirror mastic with door | --- | Guest Rooms | Assumed ACM | -- | 2,000 SF | --- |
| Concealed metal door core insulation | --- | Staircases and Hallways | Assumed ACM | -- | 2,600 SF | --- |
| Concealed metal door core insulation (historical) | --- | Ballrooms | Assumed ACM | -- | 1,500 SF | --- |
| Concealed metal elevator door core insulation | --- | Elevator Shafts | Assumed ACM | -- | 13,500 SF | --- |
| Decommissioned old electrical panel boards | --- | Hallways | Assumed ACM | -- | 580 SF | --- |
| Suspect Transite elements within main switch boxes | --- | Electrical/ Mechanical Rooms | Assumed ACM | -- | 1,000 SF | --- |
| Elevator brake pads | --- | Elevator Machine Rooms | Assumed ACM | -- | 30 SF | --- |
| Non-ACM | | | | | | |
| Wall plaster | WP | Scattered Locations
Throughout the Building | Non-ACM | ND | -- -- | --- |
| Wall plaster | SWP | Staircases | Non-ACM | ND | -- -- | --- |
| Ceiling plaster | CP | Select Building Locations | Non-ACM | ND | -- -- | --- |
| Ceiling plaster | BCP | Ballrooms | Non-ACM | ND | -- -- | --- |
| Plaster of Paris (ceiling) | POP | Ballrooms | Non-ACM | ND | -- -- | --- |
| Stucco plaster | STP | Penthouse Exterior | Non-ACM | ND | -- -- | --- |

| Material | Sample ID | Location | Survey Results | | Estimated Quantity of ACM | Notes/Comments |
|---|----------------|---|----------------|----|---------------------------|----------------|
| Gypsum wall board | SR-1 | Throughout The Building | Non-ACM | ND | -- -- | --- |
| Joint compound associated with gypsum wall board | SRJC-1 | Throughout The Building | Non-ACM | ND | -- -- | --- |
| 2'x2' ceiling panels with pin holes and grooves | CPP-1 | Select Building Locations | Non-ACM | ND | -- -- | --- |
| Water tank insulation | TI-1 | Linen Storage Areas | Non-ACM | ND | -- -- | --- |
| Pipe riser insulation (exposed) | PI-1 | Linen Storage Areas | Non-ACM | ND | -- -- | --- |
| Epoxy type floor material | FM-1 | Select Building Locations | Non-ACM | ND | -- -- | --- |

Quantitative Analysis (Semi/Full):Bulk Asbestos Analysis-PLM by EPA 600/M4-82-020 per 40 CFR or ELAP198.1 (friable) and 198.6 (NOB) samples for New York.

NAD=no asbestos detected, NAPS=Not Analyzed/Positive Stop, Trace=<1%,FBGL=Fiberglass, CELL=Cellulose,CHRY=Chrysotile,Amo=Amosite,CRO=Crocidolite,ANTH=Anthophyllite, TRE=Tremolite, ACT=Actinolite, NA=not applicable.

PLM is not consistently reliable in detecting Asbestos in floor coverings and similar non friable organically bound materials. NAD or Trace results by PLM are inconclusive.

TEM is currently the only method that can be used to determine if this material can be considered or treated as non asbestos containing in NY State.

All samples were prepared and analyzed in accordance with the EPA "TEM Method for Identifying and Quantifying Asbestos in Non-Fibrous Organically Bound Bulk Samples" ELAP 198.4".

ORG%=Ashed Organic%, All= Acid Insoluble Inorganic%, ASI= Acid Soluble Inorganic%

This "Summary of Analytical Results "shall not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, ELAP or any agency of the U.S Government. The results relate

only to the items tested. This report may not be reproduced, except in full, without the written approval of AEL. Atlas Environmental lab did not collect the analyzed samples and thus accepts no liability with

regard to their collection and/or maintenance. AEL relies on client's data. The liability of Atlas Environmental Lab corp with respect to the services charged, shall in no event exceed the amount of the invoice.

PCB in Caulking Test Results and Chain-of-Custody Documentation

Wednesday, August 07, 2019

Attn: Vijay Patel
Langan Engineering & Environmental Svcs
300 Kimball Drive
4th Floor
Parsippany NJ 07054

Project ID: 109 E 42ND ST., 170579301
SDG ID: GCD67191
Sample ID#s: CD67191 - CD67193

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

Phyllis Shiller

PQL | Units | Dilution | Date/Time | By | Reference |
|-----------|--------|------------|-------|----------|-----------|----|-----------|
|-----------|--------|------------|-------|----------|-----------|----|-----------|

3 = This parameter exceeds laboratory specified limits.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL

BRL=Below Reporting Level L=Biased Low

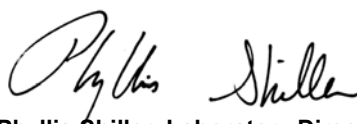

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

Comments:

Results are reported on an ``as received`` basis, and are not corrected for dry weight.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200.
The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

ASTM E 1527-13 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: _____

Person Interviewed/Title: _____ Date: _____

If known, when was the property initially developed? _____

If different, when were the current building(s) on the property constructed? _____

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

Yes___ No___ If you answer yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the *property* or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed against the *property* under federal, tribal, state, or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes___ No___ If you answer yes, please include an explanation in the space provided below:

Note 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties?

For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes___ No___ If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes___ No___ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes___ No___

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes___ No___

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes___ No___

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes___ No___

If you answered yes to any of the questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes___ No___ If you answer yes, please include an explanation in the space provided below:

Please provide the following property contact information:

Property Owner: _____

Phone Number: _____

Key Site Personnel: _____

Mr. Gregory Lowe
Commodore Owner LLC
75 Rockefeller Plaza
Suite 1500
New York, New York 10019

Re: Phase II Environmental Site Assessment
Project Commodore
109 East 42nd Street, New York, New York
Block 1280, Lot 30

Dear Mr. Lowe:

On behalf of Commodore Owner LLC (referred to herein as “Commodore Owner”), Roux Environmental Engineering and Geology, D.P.C. (Roux) has prepared this Phase II Summary Letter Report (Report) to summarize the analytical results for the soil and sub-slab soil vapor samples collected at the property located at 109 East 42nd Street, New York, New York (Site). The Site is also identified as Block 1280, Lot 30 on the New York City Tax Map. A Site location map is included as Figure 1.

Background Information

The Site is comprised of a 57,282-square-foot lot that is currently occupied by the Grand Hyatt Hotel, a 26-story building with foundations that penetrate a Metropolitan Transit Authority (MTA) mezzanine and platform levels below grade. The Grand Hyatt Hotel was previously known as the Commodore Hotel, which opened in 1919 and was renovated in the late 1970s and reopened in 1980. The proposed redevelopment plan for the Site, also known as “Project Commodore,” includes the construction of a new 89-story commercial/mixed-use tower that will be constructed following the demolition of the Grand Hyatt Hotel.

Roux identified one Recognized Environmental Condition (REC) during the Phase I Environmental Site Assessment (Phase I ESA) preparation, which is detailed below:

- **REC – Mass Transit Usage:** The area upgradient to the northwest of the Site is developed with railroad/subway infrastructure associated with the Metro North Railroad (MNR), including the adjoining Grand Central Terminal. Additional rail structures associated with the New York City Subway (MTA) are also noted to be present under the Site; therefore, the mass transit/rail usage is considered both onsite and off-site. Railway infrastructure typically involves the usage of various hazardous substances and petroleum products in its operations including lubricants, hydraulic oil, heat resistant oils, brake fluid and other oils used in power generation, which may involve the use of polychlorinated biphenyls (PCBs). Numerous New York State Department of Environmental Conservation (NYSDEC) spill listings are associated with the rail lines in this area.

Roux did not identify any Historical RECs (HRECs) or Controlled RECs (CRECs) in connection with the Site. Roux did identify the following Business Environmental Risks (BERs):

- **Suspect Presence of Historic Fill Material:** The Site was historically redeveloped with the Commodore Hotel in 1919 as evidenced by Sanborn Maps and historical accounts and online

resources for this time period. The redevelopment would have required demolition of the previous hospital and manufacturing related buildings present in the earlier Sanborn Maps dated 1890, 1899 and 1910. There is potential for the Site to be underlain by Historic Fill Material, which may contain glass, bricks, concrete, slag, ceramic and other non-native materials brought, deposited or demolished directly into the subsurface to facilitate redevelopment. The presence of this material should be considered when planning any future redevelopment requiring soil/material excavation and disposal.

- **Suspect Presence of Asbestos Containing Materials (ACMs) in Building Materials:** Based upon the age of construction of the current building (1919), there is potential for ACMs to be present in various pipe wrappings, joint wrappings, and other building materials. The MNR and MTA mezzanine and platform levels below grade were also constructed on or before approximately 1915, with many renovations since initially built, so the potential for ACMs, including pipe insulations, tars, and electrical equipment, extends to these areas as well. The investigation and planned removal of any confirmed ACMs will be the subject of a separate investigation document and are not further discussed in this Report.

Additionally, based on review of historical drawings provided by Commodore Owner, all laundry and dry-cleaning operations were conducted on the second level of the basement (not the lowest level of the basement), and therefore any operations are less likely to impact the subsurface as a Site. Based on the lack of dry cleaning-related contaminations in findings of the sampling performed during this Phase II investigation, the former dry-cleaning operations at the Site were confirmed to not be a REC.

A Phase II Site Investigation was recommended by Roux to document and characterize current Site conditions to determine if concerns identified in the Phase I ESA have impacted the Site. The fieldwork was conducted in general accordance with Roux's proposal for environmental support services dated August 25, 2020 and revised on January 15, 2021.

Phase II ESA Field Activities

The scope of work for the Phase II Site Investigation (Site Investigation) included the installation of temporary soil vapor points as well as the collection and analysis of soil and soil vapor samples. At the request of Commodore Owner, Roux worked alongside Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology D.P.C. (Langan) of New York, New York, as they conducted their geotechnical investigation. From October 2, 2020 to November 16, 2020, Roux sampled a total of seven test pit locations and three temporary soil vapor points. The investigation targeted historic fill below the slab within the specific portions of the building that will require excavation and removal as part of the redevelopment. The southeast portions of the Site were specifically avoided because there is no proposed excavation due to the subway tunnel. The locations of the test pits and temporary soil vapor points are provided on Figure 2. It was anticipated that groundwater was not going to be encountered above rock. Roux confirmed groundwater was not present in the overburden during the Site Investigation, and therefore, no groundwater samples were collected.

Soil Investigation

Roux collected soil from seven test pits spread out across the footprint of the basement of the Grand Hyatt as part of the overall geotechnical investigation performed by Langan. John Civetta & Sons, Inc (Civetta) was hired by Commodore Owner to advance the test pits to refusal as part of Langan's investigation. Roux collected soil from the seven test pits, and soil lithology was recorded according to the Unified Soil Classification System (USCS) and geologic logs were completed from the lithologic descriptions (Attachment 1). Soil was visually inspected for grain size, color, evidence of impacts, and screened for organic vapors using a photoionization detector (PID).

At least one soil sample was collected from each of the seven test pits. Roux collected ten soil samples from the seven test pits utilizing laboratory-supplied containers. The samples were placed in a cooler maintained with ice at 4°C and were transferred under chain-of-custody procedures to the laboratory.

Sub-Slab Soil Vapor Investigation

Three temporary sub-slab soil vapor sampling points were installed by Trinity Environmental Corp. (Trinity) on October 26, 2020 at the locations shown on Figure 2. At each of the sub-slab soil vapor sampling locations, Trinity drilled a hole into the slab using a hammer drill and a Vapor Pin® was sealed into place using a silicone sleeve immediately below the slab. As the depth of the basement for the new building is not proposed to go deeper than the existing slab, the sample depth is considered representative of the future soil vapor conditions for the new building.

In accordance with the New York State Department of Health (NYSDOH) Guidance for Evaluating Soil Vapor Intrusion in the State of New York (SVI Guidance Document), the integrity of each sub-slab soil vapor sampling point seal was checked using helium as a tracer gas following installation to verify that the sub-slab soil vapor sample would not be compromised by inadvertent introduction of ambient air into the sample. Sub-slab soil vapor was purged from the points using an air pump calibrated to approximately 0.2 liters per minute while the sampling point was covered at the surface with a small enclosure that was partially filled with helium. The sub-slab soil vapor discharging from the air pump and the air within the enclosure was continuously monitored for helium during purging.

After the seals were confirmed, batch-certified summa canisters and flow controllers were used to collect the sub-slab soil vapor samples over a two-hour duration. Roux collected three sub-slab soil vapor samples (SV-1, SV-2, and SV-3) from the temporary sub-slab soil vapor points installed by Trinity. Vacuum-pressure readings in the sample canister were recorded before and after the sample collection period on the sample logs and laboratory chain of custody. Samples were relinquished to the laboratory following chain of custody procedures.

Groundwater Investigation

Groundwater was not observed above in the overburden as part of the field activities.

Laboratory Analysis

Soil samples were analyzed at TestAmerica Laboratories, Inc. of Edison, New Jersey, a NYSDOH Environmental Laboratory Accreditation Program (ELAP)-certified laboratory (11452) for analysis of:

- Target Compound List (TCL) volatile organic compounds (VOCs) plus 10 tentatively identified compounds (TICs);
- TCL semivolatile organic compounds (SVOCs) plus 20 TICs;
- Target Analyte List (TAL) metals plus mercury, hexavalent chromium, and cyanide;
- PCBs; and
- Total pesticides and herbicides.

Sub-slab soil vapor samples were analyzed by Alpha Analytical of Mansfield, Massachusetts, a NYSDOH ELAP-certified laboratory (11627) for analysis of VOCs using USEPA Method TO-15.

Results

Work completed as part of this Phase II ESA included the collection of soil and sub-slab soil vapor samples. An overview of geologic conditions followed by an evaluation of the environmental media sampling results are provided below. Test pit geologic logs developed for each location are provided in Attachment 1. A full set of laboratory analytical data is provided as Attachment 2. A summary of the results is presented on Tables 1 through 8.

Site Geology

Roux observed no discernable threshold between historic fill and native soil at each of the test pits; historic fill was present in all test pits until refusal. In general, the soil at the Site is comprised of historic

fill consisting of fine to coarse sand, some silt and fine to coarse gravel, with fill consisting of brick, concrete, coal/slag, metal and other building aggregate.

Soil Analytical Results

The following section presents the results of the soil sampling and laboratory analysis. No evidence of impacts such as elevated PID detections, odors, or staining were observed during the test pit advancement. A total of ten soil samples were collected for laboratory analysis.

The concentrations of VOCs, SVOCs, metals, PCBs, pesticides and herbicides in the soil sample analytical results were compared to the NYSDEC Part 375 Unrestricted Use Soil Cleanup Objectives (UUSCOs) and NYSDEC Part 375 Commercial Soil Cleanup Objectives (CSCOs) and are provided in Tables 1 through 7. A summary of the UUSCO and CSCO exceedances are depicted on Figure 3 and laboratory analytical reports are provided in Attachment 2.

VOCs

A summary of the VOC soil exceedances in the 10 soil samples analyzed is provided below:

VOC Exceedances of SCOs in Soil

| Analyte | NYSDEC Unrestricted Use SCO (mg/kg) | Detections above NYSDEC Unrestricted Use SCOs | NYSDEC Commercial SCOs (mg/kg) | Detections above NYSDEC Commercial SCOs | Range in Concentration Above NYSDEC SCOs (mg/kg) | Soil Sample with Maximum Detection |
|---------|-------------------------------------|---|--------------------------------|---|--|------------------------------------|
| Acetone | 0.05 | 1 | 500 | 0 | 0.073 | TP-17 (0-2) |

The majority of VOC concentrations were below laboratory detection limits. The VOC acetone marginally exceeded the UUSCO in sample TP-17 (0-2), which is attributed to laboratory cross-contamination and is not indicative of contamination on-site.

SVOCs

A summary of the SVOC soil exceedances in the 10 soil samples analyzed is provided below:

SVOC Exceedances of SCOs in Soil

| Analyte | NYSDEC Unrestricted Use SCO (mg/kg) | Detections above NYSDEC Unrestricted Use SCOs | NYSDEC Commercial SCOs (mg/kg) | Detections above NYSDEC Commercial SCOs | Range in Concentration Above NYSDEC SCOs (mg/kg) | Soil Sample with Maximum Detection |
|-------------------------|-------------------------------------|---|--------------------------------|---|--|------------------------------------|
| Benzo(A) Anthracene | 1 | 4 | 5.6 | 0 | 1.1 – 1.6 | TP-15 (0-2) |
| Benzo(A) Pyrene | 1 | 4 | 1 | 4 | 1.1 – 1.8 | TP-15 (0-2) |
| Benzo(B) Fluoranthene | 1 | 5 | 5.6 | 0 | 1.1 – 2.5 | TP-15 (0-2) |
| Benzo(K) Fluoranthene | 0.8 | 1 | 56 | 0 | 1.3 | TP-15 (0-2) |
| Chrysene | 1 | 2 | 56 | 0 | 1.2 – 1.7 | TP-15 (0-2) |
| Indeno(1,2,3-C,D)Pyrene | 0.5 | 5 | 5.6 | 0 | 0.6 – 0.9 | TP-15 (0-2) |

Concentrations of several SVOCs, specifically polycyclic aromatic hydrocarbons (PAHs), were detected in exceedance of the UUSCOs and/or CSCOs in five of the ten soil samples as noted in the table above. PAHs are commonly detected in historical fill and are associated with incomplete combustion of petroleum and coal products, which were used as part of the mass transit operations onsite.

Metals

A summary of the metals soil exceedances in the 10 soil samples analyzed is provided below:

Metal Exceedances of SCOs in Soil

| Analyte | NYSDEC Unrestricted Use SCO (mg/kg) | Detections above
NYSDEC Unrestricted Use SCOs | NYSDEC Commercial SCOs (mg/kg) | Detections above
NYSDEC Commercial SCOs | Range in Concentration Above
NYSDEC SCOs (mg/kg) | Soil Sample with Maximum Detection |
|-----------------|-------------------------------------|--|--------------------------------|--|---|------------------------------------|
| Cadmium | 2.5 | 1 | 9.3 | 0 | 3.1 | TP-8 (0-2) |
| Chromium III | 30 | 3 | 1500 | 0 | 34.4 – 92.3 | TP-16 (0-2) |
| Chromium, Total | 30 | 3 | 1500 | 0 | 34.4 – 93 | TP-16 (0-2) |
| Copper | 50 | 4 | 270 | 0 | 55.8 - 195 | TP-15 (0-2) |
| Lead | 63 | 5 | 1,000 | 2 | 207 – 4,490 | TP-15 (0-2) |
| Mercury | 0.18 | 8 | 2.8 | 0 | 0.32 – 2.5 | TP-8 (0-2) |
| Nickel | 30 | 1 | 310 | 0 | 32.2 | TP-7 (0-2) |
| Zinc | 109 | 3 | 10,000 | 0 | 232 – 488 | TP-15 (0-2) |

Metals were detected above UUSCOs in eight of the ten samples collected and above CSCOs in two of those soil samples. Lead was the only metal that was detected in exceedance of CSCOs. The concentrations and distribution of the metals detected in exceedance of the CSCOs are characteristic of historical fill and mass transit operations. The highest concentrations of lead were observed at TP-7 (0-2) and TP-15 (0-2), which are both located in the MNR portion of the Site. Both of these samples, in addition to three other soil samples (TP-5 [0-2], TP-8 [0-2] and TP-12 [0-2]), were analyzed for TCLP lead and all of the soil onsite was determined not to be hazardous for disposal purposes. However, given the elevated concentrations of lead in these two locations, future disposal facilities may require additional sampling of this material or they may require that the material be handled as hazardous.

PCBs

A summary of the PCBs soil exceedances in the 10 soil samples analyzed is provided below:

PCB Exceedances of SCOs in Soil

| Analyte | NYSDEC Unrestricted Use SCO (mg/kg) | Detections above
NYSDEC Unrestricted Use SCOs | NYSDEC Commercial SCOs (mg/kg) | Detections above
NYSDEC Commercial SCOs | Range in Concentration Above
NYSDEC SCOs (mg/kg) | Soil Sample with Maximum Detection |
|------------|-------------------------------------|--|--------------------------------|--|---|------------------------------------|
| Total PCBs | 0.1 | 1 | 3.2 | 0 | 0.43 | TP-15 (0-2) |

Concentrations of total PCBs were detected in exceedance of the UUSCO but below the CSCO at one location. Exceedances of total PCBs are commonly associated with historical fill and mass transit operations.

Pesticides and Herbicides

A summary of the Pesticide and Herbicide soil exceedances in the 10 soil samples analyzed is provided below:

Pesticide and Herbicide Exceedances of SCOs in Soil

| Analyte | NYSDEC Unrestricted Use SCO (mg/kg) | Detections above NYSDEC Unrestricted Use SCOs | NYSDEC Restricted Residential SCOs (mg/kg) | Detections above NYSDEC Restricted Residential SCOs | Range in Concentration Above NYSDEC SCOs (mg/kg) | Soil Sample with Maximum Detection |
|----------|-------------------------------------|---|--|---|--|------------------------------------|
| P,P'-DDE | 0.0033 | 2 | 62 | 0 | 0.011 – 0.03 | TP-17 (0-2) |
| P,P'-DDT | 0.0033 | 2 | 47 | 0 | 0.0076 – 0.019 | TP-7 (0-2) |

Concentrations of two pesticides were detected in exceedance of the UUSCO but below the CSCO at two locations. These detections are commonly associated with historical fill.

Sub-Slab Soil Vapor Analytical Results

Results for the sub-slab soil vapor samples can be found on Table 6 and Plate 3. Each sub-slab soil vapor sample contained detections of VOCs. The following compounds are discussed because they are chlorinated-related compounds that are included in the NYSDOH SVI Guidance Decision Matrices. The matrices provide guidance for carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, trichloroethene (TCE), tetrachloroethene (PCE), 1,1,1-trichloroethane, methylene chloride, and vinyl chloride. No indoor air samples were collected as part of the Phase II ESA; therefore, no direct comparison is made to the NYSDOH Matrices. A summary of the detections is described below.

Matrix A Compounds: carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, TCE

- Carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, TCE were not detected in sub-slab soil vapor.

Matrix B Compounds: PCE, 1,1,1-trichloroethane, methylene chloride

- PCE was detected in all three sub-slab soil vapor samples (SV-1, SV-2, and SV-3) ranging in concentration from 4.37 µg/m³ to 11.8 µg/m³, with a maximum detection in sub-slab soil vapor sample SV-1.
- 1,1,1-Trichloroethane and methylene chloride were not detected in sub-slab soil vapor.

Matrix C Compound: vinyl chloride

- Vinyl chloride was not detected in sub-slab soil vapor.

The concentrations of the matrix compounds are low and do not indicate that there is an active source of contamination to sub-slab soil vapor. Petroleum-related VOCs were also detected at low levels in all three samples. Additional compounds detected besides those noted above are included in Table 11. These VOCs were not detected in soil samples on-site.

Conclusion and Recommendations

Ten soil samples were collected from seven test pits at the Site. No VOCs, with the exception of acetone, were identified in the soil samples above UUSCOs or CSCOs. The exceedance of acetone is attributed to laboratory cross-contamination and is not indicative of contamination on-site. Concentrations of several SVOCs, specifically PAHs, were detected in exceedance of the UUSCOs and/or CSCOs in five of the ten soil samples. Metals were detected above UUSCOs in eight of the ten samples collected and above CSCOs in two of those soil samples. Lead was the only metal that was detected in exceedance of CSCOs. Concentrations of total PCBs were detected in exceedance of the UUSCO but below the CSCO at one location. Concentrations of two pesticides were detected in exceedance of the UUSCO but below the CSCO at two locations.

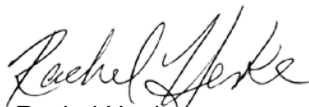

The analytical results for the samples collected at the Site are in exceedance of the CSCOs, which would apply to the planned redevelopment of the Site as a hotel/office tower. The soil exceedances are primarily associated with historic fill and mass transit operations and do not appear to be associated with an active release. If excess soils need to be removed from the Site following the installation of foundation elements or future utilities, the soils should be properly managed and disposed of offsite. Future waste characterization sampling will be required in order to ensure that the soils are appropriately handled in accordance with appropriate regulations and requirements of the selected disposal facilities.

Sub-slab soil vapor samples were collected from three locations at the Site. Concentrations of VOCs in soil vapor were detected above laboratory reporting limits at all sampling locations. However, the concentrations of the chlorinated-related and petroleum compounds are low and do not indicate that there is an active source of contamination to sub-slab soil vapor. Roux recommends that a vapor barrier be installed as part of the construction of the proposed building as a best practice.

Should you have any questions or require further information regarding this Report, do not hesitate to contact Mr. Frank Cherena or Ms. Rachel Henke by telephone at 631-232-2600 or by email at fcherena@rouxinc.com or rhenke@rouxinc.com, respectively.

Sincerely,

ROUX ENVIRONMENTAL ENGINEERING AND GEOLOGY, D.P.C.

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| E | Result exceeded calibration range. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| U | Indicates the analyte was analyzed for but not detected. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F3 | Duplicate RPD exceeds the control limit |
| F5 | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |

Eurofins TestAmerica, Edison

Job ID: 460-219669-1

Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|--------------|--|
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Job ID: 460-219669-1

Laboratory: Eurofins TestAmerica, Edison

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-219669-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 10/02/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.6 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Sample TP-5(0-2) (460-219669-1) was analyzed for Volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260C. The samples were prepared on 10/03/2020 and analyzed on 10/06/2020.

The continuing calibration verification (CCV) associated with batch 460-728718 recovered above the upper control limit for trans-1,2-Dichloroethene. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

The laboratory control sample (LCS) for analytical batch 460-729406 recovered outside control limits for the following analytes: cis-1,2-Dichloroethene and Trichloroethene. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

1,2,4-Trimethylbenzene, 1,3,5-Trimethylbenzene, m-Xylene & p-Xylene and Xylenes, Total were detected in method blank LB3 460-728710/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

No other difficulties were encountered during the volatiles analysis.

All other quality control parameters were within the acceptance limits.

PESTICIDES

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-219669-1

Job ID: 460-219669-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

Sample TP-5(0-2) (460-219669-1) was analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 10/04/2020 and analyzed on 10/06/2020.

The continuing calibration verification (CCV) associated with batch 460-729397 recovered below the upper control limit for Endrin ketone on the confirmation column. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported. The associated sample is impacted: (CCVIS 460-729397/6).

No other difficulties were encountered during the Pesticides analysis.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Sample TP-5(0-2) (460-219669-1) was analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 10/04/2020 and analyzed on 10/05/2020.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Sample TP-5(0-2) (460-219669-1) was analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 10/05/2020 and analyzed on 10/06/2020.

The continuing calibration verification (CCV) associated with batch 460-729444 recovered above the upper control limit for many analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No other difficulties were encountered during the herbicides analysis.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Sample TP-5(0-2) (460-219669-1) was analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270D. The samples were prepared and analyzed on 10/04/2020.

The laboratory control sample duplicate (LCSD) for preparation batch 460-728983 and analytical batch 460-729022 recovered outside control limits for the following analytes: Benzo[a]pyrene and Benzo[b]fluoranthene. The LCS recovery was within limits; therefore, the data have been reported.

The continuing calibration verification (CCV) analyzed in batch 460-729022 was outside the method criteria for the following analyte(s): Benzaldehyde and bis (2-chloroisopropyl) ether. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Several analytes failed the recovery criteria low for the MS of sample 460-219728-5 in batch 460-729022.

Several analytes failed the recovery criteria low for the MSD of sample 460-219728-5 in batch 460-729022.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Sample TP-5(0-2) (460-219669-1) was analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-219669-1

Job ID: 460-219669-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

were prepared on 10/03/2020 and analyzed on 10/04/2020.

Several analytes failed the recovery criteria low for the MS of sample 460-219584-1 in batch 460-728967. Barium, Lead and Manganese failed the recovery criteria high.

Beryllium, Cobalt, Magnesium, Nickel and Potassium exceeded the RPD limit for the duplicate of sample 460-219584-1.

Refer to the QC report for details.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Sample TP-5(0-2) (460-219669-1) was analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared and analyzed on 10/08/2020.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample TP-5(0-2) (460-219669-1) was analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 10/06/2020.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Sample TP-5(0-2) (460-219669-1) was analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 10/04/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Sample TP-5(0-2) (460-219669-1) was analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared on 10/06/2020 and analyzed on 10/07/2020.

Cyanide, Total failed the recovery criteria high for the MS of sample 460-219642-14 in batch 460-729830.

Cyanide, Total failed the recovery criteria high for the MSD of sample 460-219642-14 in batch 460-729830.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Sample TP-5(0-2) (460-219669-1) was analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 10/06/2020.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

| Question | Answer | Comment |
|--|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Definitions/Glossary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-219669-2

Qualifiers

Metals

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-219669-2

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 10/02/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.6 C.

Receipt Exceptions

The following sample was activated for TCLP Lead (leach/prep/hold) analysis by the client on 10/9/2020: TP-5(0-2) (460-219669-1). This analysis was not originally requested on the chain-of-custody (COC).

TCLP lead was activated for analysis on 12/14/2020.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

TCLP METALS

Sample TP-5(0-2) (460-219669-1) was analyzed for TCLP metals in accordance with 6010D. The samples were leached on 10/10/2020, prepared on 10/11/2020 and analyzed on 10/12/2020.

No difficulties were encountered during the TCLP metals analysis.

All quality control parameters were within the acceptance limits.

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| E | Result exceeded calibration range. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| N | This flag indicates the presumptive evidence of a compound. |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| U | Indicates the analyte was analyzed for but not detected. |
| X | Surrogate recovery exceeds control limits |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F3 | Duplicate RPD exceeds the control limit |
| F5 | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-220096-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 10/08/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.3 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Sample TP-5_(10-12) (460-220096-2) was analyzed for Volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260C. The samples were prepared on 10/09/2020 and analyzed on 10/12/2020.

No difficulties were encountered during the volatiles analysis.

All quality control parameters were within the acceptance limits.

PESTICIDES

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 10/10/2020 and analyzed on 10/13/2020.

Tetrachloro-m-xylene surrogate recovery for this sample was outside control limits but Decachlorobiphenyl surrogate recovery within control limits; therefore the data have been qualified and reported. TP-5_COMP_(3-18) (460-220096-1)

No other difficulties were encountered during the Pesticides analysis.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 10/10/2020 and analyzed on 10/12/2020.

Job ID: 460-220096-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared and analyzed on 10/13/2020.

No difficulties were encountered during the herbicides analysis.

All quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Sample TP-5_(10-12) (460-220096-2) was analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270D. The samples were prepared on 10/10/2020 and analyzed on 10/11/2020.

The continuing calibration verification (CCV) analyzed in batch 460-730727 was outside the method criteria for the following analyte(s): 2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol, 2-Nitrophenol and Benzaldehyde. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 460-730712 and analytical batch 460-730727 recovered outside control limits for the following analytes: 2,4-Dinitrophenol. This analyte was biased high in the LCS/LCSD and was not detected in the associated samples; therefore, the data have been reported.

Several analytes failed the recovery criteria low for the MS of sample 460-219750-10 in batch 460-730727.

Several analytes failed the recovery criteria low for the MSD of sample 460-219750-10 in batch 460-730727.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples were prepared on 10/09/2020 and analyzed on 10/10/2020.

Several analytes failed the recovery criteria low for the MS of sample 180-111495-1 in batch 460-730998. Lead failed the recovery criteria high.

Several analytes exceeded the RPD limit for the duplicate of sample 180-111495-1.

Refer to the QC report for details.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared on 10/14/2020 and 10/15/2020 and analyzed on 10/15/2020.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-220096-1

Job ID: 460-220096-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

The matrix spike soluble/matrix spike insoluble (MSS/MSI) recoveries for batch 731949, which is a re-prep of batch 731619, were outside control limits due to sample matrix. The associated laboratory control sample (LCSS/LCSI) recoveries met acceptance criteria. Both sets of data have been reported.

No other difficulties were encountered during the hexchrome Cr6 analysis.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 10/12/2020.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 10/12/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Sample TP-5_COMP_(3-18) (460-220096-1) was analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared on 10/13/2020 and analyzed on 10/14/2020.

Cyanide, Total failed the recovery criteria high for the MS of sample 460-219619-18 in batch 460-731589.

Cyanide, Total failed the recovery criteria high for the MSD of sample 460-219619-18 in batch 460-731589.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Samples TP-5_COMP_(3-18) (460-220096-1) and TP-5_(10-12) (460-220096-2) were analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 10/12/2020.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

Accreditation/Certification Summary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-220096-1

Laboratory: Eurofins TestAmerica, Edison

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York | NELAP | 11452 | 04-01-21 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|-----------------|-------------|--------|------------------|
| 7196A | | Solid | Cr (III) |
| Moisture | | Solid | Percent Moisture |
| Moisture | | Solid | Percent Solids |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| U | Indicates the analyte was analyzed for but not detected. |
| X | Surrogate recovery exceeds control limits |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| E | Result exceeded calibration range. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |
| X | Surrogate recovery exceeds control limits |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |
| N | This flag indicates the presumptive evidence of a compound. |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| U | Indicates the analyte was analyzed for but not detected. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |

Eurofins TestAmerica, Edison

Job ID: 460-220794-1

Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|--------------|--|
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-220794-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 10/16/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.6 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

Receipt Exceptions

Tests on hold were moved to a -2 job number to be reported separately if activated.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples TP-16_(0-2) (460-220794-1), TP-16_(5-7) (460-220794-3) and TP-16_(3-5) (460-220794-4) were analyzed for Volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260C. The samples were prepared on 10/17/2020 and analyzed on 10/18/2020 and 10/19/2020.

Internal standard (ISTD) response for 1,4-Dioxane-d8 for the following sample was outside acceptance criteria: TP-16_(0-2) (460-220794-1). This ISTD does not correspond to any of the requested target compounds; therefore, the data have been reported.

Four surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: TP-16_(3-5) (460-220794-4). These results have been reported and qualified.

No other difficulties were encountered during the volatiles analysis.

All other quality control parameters were within the acceptance limits.

PESTICIDES

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-220794-1

Job ID: 460-220794-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 10/20/2020 and analyzed on 10/21/2020.

No difficulties were encountered during the Pesticides analysis.

All quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 10/20/2020 and analyzed on 10/21/2020.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 10/19/2020 and analyzed on 10/20/2020.

The closing continuing calibration verification (CCVC) associated with batch 460-733097 recovered above the upper control limit for Silvex (2,4,5-TP) and 2,4,5-T. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No other difficulties were encountered during the herbicides analysis.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples TP-16_(0-2) (460-220794-1), TP-16_(5-7) (460-220794-3) and TP-16_(3-5) (460-220794-4) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270D. The samples were prepared and analyzed on 10/19/2020.

The continuing calibration verification (CCV) analyzed in batch 460-732980 was outside the method criteria for the following analyte(s): Benzaldehyde. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 460-732843 and analytical batch 460-732980 recovered outside control limits for the following analytes: Benzaldehyde. The data have been reported.

Surrogate recovery for the following sample was outside control limits: TP-16_(3-5) (460-220794-4). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples were prepared on 10/18/2020 and 10/21/2020 and analyzed on 10/21/2020 and 10/22/2020.

Several analytes failed the recovery criteria low for the MS of sample 460-220793-8 in batch 460-733508. Lead failed the recovery criteria high.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-220794-1

Job ID: 460-220794-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

Antimony failed the recovery criteria low for the MS of sample 460-220873-2 in batch 460-733866. Aluminum, Barium and Iron failed the recovery criteria high.

Refer to the QC report for details.

Sample TP-16_(3-5) (460-220794-4)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared on 10/20/2020 and analyzed on 10/21/2020.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 10/19/2020.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 10/18/2020 and 10/22/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2) and TP-16_(3-5) (460-220794-4) were analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared and analyzed on 10/22/2020.

Cyanide, Total failed the recovery criteria high for the MSD of sample 460-220793-11 in batch 460-733947.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Samples TP-16_(0-2) (460-220794-1), TP-16_COMP_(3-8.5) (460-220794-2), TP-16_(5-7) (460-220794-3) and TP-16_(3-5) (460-220794-4) were analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 10/20/2020.

No difficulties were encountered during the %solids/moisture analysis.

Accreditation/Certification Summary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-220794-1

Laboratory: Eurofins TestAmerica, Edison

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York | NELAP | 11452 | 04-01-21 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|-----------------|-------------|--------|------------------|
| 7196A | | Solid | Cr (III) |
| Moisture | | Solid | Percent Moisture |
| Moisture | | Solid | Percent Solids |

| Question | Answer | Comment |
|--|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | N/A | |
| Multiphasic samples are not present. | N/A | |
| Samples do not require splitting or compositing. | N/A | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |
| N | This flag indicates the presumptive evidence of a compound. |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F3 | Duplicate RPD exceeds the control limit |
| F5 | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |

Job ID: 460-221133-1

Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|--------------|--|
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-221133-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 10/21/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.6 C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

Receipt Exceptions

Tests on hold were moved to a -2 job number to be reported separately if activated.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TP-17 (0-2) (460-221133-1) was analyzed for Volatile Organic Compounds (GC/MS) in accordance with EPA SW-846 Method 8260D. The samples were prepared on 10/22/2020 and analyzed on 10/24/2020.

The laboratory control sample (LCS) for analytical batch 460-734254 recovered outside control limits for the following analyte: Chloroethane. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The continuing calibration verification (CCV) analyzed in batch 460-734084 was outside the method criteria for the following analyte: Methyl acetate. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

No other difficulties were encountered during the Volatiles analysis.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TP-17 (0-2) (460-221133-1) was analyzed for semivolatile organic compounds (GC/MS) in accordance with EPA SW-846 Methods

Case Narrative

Laboratory: Eurofins TestAmerica, Edison (Continued)

8270E. The samples were prepared on 10/23/2020 and analyzed on 10/24/2020.

The continuing calibration verification (CCV) analyzed in batch 460-734321 was outside the method criteria for the following analyte(s): Indeno[1,2,3-cd]pyrene, bis (2-chloroisopropyl) ether and Benzaldehyde. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Several analytes failed the recovery criteria low for the MS of sample 460-219689-14 in batch 460-734321.

Several analytes failed the recovery criteria low for the MSD of sample 460-219689-14 in batch 460-734321.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

PESTICIDES

Sample TP-17 (0-2) (460-221133-1) was analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 10/22/2020 and analyzed on 10/23/2020.

No difficulties were encountered during the Pesticides analysis.

All quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Sample TP-17 (0-2) (460-221133-1) was analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 10/22/2020 and analyzed on 10/23/2020.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Sample TP-17 (0-2) (460-221133-1) was analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 10/22/2020 and analyzed on 10/23/2020.

The closing continuing calibration verification (CCVC) associated with batch 460-734129 recovered above the upper control limit for many analytes>. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No difficulties were encountered during the herbicides analysis.

All quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Sample TP-17 (0-2) (460-221133-1) was analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples were prepared on 10/23/2020 and analyzed on 10/24/2020 and 10/26/2020.

Several analytes failed the recovery criteria low for the MS of sample 460-221093-4 in batch 460-734828. Iron failed the recovery criteria high.

Beryllium, Calcium, Chromium and Nickel exceeded the RPD limit for the duplicate of sample 460-221093-4.

Refer to the QC report for details.

Job ID: 460-221133-1

Job ID: 460-221133-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

Sample TP-17 (0-2) (460-221133-1)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Sample TP-17 (0-2) (460-221133-1) was analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared and analyzed on 10/27/2020.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample TP-17 (0-2) (460-221133-1) was analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 10/26/2020.

Mercury failed the recovery criteria high for the MS of sample 460-221337-3 in batch 460-734871.

Refer to the QC report for details.

No other difficulties were encountered during the Hg analysis.

All other quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Sample TP-17 (0-2) (460-221133-1) was analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 10/27/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Sample TP-17 (0-2) (460-221133-1) was analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared on 10/23/2020 and analyzed on 10/26/2020.

No difficulties were encountered during the cyanide analysis.

All quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Sample TP-17 (0-2) (460-221133-1) was analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 10/23/2020.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |
| N | This flag indicates the presumptive evidence of a compound. |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |
| X | Surrogate recovery exceeds control limits |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| HF | Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |

Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|--------------|--|
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Case Narrative

Job ID: 460-222083-1

Laboratory: Eurofins TestAmerica, Edison

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Commodore

Report Number: 460-222083-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/4/2020 6:00 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.5° C.

Receipt Exceptions

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. TCL lists were requested for VOC and SVOC; however, TCL/Part 375 lists are required per the client.

The client placed the following methods on hold for samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) on 11/5/2020: TCLP Metals, RCRA Characteristics. These methods were activated by the client on 11/11/2020.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for Volatile Organic Compounds (GC/MS) in accordance with EPA SW-846 Method 8260D. The samples were prepared on 11/05/2020 and analyzed on 11/07/2020.

The continuing calibration verification (CCV) associated with batch 460-737757 recovered above the upper control limit for Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

The continuing calibration verification (CCV) associated with batch 460-738009 recovered above the upper control limit for Trichlorofluoromethane, Carbon tetrachloride and 1,1,2-Trichloro-1,2,2-trifluoroethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Refer to the QC report for details.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Commodore

Job ID: 460-222083-1

Job ID: 460-222083-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

No other difficulties were encountered during the Volatiles analysis.

All quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC/MS)

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for semivolatile organic compounds (GC/MS) in accordance with EPA SW-846 Methods 8270E. The samples were prepared on 11/06/2020 and analyzed on 11/07/2020.

The continuing calibration verification (CCV) analyzed in batch 460-737974 was outside the method criteria for the following analyte(s): Indeno[1,2,3-cd]pyrene, 4-Nitrophenol, bis (2-chloroisopropyl) ether, Benzaldehyde, Caprolactam, Hexachlorocyclopentadiene and Pentachlorophenol. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Several analytes failed the recovery criteria low for the MS/MSD of sample 460-222100-2 in batch 460-737974.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

PESTICIDES

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 11/06/2020 and analyzed on 11/09/2020.

Decachlorobiphenyl surrogate recovery for this sample was outside control limits (biased high), but Tetrachloro-m-xylene surrogate recovery within control limits; therefore the data have been qualified and reported. TP-15_(0-2) (460-222083-1)

The DCB Decachlorobiphenyl surrogate recovery for the following samples was outside acceptance limits (high biased) on the primary column due to matrix interference: TP-8_(0-2) (460-222083-3). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Aldrin and Endrin aldehyde failed the recovery criteria low for the MS of sample 460-222081-1 in batch 460-738298.

Refer to the QC report for details.

No other difficulties were encountered during the Pesticides analysis.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 11/06/2020 and analyzed on 11/09/2020.

The continuing calibration verification (CCVIS) for AR 1016 peak # 6 and AR1260 peak # 6 recovered outside the control limit on the primary column. (CCVIS 460-738324/2)

The continuing calibration verification (CCV) for Tetrachloro-m-xylene surrogate recovered outside the lower control limit on the secondary column but within control limits on the primary column. The data have been qualified and reported. (CCVIS 460-738324/2).

Refer to the QC report for details.

Laboratory: Eurofins TestAmerica, Edison (Continued)

No other difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 11/05/2020 and analyzed on 11/06/2020.

No difficulties were encountered during the herbicides analysis.

All quality control parameters were within the acceptance limits.

TCLP METALS

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for TCLP metals in accordance with 6010D. The samples were leached on 11/12/2020, prepared on 11/13/2020 and analyzed on 11/14/2020.

No difficulties were encountered during the TCLP metals analysis.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples were prepared on 11/05/2020 and analyzed on 11/06/2020 and 11/07/2020.

Antimony failed the recovery criteria low for the MS of sample 460-222062-1 in batch 460-737873. Several analytes failed the recovery criteria high.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Refer to the QC report for details.

Samples TP-15_(0-2) (460-222083-1)[5X], TP-7_(0-2) (460-222083-2)[5X] and TP-8_(0-2) (460-222083-3)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

TCLP MERCURY

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for TCLP mercury in accordance with EPA SW-846 Methods 1311/7470A. The samples were leached on 11/12/2020, and prepared and analyzed on 11/13/2020.

No difficulties were encountered during the TCLP Hg analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 11/09/2020.

Samples TP-15_(0-2) (460-222083-1)[5X] and TP-8_(0-2) (460-222083-3)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Commodore

Job ID: 460-222083-1

Job ID: 460-222083-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared and analyzed on 11/10/2020.

Cyanide, Total failed the recovery criteria low for the MS of sample TP-15_(0-2)MS (460-222083-1) in batch 460-738799.

Cyanide, Total exceeded the RPD limit for the MSD of sample TP-15_(0-2)MSD (460-222083-1) in batch 460-738799.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared on 11/08/2020 and analyzed on 11/09/2020.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 11/10/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

IGNITABILITY

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for Ignitability in accordance with EPA SW-846 Method 1030. The samples were analyzed on 11/11/2020.

No difficulties were encountered during the Ignitability analysis.

All quality control parameters were within the acceptance limits.

REACTIVE CYANIDE

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for reactive cyanide in accordance with EPA SW-846 Method 7.3.3/9014. The samples were prepared and analyzed on 11/17/2020.

No difficulties were encountered during the reactive cyanide analysis.

All quality control parameters were within the acceptance limits.

REACTIVE SULFIDE

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for reactive sulfide in accordance with EPA SW-846 Method 7.3.4/9034. The samples were prepared and analyzed on 11/17/2020.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Commodore

Job ID: 460-222083-1

Job ID: 460-222083-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

No difficulties were encountered during the reactive sulfide analysis.

All quality control parameters were within the acceptance limits.

CORROSIVITY (PH)

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for corrosivity (pH) in accordance with EPA SW-846 Method 9045D. The samples were analyzed on 11/17/2020.

No difficulties were encountered during the corrosivity (pH) analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Samples TP-15_(0-2) (460-222083-1), TP-7_(0-2) (460-222083-2) and TP-8_(0-2) (460-222083-3) were analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 11/09/2020.

No difficulties were encountered during the %solids/moisture analysis.

All quality control parameters were within the acceptance limits.

Accreditation/Certification Summary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Commodore

Job ID: 460-222083-1

Laboratory: Eurofins TestAmerica, Edison

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York | NELAP | 11452 | 04-01-21 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|-----------------|-------------|--------|----------------------------|
| 7196A | | Solid | Cr (III) |
| 7470A | 7470A | Solid | Mercury |
| 8270E | 3546 | Solid | 1,2,4,5-Tetrachlorobenzene |
| 8270E | 3546 | Solid | 3 & 4 Methylphenol |
| 8270E | 3546 | Solid | Nitrobenzene |
| 9014 | 7.3.3 | Solid | Cyanide, Reactive |
| 9034 | 7.3.4 | Solid | Sulfide, Reactive |
| 9045D | | Solid | Temperature |
| Moisture | | Solid | Percent Moisture |
| Moisture | | Solid | Percent Solids |

222083

IR Gun #

Cooler Temperatures

[illegible]

If pH adjustments are required record the information below:

Volume of Preservative used (ml):

Expiration Date:

The appropriate Project Manager and Department Manager should be notified about the samples which were pH adjusted. Samples for Metal analysis which are out of compliance must be acidified at least 24 hours prior to analysis.

| Question | Answer | Comment |
|--|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

GC/MS Semi VOA TICs

| Qualifier | Qualifier Description |
|-----------|--|
| A | The tentatively identified compound is a suspected aldol-condensation product. |
| J | Indicates an Estimated Value for TICs |
| N | This flag indicates the presumptive evidence of a compound. |

GC Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| U | Indicates the analyte was analyzed for but not detected. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F5 | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| F3 | Duplicate RPD exceeds the control limit |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |

Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|--------------|--|
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-222907-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/16/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.4 C.

Receipt Exceptions

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. TCL/Part 375 lists are required, not just TCL as indicated on the COC.

The methods on hold were moved to a -2 job to be reported separately if activated.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TP-12_ (0-2) (460-222907-1) was analyzed for Volatile Organic Compounds (GC/MS) in accordance with EPA SW-846 Method 8260D. The samples were prepared on 11/17/2020 and analyzed on 11/20/2020.

The continuing calibration verification (CCV) associated with batch 460-741026 recovered above the upper control limit for Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

The continuing calibration verification (CCV) associated with batch 460-741269 recovered above the upper control limit for Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

The following samples had a peak at 11.433 min that is a column bleed; therefore, it was not reported as TIC. TP-12_ (0-2) (460-222907-1)

Case Narrative

Project/Site: Project Commodore

Job ID: 460-222907-1

Job ID: 460-222907-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

No other difficulties were encountered during the Volatiles analysis.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TP-12_ (0-2) (460-222907-1) was analyzed for semivolatile organic compounds (GC/MS) in accordance with EPA SW-846 Methods 8270E. The samples were prepared on 11/17/2020 and analyzed on 11/18/2020.

The continuing calibration verification (CCV) analyzed in batch 460-740687 was outside the method criteria for the following analyte(s): 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitrophenol and Benzaldehyde. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Several analytes failed the recovery criteria low for the MS of sample 460-222910-1 in batch 460-740687.

Several analytes failed the recovery criteria low for the MSD of sample 460-222910-1 in batch 460-740687. 3,3'-Dichlorobenzidine, 4-Chloroaniline and Atrazine exceeded the RPD limit.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

PESTICIDES

Sample TP-12_ (0-2) (460-222907-1) was analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 11/18/2020 and analyzed on 11/19/2020.

No difficulties were encountered during the Pesticides analysis.

All quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS

Sample TP-12_ (0-2) (460-222907-1) was analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 11/18/2020 and analyzed on 11/19/2020.

The continuing calibration verification (CCVIS) for AR1016 peak # 6 was outside control limits on the primary column. (CCVIS 460-741035/2)

No other difficulties were encountered during the PCBs analysis.

All other quality control parameters were within the acceptance limits.

CHLORINATED HERBICIDES

Sample TP-12_ (0-2) (460-222907-1) was analyzed for chlorinated herbicides in accordance with EPA SW-846 Method 8151A. The samples were prepared on 11/17/2020 and analyzed on 11/18/2020.

No difficulties were encountered during the herbicides analysis.

All quality control parameters were within the acceptance limits.

TOTAL METALS (ICP/MS)

Sample TP-12_ (0-2) (460-222907-1) was analyzed for Total Metals (ICP/MS) in accordance with EPA SW-846 Method 6020B. The samples were prepared on 11/19/2020 and analyzed on 11/20/2020.

Case Narrative

Job ID: 460-222907-1

Job ID: 460-222907-1 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

Several analytes failed the recovery criteria low for the MS of sample 460-222916-1 in batch 460-741162. Aluminum and Sodium failed the recovery criteria high.

Selenium exceeded the RPD limit for the duplicate of sample 460-222916-1.

Refer to the QC report for details.

No other difficulties were encountered during the metals analysis.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM

Sample TP-12_ (0-2) (460-222907-1) was analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were prepared on 11/19/2020 and analyzed on 11/20/2020.

No difficulties were encountered during the hexchrome Cr6 analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample TP-12_ (0-2) (460-222907-1) was analyzed for total mercury in accordance with EPA SW-846 Method 7471B. The samples were prepared and analyzed on 11/18/2020.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

TRIVALENT CHROMIUM

Sample TP-12_ (0-2) (460-222907-1) was analyzed for trivalent chromium in accordance with EPA SW-846 7196A_CR3 by Calculation. The samples were analyzed on 11/18/2020.

No difficulties were encountered during the cr3 analysis.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE

Sample TP-12_ (0-2) (460-222907-1) was analyzed for total cyanide in accordance with EPA SW-846 Method 9012B. The samples were prepared and analyzed on 11/21/2020.

Cyanide, Total failed the recovery criteria high for the MS of sample 460-222682-3 in batch 460-741744.

Cyanide, Total failed the recovery criteria high for the MSD of sample 460-222682-3 in batch 460-741744.

Refer to the QC report for details.

No other difficulties were encountered during the cyanide analysis.

All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS/PERCENT MOISTURE

Sample TP-12_ (0-2) (460-222907-1) was analyzed for percent solids/percent moisture in accordance with EPA Method CLPISM01.2 (Exhibit D) Modified. The samples were analyzed on 11/19/2020.

Percent Moisture exceeded the RPD limit for the duplicate of sample 460-222557-35. Refer to the QC report for details.

Accreditation/Certification Summary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-222907-1

Laboratory: Eurofins TestAmerica, Edison

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York | NELAP | 11452 | 04-01-21 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|-----------------|-------------|--------|----------------------------|
| 7196A | | Solid | Cr (III) |
| 8270E | 3546 | Solid | 1,2,4,5-Tetrachlorobenzene |
| 8270E | 3546 | Solid | 3 & 4 Methylphenol |
| 8270E | 3546 | Solid | Nitrobenzene |
| Moisture | | Solid | Percent Moisture |

Cooler #1:

TALS Sample Number

If pH adjustments are required record the information below:

Sample No(s). adjusted:

Preservative Name/Conc.:

Volume of Preservative used (ml):

Lot # of Preservative(s):

Expiration Date:

The appropriate Project Manager and Department Manager should be notified about the samples which were pH adjusted.

Samples for Metal analysis which are out of compliance must be acidified at least 24 hours prior to analysis.

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed within the body of this report. Release of the data contained in this sample data package and in the electronic data deliverable has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Melissa Haas
Senior Project Manager

Job ID: 460-222907-2

Qualifiers

Metals

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U | Indicates the analyte was analyzed for but not detected. |

General Chemistry

| Qualifier | Qualifier Description |
|-----------|--|
| HF | Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. |
| U | Indicates the analyte was analyzed for but not detected. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| □ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Case Narrative

Project/Site: Project Commodore

Job ID: 460-222907-2

Job ID: 460-222907-2

Laboratory: Eurofins TestAmerica, Edison

Narrative

CASE NARRATIVE

Client: Roux Environmental Eng & Geology DPC

Project: Project Commodore

Report Number: 460-222907-2

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/16/2020; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.4 C.

Receipt Exceptions

The methods on hold were moved to a -2 job to be reported separately if activated.

The following sample was activated for RCRA Characteristics and TCLP Lead by the client on 12/14/2020. TP-12_ (0-2) (460-222907-1)

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

TCLP METALS

Sample TP-12_ (0-2) (460-222907-1) was analyzed for TCLP metals in accordance with 6010D. The samples were leached on 12/15/2020, and prepared and analyzed on 12/18/2020.

No difficulties were encountered during the TCLP metals analysis.

All quality control parameters were within the acceptance limits.

IGNITABILITY

Sample TP-12_ (0-2) (460-222907-1) was analyzed for Ignitability in accordance with EPA SW-846 Method 1030. The samples were analyzed on 12/18/2020.

No difficulties were encountered during the Ignitability analysis.

All quality control parameters were within the acceptance limits.

Case Narrative

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-222907-2

Job ID: 460-222907-2 (Continued)

Laboratory: Eurofins TestAmerica, Edison (Continued)

REACTIVE CYANIDE

Sample TP-12_ (0-2) (460-222907-1) was analyzed for reactive cyanide in accordance with EPA SW-846 Method 7.3.3/9014. The samples were prepared and analyzed on 12/18/2020.

No difficulties were encountered during the reactive cyanide analysis.

All quality control parameters were within the acceptance limits.

REACTIVE SULFIDE

Sample TP-12_ (0-2) (460-222907-1) was analyzed for reactive sulfide in accordance with EPA SW-846 Method 7.3.4/9034. The samples were prepared and analyzed on 12/18/2020.

No difficulties were encountered during the reactive sulfide analysis.

All quality control parameters were within the acceptance limits.

CORROSIVITY (PH)

Sample TP-12_ (0-2) (460-222907-1) was analyzed for corrosivity (pH) in accordance with EPA SW-846 Method 9045D. The samples were analyzed on 12/18/2020.

No difficulties were encountered during the corrosivity (pH) analysis.

All quality control parameters were within the acceptance limits.

Accreditation/Certification Summary

Client: Roux Environmental Eng & Geology DPC
Project/Site: Project Commodore

Job ID: 460-222907-2

Laboratory: Eurofins TestAmerica, Edison

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York | NELAP | 11452 | 04-01-21 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|-----------------|-------------|--------|-------------------|
| 9014 | 7.3.3 | Solid | Cyanide, Reactive |
| 9034 | 7.3.4 | Solid | Sulfide, Reactive |
| 9045D | | Solid | Temperature |

If pH adjustments are required record the information below:

Sample No(s). adjusted:

Preservative Name/Conc.:

Volume of Preservative used (ml):

Lot # of Preservative(s):

Expiration Date:

The appropriate Project Manager and Department Manager should be notified about the samples which were pH adjusted.

Samples for Metal analysis which are out of compliance must be acidified at least 24 hours prior to analysis.

1. Introduction

Roux Environmental Engineering and Geology, D.P.C. (Roux), on behalf of Commodore Owner LLC, has prepared this Remedial Action Plan (RAP) to establish the remedial action objectives (RAOs) and procedures to meet these objectives for the proposed redevelopment known as 175 Park (also known as Project Commodore). 175 Park is located at 109 East 42nd Street, which is also identified as Block 1280, Lot 30 on the New York City Tax Map (the “Site”). A Site Location Map is provided in Figure 1. The Site has been assigned CEQR number 21DCP057M by the New York City Department of Environmental Protection (NYCDEP). A Phase I Environmental Site Assessment (ESA) Report was prepared by Roux dated January 13, 2021, and a Phase II ESA Report was prepared by Roux dated February 3, 2021. The results of the Phase I and II ESAs were used to develop this RAP and establish the Remedial Action Objectives (RAOs) provided herein. A Construction Health and Safety Plan (CHASP) has been prepared to accompany this RAP, and it addresses environmental health and safety concerns based on subsurface conditions (Appendix A). This CHASP does not take the place of the Contractor’s own Health and Safety Plan (HASP) for general construction safety.

1.1 Property Location and Site Description

The Site is comprised of a 57,282-square-foot lot that is currently occupied by the Grand Hyatt Hotel, a 26-story building with foundations that penetrate the Metro North Railroad (MNR) and Metropolitan Transit Authority (MTA) mezzanine and platform levels below grade. The “Site” as defined in this RAP is limited to the basement of the current Grand Hyatt Hotel and the below grade structures in the current MNR and MTA space beneath the ground-level of the Grand Hyatt Hotel, which are to be improved with occupiable mechanical spaces (Figures 2A, 2B, 2C and 2D). In addition, foundation elements in the MTA and MNR will be installed as part of this project to support the redevelopment. These foundation elements will be subject to the CHASP and excavation and soil management requirements described within Section 3 of this RAP. In addition, a number of transit and public realm improvements are currently being evaluated and may be incorporated into the overall development. If approved, these changes may include: redesign and expansion of fare control areas, including several new mezzanine stairs; removal of girders from the subway mezzanine level to improve circulation and enhance sightlines; and a “Short-Loop Track” connection that could be constructed to provide direct access for MNR riders from Grand Central Terminal to the subway. If approved, the soil disturbance associated with these improvements is expected to be minimal, and all of this work will be subject to the CHASP and excavation and soil management requirements described within Section 3 of this RAP.

The Site is part of Zoning District C5-3 (Commercial) and located within the Special Midtown District and Grand Central Core District. The Site is bounded by a passage to Grand Central Terminal and a 31-story mixed-use building to the north, the Chrysler Building (Chase Bank/Amazon Store) to the east, the Chanin Building (Apple Bank) to the south, and Park Avenue Elevated Car Viaduct (Banana Republic at Grade below Viaduct) and Grand Central Terminal to the west. Development in the surrounding area is comprised of mixed-use (residential, commercial, school, and community-oriented uses) development.

1.2 Site History

Based on Roux’s review of historical documentation including Sanborn Fire Insurance Maps, historical aerial photographs, historical USGS topographic maps, and the City Directory Abstracts, it appears that the Site was developed prior to 1890 with the Warren Fuller & Co (Manufactory of Paper-Hangings) in the

western portion, the “Hospital for the Ruptured and Crippled” (the Hospital) in the southeastern portion and multiple unspecified buildings in the northeastern portion with one structure noted as a wagon building. Between 1890 and 1899, the Hospital in the southeastern portion was noted to expand northward. The Warren Fuller & Co (Manufactory of Paper-Hangings) was no longer noted to be present at the Site in 1910. All of the buildings on the Site were demolished by 1918, and this demolition debris is a source of some of the fill materials at the Site. In approximately 1919, the entire area of the Site was redeveloped with the 26-story Hotel Commodore. According to the Sanborn Maps, the Hotel Commodore was renovated into the Grand Hyatt Hotel between 1968 and 1980. Although the hotel changed ownership/names, the actual structures do not appear to have changed. Sometime between 1983 and 1985, a restaurant was constructed of glass on the southern portion of the Site and overhangs the sidewalk on East 42nd Street. The Site generally remained consistent with the layout observed in the 1985 Sanborn Map until the most recent 2005 Sanborn Map.

MNR and MTA below-grade railway tunnels, station, and other facilities are present beneath the Site that were constructed in 1910s. In addition, the area surrounding the Site to the west and northwest contains railroad/subway infrastructure including the western adjoining Grand Central Terminal. Other historical uses in the surrounding area consisted of hotels, stores, storage/warehouses, and car/horse storage houses. Around the 1920s, the surrounding area was redeveloped with large-scale, multi-story commercial/office buildings.

1.3 Proposed Site Redevelopment

The planned redevelopment of the Site entails the construction of a new commercial/mixed-use (hotel/offices) tower that will be constructed following the demolition of the Grand Hyatt Hotel. The new tower will have approximately 89 stories. The ground floor of the proposed building will contain the hotel and office lobbies, a reconstructed Lexington Passage with MTA retail, transit hall space, and additional area for subway entries off 42nd Street and Lexington Avenue. Office and hotel space are planned for the upper floors.

In addition, a number of transit and public realm improvements are currently being evaluated and may be incorporated into the overall development. If approved, these changes may include: redesign and expansion of fare control areas, including several new mezzanine stairs; removal of girders from the subway mezzanine level to improve circulation and enhance sightlines; and a “Short-Loop Track” connection that could be constructed to provide direct access for MNR riders from Grand Central Terminal to the subway. Due to the MNR and MTA spaces beneath the current building, the elevation of the proposed building’s foundation slabs are not proposed to be substantially different from those in the current building. Limited and localized excavations will occur to allow for the construction of additional foundation elements that will be used to support the proposed building. No groundwater was observed above bedrock during the completion of the Phase II ESA noted in Section 1.5 below. Based on the anticipated depth to groundwater, dewatering is not anticipated to be required for the proposed construction.

1.4 Topographic and Hydrogeologic Setting

The Site is currently occupied by the Grand Hyatt Hotel, a 26-story building with foundations that penetrate an MTA mezzanine and platform levels below grade. The grade of the Site is generally level. The average elevation of the Site is approximately 49 feet above mean sea level (ft amsl). The Site is not located in or adjacent to any wetlands or located in the 100-year or 500-year flood zones.

During the completion of the test pits performed as part of the Phase II ESA, Roux observed no discernable threshold between historic fill and native soil at each of the test pit locations; historic fill was present in all test pits until refusal. In general, the soil at the Site is comprised of historic fill consisting of fine to coarse sand, some silt and fine to coarse gravel, with fill consisting of brick, concrete, coal/slag, metal and other building aggregate.

The regional direction of groundwater flow in the vicinity of the Site is assumed to flow towards the east-southeast in the direction of the East River. This estimation was based on regional topographic and hydrogeological features during the Phase I ESA. No groundwater was observed within the overburden materials above bedrock during the Phase II ESA.

1.5 Previous Environmental Reports and Environmental Conditions

The following environmental reports were available for review:

- Phase I ESA, prepared by Roux on behalf of Commodore Owner LLC dated January 2021.
 - Roux identified one Recognized Environmental Condition (REC) during the Phase I ESA.
 - **Mass Transit Usage:** The area upgradient to the northwest of the Site is developed with railroad/subway infrastructure associated with the MNR, including the adjoining Grand Central Terminal. Additional rail structures associated with the MTA are also noted to be present under the Site; therefore, the mass transit/rail usage is considered both onsite and offsite. Railway infrastructure typically involves the usage of various hazardous substances and petroleum products in its operations including lubricants, hydraulic oil, heat resistant oils, brake fluid and other oils used in power generation, which may involve the use of polychlorinated biphenyls (PCBs). Numerous New York State Department of Environmental Conservation (NYSDEC) spill listings are associated with the rail lines in this area.
 - Roux did not identify any Historical RECs (HRECs) or Controlled RECs (CRECs) in connection with the Site. Roux did identify two Business Environmental Risks (BERs).
 - **Suspect Presence of Historic Fill Material:** The Site was historically redeveloped with the Commodore Hotel in 1919 as evidenced by Sanborn Maps and historical accounts and online resources for this time period. The redevelopment would have required demolition of the previous hospital and manufacturing related buildings present in the earlier Sanborn Maps dated 1890, 1899 and 1910. There is potential for the Site to be underlain by Historic Fill Material, which may contain glass, bricks, concrete, slag, ceramic, and other non-native materials brought, deposited or demolished directly into the subsurface to facilitate redevelopment. The presence of this material should be considered when planning any future redevelopment requiring soil/material excavation and disposal.
 - **Suspect Presence of Asbestos Containing Materials (ACMs) in Building Materials:** Based upon the age of construction of the current building (1919), there is potential for ACMs to be present in various pipe wrappings, joint wrappings, and other building materials. The MNR and MTA mezzanine and platform levels below grade were also constructed on or before approximately 1915, with many renovations since initially built, so the potential for ACMs, including pipe insulations, tars, and electrical equipment, extends to these areas as well.
- Phase II ESA, prepared by Roux on behalf of Commodore Owner LLC, dated February 2021.
 - The investigation targeted historic fill below the slab within the specific portions of the building that will require excavation and removal as part of the redevelopment. Roux collected ten soil samples from seven test pits and three samples from three temporary sub-slab soil vapor points. Soil samples collected contained concentrations of semivolatile organic compounds

(SVOCs), specifically PAHs, metals, PCBs, and pesticides in exceedance of the New York State Department of Environmental Conservation (NYSDEC) 6 New York Code of Rules and Regulations (NYCRR) Part 375 Unrestricted Use Soil Cleanup Objectives (UUSCOs). Two compounds, benzo(a)pyrene (an SVOC) and lead (a metal) were also detected at concentrations in exceedance of the Commercial Soil Cleanup Objectives (CSCOs). There was no evidence of gross contamination or petroleum staining/odors. Soil vapor samples collected contained concentrations of volatile organic compounds (VOCs) above laboratory reporting limits at all sampling locations. However, the concentrations of the chlorinated VOCs and petroleum compounds are low and do not indicate that there is an active source of contamination to sub-slab soil vapor. Roux recommended the installation of a vapor barrier as part of the construction of the proposed building as a best practice. Based on the Phase II ESA the Site (soil and soil vapor) appears to have been impacted by contaminants originating from Site operations and historic fill. If excess soils need to be removed from the Site following the installation of foundation elements or future utilities, the soils should be properly managed and disposed of offsite. Future waste characterization sampling will be required in order to ensure that the soils are appropriately handled in accordance with appropriate regulations and requirements of the selected disposal facilities.

- The highest concentrations of lead were observed at two test pits which are both located in the MNR portion of the Site. MNR operations typically involve the usage of various hazardous substances and petroleum products including lubricants, hydraulic oil, heat resistant oils, brake fluid and other oils used in power generation. Electrical power conversion typically involves substations which may involve the use of PCBs in electrical transformers. The two samples, in addition to three other samples, were analyzed for TCLP lead. The results indicate that all soil characterized during this investigation has been determined to be non-hazardous (as compared to standards contained within NYSDEC Part 371 and Title 40 CFR Part 261). Special handling and considerations may be required by disposal facilities based on the elevated concentrations of lead in these two locations.

2. Remedial Action

The following remedial action has been developed for the Site based on the results of the previous Site investigations. Specifically, this plan describes measures to be undertaken during Site redevelopment related to management of excavated soils and fill materials removed from the Site and vapor barrier installation. Upon completion of the Remedial Action, Roux will submit a P.E.-certified Remedial Action Report (RAR) to the NYCDEP detailing the implementation of the remedy.

2.1 Remedial Action Objectives

Based on the results of the Phase II ESA, the following RAOs have been identified for this Site:

Soil

- Prevent direct contact with contaminated soil.
- Prevent exposure to contaminants volatilizing from contaminated soil.
- Prevent migration of contaminants that would result in groundwater contamination.

Soil Vapor

- Prevent exposure to contaminants in potential soil vapor.
- Prevent migration of potential soil vapor into dwellings and other occupied structures.

Groundwater

- Groundwater was not encountered in the overburden during the Phase II ESA and no RAOs were identified. Based on the shallow depth to bedrock, the proposed construction will not encounter groundwater, and exposures to groundwater are not anticipated.

2.2 Soil Excavation and Management

Excavation activities during the planned construction program will result in the removal of contaminated soil underlying the Site. Soil excavation and the removal of bedrock will occur in localized excavations within the footprint of the existing basement and in the MNR and MTA spaces (onsite and offsite) to support the construction of various foundation elements as shown on the Hybrid Foundation Plan Progress Prints dated October 21, 2020, which are provided as Appendix B. Soil may also be excavated for installation of utilities beneath the Site. It is not anticipated that excavated soils will be used onsite for backfilling. Crushed rock may be reused beneath foundation elements.

Any remaining excess soil, including the soil/fill generated at the offsite transit and public realm improvement areas, will be excavated and removed from the Site for proper disposal, and a truck log and disposal manifests will be provided in the RAR. Prior to removal, any soil/fill to be sent offsite for disposal will be subject to *in situ* soil characterization sampling to determine appropriate disposal facilities.

2.3 Best Management Practices

As excavation is not planned beneath the entire proposed building footprint, soils with contamination in exceedance of CSCOs will remain onsite following the completion of the Remedial Action. Best Management Practices (BMPs) will be employed in the remedial action to address the residual contamination remaining at the Site. The two primary BMPs that will be used at the Site are:

- Cover system consisting of the new concrete building slab; and
- Soil vapor barrier to separate new building slabs from underlying soil.

2.3.1 Cover System

Exposure to soil with residual impacts at the Site will be prevented by a cover system, which will be constructed as the lowest slab of the proposed building. (Figures 3A and 3B). The cover system is comprised of the concrete foundation slab with a minimum thickness of six inches at the locations shown on Figures 3A and 3B. The areas of the Site where a cover system is not proposed do not have soil beneath the lowest level of the proposed Site building due to the presence of existing MTA or MNR infrastructure (tunnel) air space below.

2.3.2 Soil Vapor Barrier System

Although elevated levels of VOCs were not detected during the Phase II ESA, potential migration of soil vapor into the proposed building will be mitigated with a combination of building slab and vapor barrier as shown on Figure 3A and 3B. The areas of the Site where a soil vapor barrier system is not proposed do not have soil beneath the lowest level of the proposed Site building due to the presence of MTA or MNR infrastructure (tunnel) air space, and therefore, there is not a direct exposure risk to soil vapor.

The subslab soil vapor barrier will be a minimum 20-mil soil vapor barrier made of polyolefin and barrier resins that is ASTM E 1745 Class A, B, and C compliant, resistant to puncturing and has high tensile strength. The permeance of the soil vapor barrier will be compliant with ASTM E 154 Sections 8, 11, 12, and 13. The soil vapor barrier will not deteriorate, decompose, or degrade below concrete slabs when buried and has an indefinite life expectancy. The proposed vapor barrier for under slab applications is either Stego® Wrap 20 Mil Vapor Barrier, Grace Florprufe® or approved equal. If an alternative product is selected other than Stego® Wrap 20 Mil Vapor Barrier and/or Grace Florprufe®, an amendment with the new vapor barrier will be submitted to NYCDEP. The proposed vapor barrier will only be used if the amendment is approved by NYCDEP. Manufacturer's specifications are provided as Appendix C. All soil vapor barriers will be installed in accordance with Manufacturer's recommendations including, but not limited to, recommended overlapping distance, tape seam installation, tape seam products, subbase layer preparation, and material. Appropriate subbase layer will include sand, pea gravel, or mud-slab concrete to prevent punctures during installation. Any penetrations through foundation will be sealed in accordance with the manufacturer's specifications.

The RAR will include photographs (maximum of two photos per page) of the installation process, manufacturer's information on the products installed, and as-built plans showing the soil vapor barrier location.

3. Remedial Soil and Material Management Plan

A Construction Contractor will perform soil excavation activities during the redevelopment process. It will be the responsibility of the Construction Contractor to handle the proper soil management and disposal of all soils excavated from the Site at appropriate offsite disposal facilities. The main elements included in the soil management are described in further detail below.

3.1 Management of Excavated Material

During the course of work at the Site, it is anticipated that excavated material will be sampled *in situ* for waste characterization purposes prior to being excavated and disposed of offsite. The Construction Contractor will coordinate with the disposal facility prior to construction. Procedures to be followed for the temporary stockpiling of fill and/or soil are described below. Observed impacted (visual or olfactory) material will be covered with polyethylene (poly) sheeting with a minimum thickness of 6 mils. These stockpiles will be covered in order to limit precipitation from contacting the material and to avoid the generation of dust. Covered stockpiles will be inspected daily to ensure there has not been any damage to the poly sheeting and the stockpile is still adequately covered.

3.2 Dust Control

Routine dust suppression methods will be employed by the Construction Contractor throughout the construction project. The Construction Contractor will maintain all excavations, stockpiles (if any), access roads/ramps, and all other work areas to minimize dust that would cause a hazard or nuisance to others. The Construction Contractor will implement necessary measures to control particulates including, but not limited to, one or more of the following measures:

1. Applying water on the access roads/ramps;
2. Misting equipment and excavation faces;
3. Spraying water (using atomizer) on buckets during excavation and dumping;
4. Hauling materials in tarped or watertight containers;
5. Reducing speed of vehicles moving through areas of the Site;
6. Covering excavated areas and material after excavation activity ceases; and
7. Stopping work.

The Construction Contractor will make provisions to have an adequate amount of water and appropriate equipment to disperse water onsite at all times.

3.3 Community Air Monitoring Plan

A real-time community air monitoring program (CAMP) will be implemented if contaminated or potentially contaminated media is handled or during any ground intrusive activities. Ground intrusive activities include, but are not limited to, soil/waste excavation and handling, test pit excavation or trenching. The air monitoring is intended to avoid or minimize exposure of the field personnel and the public to potential environmental hazards in the soil during excavation of such soil. Results of this air monitoring will be used to determine the appropriate response action, if needed.

The community air monitoring program described herein has been prepared in accordance with the NYSDEC Division of Environmental Remediation DER-10 (May 2010), Appendix 1A - New York State Department of Health Generic Community Air Monitoring Plan (December 2009).

While work zone air monitoring is not described in this RAP, typical air quality limits for the work zone are provided in the CHASP. The Contractor's HASP will need to supplement the CHASP if any additional hazards are anticipated during construction.

3.3.1 VOC Monitoring, Response Levels, and Actions

VOCs will be monitored at the downwind perimeter of the immediate work area (i.e., the exclusion zone) on a continuous basis during invasive work. Upwind concentrations will be measured at the start of each workday and periodically thereafter to establish background conditions. The monitoring work will be performed using equipment appropriate to measure the types of contaminants known or suspected to be present. The equipment will be calibrated at least daily for the contaminant(s) of concern or for an appropriate surrogate. The equipment will be capable of calculating 15-minute running average concentrations, which will be compared to the levels specified below.

- If the ambient air concentration of total organic vapors at the downwind perimeter of the work area or exclusion zone exceeds 5 parts per million (ppm) above background for the 15-minute average, work activities will be temporarily halted and monitoring continued. If the total organic vapor level readily decreases (per instantaneous readings) below 5 ppm over background, work activities will resume with continued monitoring.
- If total organic vapor levels at the downwind perimeter of the work area or exclusion zone persist at levels in excess of 5 ppm over background but less than 25 ppm, work activities will be halted, the source of vapors identified, corrective actions taken to abate emissions, and monitoring continued. After these steps, work activities will resume provided that the total organic vapor level 200 feet downwind of the exclusion zone is below 5 ppm over background for the 15-minute average.
- If the organic vapor level is above 25 ppm at the perimeter of the work area, activities will be shutdown.

All 15-minute readings will be recorded and be available for NYCDEP personnel to review and summarized in the RAR. Instantaneous readings, if any, used for decision purposes will also be recorded.

3.3.2 Particulate Monitoring, Response Levels, and Actions

Particulate concentrations will be monitored continuously at the upwind and downwind perimeters of the exclusion zone at particulate monitoring stations. The particulate monitoring will be performed using real-time monitoring equipment capable of measuring particulate matter less than 10 micrometers in size (PM-10) and capable of integrating over a period of 15 minutes (or less) for comparison to the airborne particulate action level. The equipment will be equipped with an audible alarm to indicate exceedance of the action level. In addition, fugitive dust migration should be visually assessed during all work activities.

- If the downwind PM-10 particulate level is 100 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) greater than background (upwind perimeter) for the 15-minute period or if airborne dust is observed leaving the work area, then dust suppression techniques will be employed. Work will continue with dust suppression techniques provided that downwind PM-10 particulate levels do not exceed 150 $\mu\text{g}/\text{m}^3$ above the upwind level and provided that no visible dust is migrating from the work area.
- If, after implementation of dust suppression techniques, downwind PM-10 particulate levels are greater than 150 $\mu\text{g}/\text{m}^3$ above the upwind level, work will be stopped, and a re-evaluation of

activities initiated. Work will resume provided that dust suppression measures and other controls are successful in reducing the downwind PM-10 particulate concentration to within 150 µg/m³ of the upwind level and in preventing visible dust migration.

All 15-minute readings must be recorded and be available for NYCDEP personnel to review and summarized in the RAR. Instantaneous readings, if any, used for decision purposes will also be recorded.

3.4 Transportation and Disposal of Soils

As discussed above, waste characterization sampling will be completed *in situ* prior to excavation. The Construction Contractor will secure approvals for disposal of fill and soil at a permitted facility in accordance with federal, state, and local regulations. The fill and soil will be shipped by a licensed hauler in accordance with all applicable federal, state, and local regulations. Each shipment will be transported under the appropriate waste manifest/bill of lading or other appropriate documentation based upon pre-characterization results. All disposal documentation will be submitted to Roux and will be included in the RAR. Before any transport vehicle leaves the Site, the sides and wheels will be inspected. If any fill or soils are observed on the wheels or body of the truck, they will be removed using a shovel, broom, and/or other hand tools in a designated vehicle cleaning area. This procedure will reduce the potential for disposal trucks to spread site-derived material onto the public streets.

3.5 Spill Prevention and Control

The following sections describe procedures to be followed to prevent onsite spills and contingency measures in the event that an onsite spill occurs.

3.5.1 General

A major spill is not anticipated at the Site, but the potential for a spill exists. The most probable spill events associated with this scope of work include hydraulic fluid spills from heavy equipment, fuel spills from equipment or machinery, and soils spilled during transportation. Heavy equipment typically contains 30 gallons or less of hydraulic fluid. If a leak occurs, the equipment will immediately be shut down to minimize hydraulic fluid leaks and repaired prior to re-use. The spill will be contained to the extent possible using a bucket and/or oil absorbent pads.

In general, soils spilled during transportation will be collected and returned to the truck for proper disposal. Surfaces impacted as a result of any spill shall be cleaned as soon as possible.

3.5.2 Spill Prevention

In an effort to keep the potential of spills to a minimum and maintain a constant state of readiness to combat a spill or release, the following inspections will be performed by the Site Health and Safety Officer (SHSO):

- Onsite Materials Handling – Used to account for material (including fill) quantity and proper methods of storage to help reduce the chance of a spill or release.
- Safety Equipment Inspections – Used to account for the quantity, location, and working condition of safety equipment onsite. Safety equipment and supplies will be kept accessible and in good working order.

Any discrepancies or inadequacies discovered as a result of these inspections will be corrected immediately.

3.5.3 Spill Response

Should a spill of any type occur, it will be immediately reported to the Construction Contractor's designated onsite spill response personnel. The Construction Contractor will then notify the Owner's Representative and Construction Manager, who will then contact the appropriate regulatory agencies. Potential spills for this project are anticipated to be secured and cleaned up by Site personnel who are trained in spill response, where appropriate. Unauthorized personnel will be prohibited from entering all spill cleanup areas. The Site Superintendent or Site Safety Officer must evaluate the extent of the hazard(s) and, if available, utilize engineering controls and proper safety equipment to contain the spill until the appropriate emergency response personnel arrive onsite, if necessary.

The following is a list of actions that should be taken in the event of a spill:

- Account for Site personnel and make proper notifications.
- Evaluate the hazard(s), identify the source of the discharge, and stop the spill or leak.
- Exclude any source of ignition from the spilled material if flammable.
- Isolate and contain the spill in the smallest area possible.
- Keep personnel upwind of the spill area. Evaluate potential vapor and dust hazards, and implement appropriate suppression operations.
- At no time will personnel be allowed to come in contact with unidentified spilled materials.
- Notify the Owner's Representative and Construction Manager.

The spill control equipment will be located in a construction trailer or office located at or near the Site. The exact location of the trailer or office has not yet been determined. The spill control equipment will consist of buckets, absorbent pads, oil dry, and sand.

If there is a spill offsite on the public roadway, it is the responsibility of the Waste Transportation Contractor to notify the proper authorities. Vehicles transporting materials offsite will have 24-hour emergency contact information included on the Waste Manifest/Bill of Lading. In the case of an offsite spill, the transporter will immediately notify their designated spill response Construction Contractor and the Owner's Representative and Construction Manager.

3.6 Vehicle Cleaning Area/Stabilized Construction Entrances

One or more temporary vehicle cleaning areas/stabilized construction entrances will be constructed to clean disposal trucks and other vehicles prior to leaving the Site. This area will reduce the amount of fill and soil that disposal trucks and other vehicles spread onto the public roadway. The vehicle cleaning area/stabilized construction entrance will be constructed of gravel and will be of sufficient size to prevent vehicles from spreading fill/soils onto the public roads and/or previously excavated areas of the Site where all fill has been removed. Before any disposal truck or other vehicle leaves the Site, the sides and wheels will be inspected. If any fill or soils are observed on the wheels or body of the truck, they will be removed using a shovel, broom, and/or other hand tools in the designated vehicle cleaning area. This will reduce the potential for disposal trucks to spread Site-derived material onto the public streets.

3.7 Personnel and Equipment Cleaning Areas

All personnel working in the fill will clean themselves prior to leaving the Site in accordance with the CHASP prepared for the Site. In addition, all equipment used for excavation and other earthwork activities (i.e., excavators, bulldozers, backhoes, etc.), which comes in contact with the fill, shall be cleaned at the vehicle cleaning area prior to:

- a. Crossing into areas of the Site where no fill is present;
- b. Handling clean fill/topsoil; and
- c. Leaving the Site.

No equipment will be allowed to leave the Site prior to the SHSO or Site superintendent's verification that the equipment was properly cleaned.

3.8 Unexpected Conditions

Based upon investigation data, much of the Site consists of historical fill material. Fill material contains brick, concrete, coal/slag, metal and other building aggregate. When fill material, as described above, is encountered during excavation activities, it will not be considered an "unexpected condition."

Screening for "unexpected conditions" will be performed by the Construction Contractor, with oversight by Roux personnel, during all excavation and other earth moving activities (not including the activities related to "clean" fill brought onsite). This screening will include the following:

1. Visual inspection for evidence of grossly contaminated soil (i.e., visibly identifiable free-phase or otherwise readily detectable free-phase or residual product.); and
2. Periodically screening for organic vapors with a PID.

The following procedures will be followed if "unexpected conditions" are encountered. The material encountered will be:

1. Excavated within the limits of the proposed excavation;
2. Stockpiled separately from other materials in accordance with the temporary stockpiling requirements outlined above;
3. Sampled for waste characterization parameters for disposal purposes; and
4. Disposed of appropriately offsite.

If intact or damaged buried drums or suspect asbestos containing materials (ACM) are encountered, the Construction Contractor will notify the Owner's Representative and Construction Manager who will contact the proper regulatory agencies.

In general, the Construction Contractor will be responsible for notifying the Owner's Representative and Construction Manager who will then notify the NYCDEP, and any other applicable regulatory agency of the "unexpected conditions" encountered. If encountered, any previously unidentified tanks and associated appurtenances, drums, and/or petroleum-impacted soils will be properly removed in accordance with all applicable regulations after following the above-mentioned procedures. All equipment used will be cleaned in accordance with the appropriate vehicle/equipment cleaning procedures.

3.9 Underground Storage Tanks

It is not expected that any underground storage tanks (USTs) are present beneath the Site. However, if any USTs encountered during demolition and construction activities must be properly closed and/or removed in accordance with local, state, and federal laws. The following protocols will be followed in case a UST is found during excavation:

- Excavation work will cease until such time that an inspection of the UST is conducted to determine the nature of its contents.
- If the UST is found to contain fluid, arrangements will be made to sample the contents, evacuate the contents, and properly dispose of the contents based on the analytical results and in accordance with applicable regulations.
- If required, the UST will be registered with the NYSDEC, who will be given 30-days advanced notice of its scheduled removal.
- The UST will be excavated, and its atmosphere evacuated. It will be rendered un-usable and properly disposed of.
- Endpoint soil samples will be collected from the tank excavation in accordance with the NYSDEC Spill Technology and Remediation Series (STARS) Memo #1 Petroleum-Contaminated Soil Guidance Policy. Once it is confirmed that the remaining soil meets the standards set forth in the CP-51: Soil Cleanup Guidance, development in the area of the former UST may proceed.
- A report will be prepared and submitted to the NYSDEC requesting closure of the UST and potential spill number.

Note that depending on the results of the endpoint samples, an additional investigation or remediation may be required by the NYSDEC or NYCDEP.

3.10 Procedures for Imported Fill

Any imported fill should come from an approved source. The clean fill will be segregated at the source/facility and samples will be collected by qualified environmental personnel. This clean fill will not be comprised of any construction and/or demolition debris originating from the Site. Clean fill samples will be collected and analyzed at a frequency in compliance with Part 360 regulations by a New York State Department of Health (NYSDOH) Environmental Laboratories Accreditation Program (ELAP) certified laboratory. This frequency may be modified based on quantity of import. The results will be reviewed by Roux to ensure that the samples meet the CSCOs. Gravel, rock or stone consisting of virgin material from a permitted mine or quarry or recycled concrete or brick from a NYSDEC registered construction and demolition debris processing facility if the material conforms to the requirements of Section 304 of the New York State Department of Transportation Standard Specifications Construction and Materials Volume 1 (2002) may be imported, without chemical testing, to be used as backfill beneath pavement, buildings or as part of the final site cover, provided that it contains less than 10% by weight material which would pass through a size 80 sieve.

Respectfully submitted,

1. Introduction

This site-specific Construction Health and Safety Plan (CHASP) has been prepared to address remediation activities to be performed during excavation and construction for the proposed development known as 175 Park (also known as Project Commodore). 175 Park is located at 109 East 42nd Street, which is also identified as Block 1280, Lot 30 on the New York City Tax Map (the “Site”). Relevant portions of Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 and 1926.65 were used as guidance while preparing this CHASP. This CHASP has been prepared to accompany a Remedial Action Plan (RAP) to be implemented at the Site and addresses environmental health and safety concerns based on subsurface conditions.

This CHASP has been prepared to accompany the Site’s Remedial Action Plan (RAP), dated March 5, 2021, and it addresses environmental health and safety concerns based on subsurface conditions. This CHASP does not take the place of the Construction Manager’s own Health and Safety Plan (CHASP) for general construction safety.

The designated Site Health and Safety Officer (SHSO) will be responsible for implementing the CHASP. Compliance with this CHASP is required of all workers who may potentially encounter soil at the Site (hereinafter referred to as Site Workers), including the Contractor’s employees, subcontractors to the Contractor, subcontractors to the Owner’s representative, and onsite workers for the Construction Manager. In the event that a Site Worker does not follow the procedures outlined in the CHASP, he or she will be required to leave the Site immediately. The content of this CHASP may change or undergo revisions based upon changes in the technical scope of work, the results of monitoring, and/or additional information made available to health and safety personnel. Any proposed changes must be reviewed and approved by the Corporate Safety Supervisor, and the SHSO implementing the changes to the CHASP. As of the date of this CHASP the Contractor has not been selected; the name and contact information for the Contractor will be added to the CHASP once selected.

Upon entering the Site, all visitors will be required to sign in and read and comply with the provisions of this CHASP. In the event that a visitor does not follow these procedures, he or she will be required to leave the Site immediately.

1.1 Scope of Work

This CHASP addresses excavation and construction of a new 89-story commercial/mixed-use tower that will be constructed following the demolition of the Grand Hyatt Hotel. The ground floor of the proposed building will contain the hotel and office lobbies, a reconstructed Lexington Passage with MTA retail, 6,350 square feet of transit hall space, and approximately 2,400 square feet of additional area for subway entries off 42nd Street and Lexington Avenue. An office lobby and open-air publicly accessible space will occupy the second floor with frontage on Lexington Avenue. Office space is planned to be located on floors 7 through 63, and the hotel is scheduled to occupy floors 65 through 83.

1.2 Emergency and Project Management Contact Information

Provided below is a list of telephone numbers for use in the event of an emergency onsite.

Emergency Medical Service 911
Police: New York City Police Department (NYPD) 911
Hospital: Bellevue Hospital (212) 562-4141
Urgent Care: CityMD (212) 729-4668
National Response Center (800) 424-8802
Poison Control Center (800) 222-1222
Chemtrec (800) 262-8200
Fire: New York City Fire Department (FDNY) 911
New York City Office of Emergency Management 911
Center for Disease Control (800) 311-3435
USEPA (Region II) (212) 637-5000
NYSDEC Emergency Spill Response (800) 457-7362

The following table includes the contact information for Site management and health and safety personnel. The names and phone numbers of the site safety personnel will be provided to NYC DEP prior to the start of any construction activities.

| Title | Contact | Company Name | Business Phone | Mobile Phone |
|--------------------------------|--------------------|--|----------------|----------------|
| General/Site Superintendent | TBD | TBD | TBD | TBD |
| Corporate Safety Supervisor | | | | |
| Site Health and Safety Officer | TBD | TBD | TBD | TBD |
| Construction Manager | TBD | TBD | TBD | TBD |
| Environmental Consultant | Frank Cherena, P.G | Roux Environmental Engineering and Geology, D.P.C. | (631) 232-2600 | (631) 445-0357 |
| Owner's Onsite Representative | TBD | TBD | TBD | TBD |
| Owner's Representative | Gregory Lowe | Commodore Owner LLC | (917) 282-9864 | TBD |

1.3 Address of Hospital and Urgent Care

The following information is for hospital and urgent care locations. A map and directions to each facility is provided in Figure 1.

Bellevue Hospital

462 1st Avenue
New York, New York 10016

CityMD

561 3rd Avenue
New York, New York 10016

1.4 Emergency Equipment

The following is a list of emergency equipment to be kept onsite at all times:

- First Aid Kit;
- ABC Fire Extinguisher;
- Absorbent Pads;
- Air Horns;
- Oil Dry; and
- Eye Wash.

1.5 Spills

Spills associated with site activities may be attributed to project-specific heavy equipment and include gasoline, diesel, and hydraulic oil. In the event of a leak or a release, Site personnel will inform their supervisor immediately, locate the source of spillage, and stop the flow if it can be done safely. A spill containment kit including absorbent pads, booms and/or granulated speedy dry absorbent material will be available to Site personnel to facilitate the immediate recovery of the spilled material. Daily inspections of Site equipment components including hydraulic lines, fuel tanks, etc. will be performed by their respective operators as a preventative measure for equipment leaks and to ensure that equipment is functioning properly. In the event of a spill, Site personnel will immediately notify the NYSDEC (1-800-457-7362) and a spill number will be generated.

2. Health and Safety Staff

This section briefly describes the health and safety responsibilities for the excavation work to be implemented at the Site. The following staff is responsible for ensuring compliance with the CHASP.

2.1 General/Site Superintendent (GSS) – TBD

- Has the overall responsibility for the health and safety of Site Workers.
- Ensures that adequate resources are provided to the field health and safety staff to carry out their responsibilities as outlined below.

2.2 Corporate Safety Supervisor (CSS) – TBD

- Implements the CHASP.
- Performs or oversees Site-specific training and approves revised or new safety protocols or field operations.
- Coordinates revisions of this CHASP with GSS.
- Responsible for the development of new task safety protocols and procedures and resolution of any outstanding safety issues which may arise during the completion of Site work.
- If the Contractor does not have a CSS, all CSS duties should be assumed by the SHSO.

2.3 Site Health and Safety Officer (SHSO) – TBD

- Directs and coordinates health and safety monitoring activities.
- Ensures that field teams utilize proper personal protective equipment (PPE).
- Conducts initial onsite specific training prior to Site Workers commencing work.
- Conducts and documents daily and periodic safety briefings.
- Ensures that field team members comply with this CHASP.
- Immediately notifies the GSS and CSS of all accident/incidents.
- At the end of each day, communicates the tasks completed to the designated representatives, the next day's planned activities, any third-party issues, changes of work plans, and/or changes in level of PPE.
- Determines upgrading or downgrading of PPE based on Site conditions and/or real time monitoring results.
- Ensures that monitoring instruments are calibrated daily or as the manufacturer's instructions determine.
- Reports to the GSS and CSS to provide summaries of field operations and progress.
- Submits and maintains all documentation required in this CHASP and any other pertinent health and safety documentation.

2.4 Site Workers

- Reports any unsafe or potentially hazardous conditions to the SHSO.
- Maintains knowledge of the information, instructions, and emergency response actions contained in the CHASP.
- Complies with rules, regulations, and procedures as set forth in this CHASP, including any revisions that are instituted.
- Prevents admittance to work Site by unauthorized personnel.

3. Site Description and Background

This section provides a brief summary of the conditions of the Site.

3.1 Site Description

The Site is comprised of a 57,282-square-foot lot that is currently occupied by the Grand Hyatt Hotel, a 26-story building with foundations that penetrate the Metro North Railroad (MNR) and MTA mezzanine and platform levels below grade.

3.2 Summary of Environmental Conditions

In January 2021, Roux performed a Phase I Environmental Site Assessment (ESA) on behalf of Commodore Owner LLC. Roux identified one recognized environmental condition (REC), mass transit usage. Roux also identified two Business Environmental Risks (BERs): 1) suspected presence of historic fill materials and 2) suspected presence of Asbestos Containing Materials (ACMs).

Following the Phase I ESA, Roux completed a Phase II ESA to investigate the REC identified at the Site to the extent that it may impact the future development. Roux collected ten soil samples from seven test pits and three samples from three temporary sub-slab soil vapor points.

Soil samples collected contained concentrations of semivolatile organic compounds (SVOCs), specifically polycyclic aromatic hydrocarbons (PAHs), metals, polychlorinated biphenyls (PCBs), and pesticides in exceedance of the New York State Department of Environmental Conservation (NYSDEC) 6 New York Code of Rules and Regulations (NYCRR) Part 375 Unrestricted Use Soil Cleanup Objectives (UUSCOs) and/or Commercial Soil Cleanup Objectives (CSCOs). The highest concentrations of lead were observed at two test pits which are both located in the MNR portion of the Site. The two samples, in addition to three other samples, were analyzed for toxicity characteristic leaching procedure (TCLP) lead and all soil onsite was determined not to be hazardous for disposal purposes.

Soil vapor samples collected contained concentrations of volatile organic compounds (VOCs) above laboratory reporting limits at all sampling locations. However, the concentrations of the chlorinated-related and petroleum compounds are low and do not indicate that there is an active source of contamination to sub-slab soil vapor. Roux recommended the installation of a vapor barrier as part of the construction of the proposed building as a best management practice.

Based on the Phase II ESA, the Site's soil appears to have been impacted by contaminants originating from prior Site operations and historic fill. Excess soils will need to be removed from the Site following the installation of foundation elements or future utilities, and these soils should be properly managed and disposed of offsite. Waste characterization sampling will be required in order to ensure that the soils are appropriately handled in accordance with appropriate regulations and requirements of the selected disposal facilities.

4. Potential Hazards Related to Fill/Soil

This section provides a brief summary of the potential Compounds of Concern and related hazards at the Site. The toxicological, physical, and chemical properties of potential contaminants are presented in Table 1 and fact sheets/Safety Data Sheets (SDSs) for potential COCs are included as Appendix A.

4.1 General

The following information is presented in order to identify the types of materials that may be encountered at the Site. The detailed information on these materials was obtained from:

- SAX's Dangerous Properties of Industrial Materials – Lewis Eight Edition
- Chemical Hazards of the Workplace – Proctor/Hughes
- Condensed Chemical Dictionary – Hawley
- Rapid Guide to Hazardous Chemical in the Workplace – Lewis 1990
- NIOSH Pocket Guide to Chemical Hazards
- ACGIH Threshold Limit Values (TLV) and Biological Exposure Indices (BEI)
- OSHA 29 CFR 1910.1000

Several chemicals that may potentially be present in soils at the Site, based on previous sampling results have been identified. The Summary of Toxicological Data is found in Table 1 and is provided for review of chemicals that may be encountered. The Summary of Toxicological Data Sheets provides information such as the chemicals characteristics, health hazards, protection, and exposure limits.

4.2 Compounds of Concern

Based on the results of Roux's Phase II ESA, soil samples collected contained concentrations of SVOCs, specifically PAHs, metals, PCBs, and pesticides in exceedance of the NYSDEC 6 NYCRR Part 375 UUSCOs and/or CSCOs.

4.3 Hazard Assessment

The potential to encounter hazards related to surficial soil is dependent upon the type of work activity performed and the duration and location of the work activity. Such hazards could include ingestion, inhalation, and/or skin contact with chemicals that could cause: dermatitis, skin burns, or asphyxiation.

Physical hazards that may be encountered during Site work include; heat and cold stress, exposure to excessive noise, loss of limbs, being crushed, head injuries, punctures, cuts, falls, electrocution, bruises, structural integrity of buildings, asbestos and lead paint exposure, and other physical hazards due to motor vehicle operation, heavy equipment, and power tools. The potential for Site Workers to be exposed to chemical hazards may occur during excavation, soil handling, foundation work, and truck and equipment cleaning activities.

Biological hazards may exist during Site activities. These hazards include exposure to insect bites/stings, animals and animal wastes, mold and blood borne pathogens.

Prior to the beginning of each new phase of work, an activity hazard analysis will be prepared by the SHSO with assistance from the GSS/CSS. The analysis will address the hazards for each activity performed in the phase and will present the procedures and safeguards necessary to eliminate the hazards or reduce the risk.

4.4 Exposure Pathways and Assessment

Exposure to these compounds during ongoing activities may occur through inhalation of dust particles and by way of dermal absorption and accidental ingestion by either direct or indirect cross-contamination activities.

Inhalation of dust particles can occur during adverse weather conditions (high or changing wind directions) or during operations that may generate airborne dust such as excavation and loading of Fill or Site grading. Dust control measures such as applying water to roadways and excavations will be implemented when visible dust is generated. Where dust control measures are not feasible or effective, respiratory protection will be used (see Section 7.0 for monitoring procedures and action levels).

4.5 Additional Precautions

Inhalation and dermal absorption contact with ACM and lead-based paint materials is possible during demolition activities at the Site. In addition, dermal absorption or skin contact with Site soils is possible during intrusive activities. The use of PPE and proper vehicle and Site Worker cleaning procedures should significantly reduce the risk of skin contact. The potential for accidental ingestion of Site soils is expected to be remote when good hygiene practices are used.

4.6 Hazard Assessment and Mitigation

| Task | Hazards | Risk of Exposure | Action Taken |
|--------------------------------|-----------------------------|------------------|---|
| Mobilization/Demobilization | Inhalation/
Skin Contact | Low | Proper PPE will be worn. No eating or drinking will be permitted in active work areas. |
| Site Building Demolition | Inhalation/Skin
Contact | Low | Proper PPE will be worn. No eating or drinking will be permitted in active work areas. |
| Excavation and Loading of Soil | Inhalation/
Skin Contact | High | Proper PPE will be worn, and Site Workers will remain upwind of excavation or loading areas, if possible. No eating or drinking will be permitted in active work areas. |
| Vehicle/Equipment Cleaning | Inhalation/
Skin Contact | Low | Proper PPE will be worn during vehicle cleaning and worker shall remain upwind, if possible. No eating or drinking will be permitted in active work areas. |

5. Training

This section details the training requirement for Site Workers.

5.1 Site-Specific Training

Prior to the commencement of field activities, the SHSO, CSS, or GSS will provide Site-specific training to all Site Workers. Site Workers will receive training that will specifically address the activities, procedures, monitoring, and equipment for Site operations. It will include Site layout, hazards, fire prevention and response, first aid equipment locations and emergency services at the Site and will highlight all provisions contained within this CHASP. This training will also allow field workers to clarify anything they do not understand and to reinforce their responsibilities regarding safety and operations for their particular activity. This training may be conducted in conjunction with other Site training or meetings.

5.2 Onsite Safety Meetings

Safety meetings will take place to discuss potential safety concerns for the upcoming activities. At a minimum, the appropriate field supervisors or foremen for all workers will conduct at least one formal daily safety meeting in the morning; however, additional meetings or briefings may be necessary as a result of changing conditions or modifying tasks. Copies of the daily safety meeting sign in sheet and a description of items discussed will be provided to the GSS and will be kept at the Site.

The meetings will also provide a forum to facilitate conformance with safety requirements and to identify performance deficiencies related to safety during daily activities or as a result of safety audits by the Contractor or other involved parties. These meetings may be conducted in conjunction with other Site training or meetings.

Visitors onsite must be made aware of the hazards onsite in a Site-specific safety briefing and sign a statement indicating that they will comply with the applicable requirements of this CHASP.

5.3 First Aid and CPR

The SHSO will identify those individuals having first aid and CPR training to assist with emergency medical treatment during field activities, if necessary. The training will be consistent with the requirements of the American Red Cross. Certification and appropriate training documentation will be kept with the Site Workers' records by the SHSO.

6. Site Control and Personal Protective Equipment

This section provides a detailed description of the Site control measures and personal PPE procedures to be implemented at the Site. It is important to note that this CHASP has been drafted to apply to work in Level D or modified Level D only. If the monitoring results require Level C protection or higher, all Site work will immediately cease until activities can be completed with workers trained in accordance with 29 CFR 1910.120.

6.1 Site Control

Based on the Site history and the results of Roux's investigations, SVOCs, specifically PAHs, metals, PCBs, and pesticides have been identified onsite in exceedance of the NYSDEC 6 NYCRR Part 375 UUSCOs and/or CSCOs. As such, the Site from land surface down to the bedrock will be considered the work area with respect to this CHASP.

6.2 Personal Protective Equipment

The level of protection worn by Site Workers will be enforced by the SHSO. The level of protection may be upgraded at the discretion of the SHSO. All decisions on the level of protection will be based upon a conservative interpretation by the SHSO of the information provided by air monitoring results and/or other appropriate information. Any changes in the level of protection shall be recorded in the health and safety field logbook. If the level of respiratory protection needs to be upgraded, the Contractor will immediately contact the Construction Manager and Owner's Representative.

The level of PPE for work on the Site is Level D PPE, which includes the following:

- Work uniform (long pants, sleeved shirt);
- Hard hat;
- Steel-toed, steel-shanked work boots;
- Safety glasses;
- Boot covers (as needed);
- Hearing protection (as needed); and
- Reflective safety vest.

If required by the SHSO, modified Level D PPE may also be used at the Site during specific activities, consisting of the following:

- Regular Tyvek coveralls (Poly-coated Tyvek as required);
- Outer gloves: leather, cotton, neoprene or nitrile (as required);
- Inner gloves: latex or nitrile (doubled) as required;
- Chemical resistant boots over work boots (as required);
- Steel-toed, steel-shanked work boots;
- Hard hat;
- Safety glasses;

- Hearing protection, as needed; and
- Reflective safety vest.

6.3 Site Control for Unexpected Conditions

In the event that unexpected conditions or hazardous waste is encountered, thereby requiring workers trained in accordance with 29 CFR 1910.120, the following four-zone approach will be employed in order to prevent the spread of the contamination from the area containing the unexpected condition and to protect Site Workers. The four-zones include the Exclusion Zone, the Contamination Reduction Zone, the Remediated Zone, and the Support Zone. A stepped remedial approach will be managed, and the zones modified as the work progresses. Each of the areas will be defined through the use of control barricades and/or construction/hazard fencing. A clearly marked delineation between the zones will be maintained. Signage will be posted to further identify and delineate these areas.

The following subsections describe the four zones that will be utilized in the event that unexpected conditions or contamination is discovered at the Site.

6.3.1 Exclusion Zone

The area where the unexpected condition is discovered would be considered the Exclusion Zone (EZ). All excavation and handling of contaminated materials generated as a result of the discovery of an unexpected condition would take place within the EZ. This zone will be clearly delineated by hay bales, jersey barriers, and/or similar methods. Safety tape may be used as secondary delineation within the EZ. The zone delineation markings may be opened in areas for varying lengths of time to accommodate equipment operation or specific construction activities. The SHSO may establish more than one EZ where different levels of protection may be employed or where different hazards exist. Site Workers will not be allowed in the EZ without:

- A buddy (co-worker);
- Appropriate PPE;
- Medical authorization; and
- Training certification.

6.3.2 Contamination Reduction Zone

A Contamination Reduction Zone (CRZ) will be established between the EZ and the property limits. The CRZ contains the Contamination Reduction Corridor (CRC) and provides an area for decontamination of Site Workers and equipment. The CRZ will be used for general Site entry and egress, in addition to access for heavy equipment and emergency support services. Site Workers will not be allowed in the CRZ without:

- A buddy (co-worker);
- Appropriate PPE;
- Medical authorization; and
- Training certification.

6.3.3 Remediated Zone

A Remediated Zone (RZ) will be established in portions of the Site where the remediation has been completed and only general construction work will be performed. Setup of the RZ will consist of implementing several measures designed to reduce the risk of workers' exposure and prevent non-trained workers from entering the non-remediated zone. Non-trained workers will work only in areas where the potential for exposure has been minimized by removal of all hazardous materials. The remediated zone will then be separated from the non-remediated zone by installing and maintaining temporary plywood or other construction fences along the boundary between the two zones. If potentially impacted material is uncovered in the RZ, all non-trained workers will be removed, and the SHSO will assess the potential risks. If, at any other time, the risk of exposure increases while non-trained workers are present in the RZ, the non-trained workers will be removed. At all times, when non-trained workers are present in the RZ, air monitoring for the presence of VOCs will be conducted in the RZ, as well as at the fence line of the non-remediated zone.

6.3.4 Support Zone

The Support Zone (SZ) will be an uncontaminated area that will be the field support area for the Site operations. The SZ will contain the temporary project trailers and provides for field team communications and staging for emergency response. Appropriate sanitary facilities and safety equipment will be located in this zone. Potentially contaminated Site Workers or materials are not allowed in this zone. The only exception will be appropriately packaged/decontaminated and labeled samples. Meteorological conditions will be observed and noted from this zone, as well as those factors pertinent to heat and cold stress.

7. Monitoring Procedures

A Community Air Monitoring Plan (CAMP) will be conducted in the active work areas during all excavation/truck loading activities, or as mandated by the SHSO.

Based on the results of Roux's Phase II ESA, SVOCs, specifically PAHs, metals, and pesticides are present in soil across the Site. Since the Site redevelopment includes excavation and soil disturbance, particulates will be monitored. Although VOCs were either not detected above laboratory reporting limits or below New York Part 375 Unrestricted Use Soil Cleanup Objectives, limited VOC monitoring is included as part of the CAMP.

The monitoring program will monitor for particulates at the upwind and downwind perimeters of the work area during ground intrusive activities. The design of the CAMP is intended to provide a measure of protection for the downwind community and onsite workers not directly involved with the subject work activities from potential airborne contaminant releases as a direct result of remedial work and demolition activities.

Work zone monitoring will also need to be performed to verify the adequacy of the Level D respiratory protection, to aid in Site layout, and to document monitoring results. If air monitoring in these areas indicates the presence of potentially hazardous materials, control measures will be implemented. All monitoring instruments shall be operated by qualified personnel only and will be calibrated prior to use daily or more often, as necessary. No excavation or truck loading activities will be performed without the presence of the SHSO or designated approved substitute at the Site, and without air monitoring. The SHSO is responsible for ensuring that appropriate monitoring, levels of protection, and safety procedures are followed.

7.1 Instrumentation

The following monitoring instruments will be available for use during field operations, as necessary. There will be a minimum of two of each piece of equipment on the Site at all times:

- Photoionization Detector (PID) with 10.6 EV probe, Flame Ionization Detector (FID), or equivalent.
- Dust/Particulate Monitor (DM), TSI DustTrak, or equivalent.

A PID and/or FID equipped organic vapor meter shall be used to monitor VOCs in and around active work areas during excavation and truck loading activities. VOCs shall also be measured upwind of the work areas to determine background concentrations.

A particulate monitor shall be used to measure concentrations of dust and particulate matter in and around the active work areas. Particulates shall also be measured upwind of the work areas to determine background concentrations.

All instruments shall be calibrated daily prior to use in accordance with the manufacturer's procedures. Calibration records shall be documented and recorded daily.

The frequency of monitoring should be determined by the SHSO after consultation with the CSS/GSS. The rationale for any modification must be documented and maintained by the SHSO in the onsite health and safety files.

7.2 Action Levels

Action levels for the upgrading of PPE requirements in the CHASP will apply to all Site work including excavation, soil handling, foundation work, and truck and equipment cleaning activities. These action levels are for known contaminants measured using direct reading instruments in the Breathing Zone (BZ) for VOCs and particulates. The BZ will be determined by the SHSO but is typically 4 to 5 feet above the work area surface or elevation. Action levels will be specific in the Construction Manager's HASP.

An air horn will be readily available in the Site trailer. An additional air horn will be located in the work area to alert Site Workers to an emergency situation. In the event of an emergency or the need to upgrade the level of personal protection, sharp blasts of the air horn will be sounded. If the level of respiratory protection needs to be upgraded, the Contractor will immediately contact the Construction Manager and Owner's Representative.

Action levels will be specific in the CAMP and are provided in Section 3.3 of the RAP.

8. Vehicle/Site Worker Cleaning Areas and Disposal Procedures

This section details the specific vehicle/Site Worker cleaning and waste disposal procedures to be implemented at the Site during the excavation and truck loading activities.

8.1 Contamination Prevention

Contamination prevention should minimize worker exposure and help to avoid spreading Site derived soil onto the public roadways. Procedures for prevention include:

Site Workers

- Do not directly handle or touch soil.
- No eating or drinking in the soil areas.
- Particular care should be taken to protect any skin injuries.
- Stay upwind of dust.
- Do not use cigarettes, cosmetics, gum, etc., in areas of soil.
- Care should be taken to limit the amount of soil that comes in contact with heavy equipment (tires).
- If tools used in soil are to be placed on equipment for transport to an area where all soil has been removed or to be cleaned, plastic should be used to keep the equipment clean.
- Dust control measures, including water misting, will be used on roads inside the Site boundaries.

8.2 Vehicle Cleaning Area/Stabilized Construction Entrances

One or more temporary vehicle cleaning areas will be constructed to clean disposal trucks and other vehicles and equipment prior to leaving the Site. This area will reduce the amount of soil that disposal trucks and other vehicles spread onto the public roadway. The vehicle cleaning area will be constructed of gravel and will be of sufficient size to prevent vehicles from spreading Fill/Soils onto the public roads and/or previously excavated areas of the Site where all soil has been removed. Before any disposal truck or other vehicle leaves the Site, the sides and wheels will be inspected. If any soils are observed on the wheels or body of the truck, they will be removed and collected for disposal using a shovel, broom, and/or other hand tools in the designated vehicle cleaning area. This will reduce the potential for disposal trucks to spread Site-derived material onto the public streets. This vehicle cleaning area may be upgraded to include wet vehicle cleaning procedures (i.e., power washing or steam cleaning), if deemed necessary by the SHSO, CSS, and/or GSS.

In addition, all equipment used for excavation and other earthwork activities (i.e., excavators, bulldozers, backhoes, etc.) which comes in contact with Fill shall be cleaned at the vehicle cleaning area prior to:

- Crossing into areas of the Site where no exposed soil is present; and
- Leaving the Site.

No equipment will be allowed to leave the Site prior to the SHSO or Site Superintendent's inspection and verification that the equipment was properly cleaned.

8.3 Disposal Procedures

A system of segregating all waste will be developed by the SHSO. All discarded materials, waste materials, or other objects shall be handled in such a way as to preclude the potential for spreading Fill, creating a sanitary hazard, or causing litter to be left onsite. If any potentially contaminated materials (e.g., clothing, gloves, etc.) are generated, they will be bagged or drummed, as necessary, labeled, and segregated for proper disposal. All non-contaminated materials shall be collected and bagged for appropriate disposal as domestic waste.

9. Handling of Potential Hazardous Materials

Based on the results of the previous investigations, hazardous materials have not been identified at the Site. In the event that hazardous soils are identified during the excavation and construction phases of work, the steps for dealing with hazardous conditions will be followed as outlined in Section 6.3.

10. Emergency Plan

The emergency plan outlined in this section will be understood by all Site Workers prior to the start of work so that, should an emergency occur, all parties will know how to respond. During an emergency, the SHSO will perform air monitoring as needed and will assist responding emergency personnel with health and safety information related to the Site. Site Workers will endeavor to keep non-essential personnel away from the incident until the appropriate emergency personnel arrive. At that time, the emergency personnel will take control of the Site. Site Workers may be asked to lend assistance to emergency personnel such as during evacuations, help with the injured, etc.

10.1 Emergency Response Numbers

The following sections provide emergency response and project management phone numbers. Emergencies encountered on this Site will be responded to via offsite emergency services personnel and Site Workers. The following master phone list will be prominently posted at the Contractor's construction trailer designated as the Site command post.

| | |
|--|----------------|
| Emergency Medical Service | 911 |
| <u>Police</u> : New York City Police Department (NYPD) | 911 |
| <u>Hospital</u> : Bellevue Hospital | (212) 562-4141 |
| <u>Urgent Care</u> : CityMD | (212) 729-4668 |
| National Response Center | (800) 424-8802 |
| Poison Control Center | (800) 222-1222 |
| Chemtrec | (800) 262-8200 |
| <u>Fire</u> : New York City Fire Department (FDNY) | 911 |
| New York City Office of Emergency Management | 911 |
| Center for Disease Control | (800) 311-3435 |
| USEPA (Region II) | (212) 637-5000 |
| NYSDEC Emergency Spill Response | (800) 457-7362 |

The table in Section 1.2 provides the contact information for Project Management and Health and Safety Personnel.

10.2 Emergency Evacuation

Evacuation procedures will be discussed prior to the start of work and periodically during safety meetings. In the event of an emergency situation such as fire or an explosion, an air horn or other appropriate device will be sounded for three (3) sharp blasts, indicating the initiation of evacuation procedures. The emergency evacuation route shall be clearly posted in the appropriate Site trailers. Under no circumstances will incoming Site Workers or visitors be allowed to proceed into the area once the emergency signal has been given. Once the alarm has been sounded, the SHSO or GSS must ensure that access for emergency equipment is provided and that all combustion apparatuses have been shut down. All Site Workers will assemble outside of the active work areas and away from the area of danger and the fire department and other emergency response personnel will be notified by telephone of the emergency.

10.3 Injury to Site Workers

Emergency first aid shall be applied onsite as appropriate. In the event that additional medical attention is necessary, the injured worker should be brought to either the urgent care facility or emergency room at the hospital. If the Site Worker is unable to be brought to these facilities, 911 should be called and an ambulance sent to the Site.

10.4 Site Worker Exposure

The following describes the appropriate mitigation measures to be followed in the event that Site Workers are exposed to contaminants.

| | |
|--|---|
| <u>Skin Contact:</u> | Use copious amounts of soap and water. Wash/rinse affected area thoroughly, then clean or remove PPE and provide appropriate medical attention, if necessary. Eyes should be rinsed for 15 minutes upon chemical contamination. |
| <u>Inhalation:</u> | Move to fresh air and/or, if necessary, clean or remove PPE and transport to emergency medical facility. |
| <u>Ingestion:</u> | Clean or remove PPE and transport to emergency medical facility, if necessary. |
| <u>Puncture Wound
or Laceration:</u> | Clean or remove PPE and transport to emergency medical facility, if necessary. |

11. Field Team Review

Each Site Worker shall sign this section after Site-specific training is completed and before being permitted to work at the Site.

SHSO Certification of Hospital Directions

Name of SHSO: _____

Date: _____

This is to certify that on _____, I personally drove the route to Bellevue Hospital as listed in the CHASP. The Map Routing and Directions were/were not as listed in the plan. Listed below were conditions that resulted in different directions.

Site Health and Safety Officer

TABLES

1. Toxicological, Physical and Chemical Properties of Compounds Potentially Present at the Site

Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 109 East 42nd Street, New York, New York 10017

| Compound | CAS # | ACGIH TLV | NIOSH REL | OSHA PEL | IDLH | Routes of Exposure | Toxic Properties | Target Organs | Physical/Chemical Properties |
|----------------------|-------------------|--------------------------------|--------------------------------------|--|----------------------------------|---|--|--|--|
| Acenaphthene | 83-32-9 | None established | None established | None established | None established | inhalation, ingestion, skin and/or eye contact | Irritation eyes, skin, respiratory system | Eyes, skin, respiratory system | Brown solid |
| Acenaphthylene | 208-96-8 | None Established | None established | None established | None established | inhalation, ingestion, skin and/or eye contact | Irritation eyes, skin, respiratory system | Eyes, skin, respiratory system | Yellow Solid
Fl. Pt.=251°F |
| Arsenic (inorganic) | 7440-38-2 (metal) | TWA 0.01 mg/m3 | Ca
C 0.002 mg/m3 [15-min] | TWA 0.010 mg/m3 | Ca [5 mg/m3 (as As)] | Inhalation; ingestion; skin absorption; skin and/or eye contact | Ulceration of nasal septum, dermatitis, GI disturbances, peripheral neuropathy, resp irritation, hyperpigmentation of skin, [potential occupational carcinogen] | Liver, kidneys, skin, lungs, lymphatic sys | Metal: sliver-gray or tin-white, brittle, odorless solid
BP: sublimes |
| Barium | 7440-39-3 | TWA 0.5 mg/m3 | None established | TWA 0.5 mg/m3 | None established | Inhalation, ingestion, skin contact | Irritation skin, respiratory system, digestive system | Skin, eyes, respiratory system | Yellow white powder
BP: 1640 C |
| Benzene | 71-43-2 | TWA 0.5 ppm
STEL 2.5 ppm | Ca TWA 0.1 ppm
STEL 1 ppm | TWA 1 ppm ST 5 ppm | Ca [500 ppm] | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin, nose, respiratory system; dizziness; headache, nausea, staggered gait; anorexia, lassitude (weakness, exhaustion); dermatitis; bone marrow depression; [potential occupational carcinogen] | Eyes, skin, respiratory system, blood, central nervous system, bone marrow | Colorless to light yellow liquid with an aromatic odor [Note: Solid below 42 °F]
BP: 176°F
Fl.Pt. = 12°F
LEL: 1.2%
UEL: 7.8%
Class B Flammable liquid |
| Benzo[a]anthracene | 56-55-3 | None established [skin cancer] | None established | None established | None established | Inhalation; ingestion; skin absorption; skin and/or eye contact | Irritation eyes, skin, respiratory system, CNS; skin cancer | Skin | Pale Yellow crystal, solid
BP: 438 C |
| Benzo[a]pyrene | 50-32-8 | None established [cancer] | TWA 0.1 mg/m3 | TWA 0.2 mg/m3 | None established | Inhalation; ingestion; skin absorption; skin and/or eye contact | POISON. This material is an experimental carcinogen, mutagen, tumorigen, neoplastigen and teratogen. It is a probable carcinogen in humans and a known human mutagen. IARC Group 2A carcinogen. It is believed to cause bladder, skin and lung cancer. Exposure to it may damage the developing fetus. May cause reproductive damage. Skin, respiratory and eye irritant or burns. | Skin, eye, bladder, lung, reproductive | Yellow crystals or powder [found in cigarette smoke, coal tar, fuel exhaust gas and in many other sources]
BP: 495 C |
| Benzo[b]fluoranthene | 205-99-2 | None established [cancer] | TWA 0.1 mg/m3 | TWA 0.2 mg/m3 | None established | Inhalation; ingestion; skin and/or eye contact | No data were identified on the toxicity of benzo[b]fluoranthene to humans. Based on results of studies in animals, IARC concluded that benzo[b]fluoranthene is possibly carcinogenic to humans | Respiratory system, skin, bladder, kidneys | Off-white to tan powder |
| Benzo[k]fluoranthene | 207-08-9 | None established | None established | None established | None established | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin, respiratory tract, gastrointestinal; fatal if swallowed, inhaled, absorbed through the skin; vomiting, nausea, diarrhea | Lungs, respiratory system | Yellow crystals
BP: 480 C |
| Benzo(g,h,i)perylene | 191-24-2 | None established | None established | California permissible exposure limits for chemical contaminants (Title 8, Article 107)
PEL 0.2 mg/m3 | None established | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin, respiratory tract, very toxic to aquatic life with long lasting effects | Eyes, skin, respiratory system | Pale Yellow -Green Crystals
BP: 550°C |
| Beryllium | 7440-41-7 (metal) | TWA 0.00005 mg/m ³ | Ca
C 0.0005 mg/m ³ | TWA 0.002 mg/m ³
C 0.005 mg/m ³ (30 minutes) with a maximum peak of 0.025 mg/m ³ | Ca [4 mg/m ³ (as Be)] | inhalation, skin and/or eye contact | Berylliosis (chronic exposure): anorexia, weight loss, lassitude (weakness, exhaustion), chest pain, cough, clubbing of fingers, cyanosis, pulmonary insufficiency; irritation eyes; dermatitis; [potential occupational carcinogen] | Eyes, skin, respiratory system | Metal: A hard, brittle, gray-white solid.
BP: 4532°F |
| Cadmium | 7440-43-9 (metal) | TWA 0.01 mg/m ³ | Ca | TWA 0.005 mg/m ³ | Ca [9 mg/m ³ (as Cd)] | inhalation, ingestion | Pulmonary edema, dyspnea (breathing difficulty), cough, chest tightness, substernal (occurring beneath the sternum) pain; headache; chills, muscle aches; nausea, vomiting, diarrhea; anosmia (loss of the sense of smell), emphysema, proteinuria, mild anemia; [potential occupational carcinogen] | respiratory system, kidneys, prostate, blood | Metal: Silver-white, blue-tinged lustrous, odorless solid.
BP: 1409°F |

STEL 0.03 mg/m ³ [skin] | TWA 0.01 mg/m ³
C 0.04 mg/m ³ | 2 mg/m ³ (as Hg) | inhalation, skin absorption, ingestion, skin and/or eye contact | Paresthesia; ataxia, dysarthria; vision, hearing disturbance; spasticity, jerking limbs; dizziness; salivation; lacrimation (discharge of tears); nausea, vomiting, diarrhea, constipation; skin burns; emotional disturbance; kidney injury; possible teratogenic effects | Eyes, skin, central nervous system, peripheral nervous system, kidneys | Appearance and odor vary depending upon the specific (organo) alkyl mercury compound |
| Mercury compounds [except (organo) alkyls] (as Hg) Mercury | 7439-97-6 | TWA 0.025 mg/m ³ (elemental and inorganic forms) | Hg Vapor: TWA 0.05 mg/m ³ [skin]
Other: C 0.1 mg/m3 [skin] | TWA 0.1 mg/m ³ | 10 mg/m ³ (as Hg) | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin; cough, chest pain, dyspnea (breathing difficulty), bronchitis, pneumonitis; tremor, insomnia, irritability, indecision, headache, lassitude (weakness, exhaustion); stomatitis, salivation; gastrointestinal disturbance, anorexia, weight loss; proteinuria | Eyes, skin, respiratory system, central nervous system, kidneys | Metal: Silver-white, heavy, odorless liquid.
[Note: "Other" Hg compounds include all inorganic & aryl Hg compounds except (organo) alkyls.]
BP: 674°F |
| Methylene Chloride (Dichloromethane) | 75-09-2 | TWA 50 ppm, A3 - suspected human carcinogen | Ca | TWA 25 ppm
STEL 125 ppm | Ca [2300 ppm] | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin; lassitude (weakness, exhaustion), drowsiness, dizziness; numbness, tingle limbs; nausea; [potential occupational carcinogen] | Eyes, skin, cardiovascular system, central nervous system | Colorless liquid with a chloroform-like odor
BP: 104°F
UEL: 23%
LEL: 13% |
| Naphtha (Rubber Solvent) | 8030-30-6 | None established | TWA 100 ppm (400 mg/m ³) | TWA 100 ppm (400 mg/m ³) | 1000 ppm [10%LEL] | inhalation, ingestion, skin and/or eye contact | Irritation eyes, skin, nose; dizziness, drowsiness; dermatitis; in animals: liver, kidney damage | Eyes, skin, respiratory system, central nervous system, liver, kidneys | Reddish-brown, mobile liquid with an aromatic odor
BP: 320-428°F
Fl.P: 100-109°F
Class II Combustible Liquid |
| Naphthalene | 91-20-3 | TWA 10 ppm [skin] | TWA 10 ppm (50 mg/m ³) STEL 15 ppm (75 mg/m ³) | TWA 10 ppm (50 mg/m ³) | 250 ppm | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes; headache, confusion, excitement, malaise (vague feeling of discomfort); nausea, vomiting, abdominal pain; irritation bladder; profuse sweating; jaundice; hematuria (blood in the urine), renal shutdown; dermatitis, optical neuritis, corneal damage | Eyes, skin, blood, liver, kidneys, central nervous system | Colorless to brown solid with an odor of mothballs.
BP: 424°F
Fl.P: 174°F
UEL: 5.9%
LEL: 0.9% |
| Petroleum hydrocarbons(Petroleum distillates) | 8002-05-9 | None established | TWA 350 mg/m ³
C 1800 mg/m ³ [15 min] | TWA 500 ppm (2000 mg/m ³) | 1,100 [10% LEL] | Inhalation; ingestion; skin and/or eye contact | Irritation eyes, skin, nose, throat; dizziness, drowsiness, headache, nausea; dried/cracked skin; chemical pneumonitis | CNS, eyes, respiratory system, skin | Colorless liquid with a gasoline or kerosene-like odor
BP: 86-460°F
Fl. Pt = -40 to -86°F
UEL: 5.9%
LEL: 1.1%
Flammable liquid |
| Polychlorinated Biphenyls (PCBs) (Chlorodiphenyl (42% Chlorine)) | 53469-21-9 | TWA 1 mg/m ³ | Ca TWA 0.001 mg/m ³ | 0.5 mg/m ³ | 5 ppm | Dermal; inhalation; ingestion; skin and/or eye contact | Irritation eyes; chloracne; liver damage; reproductive effects; [potential occupational carcinogen] | Eyes, skin, liver, respiratory system | Colorless to light-colored, viscous liquid, hydrocarbon odor, BP: 617 - 734°F, non-flammable, LEL: NA, UEL: NA |
| Selenium | 7782-49-2 | TWA 0.2 mg/m ³ | TWA 0.2 mg/m ³ | TWA 0.2 mg/m ³ | 1 mg/m ³ (as Se) | inhalation, ingestion, skin and/or eye contact | Irritation eyes, skin, nose, throat; visual disturbance; headache; chills, fever; dyspnea (breathing difficulty), bronchitis; metallic taste, garlic breath, gastrointestinal disturbance; dermatitis; eye, skin burns; in animals: anemia; liver necrosis, cirrhosis; kidney, spleen damage | Eyes, skin, respiratory system, liver, kidneys, blood, spleen | Amorphous or crystalline, red to gray solid.
[Note: Occurs as an impurity in most sulfide ores.]
BP: 1265°F |

Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 109 East 42nd Street, New York, New York 10017

| Compound | CAS # | ACGIH TLV | NIOSH REL | OSHA PEL | IDLH | Routes of Exposure | Toxic Properties | Target Organs | Physical/Chemical Properties |
|---|-----------------------------|--|---|---|---|--|---|---|---|
| Silver | 7440-22-4 (metal) | TWA 0.1 mg/m ³ (metal, dust, fume)
TWA 0.01 mg/m ³ (Soluble compounds, as Ag) | TWA 0.01 mg/m ³ | TWA 0.01 mg/m ³ | 10 mg/m ³ (as Ag) | inhalation, ingestion, skin and/or eye contact | Blue-gray eyes, nasal septum, throat, skin; irritation, ulceration skin; gastrointestinal disturbance | Nasal septum, skin, eyes | Metal: White, lustrous solid
BP: 3632°F |
| Tetrachloroethene | 127-18-4 | TWA 25 ppm
STEL 100 ppm
listed as A3, animal carcinogen | Ca Minimize workplace exposure concentrations | TWA 100 ppm
C 200 ppm (for 5 minutes in any 3-hour period), with a maximum peak of 300 ppm | Ca [150 ppm] | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin, nose, throat, respiratory system; nausea; flush face, neck; dizziness, incoordination; headache, drowsiness; skin erythema (skin redness); liver damage; [potential occupational carcinogen] | Eyes, skin, respiratory system, liver, kidneys, central nervous system | Colorless liquid with a mild, chloroform-like odor.
BP: 250°F
Noncombustible Liquid |
| Toluene | 108-88-3 | TWA 20 ppm | TWA 100 ppm (375 mg/m ³)
STEL 150 ppm (560 mg/m ³) | TWA 200 ppm
C 300 ppm 500 ppm (10-minute maximum peak) | 500 ppm | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, nose; lassitude (weakness, exhaustion), confusion, euphoria, dizziness, headache; dilated pupils, lacrimation (discharge of tears); anxiety, muscle fatigue, insomnia; paresthesia; dermatitis; liver, kidney damage | Eyes, skin, respiratory system, central nervous system, liver, kidneys | Colorless liquid with a sweet, pungent, benzene-like odor.
BP: 232°F
Fl.P: 40°F
UEL: 7.1%
LEL: 1.1%
Class IB Flammable Liquid |
| 1,1,1-Trichloroethane (Methyl Chloroform) | 71-55-6 | TWA 350 ppm
STEL 450 ppm | C 350 ppm (1900 mg/m ³) [15-minute] | TWA 350 ppm (1900 mg/m ³) | 700 ppm | inhalation, ingestion, skin and/or eye contact | Irritation eyes, skin; headache, lassitude (weakness, exhaustion), central nervous system depression, poor equilibrium; dermatitis; cardiac arrhythmias; liver damage | Eyes, skin, central nervous system, cardiovascular system, liver | Colorless liquid with a mild, chloroform-like odor.
BP: 165°F
UEL: 12.5%
LEL: 7.5% |
| Trichloroethene | 79-01-6 | TWA 10 ppm
STEL 25 ppm | Ca | TWA 100 ppm
C 200 ppm 300 ppm (5-minute maximum peak in any 2 hours) | Ca [1000 ppm] | inhalation, skin absorption, ingestion, skin and/or eye contact | Irritation eyes, skin; headache, visual disturbance, lassitude (weakness, exhaustion), dizziness, tremor, drowsiness, nausea, vomiting; dermatitis; cardiac arrhythmias, paresthesia; liver injury; [potential occupational carcinogen] | Eyes, skin, respiratory system, heart, liver, kidneys, central nervous system | Colorless liquid (unless dyed blue) with a chloroform-like odor.
BP: 189°F
UEL(77°F): 10.5%
LEL(77°F): 8% |
| Vinyl Chloride | 75-01-4 | TWA 1 ppm | Carcinogen | TWA 1 ppm
C 5 ppm [15-minute] | Ca [IDLH value has not been determined] | inhalation, skin, and/or eye contact (liquid) | Lassitude (weakness, exhaustion); abdominal pain, gastrointestinal bleeding; enlarged liver; pallor or cyanosis of extremities; liquid: frostbite; [potential occupational carcinogen] | Liver, central nervous system, blood, respiratory system, lymphatic system | Colorless gas or liquid (below 7°F) with a pleasant odor at high concentrations.
BP: 7°F
UEL: 33.0%
LEL: 3.6%
Flammable Gas |
| Xylene (m, o & p isomers) | 108-38-3, 95-47-6, 106-42-3 | TWA 100 ppm
STEL 150 ppm | TWA 100 ppm (435 mg/m ³) | TWA 100 ppm (435 mg/m ³) | 900 ppm | Skin absorption, inhalation, ingestion, skin, and/or eye contact | Irritation eyes, skin, nose, throat; dizziness, excitement, drowsiness, incoordination, staggering gait; corneal vacuolization; anorexia, nausea, vomiting, abdominal pain; dermatitis | Eyes, skin, respiratory system, central nervous system, gastrointestinal tract, blood, liver, kidneys | Colorless liquid with an aromatic odor
BP: 282°F, 292°F, 281°F
Fl. Pt. 82°F, 90°F, 81°F
LEL: 1.1%, 0.9%, 1.1%
UEL: 7.0%, 6.7%, 7.0%
Class C Flammable Liquid |
| Zinc Oxide | 1314-13-2 | TWA 2 mg/m3
STEL 10 mg/m ³ | None established | TWA 10 mg/m3 (for zinc oxide fume) | None established | skin and/or eye contact, inhalation, ingestion | Irritation eyes, skin, respiratory tract; gastrointestinal disturbances | Eyes, skin, respiratory system, | Bluish gray solid
BP: 1664.6°F
Flammable |

Abbreviations:

ACGIH – American Conference of Governmental Industrial Hygienists.
BP – boiling point at 1 atmosphere, °F
C – Ceiling, is a concentration that should not be exceeded during and part of the working exposure.
CAS# - Chemical Abstracts Service registry number which is unique for each chemical.
Ft Pt. – Flash point
IDLH - Immediately Dangerous to Life and Health concentrations represent the maximum concentration from which, in the event of respirator failure, one could escape within 30 minutes without a respirator and without experiencing any escape-impairing or irreversible health effects.
LEL – Lower explosive (flammable) limit in air, % by volume (at room temperature)
mg/m³ – Milligrams of substance per cubic meter of air
NIOSH - National Institute for Occupational Safety and Health.
OSHA – Occupational Safety and Health Administration
PEL - OSHA Permissible Exposure Limit (usually) a time weighted average concentration that must not be exceeded during any 8 hour work shift of a 40 hr work week.
ppm – parts per million
REL – NIOSH Recommended Limit indicated a time weighted average concentration that must not be exceeded during any 10 hour work shift of a 40 hr work week
SG - Specific Gravity
STEL – Short-term exposure limit (ST)
TLV - ACGIH Threshold Limit Values (usually 8 hour time weighted average concentrations).
TWA – 8-hour, time-weighted average
UEL – Upper explosive (flammable) limit in air, % by volume (at room temperature)
VP - Vapor Pressure

APPENDIX A

Fact Sheets and/or Safety Data Sheets for Potential COCs

Material Safety Data Sheet

Acenaphthylene

ACC# 02275

Section 1 - Chemical Product and Company Identification

MSDS Name: Acenaphthylene**Catalog Numbers:** AC338880000, AC338880010, AC338880050**Synonyms:** Cyclopenta(de)naphthalene; Polycyclic aromatic hydrocarbon.**Company Identification:**

Acros Organics N.V.

One Reagent Lane

Fair Lawn, NJ 07410

For information in North America, call: 800-ACROS-01**For emergencies in the US, call CHEMTREC:** 800-424-9300

Section 2 - Composition, Information on Ingredients

| CAS# | Chemical Name | Percent | EINECS/ELINCS |
|----------|----------------|---------|---------------|
| 208-96-8 | Acenaphthylene | >80 | 205-917-1 |

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Appearance: yellow flakes.**Warning!** Causes eye, skin, and respiratory tract irritation. May be harmful if swallowed, inhaled, or absorbed through the skin.**Target Organs:** Lungs, eyes, nervous system, skin, mucous membranes.

Potential Health Effects

Eye: Causes eye irritation.**Skin:** Causes skin irritation. May be harmful if absorbed through the skin. The toxicological properties of this material have not been fully investigated.**Ingestion:** May cause irritation of the digestive tract. May be harmful if swallowed.**Inhalation:** Causes respiratory tract irritation. The toxicological properties of this substance have not been fully investigated. May be harmful if inhaled.**Chronic:** Some polycyclic aromatic hydrocarbons are suspect carcinogens, as well as air and water contaminants.

Section 4 - First Aid Measures

Eyes: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical aid.**Skin:** In case of contact, flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical aid if irritation develops and persists. Wash clothing before reuse.**Ingestion:** If swallowed, do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical aid.**Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult,

give oxygen. Get medical aid.

Notes to Physician: Treat symptomatically and supportively.

Section 5 - Fire Fighting Measures

General Information: As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion.

Extinguishing Media: Use foam, dry chemical, or carbon dioxide.

Flash Point: 122.2 deg C (251.96 deg F)

Autoignition Temperature: Not available.

Explosion Limits, Lower:Not available.

Upper: Not available.

NFPA Rating: (estimated) Health: 2; Flammability: 1; Instability: 0

Section 6 - Accidental Release Measures

General Information: Use proper personal protective equipment as indicated in Section 8.

Spills/Leaks: Vacuum or sweep up material and place into a suitable disposal container. Avoid generating dusty conditions. Provide ventilation.

Section 7 - Handling and Storage

Handling: Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Use with adequate ventilation. Minimize dust generation and accumulation. Avoid contact with eyes, skin, and clothing. Avoid breathing dust.

Storage: Store in a cool, dry place. Store in a tightly closed container.

Section 8 - Exposure Controls, Personal Protection

Engineering Controls: Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate ventilation to keep airborne concentrations low.

Exposure Limits

| Chemical Name | ACGIH | NIOSH | OSHA - Final PELs |
|----------------|-------------|-------------|-------------------|
| Acenaphthylene | none listed | none listed | none listed |

OSHA Vacated PELs: Acenaphthylene: No OSHA Vacated PELs are listed for this chemical.

Personal Protective Equipment

Eyes: Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.

Skin: Wear appropriate protective gloves to prevent skin exposure.

Clothing: Wear appropriate protective clothing to prevent skin exposure.

Respirators: Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

Section 9 - Physical and Chemical Properties

Physical State: Flakes
Appearance: yellow
Odor: Not available.
pH: Not available.
Vapor Pressure: .0009 mm Hg @ 25 deg C
Vapor Density: Not available.
Evaporation Rate: Not available.
Viscosity: Not available.
Boiling Point: 280 deg C
Freezing/Melting Point: 88 - 91 deg C
Decomposition Temperature: Not available.
Solubility: 16.1 mg/liter @ 25°C
Specific Gravity/Density: 0.8988 @ 16°C/2°C
Molecular Formula: C₁₂H₈
Molecular Weight: 152.20

Section 10 - Stability and Reactivity

Chemical Stability: Stable under normal temperatures and pressures.
Conditions to Avoid: Dust generation, excess heat.
Incompatibilities with Other Materials: Strong oxidizing agents.
Hazardous Decomposition Products: Carbon monoxide, carbon dioxide.
Hazardous Polymerization: Has not been reported

Section 11 - Toxicological Information

RTECS#:
CAS# 208-96-8: AB1254000; AB1254200
LD50/LC50:
CAS# 208-96-8:
Oral, mouse: LD50 = 1760 mg/kg;

Carcinogenicity:
CAS# 208-96-8: Not listed by ACGIH, IARC, NTP, or CA Prop 65.

Epidemiology: No information found
Teratogenicity: No information found
Reproductive Effects: No information found
Mutagenicity: See actual entry in RTECS for complete information.
Neurotoxicity: No information found
Other Studies:

Section 12 - Ecological Information

Ecotoxicity: No data available. No information available.
Environmental: Acenaphthylene has the potential to bioconcentrate in aquatic systems. Considered to be persistent, bioaccumulative, and toxic. Even when released in very small amounts, can accumulate and cause environmental problems.
Physical: log Kow = 4.07
Other: No information available.

Section 13 - Disposal Considerations

Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

RCRA P-Series: None listed.

RCRA U-Series: None listed.

Section 14 - Transport Information

| | US DOT | Canada TDG |
|-----------------------|---------------|---------------|
| Shipping Name: | Not regulated | Not Regulated |
| Hazard Class: | | |
| UN Number: | | |
| Packing Group: | | |

Section 15 - Regulatory Information

US FEDERAL

TSCA

CAS# 208-96-8 is listed on the TSCA inventory.

Health & Safety Reporting List

None of the chemicals are on the Health & Safety Reporting List.

Chemical Test Rules

None of the chemicals in this product are under a Chemical Test Rule.

Section 12b

None of the chemicals are listed under TSCA Section 12b.

TSCA Significant New Use Rule

None of the chemicals in this material have a SNUR under TSCA.

CERCLA Hazardous Substances and corresponding RQs

CAS# 208-96-8: 5000 lb final RQ; 2270 kg final RQ

SARA Section 302 Extremely Hazardous Substances

None of the chemicals in this product have a TPQ.

Section 313 No chemicals are reportable under Section 313.

Clean Air Act:

This material does not contain any hazardous air pollutants.

This material does not contain any Class 1 Ozone depleters.

This material does not contain any Class 2 Ozone depleters.

Clean Water Act:

None of the chemicals in this product are listed as Hazardous Substances under the CWA. CAS# 208-96-8 is listed as a Priority Pollutant under the Clean Water Act.

None of the chemicals in this product are listed as Toxic Pollutants under the CWA.

OSHA:

None of the chemicals in this product are considered highly hazardous by OSHA.

STATE

CAS# 208-96-8 can be found on the following state right to know lists: New Jersey, Pennsylvania, Massachusetts.

California Prop 65

California No Significant Risk Level: None of the chemicals in this product are listed.

European/International Regulations
European Labeling in Accordance with EC Directives
Hazard Symbols:

XI

Risk Phrases:

R 36/37/38 Irritating to eyes, respiratory system and skin.

Safety Phrases:

S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

S 37/39 Wear suitable gloves and eye/face protection.

WGK (Water Danger/Protection)

CAS# 208-96-8: No information available.

Canada - DSL/NDSL

CAS# 208-96-8 is listed on Canada's NDSL List.

Canada - WHMIS

This product has a WHMIS classification of D2B.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all of the information required by those regulations.

Canadian Ingredient Disclosure List

CAS# 208-96-8 is not listed on the Canadian Ingredient Disclosure List.

MSDS Creation Date: 2/03/2000

Revision #5 Date: 10/25/2007

The information above is believed to be accurate and represents the best information currently available to us. However, we make no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from its use. Users should make their own investigations to determine the suitability of the information for their particular purposes. In no event shall Fisher be liable for any claims, losses, or damages of any third party or for lost profits or any special, indirect, incidental, consequential or exemplary damages, howsoever arising, even if Fisher has been advised of the possibility of such damages.

SAFETY DATA SHEET

Acetone

Section 1. Identification

| | |
|--------------------------------------|---|
| GHS product identifier | : Acetone |
| Chemical name | : acetone |
| Other means of identification | : propan-2-one; propanone; 2-Propanone; Ketone propane; Dimethyl ketone; dimethyl ketone; 2-propanone; β -ketonepropane; acetonum; dimethylketone; methyl ketone; propanone; pyroacetic acid; pyroacetic ether; methyl ketone; Acetone (I); 2-Propanone (I); Cetona; Pyroacetic ether |
| Product type | : Liquid. |
| Product use | : Synthetic/Analytical chemistry. |
| Synonym | : propan-2-one; propanone; 2-Propanone; Ketone propane; Dimethyl ketone; dimethyl ketone; 2-propanone; β -ketonepropane; acetonum; dimethylketone; methyl ketone; propanone; pyroacetic acid; pyroacetic ether; methyl ketone; Acetone (I); 2-Propanone (I); Cetona; Pyroacetic ether |
| SDS # | : 001088 |
| Supplier's details | : Airgas USA, LLC and its affiliates
259 North Radnor-Chester Road
Suite 100
Radnor, PA 19087-5283
1-610-687-5253 |
| 24-hour telephone | : 1-866-734-3438 |

Section 2. Hazards identification

| | |
|---|--|
| OSHA/HCS status | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
| Classification of the substance or mixture | : FLAMMABLE LIQUIDS - Category 2
EYE IRRITATION - Category 2A
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3 |

GHS label elements

Hazard pictograms

Signal word

: Danger

Hazard statements

: May form explosive mixtures with air.
Highly flammable liquid and vapor.
Causes serious eye irritation.
May cause drowsiness or dizziness.

Precautionary statements

General

: Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.

Prevention

: Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Wash hands thoroughly after handling.

Section 2. Hazards identification

| | |
|---|---|
| Response | : IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. |
| Storage | : Store locked up. Store in a well-ventilated place. Keep cool. |
| Disposal | : Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazards not otherwise classified | : None known. |

Section 3. Composition/information on ingredients

| | |
|--------------------------------------|--|
| Substance/mixture | : Substance |
| Chemical name | : acetone |
| Other means of identification | : propan-2-one; propanone; 2-Propanone; Ketone propane; Dimethyl ketone; dimethyl ketone; 2-propanone; β -ketonepropane; acetone; dimethylketone; methyl ketone; propanone; pyroacetic acid; pyroacetic ether; methyl ketone; Acetone (I); 2-Propanone (I); Cetona; Pyroacetic ether |
| Product code | : 001088 |

CAS number/other identifiers

CAS number : 67-64-1

| Ingredient name | % | CAS number |
|------------------------|----------|-------------------|
| acetone | 100 | 67-64-1 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

| | |
|---------------------|--|
| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Section 4. First aid measures

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : Causes serious eye irritation.
- Inhalation** : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.
- Skin contact** : No known significant effects or critical hazards.
- Frostbite** : Try to warm up the frozen tissues and seek medical attention.
- Ingestion** : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following: pain or irritation, watering, redness
- Inhalation** : Adverse symptoms may include the following: nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness
- Skin contact** : No specific data.
- Ingestion** : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable extinguishing media** : Do not use water jet.

- Specific hazards arising from the chemical** : Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.

- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide

- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Avoid contact with eyes, skin and clothing. Do not ingest. Empty containers retain product residue and can be hazardous. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Do not reuse container. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Store locked up. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits |
|-----------------|--|
| acetone | <p>ACGIH TLV (United States, 3/2017).
 STEL: 500 ppm 15 minutes.
 TWA: 250 ppm 8 hours.</p> <p>NIOSH REL (United States, 10/2016).
 TWA: 590 mg/m³ 10 hours.
 TWA: 250 ppm 10 hours.</p> <p>OSHA PEL (United States, 6/2016).
 TWA: 2400 mg/m³ 8 hours.
 TWA: 1000 ppm 8 hours.</p> <p>OSHA PEL 1989 (United States, 3/1989).
 STEL: 2400 mg/m³ 15 minutes.
 STEL: 1000 ppm 15 minutes.
 TWA: 1800 mg/m³ 8 hours.
 TWA: 750 ppm 8 hours.</p> |

Appropriate engineering controls

- : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls

- : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures

- : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

- : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin protection

Hand protection

- : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection

- : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Other skin protection

- : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Section 8. Exposure controls/personal protection

- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

- Physical state** : Liquid. [COLORLESS LIQUID WITH A FRAGRANT, MINT-LIKE ODOR]
- Color** : Colorless.
- Odor** : Characteristic.
- Odor threshold** : Not available.
- pH** : Not available.
- Melting point** : -94.7°C (-138.5°F)
- Boiling point** : 56.05°C (132.9°F)
- Critical temperature** : 234.85°C (454.7°F)
- Flash point** : Closed cup: -20°C (-4°F)
- Evaporation rate** : 6.06 (butyl acetate = 1)
- Flammability (solid, gas)** : Not available.
- Lower and upper explosive (flammable) limits** : Lower: 2.2%
Upper: 13%
- Vapor pressure** : 24 kPa (180.01 mm Hg) [room temperature]
- Vapor density** : 2 (Air = 1)
- Specific Volume (ft³/lb)** : 1.2642
- Gas Density (lb/ft³)** : 0.791
- Relative density** : 0.8
- Solubility** : Not available.
- Solubility in water** : Not available.
- Partition coefficient: n-octanol/water** : -0.23
- Auto-ignition temperature** : 465°C (869°F)
- Decomposition temperature** : Not available.
- Viscosity** : Not available.
- Flow time (ISO 2431)** : Not available.
- Molecular weight** : 58.09 g/mole
- Aerosol product**
- Heat of combustion** : -28493500 J/kg

Section 10. Stability and reactivity

- Reactivity** : No specific test data related to reactivity available for this product or its ingredients.
- Chemical stability** : The product is stable.
- Possibility of hazardous reactions** : Under normal conditions of storage and use, hazardous reactions will not occur.
- Conditions to avoid** : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.
- Incompatible materials** : Reactive or incompatible with the following materials:
oxidizing materials

Section 10. Stability and reactivity

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|-------------------------|------------------------------------|------------|-------------------------|--------------|
| acetone | LC50 Inhalation Vapor
LD50 Oral | Rat
Rat | 59528 ppm
5800 mg/kg | 1 hours
- |

Irritation/Corrosion

| Product/ingredient name | Result | Species | Score | Exposure | Observation |
|-------------------------|--------------------------|---------|-------|--------------------------|-------------|
| acetone | Eyes - Mild irritant | Human | - | 186300 parts per million | - |
| | Eyes - Mild irritant | Rabbit | - | 10 microliters | - |
| | Eyes - Moderate irritant | Rabbit | - | 24 hours 20 milligrams | - |
| | Eyes - Severe irritant | Rabbit | - | 20 milligrams | - |
| | Skin - Mild irritant | Rabbit | - | 24 hours 500 milligrams | - |
| | Skin - Mild irritant | Rabbit | - | 395 milligrams | - |

Sensitization

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

| Name | Category | Route of exposure | Target organs |
|---------|------------|-------------------|------------------|
| acetone | Category 3 | Not applicable. | Narcotic effects |

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on the likely routes of exposure : Not available.

Potential acute health effects

Eye contact : Causes serious eye irritation.

Section 11. Toxicological information

- Inhalation** : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : Can cause central nervous system (CNS) depression.

Symptoms related to the physical, chemical and toxicological characteristics

- Eye contact** : Adverse symptoms may include the following: pain or irritation, watering, redness
- Inhalation** : Adverse symptoms may include the following: nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness
- Skin contact** : No specific data.
- Ingestion** : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

- Potential immediate effects** : Not available.
- Potential delayed effects** : Not available.

Long term exposure

- Potential immediate effects** : Not available.
- Potential delayed effects** : Not available.

Potential chronic health effects

Not available.

- General** : No known significant effects or critical hazards.
- Carcinogenicity** : No known significant effects or critical hazards.
- Mutagenicity** : No known significant effects or critical hazards.
- Teratogenicity** : No known significant effects or critical hazards.
- Developmental effects** : No known significant effects or critical hazards.
- Fertility effects** : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

| Product/ingredient name | Result | Species | Exposure |
|-------------------------|-------------------------------------|--|----------|
| acetone | Acute EC50 20.565 mg/l Marine water | Algae - Ulva pertusa | 96 hours |
| | Acute LC50 6000000 µg/l Fresh water | Crustaceans - Gammarus pulex | 48 hours |
| | Acute LC50 10000 µg/l Fresh water | Daphnia - Daphnia magna | 48 hours |
| | Acute LC50 5600 ppm Fresh water | Fish - Poecilia reticulata | 96 hours |
| | Chronic NOEC 4.95 mg/l Marine water | Algae - Ulva pertusa | 96 hours |
| | Chronic NOEC 0.016 ml/L Fresh water | Crustaceans - Daphniidae | 21 days |
| | Chronic NOEC 0.1 ml/L Fresh water | Daphnia - Daphnia magna - Neonate | 21 days |
| | Chronic NOEC 5 µg/l Marine water | Fish - Gasterosteus aculeatus - Larvae | 42 days |
| | | | |

Persistence and degradability

Section 12. Ecological information

Not available.

Bioaccumulative potential

| Product/ingredient name | LogP _{ow} | BCF | Potential |
|-------------------------|--------------------|-----|-----------|
| acetone | -0.23 | - | low |

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

United States - RCRA Toxic hazardous waste "U" List

| Ingredient | CAS # | Status | Reference number |
|------------------------------|---------|--------|------------------|
| Acetone (I); 2-Propanone (I) | 67-64-1 | Listed | U002 |

Additional information

Section 14. Transport information

- DOT Classification** : **Reportable quantity** 5000 lbs / 2270 kg [758.12 gal / 2869.8 L]. Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ (reportable quantity) transportation requirements.
Limited quantity Yes.
Quantity limitation Passenger aircraft/rail: 5 L. Cargo aircraft: 60 L.
Special provisions IB2, T4, TP1
- TDG Classification** : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.18-2.19 (Class 3).
Explosive Limit and Limited Quantity Index 1
Passenger Carrying Ship Index Forbidden
Passenger Carrying Road or Rail Index 5
- IATA** : **Quantity limitation** Passenger and Cargo Aircraft: 5 L. Cargo Aircraft Only: 60 L. Limited Quantities - Passenger Aircraft: 1 L.
- Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 8(a) CDR Exempt/Partial exemption:** Not determined

Clean Air Act Section 112 : Not listed

(b) Hazardous Air Pollutants (HAPs)

Clean Air Act Section 602 Class I Substances : Not listed

Clean Air Act Section 602 Class II Substances : Not listed

DEA List I Chemicals (Precursor Chemicals) : Not listed

DEA List II Chemicals (Essential Chemicals) : Listed

SARA 302/304

Composition/information on ingredients

No products were found.

SARA 304 RQ : Not applicable.

SARA 311/312

Classification : Refer to Section 2: Hazards Identification of this SDS for classification of substance.

SAFETY DATA SHEET

Version 6.2
Revision Date 04/17/2020
Print Date 08/29/2020

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : BENZO(K)FLUORANTHEN 98%

Product Number : 392251

Brand : Aldrich

Index-No. : 601-036-00-5

CAS-No. : 207-08-9

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheet

Company : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES

Telephone : +1 314 771-5765

Fax : +1 800 325-5052

1.4 Emergency telephone number

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Carcinogenicity (Category 1B), H350
Short-term (acute) aquatic hazard (Category 1), H400
Long-term (chronic) aquatic hazard (Category 1), H410

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Danger

| | |
|----------------------------|---|
| Hazard statement(s) | |
| H350 | May cause cancer. |
| H410 | Very toxic to aquatic life with long lasting effects. |
| Precautionary statement(s) | |
| P201 | Obtain special instructions before use. |
| P202 | Do not handle until all safety precautions have been read and understood. |
| P273 | Avoid release to the environment. |
| P280 | Wear protective gloves/ protective clothing/ eye protection/ face protection. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P391 | Collect spillage. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

| | |
|------------------|-----------------------------------|
| Formula | : C ₂₀ H ₁₂ |
| Molecular weight | : 252.31 g/mol |
| CAS-No. | : 207-08-9 |
| EC-No. | : 205-916-6 |
| Index-No. | : 601-036-00-5 |

| Component | Classification | Concentration |
|-----------------------------|--|---------------|
| Benzo[k]fluoranthene | | |
| | Carc. 1B; Aquatic Acute 1; Aquatic Chronic 1; H350, H400, H410
M-Factor - Aquatic Acute: 10
M-Factor - Aquatic Chronic: 10 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures**5.1 Extinguishing media****Suitable extinguishing media**

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Carbon oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Use personal protective equipment. Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Storage class (TRGS 510): 6.1C: Combustible, acute toxic Cat.3 / toxic compounds or compounds which causing chronic effects

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|----------------------|----------|--|-----------------------|---|
| Benzo[k]fluoranthene | 207-08-9 | PEL | 0.2 mg/m ³ | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | Remarks | Coal tar pitch volatiles (benzene or cyclohexane-soluble fraction) include fused polycyclic hydrocarbons (some of which are known carcinogens) which volatilize from the distillation residues of coal, petroleum (excluding asphalt), wood, and other organic matter. Asphalt (CAS 8052-42-4, and CAS 64742-93-4) is not covered under the 'coal tar pitch volatiles' standard. | | |

Biological occupational exposure limits

| Component | CAS-No. | Parameters | Value | Biological specimen | Basis |
|----------------------|----------|---------------------------------|----------|---------------------|---|
| Benzo[k]fluoranthene | 207-08-9 | 1-Hydroxypyrene | 2.5 µg/l | Urine | ACGIH - Biological Exposure Indices (BEI) |
| | Remarks | End of shift at end of workweek | | | |
| | | 3-hydroxybenzo(a)pyrene | | Urine | ACGIH - Biological Exposure Indices (BEI) |
| | | End of shift at end of workweek | | | |

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|---------------|-------------------------------------|
| a) Appearance | Form: crystalline
Colour: yellow |
| b) Odour | No data available |

| | |
|---|---|
| c) Odour Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 215 - 217 °C (419 - 423 °F) - lit. |
| f) Initial boiling point and boiling range | 480 °C 896 °F |
| g) Flash point | ()No data available |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapour pressure | No data available |
| l) Vapour density | No data available |
| m) Relative density | 1.286 g/cm ³ at 20 °C (68 °F) |
| n) Water solubility | insoluble |
| o) Partition coefficient: n-octanol/water | log Pow: 6.188 at 25 °C (77 °F) |
| p) Auto-ignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Carbon oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No data available

Inhalation: Irritating to respiratory system.

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitisation

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

Presumed to have carcinogenic potential for humans

IARC: 2B - Group 2B: Possibly carcinogenic to humans (Benzo[k]fluoranthene)

NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

RTECS: DF6350000

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

SECTION 12: Ecological information

12.1 Toxicity

No data available

12.2 Persistence and degradability

No data available

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Very toxic to aquatic life with long lasting effects.

No data available

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

UN number: 3077 Class: 9

Packing group: III

Proper shipping name: Environmentally hazardous substance, solid, n.o.s.

(Benzo[k]fluoranthene)

Reportable Quantity (RQ): 5000 lbs

Poison Inhalation Hazard: No

IMDG

UN number: 3077 Class: 9

Packing group: III

EMS-No: F-A, S-F

Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S.

(Benzo[k]fluoranthene)

Marine pollutant : yes

IATA

UN number: 3077 Class: 9

Packing group: III

Proper shipping name: Environmentally hazardous substance, solid, n.o.s.
(Benzo[k]fluoranthene)

Further information

EHS-Mark required (ADR 2.2.9.1.10, IMDG code 2.10.3) for single packagings and combination packagings containing inner packagings with Dangerous Goods > 5L for liquids or > 5kg for solids.

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | | |
|----------------------|---------------------|-----------------------------|
| Benzo[k]fluoranthene | CAS-No.
207-08-9 | Revision Date
1993-02-16 |
|----------------------|---------------------|-----------------------------|

SARA 311/312 Hazards

Acute Health Hazard, Chronic Health Hazard

Massachusetts Right To Know Components

No components are subject to the Massachusetts Right to Know Act.

Pennsylvania Right To Know Components

| | | |
|----------------------|---------------------|-----------------------------|
| Benzo[k]fluoranthene | CAS-No.
207-08-9 | Revision Date
1993-02-16 |
|----------------------|---------------------|-----------------------------|

|-------------|--|

Physical and Chemical Hazard

Solid.
Does not mix with water. Combustible.
Toxic smoke/fumes in a fire.

Health Hazards

| | |
|---------------------|--|
| Inhaled | <p>The material is not thought to produce either adverse health effects or irritation of the respiratory tract following inhalation (as classified by EC Directives using animal models). Nevertheless, adverse systemic effects have been produced following exposure of animals by at least one other route and good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.</p> <p>Persons with impaired respiratory function, airway diseases and conditions such as emphysema or chronic bronchitis, may incur further disability if excessive concentrations of particulate are inhaled.</p> <p>If prior damage to the circulatory or nervous systems has occurred or if kidney damage has been sustained, proper screenings should be conducted on individuals who may be exposed to further risk if handling and use of the material result in excessive exposures.</p> |
| Ingestion | <p>The material has NOT been classified by EC Directives or other classification systems as "harmful by ingestion". This is because of the lack of corroborating animal or human evidence. The material may still be damaging to the health of the individual, following ingestion, especially where pre-existing organ (e.g liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.</p> |
| Skin Contact | <p>The material is not thought to be a skin irritant (as classified by EC Directives using animal models). Abrasive damage however, may result from prolonged exposures. Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.</p> <p>Skin contact with the material may damage the health of the individual; systemic effects may result following absorption.</p> <p>Open cuts, abraded or irritated skin should not be exposed to this material</p> <p>Entry into the blood-stream through, for example, cuts, abrasions, puncture wounds or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.</p> |
| Eye | <p>Although the material is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may cause transient discomfort characterised by tearing or conjunctival redness (as with windburn). Slight abrasive damage may also result. The material may produce foreign body irritation in certain individuals.</p> |
| Chronic | <p>On the basis, primarily, of animal experiments, the material may be regarded as carcinogenic to humans. There is sufficient evidence to provide a strong presumption that human exposure to the material may result in cancer on the basis of:</p> <ul style="list-style-type: none"> - appropriate long-term animal studies - other relevant information <p>Long term exposure to high dust concentrations may cause changes in lung function (i.e. pneumoconiosis) caused by particles less than 0.5 micron penetrating and remaining in the lung. A prime symptom is breathlessness. Lung shadows show on X-ray.</p> <p>The so-called polycyclic aromatic hydrocarbons (PAHs) comprise a large family; some members occur in coal tar, tobacco smoke, petroleum and air pollution.</p> <p>PAHs are potent atmospheric pollutants that consist of fused aromatic rings and do not contain heteroatoms or carry substituents. As a pollutant, they are of concern because some compounds have been identified as carcinogenic, mutagenic, and teratogenic. Some substituted derivatives have been identified, in animal studies, as amongst the most highly active carcinogens. Rodent species are sensitive to some PAHs with skin application producing cancerous growths. Injection produces soft tissue tumours (sarcomas) in rats and mice.</p> |

Continued...

BENZ[A]ANTHRACENE

The toxicity of PAHs is structure-dependent. Isomers (PAHs with the same formula and number of rings) can vary from being nontoxic to extremely toxic. Natural crude oil and coal deposits contain significant amounts of PAHs, arising from chemical conversion of natural product molecules, such as steroids, to aromatic hydrocarbons. They are also found in processed fossil fuels, tar and various edible oils. In a study evaluating the genotoxic and carcinogenic risks associated with the consumption of repeatedly heated coconut oil (RCO), one of the commonly consumed cooking and frying medium, it was concluded that dietary consumption of RCO can cause a genotoxic and preneoplastic change in the liver.

High prenatal exposure to PAH is associated with lower IQ and childhood asthma. Exposure to PAH pollution during pregnancy is related to adverse birth outcomes including low birth weight, premature delivery, and heart malformations. Cord blood of exposed babies shows DNA damage that has been linked to cancer. Follow-up studies show a higher level of developmental delays at age three, lower scores on IQ tests and increased behavioural problems at ages six and eight; one study found that exposure to higher levels of PAH was associated with a 24% higher score of anxiety/depression for children ages 6 to 7 than those with low exposure levels. Infants found to have elevated PAH levels in their umbilical cord blood were 46% more likely to eventually score highly on the anxiety/depression scale than those with low PAH levels in cord blood. Administration of PAHs to Rhesus monkey on the other hand has not yet proved successful in yielding tumours and there is inadequate date to support the proposition that individual PAHs produce cancer in humans. There are however a number of epidemiology and mortality studies that show increased incidence of cancer in humans exposed to mixtures of PAHs. Evidence exists of lung and genito-urinary cancer mortality amongst coke-oven workers and skin tumours in workers exposed to creosote. Exposures to other chemical mixtures containing PAHs such as cigarette smoke, coal tar, coal tar pitch and bitumens, have been associated with increased incidences of lung cancer in humans.

Anthracene, the basic unit on which most PAHs are built, is not carcinogenic whereas benz[a]anthracene appears to have weak carcinogenicity. Additions of other benzene rings to select positions on the benz[a]anthracene skeleton results in agents with powerful carcinogenicity (e.g. dibenz[a,h]anthracene and benz[a]pyrene). Further substitution of methyl groups in positions on the rings enhances carcinogenicity (7,12 dimethylbenz[a]anthracene is one of the most powerful PAH carcinogens known). Biotransformation to produce soluble metabolites suitable for excretion appears to transform some PAHs to reactive electrophiles (as epoxides) which bind to DNA. Initiation of carcinogenesis is thought to rely upon such interactions.

One study examined the correlation between the weight percentage of various chemical classes of compounds in thirteen refinery streams and the magnitude of various effects produced in rats treated dermally with these substances in repeat-dose and developmental toxicity studies. In general, toxicity is correlated with concentrations of PAH composed of 3, 4, 5, 6, and/or 7 rings (decreased thymus weight, increased liver weight, aberrant haematology and serum chemistry, increased incidence of resorptions, decreased foetal body weight). PAH containing nonbasic nitrogen heteroatoms (increased mortality, decreased body weight, decreased thymus weight, increased liver weight, decreased haemoglobin content, haematocrit level, decreased foetal body weight), and/or PAH containing sulfur heteroatoms (decreased red blood cell and platelet counts, increased sorbitol dehydrogenase). A relationship between 2- ring PAH and skin irritation was demonstrated. Severity of effect was ranked against concentration of component class and statistical significance determined by the rank order correlation of Spearman. For the 13 streams tested, the presence and severity of systemic and developmental toxicity were dependent upon the levels of PAH and nonbasic nitrogen PAH. It is reasonable to assume that refinery streams rich in 3- to 7-ring PAH, S-PAH, and nonbasic N-PAH (e.g., carbazole derivatives) would be toxic, not only to the adult animal, but to the foetus as well.

Certain PAHs have structures resembling steroidal hormones and exhibit weak estrogenic or antiestrogenic activity. PAHs and their metabolites can act in the same manner as hormonal estrogens by binding to the estrogen receptor (ER) or modify estrogen availability by influencing estrogen metabolism by the CYP450 system. Estrogen induced carcinogenesis could therefore also be related to PAH induced carcinogenesis. After bioactivation by rat liver microsomes with induced P4501A1 and P4501A2 activity, metabolites from benz[a]anthracene and chrysene were found to be estrogenic in binding experiments.

NOTE: Some jurisdictions require that health surveillance be conducted on workers occupationally exposed to polycyclic aromatic hydrocarbons. Such surveillance should emphasise

- demography, occupational and medical history
- health advice, including recognition of photosensitivity and skin changes
- physical examination if indicated
- records of personal exposure including photosensitivity
- completion of a standardised respiratory questionnaire
- standardised respiratory function tests such as FEV1, FVC and FEV1/FVC
- chest X-ray, full size PA view
- records of personal exposure

Environmental Hazards

Very toxic to aquatic organisms.
May cause long-term adverse effects in the aquatic environment. Use appropriate container to avoid environmental contamination.
Avoid release to the environment. Refer to special instructions/Safety data sheets.

Other hazards

Skin contact may produce health damage*.

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

Substances

| CAS No | %[weight] | Name | GHS Classification |
|---------|-----------|-----------------------------------|---|
| 56-55-3 | >98 | benz[a]anthracene | Carcinogen Category 1B, Acute Aquatic Hazard Category 1, Chronic Aquatic Hazard Category 1; H350, H400, H410 ^[1] |

Legend: 1. Classified by Chemwatch; 2. Classification drawn from EC Directive 67/548/EEC - Annex I; 3. Classification drawn from EC Directive 1272/2008 - Annex VI

Mixtures

SECTION 4 FIRST AID MEASURES

Description of first aid measures

| | |
|--------------------|---|
| Eye Contact | <p>If this product comes in contact with the eyes:</p> <ul style="list-style-type: none"> ▸ Wash out immediately with fresh running water. ▸ Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. ▸ Seek medical attention without delay; if pain persists or recurs seek medical attention. ▸ Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|--------------------|---|

BENZ[A]ANTHRACENE

| | |
|---------------------|---|
| Skin Contact | <p>If skin contact occurs:</p> <ul style="list-style-type: none"> ▶ Immediately remove all contaminated clothing, including footwear. ▶ Flush skin and hair with running water (and soap if available). ▶ Seek medical attention in event of irritation. |
| Inhalation | <ul style="list-style-type: none"> ▶ If dust is inhaled, remove from contaminated area. ▶ Encourage patient to blow nose to ensure clear passage of breathing. ▶ If irritation or discomfort persists seek medical attention. |
| Ingestion | <ul style="list-style-type: none"> ▶ Immediately give a glass of water. ▶ First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor. |

Advise for rescue team (PPE requirement for rescue personnel)

| | |
|--|---|
| | <ul style="list-style-type: none"> ▶ Clean up waste regularly and abnormal spills immediately. ▶ Avoid breathing dust and contact with skin and eyes. ▶ Wear protective clothing, gloves, safety glasses and dust respirator. ▶ Use dry clean up procedures and avoid generating dust. ▶ Vacuum up or sweep up. NOTE: Vacuum cleaner must be fitted with an exhaust micro filter (HEPA type) (consider explosion-proof machines designed to be grounded during storage and use). ▶ Dampen with water to prevent dusting before sweeping. ▶ Place in suitable containers for disposal. <p>Environmental hazard - contain spillage.</p> |
|--|---|

Indication of any immediate medical attention and special treatment needed

| | |
|--|------------------------|
| | Treat symptomatically. |
|--|------------------------|

SECTION 5 FIREFIGHTING MEASURES

Extinguishing media

| | |
|--|---|
| | <ul style="list-style-type: none"> ▶ Foam. ▶ Dry chemical powder. ▶ BCF (where regulations permit). ▶ Carbon dioxide. ▶ Water spray or fog - Large fires only. |
|--|---|

Special hazards arising from the substrate or mixture

| | |
|-----------------------------|--|
| Fire Incompatibility | ▶ Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result |
|-----------------------------|--|

Advice for firefighters

| | |
|------------------------------|--|
| Fire Fighting | <ul style="list-style-type: none"> ▶ Alert Fire Brigade and tell them location and nature of hazard. ▶ Wear breathing apparatus plus protective gloves. ▶ Prevent, by any means available, spillage from entering drains or water courses. ▶ Use water delivered as a fine spray to control fire and cool adjacent area. ▶ DO NOT approach containers suspected to be hot. ▶ Cool fire exposed containers with water spray from a protected location. ▶ If safe to do so, remove containers from path of fire. ▶ Equipment should be thoroughly decontaminated after use. |
| Fire/Explosion Hazard | <ul style="list-style-type: none"> ▶ Combustible solid which burns but propagates flame with difficulty; it is estimated that most organic dusts are combustible (circa 70%) - according to the circumstances under which the combustion process occurs, such materials may cause fires and / or dust explosions. ▶ Organic powders when finely divided over a range of concentrations regardless of particulate size or shape and suspended in air or some other oxidizing medium may form explosive dust-air mixtures and result in a fire or dust explosion (including secondary explosions). ▶ Avoid generating dust, particularly clouds of dust in a confined or unventilated space as dusts may form an explosive mixture with air, and any source of ignition, i.e. flame or spark, will cause fire or explosion. Dust clouds generated by the fine grinding of the solid are a particular hazard; accumulations of fine dust (420 micron or less) may burn rapidly and fiercely if ignited - particles exceeding this limit will generally not form flammable dust clouds; once initiated, however, larger particles up to 1400 microns diameter will contribute to the propagation of an explosion. ▶ In the same way as gases and vapours, dusts in the form of a cloud are only ignitable over a range of concentrations; in principle, the concepts of lower explosive limit (LEL) and upper explosive limit (UEL) are applicable to dust clouds but only the LEL is of practical use; - this is because of the inherent difficulty of achieving homogeneous dust clouds at high temperatures (for dusts the LEL is often called the "Minimum Explosible Concentration", MEC). ▶ When processed with flammable liquids/vapors/mists, ignitable (hybrid) mixtures may be formed with combustible dusts. Ignitable mixtures will increase the rate of explosion pressure rise and the Minimum Ignition Energy (the minimum amount of energy required to ignite dust clouds - MIE) will be lower than the pure dust in air mixture. The Lower Explosive Limit (LEL) of the vapour/dust mixture will be lower than the individual LELs for the vapors/mists or dusts. ▶ A dust explosion may release of large quantities of gaseous products; this in turn creates a subsequent pressure rise of explosive force capable of damaging plant and buildings and injuring people. ▶ Usually the initial or primary explosion takes place in a confined space such as plant or machinery, and can be of sufficient force to damage or rupture the plant. If the shock wave from the primary explosion enters the surrounding area, it will disturb any settled dust layers, forming a second dust cloud, and often initiate a much larger secondary explosion. All large scale explosions have resulted from chain reactions of this type. ▶ Dry dust can be charged electrostatically by turbulence, pneumatic transport, pouring, in exhaust ducts and during transport. ▶ Build-up of electrostatic charge may be prevented by bonding and grounding. ▶ Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting. ▶ All movable parts coming in contact with this material should have a speed of less than 1-meter/sec. ▶ A sudden release of statically charged materials from storage or process equipment, particularly at elevated temperatures and/ or pressure, may result in ignition especially in the absence of an apparent ignition source. |

BENZ[A]ANTHRACENE

- ▶ One important effect of the particulate nature of powders is that the surface area and surface structure (and often moisture content) can vary widely from sample to sample, depending of how the powder was manufactured and handled; this means that it is virtually impossible to use flammability data published in the literature for dusts (in contrast to that published for gases and vapours).
- ▶ Autoignition temperatures are often quoted for dust clouds (minimum ignition temperature (MIT)) and dust layers (layer ignition temperature (LIT)); LIT generally falls as the thickness of the layer increases.

Combustion products include:

- , carbon monoxide (CO)
- , carbon dioxide (CO₂)
- , other pyrolysis products typical of burning organic material

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Minor Spills

- ▶ Clean up waste regularly and abnormal spills immediately.
- ▶ Avoid breathing dust and contact with skin and eyes.
- ▶ Wear protective clothing, gloves, safety glasses and dust respirator.
- ▶ Use dry clean up procedures and avoid generating dust.
- ▶ Vacuum up or sweep up. **NOTE:** Vacuum cleaner must be fitted with an exhaust micro filter (HEPA type) (consider explosion-proof machines designed to be grounded during storage and use).
- ▶ Dampen with water to prevent dusting before sweeping.
- ▶ Place in suitable containers for disposal.

Environmental hazard - contain spillage.

Major Spills

- ▶ Clear area of personnel and move upwind.
- ▶ Alert Fire Brigade and tell them location and nature of hazard.
- ▶ Wear full body protective clothing with breathing apparatus.
- ▶ Prevent, by all means available, spillage from entering drains or water courses.
- ▶ Consider evacuation (or protect in place).
- ▶ No smoking, naked lights or ignition sources.
- ▶ Increase ventilation.
- ▶ Stop leak if safe to do so.
- ▶ Water spray or fog may be used to disperse / absorb vapour.
- ▶ Contain or absorb spill with sand, earth or vermiculite.
- ▶ Collect recoverable product into labelled containers for recycling.
- ▶ Collect solid residues and seal in labelled drums for disposal.
- ▶ Wash area and prevent runoff into drains.
- ▶ After clean up operations, decontaminate and launder all protective clothing and equipment before storing and re-using.
- ▶ If contamination of drains or waterways occurs, advise emergency services.

Environmental hazard - contain spillage.

Personal Protective Equipment advice is contained in Section 8 of the MSDS.

Measures for Preventing Secondary Contamination

Refer to section above

Environmental precautions

See section 12

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling

Safe handling

- ▶ Avoid all personal contact, including inhalation.
- ▶ Wear protective clothing when risk of exposure occurs.
- ▶ Use in a well-ventilated area.
- ▶ Prevent concentration in hollows and sumps.
- ▶ **DO NOT enter confined spaces until atmosphere has been checked.**
- ▶ **DO NOT allow material to contact humans, exposed food or food utensils.**
- ▶ Avoid contact with incompatible materials.
- ▶ **When handling, DO NOT eat, drink or smoke.**
- ▶ Keep containers securely sealed when not in use.
- ▶ Avoid physical damage to containers.
- ▶ Always wash hands with soap and water after handling.
- ▶ Work clothes should be laundered separately. Launder contaminated clothing before re-use.
- ▶ Use good occupational work practice.
- ▶ Observe manufacturer's storage and handling recommendations contained within this MSDS.
- ▶ Atmosphere should be regularly checked against established exposure standards to ensure safe working conditions are maintained.
- ▶ Organic powders when finely divided over a range of concentrations regardless of particulate size or shape and suspended in air or some other oxidizing medium may form explosive dust-air mixtures and result in a fire or dust explosion (including secondary explosions)
- ▶ Minimise airborne dust and eliminate all ignition sources. Keep away from heat, hot surfaces, sparks, and flame.
- ▶ Establish good housekeeping practices.
- ▶ Remove dust accumulations on a regular basis by vacuuming or gentle sweeping to avoid creating dust clouds.
- ▶ Use continuous suction at points of dust generation to capture and minimise the accumulation of dusts. Particular attention should be given to overhead and hidden horizontal surfaces to minimise the probability of a "secondary" explosion. According to NFPA Standard 654, dust layers 1/32 in.(0.8 mm) thick can be sufficient to warrant immediate cleaning of the area.

BENZ[A]ANTHRACENE

| | |
|-------------------|--|
| | <ul style="list-style-type: none"> Do not use air hoses for cleaning. Minimise dry sweeping to avoid generation of dust clouds. Vacuum dust-accumulating surfaces and remove to a chemical disposal area. Vacuums with explosion-proof motors should be used. Control sources of static electricity. Dusts or their packages may accumulate static charges, and static discharge can be a source of ignition. Solids handling systems must be designed in accordance with applicable standards (e.g. NFPA including 654 and 77) and other national guidance. Do not empty directly into flammable solvents or in the presence of flammable vapors. The operator, the packaging container and all equipment must be grounded with electrical bonding and grounding systems. Plastic bags and plastics cannot be grounded, and antistatic bags do not completely protect against development of static charges. <p>Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignition source.</p> <ul style="list-style-type: none"> Do NOT cut, drill, grind or weld such containers. In addition ensure such activity is not performed near full, partially empty or empty containers without appropriate workplace safety authorisation or permit. |
| Other information | <ul style="list-style-type: none"> Store in original containers. Keep containers securely sealed. Store in a cool, dry area protected from environmental extremes. Store away from incompatible materials and foodstuff containers. Protect containers against physical damage and check regularly for leaks. Observe manufacturer's storage and handling recommendations contained within this MSDS. <p>For major quantities:</p> <ul style="list-style-type: none"> Consider storage in banded areas - ensure storage areas are isolated from sources of community water (including stormwater, ground water, lakes and streams). Ensure that accidental discharge to air or water is the subject of a contingency disaster management plan; this may require consultation with local authorities. |

Conditions for safe storage, including any incompatibilities

MATERIAL DATA

It is the goal of the ACGIH (and other Agencies) to recommend TLVs (or their equivalent) for all substances for which there is evidence of health effects at airborne concentrations encountered in the workplace.

At this time no TLV has been established, even though this material may produce adverse health effects (as evidenced in animal experiments or clinical experience). Airborne concentrations must be maintained as low as is practically possible and occupational exposure must be kept to a minimum.

NOTE: The ACGIH occupational exposure standard for Particles Not Otherwise Specified (P.N.O.S) does NOT apply.

Exposure controls

| | |
|----------------------------------|---|
| Appropriate engineering controls | <p>Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.</p> <p>The basic types of engineering controls are:</p> <p>Process controls which involve changing the way a job activity or process is done to reduce the risk.</p> <p>Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment. Ventilation can remove or dilute an air contaminant if designed properly. The design of a ventilation system must match the particular process and chemical or contaminant in use.</p> <p>Employers may need to use multiple types of controls to prevent employee overexposure.</p> <ul style="list-style-type: none"> Employees exposed to confirmed human carcinogens should be authorized to do so by the employer, and work in a regulated area. Work should be undertaken in an isolated system such as a "glove-box". Employees should wash their hands and arms upon completion of the assigned task and before engaging in other activities not associated with the isolated system. Within regulated areas, the carcinogen should be stored in sealed containers, or enclosed in a closed system, including piping systems, with any sample ports or openings closed while the carcinogens are contained within. Open-vessel systems are prohibited. Each operation should be provided with continuous local exhaust ventilation so that air movement is always from ordinary work areas to the operation. Exhaust air should not be discharged to regulated areas, non-regulated areas or the external environment unless decontaminated. Clean |
|----------------------------------|---|

Continued...

BENZ[A]ANTHRACENE

| | |
|-------------------------|---|
| | <ul style="list-style-type: none"> ▶ make-up air should be introduced in sufficient volume to maintain correct operation of the local exhaust system. ▶ For maintenance and decontamination activities, authorized employees entering the area should be provided with and required to wear clean, impervious garments, including gloves, boots and continuous-air supplied hood. Prior to removing protective garments the employee should undergo decontamination and be required to shower upon removal of the garments and hood. ▶ Except for outdoor systems, regulated areas should be maintained under negative pressure (with respect to non-regulated areas). ▶ Local exhaust ventilation requires make-up air be supplied in equal volumes to replaced air. ▶ Laboratory hoods must be designed and maintained so as to draw air inward at an average linear face velocity of 0.76 m/sec with a minimum of 0.64 m/sec. Design and construction of the fume hood requires that insertion of any portion of the employees body, other than hands and arms, be disallowed. |
| Personal protection |      |
| Eye and face protection | <ul style="list-style-type: none"> ▶ Safety glasses with side shields ▶ Chemical goggles. ▶ Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly. [CDC NIOSH Current Intelligence Bulletin 59], [AS/NZS 1336 or national equivalent] |
| Skin protection | See Hand protection below |
| Hands/feet protection | <ul style="list-style-type: none"> ▶ Wear chemical protective gloves, e.g. PVC. ▶ Wear safety footwear or safety gumboots, e.g. Rubber <p>The selection of suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Where the chemical is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.</p> <p>The exact break through time for substances has to be obtained from the manufacturer of the protective gloves and has to be observed when making a final choice.</p> <p>Suitability and durability of glove type is dependent on usage. Important factors in the selection of gloves include:</p> <ul style="list-style-type: none"> ▶ frequency and duration of contact, ▶ chemical resistance of glove material, ▶ glove thickness and ▶ dexterity <p>Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent).</p> <ul style="list-style-type: none"> ▶ When prolonged or frequently repeated contact may occur, a glove with a protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. ▶ When only brief contact is expected, a glove with a protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. ▶ Some glove polymer types are less affected by movement and this should be taken into account when considering gloves for long-term use. ▶ Contaminated gloves should be replaced. <p>Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturiser is recommended.</p> |
| Body protection | See Other protection below |
| Other protection | <ul style="list-style-type: none"> ▶ Overalls. ▶ P.V.C. apron. ▶ Barrier cream. ▶ Skin cleansing cream. ▶ Eye wash unit. |

GLOVE SELECTION INDEX

Glove selection is based on a modified presentation of the:

"Forsberg Clothing Performance Index".

The effect(s) of the following substance(s) are taken into account in the **computer-generated** selection:

BENZ[A]ANTHRACENE Not Available

| Material | CPI |
|----------|-----|
|----------|-----|

* CPI - Chemwatch Performance Index

A: Best Selection

B: Satisfactory; may degrade after 4 hours continuous immersion

C: Poor to Dangerous Choice for other than short term immersion

NOTE: As a series of factors will influence the actual performance of the glove, a final selection must be based on detailed observation. -

* Where the glove is to be used on a short term, casual or infrequent basis, factors such as "feel" or convenience (e.g. disposability), may dictate a choice of gloves which might otherwise be unsuitable following long-term or frequent use. A qualified practitioner should be consulted.

Respiratory protection

| Required Minimum Protection Factor | Half-Face Respirator | Full-Face Respirator | Powered Air Respirator |
|------------------------------------|----------------------|----------------------|------------------------|

Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Do NOT allow product to come in contact with surface waters or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash-waters.

Wastes resulting from use of the product must be disposed of on site or at approved waste sites.

for polycyclic aromatic hydrocarbons (PAHs):

Environmental fate:

PAHs travel through the atmosphere as a gas or attached to dust particles. They are carried by air currents and deposited by dry or wet (rain, dew, etc) deposition. When deposited in water they sink to the bottom of lakes and rivers. Some will move through the soil to contaminate groundwater.

Because of the very low water solubility and high Kow values, they will tend to be sorbed to the organic matter in the soil

instead of being solubilised in the infiltrating water and therefore are not transported downwards to the groundwater reservoirs. The sorption process is therefore counteractive to efficient biodegradation since it will decrease bioavailability, since the compounds due to sorption will be located in microporous areas of the soil inaccessible to the bacteria, and the biodegradation will thus be controlled by the slow desorptive and diffusive mass transfer into the biologically active areas. It has been claimed that a slow sorption following the initial rapid and reversible sorption lead to a chemical fraction that is very resistant to desorption. This phenomenon is called aging, and the existence of such a desorption-resistant residues may increase the time, dramatically. PAHs have also been shown to be partitioned or incorporated more or less reversibly into the humic substances of the soil after partial degradation and thereby be even more immobilised in the soil.

At the same time they show very low aerobic degradability depending on the environmental conditions and the available concentration. Three-ring aromatics such as fluorene, phenanthrene, and dibenzothiophene are degraded at similar rates and in preference to four-ring compounds. Another general rule for biodegradation of PAHs is that parent compounds tend to degrade faster than alkylated analogs. Less is known about the biodegradability of resins and asphaltene, but the current knowledge suggests these are not very biodegradable and will persist in the environment for a long time.

Polycyclic aromatic hydrocarbons (PAHs) are ubiquitous in the marine environment, occurring at their highest environmental concentrations around urban centres.

Two factors, lipid and organic carbon, control to a large extent the partitioning behaviour of PAHs in sediment, water and tissue; the more hydrophobic a compound, the greater the partitioning to non-aqueous phases. These two factors, along with the octanol-water partition coefficient, are the best predictors of this partitioning and can be used to determine PAH behaviour and its bioavailability in the environment.

The lipid (fat) phase, of all organisms, contains the highest levels of PAHs: organic carbon associated with sediment or dissolved in water has a great influence on bioavailability resulting from its ability to adsorb.

Accumulation of PAHs occurs in all marine organisms; however there is a wide range in tissue concentrations resulting from variable environmental concentrations, level and time of exposure, and species ability to metabolize these compounds. PAHs generally partition in lipid-rich tissues and their metabolites are found in most tissues. In fish, bile and liver accumulate the highest levels of parent PAH and metabolites. In invertebrates, the highest concentrations can be found in the internal organs, such as the liver and pancreas; tissue concentrations appear to follow seasonal cycles which may be related to variations in lipid content or spawning cycles.

The primary mode of toxicity for PAHs in soil dwelling terrestrial invertebrates is non-specific non-polar narcosis. The uptake of PAHs by earthworms occurs primarily by direct contact with the soluble phase of soil solution (interstitial pore-water).

Microbial degradation of PAHs is a key process in soils. Biodegradation of PAHs may take place over a period of weeks to months. Mixed microbial populations in sediment/water systems may degrade some PAHs, with degradation progressively decreasing with increasing molecular weight. The rate of degradation is dependent on nutrient content and the bacterial community in soil.

PAHs in soils undergo a weathering process such that the lighter chain fractions are removed (primarily by volatilisation). Heavier fractions bind to soil organic matter and remain behind in the top soil horizon. As the mixture of PAHs age, bioavailability changes as the fraction remaining bind more tightly.

In general the more soluble a PAH, the higher the uptake by plants while the reverse is true for uptake by earthworms and uptake in the gastrointestinal tract of animals.

DO NOT discharge into sewer or waterways.

Persistence and degradability

| Ingredient | Persistence: Water/Soil | Persistence: Air |

SECTION 15 REGULATORY INFORMATION

Safety, health and environmental regulations / legislation specific for the substance or mixture

| | |
|---|---|
| benz[a]anthracene(56-55-3) is found on the following regulatory lists | "China Inventory of Existing Chemical Substances","International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs","China List of Dangerous Goods (GB 12268-2005) (Chinese)" |
|---|---|

SECTION 16 OTHER INFORMATION

Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

A list of reference resources used to assist the committee may be found at:

www.chemwatch.net/references

The (M)SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Carcinogenicity (Category 1B), H350
Short-term (acute) aquatic hazard (Category 1), H400
Long-term (chronic) aquatic hazard (Category 1), H410

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Danger

| | |
|----------------------------|---|
| Hazard statement(s) | |
| H350 | May cause cancer. |
| H410 | Very toxic to aquatic life with long lasting effects. |
| Precautionary statement(s) | |
| P201 | Obtain special instructions before use. |
| P202 | Do not handle until all safety precautions have been read and understood. |
| P273 | Avoid release to the environment. |
| P281 | Use personal protective equipment as required. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P391 | Collect spillage. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

Synonyms : 3,4-Benzofluoranthene
Benz[e]acephenanthrylene
2,3-Benzfluoranthene
3,4-Benz[e]acephenanthrylene
Benzo[b]fluoranthene
Benzo[e]fluoranthene
NSC 89265

Formula : C₂₀H₁₂
Molecular weight : 252.31 g/mol
CAS-No. : 205-99-2
EC-No. : 205-911-9
Index-No. : 601-034-00-4

| Component | Classification | Concentration |
|---------------------------------|--|---------------|
| Benz[e]acephenanthrylene | | |
| | Carc. 1B; Aquatic Acute 1; Aquatic Chronic 1; H350, H400, H410
M-Factor - Aquatic Acute: 10 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures**5.1 Extinguishing media****Suitable extinguishing media**

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Carbon oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.
Provide appropriate exhaust ventilation at places where dust is formed.
For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.
Storage class (TRGS 510): 6.1D: Non-combustible, acute toxic Cat.3 / toxic hazardous materials or hazardous materials causing chronic effects

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|--------------------------|----------|--|-----------------------|---|
| | Remarks | Cancer
Substances for which there is a Biological Exposure Index or Indices (see BEI® section), see BEI® for Polycyclic Aromatic Hydrocarbons (PAHs)
Exposure by all routes should be carefully controlled to levels as low as possible.
Suspected human carcinogen | | |
| Benz[e]acephenanthrylene | 205-99-2 | PEL | 0.2 mg/m ³ | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | Coal tar pitch volatiles (benzene or cyclohexane-soluble fraction) include fused polycyclic hydrocarbons (some of which are known carcinogens) which volatilize from the distillation residues of coal, petroleum (excluding asphalt), wood, and other organic matter. Asphalt (CAS 8052-42-4, and CAS 64742-93-4) is not covered under the 'coal tar pitch volatiles' standard. | | |

Biological occupational exposure limits

| Component | CAS-No. | Parameters | Value | Biological specimen | Basis |
|--------------------------|----------|---------------------------------|----------|---------------------|---|
| Benz[e]acephenanthrylene | 205-99-2 | 1-Hydroxypyrene | 2.5 µg/l | Urine | ACGIH - Biological Exposure Indices (BEI) |
| | Remarks | End of shift at end of workweek | | | |

| | | | | | |
|--|--|---------------------------------|--|-------|---|
| | | 3-hydroxybenzo(a)pyrene | | Urine | ACGIH - Biological Exposure Indices (BEI) |
| | | End of shift at end of workweek | | | |

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|---|
| a) Appearance | Form: solid |
| b) Odor | No data available |
| c) Odor Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 163 - 165 °C (325 - 329 °F) - lit. |
| f) Initial boiling point and boiling range | No data available |
| g) Flash point | No data available |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapor pressure | No data available |
| l) Vapor density | No data available |
| m) Relative density | No data available |
| n) Water solubility | No data available |
| o) Partition coefficient: n-octanol/water | No data available |
| p) Autoignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Carbon oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

TDLo Oral - Mouse - 7.57 mg/kg

Remarks: Liver:Changes in liver weight. Endocrine:Changes in thymus weight.

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

This product is or contains a component that has been reported to be probably carcinogenic based on its IARC, OSHA, ACGIH, NTP, or EPA classification.

Possible human carcinogen

IARC: 2B - Group 2B: Possibly carcinogenic to humans (Benz[e]acephenanthrylene)

NTP: RAHC - Reasonably anticipated to be a human carcinogen
(Benz[e]acephenanthrylene)

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

RTECS: Not available

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

SECTION 12: Ecological information**12.1 Toxicity**

| | |
|---|--|
| Toxicity to daphnia and other aquatic invertebrates | Immobilization EC50 - Daphnia magna (Water flea) - > 1.024 mg/l - 24 h |
|---|--|

12.2 Persistence and degradability

No data available

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Very toxic to aquatic life.

SECTION 13: Disposal considerations**13.1 Waste treatment methods****Product**

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

Not dangerous goods

IMDG

UN number: 3077 Class: 9 Packing group: III EMS-No: F-A, S-F
Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S.
(Benz[e]acephenanthrylene)
Marine pollutant : yes

IATA

UN number: 3077 Class: 9 Packing group: III
Proper shipping name: Environmentally hazardous substance, solid, n.o.s.
(Benz[e]acephenanthrylene)

Further information

EHS-Mark required (ADR 2.2.9.1.10, IMDG code 2.10.3) for single packagings and combination packagings containing inner packagings with Dangerous Goods > 5L for liquids or > 5kg for solids.

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | CAS-No. | Revision Date |
|--------------------------|----------|---------------|
| Benz[e]acephenanthrylene | 205-99-2 | 2007-03-01 |

SARA 311/312 Hazards

Chronic Health Hazard

Massachusetts Right To Know Components

| | CAS-No. | Revision Date |
|--------------------------|----------|---------------|
| Benz[e]acephenanthrylene | 205-99-2 | 2007-03-01 |

Pennsylvania Right To Know Components

| | CAS-No. | Revision Date |
|--------------------------|----------|---------------|
| Benz[e]acephenanthrylene | 205-99-2 | 2007-03-01 |

California Prop. 65 Components

| | CAS-No. | Revision Date |
|---|----------|---------------|
| , which is/are known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov . Benz[e]acephenanthrylene | 205-99-2 | 2007-09-28 |

SECTION 16: Other information

Revision Date: 09/14/2020

Print Date: 11/20/2020

SAFETY DATA SHEET

Version 6.2
Revision Date 09/15/2020
Print Date 11/19/2020

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : Cadmium

Product Number : 265365
Brand : Aldrich
Index-No. : 048-002-00-0
CAS-No. : 7440-43-9

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheet

Company : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES

Telephone : +1 314 771-5765
Fax : +1 800 325-5052

1.4 Emergency telephone

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Acute toxicity, Oral (Category 3), H301
Acute toxicity, Inhalation (Category 2), H330
Germ cell mutagenicity (Category 2), H341
Carcinogenicity (Category 1B), H350
Reproductive toxicity (Category 2), H361
Specific target organ toxicity - repeated exposure (Category 1), H372
Short-term (acute) aquatic hazard (Category 1), H400
Long-term (chronic) aquatic hazard (Category 1), H410

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Danger

Hazard statement(s)

H301 Toxic if swallowed.
H330 Fatal if inhaled.
H341 Suspected of causing genetic defects.
H350 May cause cancer.
H361 Suspected of damaging fertility or the unborn child.
H372 Causes damage to organs through prolonged or repeated exposure.
H410 Very toxic to aquatic life with long lasting effects.

Precautionary statement(s)

P201 Obtain special instructions before use.
P202 Do not handle until all safety precautions have been read and understood.
P260 Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.
P264 Wash skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P271 Use only outdoors or in a well-ventilated area.
P273 Avoid release to the environment.
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
P284 Wear respiratory protection.
P301 + P310 + P330 IF SWALLOWED: Immediately call a POISON CENTER/ doctor. Rinse mouth.
P304 + P340 + P310 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER/ doctor.
P308 + P313 IF exposed or concerned: Get medical advice/ attention.
P391 Collect spillage.
P403 + P233 Store in a well-ventilated place. Keep container tightly closed.
P405 Store locked up.
P501 Dispose of contents/ container to an approved waste disposal plant.

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

Formula : Cd
Molecular weight : 112.41 g/mol
CAS-No. : 7440-43-9
EC-No. : 231-152-8
Index-No. : 048-002-00-0

| Component | Classification | Concentration |
|----------------|--|---------------|
| Cadmium | | |
| | Acute Tox. 3; Acute Tox. 2; Muta. 2; Carc. 1B; Repr. 2; STOT RE 1; | <= 100 % |

| | | |
|--|---|--|
| | Aquatic Acute 1; Aquatic Chronic 1; H301, H330, H341, H350, H361, H372, H400, H410
M-Factor - Aquatic Acute: 1,000 | |
|--|---|--|

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Take victim immediately to hospital. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Cadmium/cadmium oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Air sensitive. Keep in a dry place.

Storage class (TRGS 510): 6.1A: Combustible, acute toxic Cat. 1 and 2 / very toxic hazardous materials

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|-----------|-----------|---|-----------------------|--|
| | Remarks | Substance listed; for more information see OSHA document 1910.1027 | | |
| Cadmium | 7440-43-9 | TWA | 0.1 mg/m ³ | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | Z37.5-1970
This standard applies to any operations or sectors for which the Cadmium standard, 1910.1027, is stayed or otherwise not in effect. | | |

| | | | | |
|--|--|---|-------------|---|
| | | TWA | 0.2 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | Z37.5-1970
This standard applies to any operations or sectors for which the Cadmium standard, 1910.1027, is stayed or otherwise not in effect. | | |
| | | CEIL | 0.3 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | Z37.5-1970
This standard applies to any operations or sectors for which the Cadmium standard, 1910.1027, is stayed or otherwise not in effect. | | |
| | | CEIL | 0.6 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | Z37.5-1970
This standard applies to any operations or sectors for which the Cadmium standard, 1910.1027, is stayed or otherwise not in effect. | | |
| | | PEL | 0.005 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | see Sections 1532 & 5207 | | |
| | | Potential Occupational Carcinogen
See Appendix A | | |
| | | TWA | 0.01 mg/m3 | USA. ACGIH Threshold Limit Values (TLV) |
| | | Kidney damage
Substances for which there is a Biological Exposure Index or Indices (see BEI® section)
Suspected human carcinogen varies | | |
| | | TWA | 0.002 mg/m3 | USA. ACGIH Threshold Limit Values (TLV) |
| | | Kidney damage
Substances for which there is a Biological Exposure Index or Indices (see BEI® section)
Suspected human carcinogen varies | | |
| | | PEL | 0.005 mg/m3 | OSHA Specifically Regulated Chemicals/Carcinogens |
| | | 1910.1027
This standard applies to all occupational exposures to cadmium and cadmium compounds, in all forms, and in all industries covered by the Occupational Safety and Health Act, except the construction-related industries, which are covered under 29 CFR 1926.63.
OSHA specifically regulated carcinogen | | |

Biological occupational exposure limits

| Component | CAS-No. | Parameters | Value | Biological specimen | Basis |
|-----------|-----------|--------------|------------------|---------------------|---|
| Cadmium | 7440-43-9 | cadmium | 5 µg/l | In blood | ACGIH - Biological Exposure Indices (BEI) |
| | Remarks | Not critical | | | |
| | | cadmium | 5µg/g creatinine | Urine | ACGIH - Biological Exposure Indices (BEI) |
| | | Not critical | | | |

8.2 Exposure controls**Appropriate engineering controls**

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment**Eye/face protection**

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested:Dermatril® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested:Dermatril® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N99 (US) or type P2 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|---|
| a) Appearance | Form: powder
Color: metallic |
| b) Odor | odorless |
| c) Odor Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 320.9 °C (609.6 °F) - lit. |
| f) Initial boiling point and boiling range | 765 °C 1409 °F - lit. |
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapor pressure | 1.3 hPa at 394 °C (741 °F) |
| l) Vapor density | No data available |
| m) Relative density | 8.65 g/cm ³ at 25 °C (77 °F) |
| n) Water solubility | 2.3 g/l at 20 °C (68 °F) - OECD Test Guideline 105 - slightly soluble |
| o) Partition coefficient: n-octanol/water | Not applicable for inorganic substances |
| p) Autoignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents, acids

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Cadmium/cadmium oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

LD50 Oral - Mouse - 65 mg/kg

Remarks: (ECHA)

LC50 Inhalation - Rat - male - 4 h - > 0.5638 mg/l

Remarks: (ECHA)

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

Suspected of causing genetic defects.

Carcinogenicity

Presumed to have carcinogenic potential for humans

IARC: 1 - Group 1: Carcinogenic to humans (Cadmium)

NTP: No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is

on OSHA's list of regulated carcinogens.

Reproductive toxicity

Suspected of damaging the unborn child.

Suspected of damaging fertility.

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

Causes damage to organs through prolonged or repeated exposure.

Aspiration hazard

No data available

Additional Information

RTECS: EU9800000

Damage to the lungs., Kidney injury may occur., prolonged or repeated exposure can cause:, Vomiting, Diarrhea, Lung irritation

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Stomach - Irregularities - Based on Human Evidence

Stomach - Irregularities - Based on Human Evidence

SECTION 12: Ecological information

12.1 Toxicity

| | |
|---|--|
| Toxicity to fish | flow-through test LC50 - Pimephales promelas (fathead minnow) - 1.5 mg/l - 96 h
Remarks: (ECHA) |
| Toxicity to daphnia and other aquatic invertebrates | static test LC50 - Daphnia magna (Water flea) - 0.11 mg/l - 48 h (OECD Test Guideline 202) |
| Toxicity to bacteria | static test NOEC - activated sludge - 0.2 mg/l - 3 h (OECD Test Guideline 209) |

12.2 Persistence and degradability

The methods for determining the biological degradability are not applicable to inorganic substances.

12.3 Bioaccumulative potential

Bioaccumulation Oncorhynchus mykiss (rainbow trout) - 72 d
- 1.27 µg/l(Cadmium)

Bioconcentration factor (BCF): 55

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Very toxic to aquatic life with long lasting effects.

No data available

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

UN number: 3288 Class: 6.1 Packing group: II
Proper shipping name: Toxic solid, inorganic, n.o.s. (Cadmium)
Reportable Quantity (RQ): 10 lbs
Reportable Quantity (RQ): 10 lbs
Poison Inhalation Hazard: No

IMDG

UN number: 3288 Class: 6.1 Packing group: II EMS-No: F-A, S-A
Proper shipping name: TOXIC SOLID, INORGANIC, N.O.S. (Cadmium)
Marine pollutant : yes

IATA

UN number: 3288 Class: 6.1 Packing group: II
Proper shipping name: Toxic solid, inorganic, n.o.s. (Cadmium)

SECTION 15: Regulatory information

SARA 302 Components

This material does not contain any components with a section 302 EHS TPQ.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | | |
|---------|----------------------|-----------------------------|
| Cadmium | CAS-No.
7440-43-9 | Revision Date
2007-07-01 |
|---------|----------------------|-----------------------------|

SARA 311/312 Hazards

Acute Health Hazard, Chronic Health Hazard

:

Reportable Quantity D006 lbs

Massachusetts Right To Know Components

No components are subject to the Massachusetts Right to Know Act.

SECTION 16: Other information

Further information

Print Date: 11/19/2020

SAFETY DATA SHEET

Version 6.4
Revision Date 01/15/2020
Print Date 11/20/2020

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : Chromium

Product Number : 374849
Brand : Aldrich
CAS-No. : 7440-47-3

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheet

Company : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES

Telephone : +1 314 771-5765
Fax : +1 800 325-5052

1.4 Emergency telephone number

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture**

Not a hazardous substance or mixture.

2.2 GHS Label elements, including precautionary statements

Not a hazardous substance or mixture.

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none**SECTION 3: Composition/information on ingredients****3.1 Substances**

Formula : Cr
Molecular weight : 52.00 g/mol
CAS-No. : 7440-47-3
EC-No. : 231-157-5

Aldrich - 374849

Page 1 of 8

| Component | Classification | Concentration |
|-----------------|----------------|---------------|
| Chromium | | |
| | | <= 100 % |

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration.

In case of skin contact

Wash off with soap and plenty of water.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Chromium oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing vapours, mist or gas.
For personal protection see section 8.

6.2 Environmental precautions

No special environmental precautions required.

6.3 Methods and materials for containment and cleaning up

Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Storage class (TRGS 510): 13: Non Combustible Solids

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|-----------|-----------|---|-----------------------|---|
| Chromium | 7440-47-3 | TWA | 0.5 mg/m ³ | USA. ACGIH Threshold Limit Values (TLV) |
| | Remarks | respiratory tract irritation
2018 Adoption | | |
| | | PEL | 0.5 mg/m ³ | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | see Sections 1532.2, 5206 & 8359 | | |
| | | TWA | 1 mg/m ³ | USA. Occupational Exposure Limits (OSHA) - Table Z-1
Limits for Air Contaminants |

8.2 Exposure controls

Appropriate engineering controls

General industrial hygiene practice.

Personal protective equipment

Eye/face protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Respiratory protection is not required. Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

No special environmental precautions required.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|--|---|
| a) Appearance | Form: chips
Colour: light grey |
| b) Odour | odourless |
| c) Odour Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 1,857 °C (3,375 °F) - lit. |
| f) Initial boiling point and boiling range | 2,672 °C 4,842 °F - lit. |

| | |
|---|----------------------------|
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapour pressure | No data available |
| l) Vapour density | No data available |
| m) Relative density | 7.14 g/mL at 25 °C (77 °F) |
| n) Water solubility | No data available |
| o) Partition coefficient: n-octanol/water | No data available |
| p) Auto-ignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong acids, Strong oxidizing agents

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Chromium oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No data available

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitisation

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

RTECS: GB4200000

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Stomach - Irregularities - Based on Human Evidence

Stomach - Irregularities - Based on Human Evidence

SECTION 12: Ecological information

12.1 Toxicity

Toxicity to fish LC50 - Cyprinus carpio (Carp) - 14.3 mg/l - 96 h

Toxicity to daphnia EC50 - Daphnia magna (Water flea) - 0.07 mg/l - 48 h

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | CAS-No. | Revision Date |
|----------|-----------|---------------|

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Carbon oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols.**Advice on safe handling**

Avoid exposure - obtain special instructions before use.

Advice on protection against fire and explosion

Provide appropriate exhaust ventilation at places where dust is formed.

Hygiene measures

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Storage conditions

Store in cool place. Keep container tightly closed in a dry and well-ventilated place.

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

8.2 Exposure controls

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

The selected protective gloves have to satisfy the specifications of Regulation (EU) 2016/425 and the standard EN 374 derived from it.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|-------------------|
| a) Appearance | Form: solid |
| b) Odor | No data available |

temperature

- r) Viscosity Viscosity, kinematic: No data available
 Viscosity, dynamic: No data available
- s) Explosive properties No data available
- t) Oxidizing properties No data available

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents

10.6 Hazardous decomposition products

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

Laboratory experiments have shown mutagenic effects.

In vitro tests showed mutagenic effects

Test Type: Ames test

Test system: Salmonella typhimurium

Result: positive

Remarks: (Lit.)

Carcinogenicity

No data available

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

11.2 Additional Information

RTECS: GC0700000

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Property that cannot be excluded on the basis of structure- effect considerations:

Nausea

Vomiting

Risk of methaemoglobin formation with headache, cardiac dysrhythmia, drop in blood pressure, dyspnoea and spasms, principal symptom: cyanosis (blue discolouration of the blood).

This substance should be handled with particular care.

SECTION 12: Ecological information**12.1 Toxicity**

Toxicity to daphnia and other aquatic invertebrates EC50 - Daphnia magna (Water flea) - 1,90 mg/l - 2 h

12.2 Persistence and degradability

No data available

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

This substance/mixture contains components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB).

12.6 Other adverse effects

Very toxic to aquatic life with long lasting effects.

Discharge into the environment must be avoided.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

14.1 UN number

ADR/RID: 3077

IMDG: 3077

IATA: 3077

14.2 UN proper shipping name

ADR/RID: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (chrysene)

IMDG: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (chrysene)

IATA: Environmentally hazardous substance, solid, n.o.s. (chrysene)

14.3 Transport hazard class(es)

14.6 Special precautions for user

Further information

EHS-Mark required (ADR 2.2.9.1.10, IMDG code 2.10.3) for single packagings and combination packagings containing inner packagings with Dangerous Goods > 5L for liquids or > 5kg for solids.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

This material safety data sheet complies with the requirements of Regulation (EC) No. 1907/2006.

Authorisations and/or restrictions on use

National legislation

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances.

: ENVIRONMENTAL HAZARDS

15.2 Chemical Safety Assessment

For this product a chemical safety assessment was not carried out

SECTION 16: Other information

Full text of H-Statements referred to under sections 2 and 3.

| | |
|------|---|
| H341 | Suspected of causing genetic defects. |
| H350 | May cause cancer. |
| H400 | Very toxic to aquatic life. |
| H410 | Very toxic to aquatic life with long lasting effects. |

Further information

The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. The information in this document is based on the present state of our knowledge and is applicable to the product with regard to appropriate safety precautions. It does not represent any guarantee of the properties of the product. Sigma-Aldrich Corporation and its Affiliates shall not be held liable for any damage resulting from handling or from contact with the above product. See www.sigma-aldrich.com and/or the reverse side of invoice or packing slip for additional terms and conditions of sale.

The branding on the header and/or footer of this document may temporarily not visually match the product purchased as we transition our branding. However, all of the information in the document regarding the product remains unchanged and matches the product ordered. For further information please contact mlsbranding@sial.com.

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : Continuous cast copper (O)

Product Number : BCR058
Brand : Sigma-Aldrich
CAS-No. : 7440-50-8**1.2 Relevant identified uses of the substance or mixture and uses advised against**

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheetCompany : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES OF AMERICA (THE)Telephone : +1 314 771-5765
Fax : +1 800 325-5052**1.4 Emergency telephone**Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture**

Not a hazardous substance or mixture.

2.2 GHS Label elements, including precautionary statements

Not a hazardous substance or mixture.

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients**3.1 Substances**

Synonyms : Copper

Formula : Cu

Sigma-Aldrich - BCR058

Page 1 of 9

Molecular weight : 63.55 g/mol
CAS-No. : 7440-50-8
EC-No. : 231-159-6

| Component | Classification | Concentration |
|---------------|----------------|---------------|
| copper | | |
| | | <= 100 % |

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration.

In case of skin contact

Wash off with soap and plenty of water.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media

For this substance/mixture no limitations of extinguishing agents are given.

5.2 Special hazards arising from the substance or mixture

Copper oxides

Combustible.

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing vapors, mist or gas.
For personal protection see section 8.

6.2 Environmental precautions

No special environmental precautions required.

6.3 Methods and materials for containment and cleaning up

Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling

Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Advice on protection against fire and explosion

Provide appropriate exhaust ventilation at places where dust is formed.

Hygiene measures

General industrial hygiene practice.
For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Storage conditions

Keep container tightly closed in a dry and well-ventilated place.
Storage class (TRGS 510): 4.1B: Flammable solid hazardous materials

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|-----------|-----------|-------|--------------------|---|
| copper | 7440-50-8 | TWA | 1 mg/m3 | USA. ACGIH Threshold Limit Values (TLV) |
| | | TWA | 0.2 mg/m3 | USA. ACGIH Threshold Limit Values (TLV) |
| | | TWA | 1 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | TWA | 1 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | TWA | 1 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-1 Limits for Air Contaminants |
| | | TWA | 0.1 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-1 Limits for Air Contaminants |
| | | PEL | 0.1 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | TWA | 0.1 mg/m3 | USA. OSHA - TABLE Z-1 Limits for Air Contaminants - 1910.1000 |
| | | TWA | 1 mg/m3 | USA. OSHA - TABLE Z-1 Limits for Air Contaminants - 1910.1000 |

8.2 Exposure controls

Appropriate engineering controls

General industrial hygiene practice.

Personal protective equipment

Eye/face protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatril® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatril® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place., The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Respiratory protection is not required. Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

No special environmental precautions required.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|---|---|
| a) Appearance | Form: Rods
Color: light red |
| b) Odor | No data available |
| c) Odor Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 1,083.4 °C (1,982.1 °F) - lit. |
| f) Initial boiling point and boiling range | 2,567 °C 4,653 °F - lit. |
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapor pressure | No data available |
| l) Vapor density | No data available |
| m) Relative density | No data available |
| n) Water solubility | insoluble |
| o) Partition coefficient: | Not applicable for inorganic substances |

n-octanol/water

- | | | |
|----|---------------------------|-------------------|
| p) | Autoignition temperature | No data available |
| q) | Decomposition temperature | No data available |
| r) | Viscosity | No data available |
| s) | Explosive properties | No data available |
| t) | Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong acids, Acid chlorides, Halogens

10.6 Hazardous decomposition products

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No data available

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

IARC: No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP: No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

11.2 Additional Information

RTECS: GL5325000

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Liver - Irregularities - Based on Human Evidence

SECTION 12: Ecological information**12.1 Toxicity**

No data available

12.2 Persistence and degradability

The methods for determining biodegradability are not applicable to inorganic substances.

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

No data available

Sigma-Aldrich - BCR058

Page 7 of 9

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

UN number: 3089 Class: 4.1 Packing group: II
Proper shipping name: Metal powders, flammable, n.o.s.
Reportable Quantity (RQ):
Poison Inhalation Hazard: No

IMDG

UN number: 3089 Class: 4.1 Packing group: II EMS-No: F-G, S-G
Proper shipping name: METAL POWDER, FLAMMABLE, N.O.S. (Copper)
Marine pollutant : yes

IATA

UN number: 3089 Class: 4.1 Packing group: II
Proper shipping name: Metal powder, flammable, n.o.s.

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | CAS-No. | Revision Date |
|--------|-----------|---------------|
| Copper | 7440-50-8 | 1993-02-16 |

SARA 311/312 Hazards

Fire Hazard, Chronic Health Hazard

Massachusetts Right To Know Components

No components are subject to the Massachusetts Right to Know Act.

SECTION 16: Other information

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Carcinogenicity (Category 2), H351

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word : Warning

Hazard statement(s)
H351 : Suspected of causing cancer.

Precautionary statement(s)
P201 : Obtain special instructions before use.

| | |
|-------------|---|
| P202 | Do not handle until all safety precautions have been read and understood. |
| P281 | Use personal protective equipment as required. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

| | |
|------------------|-----------------------------------|
| Formula | : C ₂₂ H ₁₂ |
| Molecular weight | : 276.33 g/mol |
| CAS-No. | : 193-39-5 |
| EC-No. | : 205-893-2 |

| Component | Classification | Concentration |
|-------------------------------|----------------|---------------|
| Indeno[1,2,3-cd]pyrene | | |
| | Carc. 2; H351 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Carbon oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Store at room temperature.

Storage class (TRGS 510): 13: Non Combustible Solids

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters

Contains no substances with occupational exposure limit values.

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Body Protection

Impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|--|---------------------|
| a) Appearance | Form: solid |
| b) Odour | No data available |
| c) Odour Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | 163.6 °C (326.5 °F) |
| f) Initial boiling point and boiling range | 536.0 °C 996.8 °F |
| g) Flash point | No data available |
| h) Evaporation rate | No data available |

| | | |
|----|--|-------------------|
| i) | Flammability (solid, gas) | No data available |
| j) | Upper/lower flammability or explosive limits | No data available |
| k) | Vapour pressure | No data available |
| l) | Vapour density | No data available |
| m) | Relative density | No data available |
| n) | Water solubility | No data available |
| o) | Partition coefficient: n-octanol/water | No data available |
| p) | Auto-ignition temperature | No data available |
| q) | Decomposition temperature | No data available |
| r) | Viscosity | No data available |
| s) | Explosive properties | No data available |
| t) | Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Carbon oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No data available

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitisation

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

This product is or contains a component that has been reported to be possibly carcinogenic based on its IARC, ACGIH, NTP, or EPA classification.

Limited evidence of carcinogenicity in animal studies

IARC: 2B - Group 2B: Possibly carcinogenic to humans (Indeno[1,2,3-cd]pyrene)

NTP: RAHC - Reasonably anticipated to be a human carcinogen (Indeno[1,2,3-cd]pyrene)

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

RTECS: Not available

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

SECTION 12: Ecological information

12.1 Toxicity

No data available

12.2 Persistence and degradability

No data available

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

No data available

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

Not dangerous goods

IMDG

Not dangerous goods

IATA

Not dangerous goods

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

| P280 | Wear protective gloves/ protective clothing/ eye protection/ face protection. |
| P301 + P312 + P330 | IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell. Rinse mouth. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P391 | Collect spillage. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

| | |
|------------------|----------------|
| Formula | : Pb |
| Molecular weight | : 207.20 g/mol |
| CAS-No. | : 7439-92-1 |
| EC-No. | : 231-100-4 |

| Component | Classification | Concentration |
|-------------|---|---------------|
| Lead | | |
| | Carc. 2; Repr. 1A; Lact. ; STOT RE 1; Aquatic Acute 1; Aquatic Chronic 1; H351, H360, H362, H372, H400, H410
Concentration limits:
>= 2.5 %: Repr. 2, H361f; >= 0.5 %: STOT RE 2, H373; >= 0.03 %: Repr. 1A, H360D;
M-Factor - Aquatic Acute: 10 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Lead oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Keep in a dry place.

Storage class (TRGS 510): 6.1D: Non-combustible, acute toxic Cat.3 / toxic hazardous materials or hazardous materials causing chronic effects

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|-----------|-----------|---|------------------------|---|
| | Remarks | See 1910.1025 | | |
| Lead | 7439-92-1 | TWA | 0.05 mg/m ³ | USA. ACGIH Threshold Limit Values (TLV) |
| | | Confirmed animal carcinogen with unknown relevance to humans | | |
| | | TWA | 0.05 mg/m ³ | USA. ACGIH Threshold Limit Values (TLV) |
| | | Central Nervous System impairment
Hematologic effects
Peripheral Nervous System impairment
Substances for which there is a Biological Exposure Index or Indices (see BEI® section)
Confirmed animal carcinogen with unknown relevance to humans | | |
| | | TWA | 0.05 mg/m ³ | USA. NIOSH Recommended Exposure Limits |
| | | See Appendix C | | |

Biological occupational exposure limits

| Component | CAS-No. | Parameters | Value | Biological specimen | Basis |
|-----------|-----------|--------------|----------|---------------------|---|
| Lead | 7439-92-1 | Lead | 200 µg/l | In blood | ACGIH - Biological Exposure Indices (BEI) |
| | Remarks | Not critical | | | |

8.2 Exposure controls**Appropriate engineering controls**

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment**Eye/face protection**

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and

approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|---|
| a) Appearance | Form: powder |
| b) Odor | No data available |
| c) Odor Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: 327.4 °C (621.3 °F) - lit. |
| f) Initial boiling point and boiling range | 1,740 °C 3,164 °F - lit. |
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapor pressure | No data available |
| l) Vapor density | No data available |
| m) Relative density | No data available |
| n) Water solubility | No data available |
| o) Partition coefficient: n-octanol/water | No data available |
| p) Autoignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong acids

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Lead oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

LD50 Oral - Rat - male and female - > 2,000 mg/kg

(OECD Test Guideline 423)

LC50 Inhalation - Rat - male and female - 4 h - > 5.05 mg/l

(OECD Test Guideline 403)

LD50 Dermal - Rat - male and female - > 2,000 mg/kg

(OECD Test Guideline 402)

No data available

Skin corrosion/irritation

Skin - Rabbit

Result: No skin irritation - 4 h

(OECD Test Guideline 404)

Serious eye damage/eye irritation

Eyes - Rabbit

Result: No eye irritation - 72 h

(OECD Test Guideline 405)

Respiratory or skin sensitization

Maximization Test - Guinea pig

Result: negative

(OECD Test Guideline 406)

Germ cell mutagenicity

Rat - female - Red blood cells (erythrocytes)

Result: positive

(ECHA)

Mouse - male - Liver cells

Result: negative
(ECHA)

Mouse - female - Bone marrow
Result: Positive results were obtained in some in vivo tests.
(ECHA)

Monkey - female - lymphocyte
Result: Positive results were obtained in some in vivo tests.
(ECHA)

Carcinogenicity

IARC: 2B - Group 2B: Possibly carcinogenic to humans (Lead)

NTP: RAHC - Reasonably anticipated to be a human carcinogen The reference note has been added by TD based on the background information of the NTP. (Lead)

OSHA: OSHA specifically regulated carcinogen (Lead)

Reproductive toxicity

May damage the unborn child. Positive evidence from human epidemiological studies.
May damage fertility. Positive evidence from human epidemiological studies. Studies indicating a hazard to babies during the lactation period

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

Oral - Causes damage to organs through prolonged or repeated exposure. - Central nervous system, Blood, Immune system, Kidney

Aspiration hazard

No data available

Additional Information

RTECS: OF7525000

anemia

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

On the basis of the morphology of the product, no hazardous properties are to be expected when it is handled and used with appropriate care.

The following applies to lead compounds in general: Due to the poor absorbability via the gastrointestinal tract, only very high doses lead to acute cases of intoxication. After a latency period of several hours, metallic taste, nausea, vomiting, and colics occur, in many instances followed by shock. Chronic uptake causes peripheral muscular weakness ("drop-wrist"), anaemia, and central-nervous disorders. Women of child-bearing age should not be exposed to the substance over longer periods of time (observe critical threshold).

Handle in accordance with good industrial hygiene and safety practice.

Stomach - Irregularities - Based on Human Evidence

Stomach - Irregularities - Based on Human Evidence

SECTION 12: Ecological information

12.1 Toxicity

| | |
|-------------------|--|
| Toxicity to fish | static test LC50 - Oncorhynchus mykiss (rainbow trout) - 0.1 mg/l - 96 h
Remarks: (ECHA) |
| Toxicity to algae | mortality EC50 - Skeletonema costatum - 7.94 mg/l - 10 d
Remarks: (ECOTOX Database)(Lead) |

12.2 Persistence and degradability

| | |
|------------------|---|
| Biodegradability | Result: - According to the results of tests of biodegradability this product is not readily biodegradable.
Remarks: The methods for determining biodegradability are not applicable to inorganic substances. |
|------------------|---|

12.3 Bioaccumulative potential

| | |
|-----------------|--|
| Bioaccumulation | Oncorhynchus kisutch - 2 Weeks
- 150 µg/l(Lead) |
| | Bioconcentration factor (BCF): 12 |

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.
Very toxic to aquatic life with long lasting effects.
Discharge into the environment must be avoided.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

UN number: 3077 Class: 9 Packing group: III
Proper shipping name: Environmentally hazardous substance, solid, n.o.s. (Lead)
Reportable Quantity (RQ): 10 lbs
Poison Inhalation Hazard: No

IMDG

UN number: 3077 Class: 9 Packing group: III EMS-No: F-A, S-F
Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S.
(Lead)
Marine pollutant : yes

IATA

UN number: 3077 Class: 9 Packing group: III
Proper shipping name: Environmentally hazardous substance, solid, n.o.s. (Lead)

Further information

EHS-Mark required (ADR 2.2.9.1.10, IMDG code 2.10.3) for single packagings and combination packagings containing inner packagings with Dangerous Goods > 5L for liquids or > 5kg for solids.

SECTION 15: Regulatory information**SARA 302 Components**

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | CAS-No. | Revision Date |
|------|-----------|---------------|
| Lead | 7439-92-1 | 2015-11-23 |

Hours/day; 7 Days/week**SECTION 2: Hazards identification****2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**Corrosive to Metals (Category 1), H290
Acute toxicity, Oral (Category 4), H302
Acute toxicity, Inhalation (Category 3), H331
Acute toxicity, Dermal (Category 3), H311
Skin corrosion (Category 1A), H314
Serious eye damage (Category 1), H318
Specific target organ toxicity - repeated exposure (Category 2), Kidney, H373
Short-term (acute) aquatic hazard (Category 2), H401
Long-term (chronic) aquatic hazard (Category 2), H411

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Danger

Hazard statement(s)

H290

May be corrosive to metals.

H302

Harmful if swallowed.

H311 + H331

Toxic in contact with skin or if inhaled.

H314

Causes severe skin burns and eye damage.

H373

May cause damage to organs (Kidney) through prolonged or repeated exposure.

H411

Toxic to aquatic life with long lasting effects.

Precautionary statement(s)

P234

Keep only in original container.

P260

Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.

P264

Wash skin thoroughly after handling.

P270

Do not eat, drink or smoke when using this product.

P271

Use only outdoors or in a well-ventilated area.

P273

Avoid release to the environment.

P280

Wear protective gloves/ protective clothing/ eye protection/ face protection.

P301 + P312 + P330

IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell. Rinse mouth.

P301 + P330 + P331

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303 + P361 + P353

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower.

P304 + P340 + P310

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER/ doctor.

P305 + P351 + P338 + P310

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/ doctor.

P314

Get medical advice/ attention if you feel unwell.

P362

Take off contaminated clothing and wash before reuse.

P390

Absorb spillage to prevent material damage.

P391

Collect spillage.

P403 + P233

Store in a well-ventilated place. Keep container tightly closed.

P405

Store locked up.

P406

Store in corrosive resistant container with a resistant inner liner.

P501

Dispose of contents/ container to an approved waste disposal plant.

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS

Corrosive to the respiratory tract.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

| Component | Classification | Concentration |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

First aiders need to protect themselves. Show this material safety data sheet to the doctor in attendance.

If inhaled

After inhalation: fresh air. Immediately call in physician. If breathing stops: immediately apply artificial respiration, if necessary also oxygen.

In case of skin contact

In case of skin contact: Take off immediately all contaminated clothing. Rinse skin with water/ shower. Call a physician immediately.

In case of eye contact

After eye contact: rinse out with plenty of water. Immediately call in ophthalmologist.
Remove contact lenses.

If swallowed

After swallowing: make victim drink water (two glasses at most), avoid vomiting (risk of perforation). Call a physician immediately. Do not attempt to neutralise.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures**5.1 Extinguishing media****Suitable extinguishing media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media

For this substance/mixture no limitations of extinguishing agents are given.

5.2 Special hazards arising from the substance or mixture

Nitrogen oxides (NO_x)

Mercury/mercury oxides.

Not combustible.

Ambient fire may liberate hazardous vapours.

5.3 Advice for firefighters

Stay in danger area only with self-contained breathing apparatus. Prevent skin contact by keeping a safe distance or by wearing suitable protective clothing.

5.4 Further information

Suppress (knock down) gases/vapors/mists with a water spray jet. Prevent fire extinguishing water from contaminating surface water or the ground water system.

SECTION 6: Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Advice for non-emergency personnel: Do not breathe vapors, aerosols. Avoid substance contact. Ensure adequate ventilation. Evacuate the danger area, observe emergency procedures, consult an expert.

For personal protection see section 8.

6.2 Environmental precautions

Do not let product enter drains.

6.3 Methods and materials for containment and cleaning up

Cover drains. Collect, bind, and pump off spills. Observe possible material restrictions (see sections 7 and 10). Take up carefully with liquid-absorbent material (e.g. Chemizorb®). Dispose of properly. Clean up affected area.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling

Work under hood. Do not inhale substance/mixture. Avoid generation of vapours/aerosols.

Hygiene measures

Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face after working with substance.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Storage conditions

Tightly closed. Keep in a well-ventilated place. Keep locked up or in an area accessible only to qualified or authorized persons.

Storage class (TRGS 510): 6.1D: Non-combustible, acute toxic Cat.3 / toxic hazardous materials or hazardous materials causing chronic effects

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|---------------------|------------|--|--------------------|---|
| nitric acid | 7697-37-2 | TWA | 2 ppm | USA. ACGIH Threshold Limit Values (TLV) |
| | | STEL | 4 ppm | USA. ACGIH Threshold Limit Values (TLV) |
| | | TWA | 2 ppm
5 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | ST | 4 ppm
10 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | TWA | 2 ppm
5 mg/m3 | USA. Occupational Exposure Limits (OSHA) - Table Z-1 Limits for Air Contaminants |
| | | TWA | 2 ppm
5 mg/m3 | USA. OSHA - TABLE Z-1 Limits for Air Contaminants - 1910.1000 |
| | | STEL | 4 ppm
10 mg/m3 | USA. OSHA - TABLE Z-1 Limits for Air Contaminants - 1910.1000 |
| | | PEL | 2 ppm
5 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | STEL | 4 ppm
10 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| Mercury(II) nitrate | 10045-94-0 | TWA | 0.025 mg/m3 | USA. ACGIH Threshold Limit Values (TLV) |
| | Remarks | Not classifiable as a human carcinogen
Danger of cutaneous absorption | | |
| | | TWA | 0.05 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | Potential for dermal absorption | | |
| | | C | 0.1 mg/m3 | USA. NIOSH Recommended Exposure Limits |
| | | Potential for dermal absorption | | |
| | | PEL | 0.025 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | Skin | | |
| | | C | 0.1 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | Skin | | |

8.2 Exposure controls

Appropriate engineering controls

Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face after working with substance.

Personal protective equipment

Eye/face protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Tightly fitting safety goggles

Skin protection

required

Body Protection

protective clothing

Respiratory protection

required when vapours/aerosols are generated.

Our recommendations on filtering respiratory protection are based on the following standards: DIN EN 143, DIN 14387 and other accompanying standards relating to the used respiratory protection system.

Control of environmental exposure

Do not let product enter drains.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|---|------------------------|
| a) Appearance | Form: Aqueous solution |
| b) Odor | No data available |
| c) Odor Threshold | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

The product is chemically stable under standard ambient conditions (room temperature) .

10.3 Possibility of hazardous reactions

Violent reactions possible with:

The generally known reaction partners of water.

10.4 Conditions to avoid

no information available

10.5 Incompatible materials

Strong oxidizing agentsMetals

10.6 Hazardous decomposition products

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Mixture

Acute toxicity

Oral: No data available

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

Mixture causes severe burns.

Serious eye damage/eye irritation

Mixture causes serious eye damage. Risk of blindness!

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

IARC: No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP: No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

Mixture may cause damage to organs through prolonged or repeated exposure. - Kidney

Aspiration hazard

No data available

11.2 Additional Information

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Other dangerous properties can not be excluded.

Handle in accordance with good industrial hygiene and safety practice.

Liver - Irregularities - Based on Human Evidence

Components**nitric acid****Acute toxicity**

Oral: No data available

Acute toxicity estimate Inhalation - 4 h - 2.5 mg/l
(Expert judgment)

Dermal: No data available

No data available

Skin corrosion/irritation

Skin - Rabbit

Result: Causes severe burns.

Remarks: (IUCLID)

Causes poorly healing wounds.

Serious eye damage/eye irritation

Eyes - Rabbit

Result: Causes burns.

Remarks: (IUCLID)

Causes serious eye damage.

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

Ames test

Salmonella typhimurium

Result: negative

Carcinogenicity

No data available

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Mercury(II) nitrate**Acute toxicity**

Acute toxicity estimate Oral - 5.1 mg/kg

(Expert judgment)

Acute toxicity estimate Inhalation - 0.051 mg/l

(Expert judgment)

Acute toxicity estimate Dermal - 5.1 mg/kg

(Expert judgment)

No data available

Skin corrosion/irritation

No data available

Serious eye damage/eye irritation

No data available

Respiratory or skin sensitization

No data available

Germ cell mutagenicity

No data available

Carcinogenicity

This product is or contains a component that is not classifiable as to its carcinogenicity based on its IARC, ACGIH, NTP, or EPA classification.

Reproductive toxicity

No data available

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

May cause damage to organs through prolonged or repeated exposure. - Kidney

Aspiration hazard

No data available

SECTION 12: Ecological information

12.1 Toxicity

Mixture

No data available

12.2 Persistence and degradability

No data available

12.3 Bioaccumulative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

No data available

Components

nitric acid

No data available

Mercury(II) nitrate

Toxicity to fish

LC50 - Pimephales promelas (fathead minnow) - 0.172 mg/l - 96.0 h

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Waste material must be disposed of in accordance with the national and local regulations. Leave chemicals in original containers. No mixing with other waste. Handle uncleaned containers like the product itself. See www.retrologistik.com for processes regarding the return of chemicals and containers, or contact us there if you have further questions.

SECTION 14: Transport information**DOT (US)**

UN number: 2031 Class: 8 Packing group: II
Proper shipping name: Nitric acid
Reportable Quantity (RQ): 625 lbs
Poison Inhalation Hazard: No

IMDG

UN number: 2031 Class: 8 Packing group: II EMS-No: F-A, S-B
Proper shipping name: NITRIC ACID

IATA

UN number: 2031 Class: 8 Packing group: II
Proper shipping name: Nitric acid

SECTION 15: Regulatory information**SARA 302 Components**

| | | |
|-------------|----------------------|-----------------------------|
| nitric acid | CAS-No.
7697-37-2 | Revision Date
2007-07-01 |

Revision Date: 05/06/2021

Print Date: 05/10/2021

SAFETY DATA SHEET

Version 6.3
Revision Date 09/27/2020
Print Date 11/19/2020

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : Nickel

Product Number : 203904
Brand : Aldrich
Index-No. : 028-002-01-4
CAS-No. : 7440-02-0

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheet

Company : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES

Telephone : +1 314 771-5765
Fax : +1 800 325-5052

1.4 Emergency telephone

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Skin sensitization (Category 1), H317
Carcinogenicity (Category 2), H351
Specific target organ toxicity - repeated exposure, Inhalation (Category 1), H372
Short-term (acute) aquatic hazard (Category 3), H402
Long-term (chronic) aquatic hazard (Category 3), H412

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Danger

| | |
|----------------------------|---|
| Hazard statement(s) | |
| H317 | May cause an allergic skin reaction. |
| H351 | Suspected of causing cancer. |
| H372 | Causes damage to organs through prolonged or repeated exposure if inhaled. |
| H412 | Harmful to aquatic life with long lasting effects. |
| Precautionary statement(s) | |
| P201 | Obtain special instructions before use. |
| P202 | Do not handle until all safety precautions have been read and understood. |
| P260 | Do not breathe dust/ fume/ gas/ mist/ vapors/ spray. |
| P264 | Wash skin thoroughly after handling. |
| P270 | Do not eat, drink or smoke when using this product. |
| P272 | Contaminated work clothing should not be allowed out of the workplace. |
| P273 | Avoid release to the environment. |
| P280 | Wear protective gloves/ protective clothing/ eye protection/ face protection. |
| P302 + P352 | IF ON SKIN: Wash with plenty of soap and water. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P333 + P313 | If skin irritation or rash occurs: Get medical advice/ attention. |
| P363 | Wash contaminated clothing before reuse. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

SECTION 3: Composition/information on ingredients

3.1 Substances

| | |
|------------------|----------------|
| Formula | : Ni |
| Molecular weight | : 58.69 g/mol |
| CAS-No. | : 7440-02-0 |
| EC-No. | : 231-111-4 |
| Index-No. | : 028-002-01-4 |

| Component | Classification | Concentration |
|---|--|---------------|
| nickel powder; [particle diameter < 1 mm] | | |
| | Skin Sens. 1; Carc. 2;
STOT RE 1; Aquatic Acute
3; Aquatic Chronic 3;
H317, H351, H372, H402,
H412 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice

Consult a physician. Show this material safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Take victim immediately to hospital. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Nickel/nickel oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Keep in a dry place. Handle and store under inert gas. Keep in a dry place.

Storage class (TRGS 510): 4.1B: Flammable solid hazardous materials

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|---|-----------|---|-------------------------|---|
| nickel powder;
[particle diameter
< 1 mm] | 7440-02-0 | TWA | 1.5 mg/m ³ | USA. ACGIH Threshold Limit Values (TLV) |
| | Remarks | Dermatitis
Pneumoconiosis
Not suspected as a human carcinogen | | |
| | | PEL | 0.5 mg/m ³ | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | TWA | 1 mg/m ³ | USA. Occupational Exposure Limits (OSHA) - Table Z-1 Limits for Air Contaminants |
| | | TWA | 0.015 mg/m ³ | USA. NIOSH Recommended Exposure Limits |
| | | Potential Occupational Carcinogen
See Appendix A | | |

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested:Dermatril® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested:Dermatril® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|--|
| a) Appearance | Form: powder
Color: gray |
| b) Odor | No data available |
| c) Odor Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point: 1,455 °C (2,651 °F) |
| f) Initial boiling point and boiling range | 2,730 °C 4,946 °F |
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | The substance or mixture is a flammable solid with the category 2. |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapor pressure | 1 hPa at 1,810 °C (3,290 °F) |
| l) Vapor density | No data available |
| m) Relative density | 8.9 g/mL at 25 °C (77 °F) |
| n) Water solubility | insoluble |
| o) Partition coefficient: n-octanol/water | Not applicable for inorganic substances |
| p) Autoignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

acids, Oxidizing agents, Sulfur compounds, Hydrogen gas, Oxygen, Methanol, organic solvents, Aluminum, Fluorine, Ammonia

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Nickel/nickel oxides
Other decomposition products - No data available
In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

LD50 Oral - Rat - male and female - > 9,000 mg/kg
(OECD Test Guideline 401)
Dermal: No data available
No data available

Skin corrosion/irritation

Skin - Rabbit
Result: No skin irritation - 4 h
(OECD Test Guideline 404)

Serious eye damage/eye irritation

Eyes - Rabbit
Result: No eye irritation
(OECD Test Guideline 405)

Respiratory or skin sensitization

Germ cell mutagenicity

No data available

Carcinogenicity

Limited evidence of carcinogenicity in animal studies

IARC: 1 - Group 1: Carcinogenic to humans (nickel powder; [particle diameter < 1 mm])

2B - Group 2B: Possibly carcinogenic to humans (nickel powder; [particle diameter < 1 mm])

IARC: 1 - Group 1: Carcinogenic to humans (nickel powder; [particle diameter < 1 mm])

2B - Group 2B: Possibly carcinogenic to humans (nickel powder; [particle diameter < 1 mm])

NTP: RAHC - Reasonably anticipated to be a human carcinogen (nickel powder; [particle diameter < 1 mm])

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

Inhalation - Causes damage to organs through prolonged or repeated exposure.

Aspiration hazard

No data available

Additional Information

Repeated dose toxicity - Rat - male and female - Inhalation

RTECS: Not available

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Stomach - Irregularities - Based on Human Evidence

Stomach - Irregularities - Based on Human Evidence

SECTION 12: Ecological information**12.1 Toxicity**

Toxicity to fish semi-static test LC50 - Oncorhynchus mykiss (rainbow trout) - 15.3 mg/l - 96 h

12.2 Persistence and degradability

The methods for determining biodegradability are not applicable to inorganic substances.

12.3 Bioaccumulative potential**12.4 Mobility in soil****12.5 Results of PBT and vPvB assessment**

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Harmful to aquatic life with long lasting effects.

SECTION 13: Disposal considerations**13.1 Waste treatment methods****Product**

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

UN number: 3089 Class: 4.1 Packing group: II
Proper shipping name: Metal powders, flammable, n.o.s.
Reportable Quantity (RQ): 100 lbs
Poison Inhalation Hazard: No

IMDG

UN number: 3089 Class: 4.1 Packing group: II EMS-No: F-G, S-G
Proper shipping name: METAL POWDER, FLAMMABLE, N.O.S. (nickel powder; [particle diameter < 1 mm])
Marine pollutant : yes

IATA

UN number: 3089 Class: 4.1 Packing group: II
Proper shipping name: Metal powder, flammable, n.o.s.

SECTION 15: Regulatory information

SARA 302 Components

This material does not contain any components with a section 302 EHS TPQ.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Skin irritation (Category 2), H315
Eye irritation (Category 2A), H319
Skin sensitisation (Category 1), H317
Carcinogenicity (Category 2), H351
Specific target organ toxicity - single exposure (Category 3), Central nervous system, H336
Short-term (acute) aquatic hazard (Category 2), H401
Long-term (chronic) aquatic hazard (Category 2), H411

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word

Warning

Hazard statement(s)

| | |
|------|--|
| H315 | Causes skin irritation. |
| H317 | May cause an allergic skin reaction. |
| H319 | Causes serious eye irritation. |
| H336 | May cause drowsiness or dizziness. |
| H351 | Suspected of causing cancer. |
| H411 | Toxic to aquatic life with long lasting effects. |

Precautionary statement(s)

| | |
|--------------------|--|
| P201 | Obtain special instructions before use. |
| P202 | Do not handle until all safety precautions have been read and understood. |
| P261 | Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray. |
| P264 | Wash skin thoroughly after handling. |
| P271 | Use only outdoors or in a well-ventilated area. |
| P272 | Contaminated work clothing should not be allowed out of the workplace. |
| P273 | Avoid release to the environment. |
| P280 | Wear protective gloves/ protective clothing/ eye protection/ face protection. |
| P302 + P352 | IF ON SKIN: Wash with plenty of soap and water. |
| P304 + P340 + P312 | IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell. |
| P305 + P351 + P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |
| P308 + P313 | IF exposed or concerned: Get medical advice/ attention. |
| P333 + P313 | If skin irritation or rash occurs: Get medical advice/ attention. |
| P337 + P313 | If eye irritation persists: Get medical advice/ attention. |
| P362 | Take off contaminated clothing and wash before reuse. |
| P391 | Collect spillage. |
| P403 + P233 | Store in a well-ventilated place. Keep container tightly closed. |
| P405 | Store locked up. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS - none

H336, H401, H411
Concentration limits:
>= 20 %: STOT SE 3,
H336; | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Carbon oxides, Hydrogen chloride gas

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas.
For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Soak up with inert absorbent material and dispose of as hazardous waste. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid inhalation of vapour or mist.
For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.
Storage class (TRGS 510): 6.1D: Non-combustible, acute toxic Cat.3 / toxic hazardous materials or hazardous materials causing chronic effects

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters

| Component | CAS-No. | Value | Control parameters | Basis |
|---------------------|----------|--|--------------------|---|
| Tetrachloroethylene | 127-18-4 | TWA | 25 ppm | USA. ACGIH Threshold Limit Values (TLV) |
| | Remarks | Central Nervous System impairment
Substances for which there is a Biological Exposure Index or Indices (see BEI® section)
Confirmed animal carcinogen with unknown relevance to humans | | |

| | | | | |
|--|--|--|----------------------|---|
| | | STEL | 100 ppm | USA. ACGIH Threshold Limit Values (TLV) |
| | | Central Nervous System impairment
Substances for which there is a Biological Exposure Index or Indices (see BEI® section)
Confirmed animal carcinogen with unknown relevance to humans | | |
| | | Potential Occupational Carcinogen
Minimize workplace exposure concentrations.
See Appendix A | | |
| | | See Table Z-2 | | |
| | | TWA | 100 ppm | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | CEIL | 200 ppm | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | Peak | 300 ppm | USA. Occupational Exposure Limits (OSHA) - Table Z-2 |
| | | STEL | 100 ppm
685 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | C | 300 ppm | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |
| | | PEL | 25 ppm
170 mg/m3 | California permissible exposure limits for chemical contaminants (Title 8, Article 107) |

Biological occupational exposure limits

| Component | CAS-No. | Parameters | Value | Biological specimen | Basis |
|---------------------|----------|---|--------------------|---------------------|---|
| Tetrachloroethylene | 127-18-4 | Tetrachloroethylene | 3parts per million | In end-exhaled air | ACGIH - Biological Exposure Indices (BEI) |
| | Remarks | Prior to shift (16 hours after exposure ceases) | | | |
| | | Tetrachloroethylene | 0.5 mg/l | In blood | ACGIH - Biological Exposure Indices (BEI) |
| | | Prior to shift (16 hours after exposure ceases) | | | |

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Fluorinated rubber

Minimum layer thickness: 0.7 mm

Break through time: 480 min

Material tested: Vitoject® (KCL 890 / Aldrich Z677698, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.2 mm

Break through time: 49 min

Material tested: Dermatrill® P (KCL 743 / Aldrich Z677388, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- | | |
|---------------------------------|--|
| a) Appearance | Form: liquid, clear
Colour: colourless |
| b) Odour | No data available |
| c) Odour Threshold | No data available |
| d) pH | No data available |
| e) Melting point/freezing point | Melting point/range: -22 °C (-8 °F) - lit. |
| f) Initial boiling point | 121 °C 250 °F - lit. |

and boiling range

- | | |
|---|---|
| g) Flash point | ()No data available |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | No data available |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapour pressure | 25.3 hPa at 25.0 °C (77.0 °F)
17.3 hPa at 20.0 °C(68.0 °F) |
| l) Vapour density | No data available |
| m) Relative density | 1.623 g/cm ³ at 25 °C (77 °F) |
| n) Water solubility | 0.15 g/l at 25 °C (77 °F) |
| o) Partition coefficient: n-octanol/water | log Pow: 2.53 at 23 °C (73 °F) |
| p) Auto-ignition temperature | No data available |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

Surface tension 32.1 mN/m at 20 °C (68 °F)

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents, Strong bases

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Carbon oxides, Hydrogen chloride gas

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

LD50 Oral - Rat - female - 3,385 mg/kg
(OECD Test Guideline 401)

Inhalation: No data available

Dermal: No data available

No data available

Skin corrosion/irritation

Skin - Rabbit

Result: Skin irritation - 4 h

(OECD Test Guideline 404)

Serious eye damage/eye irritation

Eyes - Rabbit

Result: Mild eye irritation - 24 h

Respiratory or skin sensitisation

- Mouse

Result: May cause sensitisation by skin contact.

(OECD Test Guideline 429)

Germ cell mutagenicity

Hamster

ovary

Result: negative

OECD Test Guideline 474

Mouse - male

Result: negative

Carcinogenicity

Limited evidence of carcinogenicity in animal studies

IARC: 2A - Group 2A: Probably carcinogenic to humans (Tetrachloroethylene)

NTP: RAHC - Reasonably anticipated to be a human carcinogen (Tetrachloroethylene)

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

No data available

Specific target organ toxicity - single exposure

May cause drowsiness or dizziness.

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

Repeated dose toxicity - Mouse - female - Oral - Lowest observed adverse effect level - 390 mg/kg

RTECS: KX3850000

narcosis, Liver injury may occur., Kidney injury may occur.

SECTION 12: Ecological information

12.1 Toxicity

| | |
|---|--|
| Toxicity to fish | flow-through test LC50 - Oncorhynchus mykiss (rainbow trout) - 5 mg/l - 96 h |
| Toxicity to daphnia and other aquatic invertebrates | EC50 - Daphnia magna (Water flea) - 7.50 mg/l - 48 h |
| Toxicity to algae | static test EC50 - Skeletonema costatum - > 16 mg/l - 7 h |

12.2 Persistence and degradability

| | |
|------------------|---|
| Biodegradability | aerobic - Exposure time 28 d
Result: 11 % - Not readily biodegradable.
(OECD Test Guideline 301C) |
|------------------|---|

12.3 Bioaccumulative potential

| | |
|-----------------|--|
| Bioaccumulation | Lepomis macrochirus (Bluegill) - 21 d
- 0.00343 mg/l(Tetrachloroethylene) |
| | Bioconcentration factor (BCF): 49 |

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.
Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

Sigma-Aldrich - 371696

Page 9 of 11

UN number: 1897 Class: 6.1 Packing group: III
Proper shipping name: Tetrachloroethylene
Reportable Quantity (RQ): 100 lbs
Reportable Quantity (RQ): 100 lbs
Poison Inhalation Hazard: No

IMDG

UN number: 1897 Class: 6.1 Packing group: III EMS-No: F-A, S-A
Proper shipping name: TETRACHLOROETHYLENE
Marine pollutant : yes

IATA

UN number: 1897 Class: 6.1 Packing group: III
Proper shipping name: Tetrachloroethylene

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:

| | CAS-No. | Revision Date |
|---------------------|----------|---------------|
| Tetrachloroethylene | 127-18-4 | 2007-07-01 |

SARA 311/312 Hazards

Acute Health Hazard, Chronic Health Hazard

:

Reportable Quantity D039 lbs

Massachusetts Right To Know Components

Print Date: 08/29/2020

SAFETY DATA SHEET

Version 6.4
Revision Date 02/10/2020
Print Date 11/19/2020

SECTION 1: Identification of the substance/mixture and of the company/undertaking**1.1 Product identifiers**

Product name : Zinc

Product Number : 243469
Brand : Sigma-Aldrich
CAS-No. : 7440-66-6

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Laboratory chemicals, Synthesis of substances

1.3 Details of the supplier of the safety data sheet

Company : Sigma-Aldrich Inc.
3050 Spruce Street
ST. LOUIS MO 63103
UNITED STATES

Telephone : +1 314 771-5765
Fax : +1 800 325-5052

1.4 Emergency telephone number

Emergency Phone # : 800-424-9300 CHEMTREC (USA) +1-703-
527-3887 CHEMTREC (International) 24
Hours/day; 7 Days/week

SECTION 2: Hazards identification**2.1 Classification of the substance or mixture****GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)**

Short-term (acute) aquatic hazard (Category 1), H400
Long-term (chronic) aquatic hazard (Category 1), H410

For the full text of the H-Statements mentioned in this Section, see Section 16.

2.2 GHS Label elements, including precautionary statements

Pictogram

Signal word : Warning

Hazard statement(s)
H410 : Very toxic to aquatic life with long lasting effects.

| | |
|----------------------------|---|
| Precautionary statement(s) | |
| P273 | Avoid release to the environment. |
| P391 | Collect spillage. |
| P501 | Dispose of contents/ container to an approved waste disposal plant. |

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS

Combustible dust

SECTION 3: Composition/information on ingredients

3.1 Substances

| | |
|------------------|---------------|
| Formula | : Zn |
| Molecular weight | : 65.39 g/mol |
| CAS-No. | : 7440-66-6 |
| EC-No. | : 231-175-3 |

| Component | Classification | Concentration |
|---------------------------------|---|---------------|
| Zinc powder (stabilized) | | |
| | Aquatic Acute 1; Aquatic Chronic 1; H400, H410
M-Factor - Aquatic Acute: 1
M-Factor - Aquatic Chronic: 10 | <= 100 % |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Flush eyes with water as a precaution.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

5.2 Special hazards arising from the substance or mixture

Zinc/zinc oxides

5.3 Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

5.4 Further information

No data available

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. For personal protection see section 8.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For disposal see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

Storage class (TRGS 510): 13: Non Combustible Solids

7.3 Specific end use(s)

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters

Contains no substances with occupational exposure limit values.

8.2 Exposure controls

Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Personal protective equipment

Eye/face protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.11 mm

Break through time: 480 min

Material tested: Dermatrill® (KCL 740 / Aldrich Z677272, Size M)

data source: KCL GmbH, D-36124 Eichenzell, phone +49 (0)6659 87300, e-mail sales@kcl.de, test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Body Protection

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory protection

Respiratory protection is not required. Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| | |
|---|--|
| a) Appearance | Form: granular
Colour: metallic, grey |
| b) Odour | odourless |
| c) Odour Threshold | No data available |
| d) pH | Not applicable |
| e) Melting point/freezing point | Melting point/range: 420 °C (788 °F) - lit. |
| f) Initial boiling point and boiling range | 907 °C 1665 °F - lit. |
| g) Flash point | ()Not applicable |
| h) Evaporation rate | No data available |
| i) Flammability (solid, gas) | May form combustible dust concentrations in air. |
| j) Upper/lower flammability or explosive limits | No data available |
| k) Vapour pressure | 1.33 hPa at 487 °C (909 °F) |
| l) Vapour density | No data available |
| m) Relative density | 7.133 g/cm ³ at 25 °C (77 °F) |
| n) Water solubility | 0.0001 g/l at 20 °C (68 °F) - OECD Test Guideline 105 - slightly soluble |
| o) Partition coefficient: n-octanol/water | Not applicable for inorganic substances |
| p) Auto-ignition temperature | does not ignite |
| q) Decomposition temperature | No data available |
| r) Viscosity | No data available |
| s) Explosive properties | No data available |
| t) Oxidizing properties | No data available |

9.2 Other safety information

| | |
|--------------|-----------------------------|
| Bulk density | 1.8 - 3.2 kg/m ³ |
|--------------|-----------------------------|

SECTION 10: Stability and reactivity

10.1 Reactivity

No data available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No data available

10.4 Conditions to avoid

No data available

10.5 Incompatible materials

Strong oxidizing agents, Acids and bases

10.6 Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Zinc/zinc oxides

Other decomposition products - No data available

In the event of fire: see section 5

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

LD50 Oral - Rat - male and female - > 2,000 mg/kg

(OECD Test Guideline 401)

LC50 Inhalation - Rat - male and female - 4 h - > 5.41 mg/l

(OECD Test Guideline 403)

Dermal: No data available

No data available

Skin corrosion/irritation

Skin - Rabbit

Result: No skin irritation - 5 d

Remarks: (in analogy to similar products) (ECHA)

Serious eye damage/eye irritation

Eyes - Rabbit

Result: No eye irritation - 24 h

(OECD Test Guideline 405)

Respiratory or skin sensitisation

Maximisation Test - Guinea pig

Result: negative

(OECD Test Guideline 406)

Remarks: (in analogy to similar products)

Germ cell mutagenicity

Ames test

Escherichia coli/Salmonella typhimurium

Result: negative

(in analogy to similar products)

In vitro mammalian cell gene mutation test

mouse lymphoma cells
Result: negative
(in analogy to similar products) (ECHA)
Chromosome aberration test in vitro
Other cell types
Result: negative
(in analogy to similar products) (ECHA)

Mouse - male and female - Red blood cells (erythrocytes)
Result: negative
(in analogy to similar products) (ECHA)

Carcinogenicity

IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.
OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

No data available

Specific target organ toxicity - repeated exposure

No data available

Aspiration hazard

No data available

Additional Information

Repeated dose toxicity - Rat - male and female - Oral - 13 Weeks - No observed adverse effect level - 31.52 mg/kg - Lowest observed adverse effect level - 53.8 mg/kg
RTECS: Not available

Effects due to ingestion may include:, chills, dry throat, sweet taste, Fever, Cough, Nausea, Vomiting, Weakness, Contact with eyes or skin may cause:, Irritation
To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

SECTION 12: Ecological information

12.1 Toxicity

| | |
|---|--|
| Toxicity to fish | flow-through test LC50 - other fish - 0.439 mg/l - 96 h
Remarks: (ECHA) |
| Toxicity to daphnia and other aquatic invertebrates | static test EC50 - Daphnia magna (Water flea) - 1.833 mg/l - 48 h
(OECD Test Guideline 202) |
| Toxicity to algae | static test NOEC - Pseudokirchneriella subcapitata - 0.005 mg/l - 3 d |

(OECD Test Guideline 201)

Toxicity to bacteria static test NOEC - activated sludge - 0.1 mg/l - 4 h
(ISO 9509)
Remarks: (in analogy to similar products)

12.2 Persistence and degradability

The methods for determining the biological degradability are not applicable to inorganic substances.

12.3 Bioaccumulative potential

This substance is not considered to be persistent, bioaccumulating and toxic (PBT).

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

12.6 Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Very toxic to aquatic life with long lasting effects.

No data available

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Offer surplus and non-recyclable solutions to a licensed disposal company.

Contaminated packaging

Dispose of as unused product.

SECTION 14: Transport information

DOT (US)

Not dangerous goods

IMDG

UN number: 3077 Class: 9 Packing group: III EMS-No: F-A, S-F
Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (Zinc powder (stabilized))
Marine pollutant : yes

IATA

UN number: 3077 Class: 9 Packing group: III
Proper shipping name: Environmentally hazardous substance, solid, n.o.s. (Zinc powder (stabilized))

Further information

EHS-Mark required (ADR 2.2.9.1.10, IMDG code 2.10.3) for single packagings and combination packagings containing inner packagings with Dangerous Goods > 5L for liquids or > 5kg for solids.

SECTION 15: Regulatory information

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

SARA 311/312 Hazards

No SARA Hazards

Massachusetts Right To Know Components

No components are subject to the Massachusetts Right to Know Act.

Pennsylvania Right To Know Components

Zinc powder (stabilized)

CAS-No.

7440-66-6

Revision Date

1993-02-16

APPENDIX C

Vapor Barrier Specifications

SECTION 072616

Integrally-bonded underslab vapor retarder

Florprufe® 120 membrane

PART 1 — GENERAL

1.01 SUMMARY

- A. The Work of this Section includes, but is not limited to, underslab vapor retarder/barrier membrane that forms an integral bond to poured concrete for use below slabs on grade.
- B. Related sections include, but are not limited to, the following:
 - 1. Section 031000 – Concrete Formwork
 - 2. Section 033000 – Cast-In-Place Concrete

1.02 SUBMITTALS

- A. Submit manufacturer's product data, installation instructions and membrane samples for approval.

1.03 REFERENCE STANDARDS

- A. The following standards and publications are applicable to the extent referenced in the text.
- B. American Society for Testing and Materials (ASTM):
 - D 412 Standard Test Methods for Rubber Properties in Tension
 - D 903 Standard Test Method for Peel or Stripping Strength of Adhesive Bonds
 - D 3767 Standard Practice for Rubber - Measurements of Dimensions
 - E 96 Standard Test Methods for Water Vapor Transmission of Materials
 - E 154 Standard Test Methods for Water Vapor Retarders Used in Contact with Earth Under Concrete Slabs, on Walls, or as Ground Cover
 - E 1643 Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs
 - E 1745 Plastic Vapor Retarders Used in Contact with Soil or Granular fill under Concrete Slabs
- C. American Concrete Institute (ACI)
 - ACI 302.1R-96 Addendum Vapor Retarder Location: For slabs with vapor-sensitive floor coverings, locate retarder in direct contact with the slab (not beneath a layer of granular fill).

1.04 QUALITY ASSURANCE

- A. Materials: For each type of material required for the work of this section, provide primary materials that are the products of one manufacturer.
- B. Schedule Coordination: Schedule work such that membrane will not be left exposed to weather for longer than that recommended by the manufacturer.

1.05 DELIVERY, STORAGE AND HANDLING

- A. Deliver materials in labeled packages. Store and handle in strict compliance with manufacturer's instructions. Protect from damage from weather, excessive temperature and construction operations. Remove and dispose of damaged material in accordance with applicable regulations.

PART 2 — PRODUCTS

2.01 MATERIALS

- A. Integrally Bonded Vapor Protection: Florprufe® 120 Membrane by GCP Advanced Technologies Construction Products, a 0.5mm (0.021 in) nominal thickness composite sheet membrane comprising 0.4 mm (0.016 in.) of polyolefin film, and layers of specially formulated synthetic adhesive layers. The membrane shall form an integral and permanent bond to poured concrete to prevent vapor migration at the interface of the membrane and structural concrete. Provide membrane with the following physical properties:

PHYSICAL PROPERTIES FOR FLORPRUFE® 120 MEMBRANE:
Florprufe 120 is a Class A vapor barrier and exceeds the requirements as defined by ASTM E 1745

| Property | Typical Value | Test Method |
|---------------------------|------------------|---------------------|
| Thickness (nominal) | 0.5mm (0.021 in) | ASTM D3767 Method A |
| Water Vapor Permeance | 0.03 perms | ASTM E96 Method B * |
| Tensile Strength | 65 lb./in | ASTM E154 * |
| Elongation | 300% | ASTM D412 |
| Puncture Resistance | 3300 grams | ASTM D1709 * |
| Peel Adhesion to Concrete | >4 lb./in | ASTM D903 |

* ASTM E 1745 Requirements.

PART 3 — EXECUTION

3.01 EXECUTION

- A. The installer shall examine conditions of substrates and other conditions under which this work is to be performed and notify the Contractor, in writing, of circumstances detrimental to the proper completion of the work. Do not proceed with work until unsatisfactory conditions are corrected.

3.02 INSTALLATION

- A. Earth and stone substrates shall be well compacted to produce an even, solid substrate. Remove loose aggregate or sharp protrusions. Concrete substrates shall be smooth or broom finished and monolithic. Remove standing water prior to membrane applications.
- B. Installation shall be in accordance with manufacturer’s instructions and ASTM E 1643–98, including but not limited to, the following:
 - 1. Apply membrane with the HDPE film facing the prepared substrate. Remove the release liner during application.
 - 2. Apply succeeding sheets by overlapping the previous sheet 50-mm (2 in.) along the marked lap line. End Laps should be staggered to avoid a build up of layers.

Mechanical Fastening Method - To prevent the membrane from moving and gaps opening, the laps should be fastened together at 1.0m (39 in) maximum centers. Fix through the center of the lap area using 12mm (0.5 in) long washer-head self-tapping galvanized screws or similar allowing the head of the screw to bed into the adhesive compound to self-seal. Ensure the membrane lays flat and no openings occur. Additional fastening may be required at corners, details etc.

OR

Taped Lap Method - For additional security use Preprufe® Tape to secure and seal the overlaps. Overband the lap with the 100mm (4in) wide Preprufe® Tape using the lap line for alignment. Remove plastic release liner to ensure bond to concrete.

- 3. Mix and apply GCP Advanced Technologies liquid detailing compound to seal around penetrations such as drainage pipes, etc.

3.04 CONCRETE PLACEMENT

- A. Place concrete within 30 days. Inspect membrane and repair any damage with patches of Preprufe Tape. Ensure all liner is removed from membrane and tape before concrete placement.

UNDER-SLAB VAPOR BARRIER

PART 1 – GENERAL

1.1 SUMMARY

- A. Products supplied under this section:
 - 1. Vapor barrier and installation accessories for installation under concrete slabs.
- B. Related sections:
 - 1. Section 03 30 00 Cast-in-Place Concrete
 - 2. Section 07 26 00 Vapor Retarders

1.2 REFERENCES

- A. ASTM International:
 - 1. ASTM E1745-17 Standard Specification for Plastic Water Vapor Retarders Used in Contact with Soil or Granular Fill Under Concrete Slabs.
 - 2. ASTM E1643-18a Selection, Design, Installation, and Inspection of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs.
- B. Technical Reference - American Concrete Institute (ACI):
 - 1. ACI 302.2R-06 Guide for Concrete Slabs that Receive Moisture-Sensitive Flooring Materials.
 - 2. ACI 302.1R-15 Guide to Concrete Floor and Slab Construction.

1.3 SUBMITTALS

- A. Quality control/assurance:
 - 1. Summary of test results per paragraph 9.3 of ASTM E1745.
 - 2. Manufacturer's samples and literature.
 - 3. Manufacturer's installation instructions for placement, seaming, penetration prevention and repair, and perimeter seal per ASTM E1643.
 - 4. All mandatory ASTM E1745 testing must be performed on a single production roll per ASTM E1745 Section 8.1.

PART 2 – PRODUCTS

2.1 MATERIALS

- A. Vapor barrier shall have all of the following qualities:
 - 1. Maintain permeance of less than 0.01 Perms [grains/(ft² · hr · inHg)] as tested in accordance with mandatory conditioning tests per ASTM E1745 Section 7.1 (7.1.1-7.1.5).
 - 2. Other performance criteria:
 - a. Strength: ASTM E1745 Class A.
 - b. Thickness: 20 mils minimum
 - 3. Provide third party documentation that all testing was performed on a single production roll per ASTM E1745 Section 8.1
- B. Vapor barrier products:
 - 1. Basis of Design: Stego Wrap 20-Mil Vapor Barrier by Stego Industries LLC., (877) 464-7834 www.stegoindustries.com.
 - 2. No substitutions.

2.2 ACCESSORIES

- A. Seams:
 - 1. Stego Tape by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
- B. Sealing Penetrations of Vapor barrier:
 - 1. Stego Mastic by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
 - 2. Stego Tape by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
- C. Perimeter/edge seal:
 - 1. Stego Crete Claw by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
 - 2. Stego Term Bar by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
 - 3. StegoTack Tape (double-sided sealant tape) by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
- D. Penetration Prevention:
 - 1. Beast Foot by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
 - 2. Beast Form Stake by Stego Industries LLC, (877) 464-7834 www.stegoindustries.com.
- E. Vapor Barrier-Safe Screed System
 - 1. Beast Screed by Stego Industries, LLC, (877) 464-7834 www.stegoindustries.com.
 - 2. Beast Hook by Stego Industries, LLC, (877) 464-7834 www.stegoindustries.com.

PART 3 – EXECUTION

3.1 PREPARATION

- A. Ensure that subsoil is approved by Architect or Geotechnical Engineer.
 - 1. Level and compact base material.

3.2 INSTALLATION

- A. Install vapor barrier in accordance ASTM E1643.
 - 1. Unroll vapor barrier with the longest dimension parallel with the direction of the concrete placement and face laps away from the expected direction of the placement whenever possible.
 - 2. Extend vapor barrier to the perimeter of the slab. If practicable, terminate it at the top of the slab, otherwise (a) at a point acceptable to the structural engineer or (b) where obstructed by impediments, such as dowels, waterstops, or any other site condition requiring early termination of the vapor barrier. At the point of termination, seal vapor barrier to the foundation wall, grade beam or slab itself.

[Specifier note: The perimeter seal can be handled several ways. When sealing to the slab, Crete Claw is the best option. When sealing to a stem wall or wall, the best option is to use StegoTack Tape or both StegoTack Tape and Stego Term Bar.]

 - a. Seal vapor barrier to the entire slab perimeter using Stego Crete Claw, per manufacturer's instructions.

OR

 - b. Seal vapor barrier to the entire perimeter wall or footing/grade beam with double sided StegoTack Tape, or both Stego Term Bar and StegoTack Tape, per manufacturer's instructions. Ensure the concrete is clean and dry prior to adhering tape.
 - 3. Overlap joints 6 inches and seal with manufacturer's seam tape.
 - 4. Apply seam tape/Crete Claw to a clean and dry vapor barrier.
 - 5. Seal all penetrations (including pipes) per manufacturer's instructions.

6. For interior forming applications, avoid the use of non-permanent stakes driven through vapor barrier. Use Beast Form Stake and Beast Foot as a vapor barrier-safe forming system. Ensure Beast Foot's peel-and-stick adhesive base is fully adhered to the vapor barrier.
7. If non-permanent stakes must be driven through vapor retarder, repair as recommended by vapor retarder manufacturer.
8. Use reinforcing bar supports with base sections that eliminate or minimize the potential for puncture of the vapor barrier.
9. Repair damaged areas with vapor barrier material of similar (or better) permeance, puncture and tensile.
10. For vapor barrier-safe concrete screeding applications, install Beast Screed (vapor barrier-safe screed system) per manufacturer's instructions prior to placing concrete.

Stego Installation Support - A Free Service

When you choose **Stego® Barrier Solutions** and products, you gain access to a large nationwide network of full-time technical sales representatives providing unmatched local support and service. If you ever have a question or concern regarding the following installation scenarios please contact us and take advantage of our free Stego Installation Support.

Stego Wrap

Stego Wrap is made from a proprietary blend of prime virgin resins and additives, a combination lending to great value and effectiveness in protecting the concrete slab from moisture intrusion. All rolls of Stego Wrap are continuously printed with the Stego logo. This ensures no copycat or counterfeit products show up on a job site that could expose you to liability if an incorrectly identified product fails.

- **Stego® Wrap 20-Mil Vapor Barrier (Class A)**
- **Stego® Wrap 15-Mil Vapor Barrier (Class A)**
- **Stego® Wrap 10-Mil Vapor Retarder (Class A)**
- **Stego® Wrap 10-Mil Vapor Retarder (Class C)**

Stego Accessories

At Stego, we know every project has its own unique challenges. To make a Stego Wrap installation easy and flexible, we offer an extensive line of accessory items that give you options to accomplish an effective perimeter seal that meets ASTM E1643. **Consult the project architect, owner's representative, and structural engineer of record before proceeding with any of these options.**

Stego® Tape

This low permeance and pressure-sensitive tape is engineered to bond specifically to Stego Wrap, making it ideal for sealing Stego Wrap seams and penetrations.

Stego® Mastic

A liquid vapor retardant membrane, designed to be used with Stego Wrap, for sealing utility and pipe penetrations.

Stego® Crete Claw® Tape 3"

This multi-layered tape utilizes a textured film that mechanically bonds to concrete cast against it. It is used to create a seal at Stego Wrap's terminating edges to subsequently placed slabs.

Stego® Term Bar

A semi-flexible plastic termination bar, optimal for mechanically securing Stego Wrap to concrete, wood, or masonry.

StegoTack® Tape

A double-sided adhesive strip used to bond and seal Stego Wrap to concrete, masonry, wood, metal, and other surfaces.

Creating a Monolithic Membrane

The key to an effective Stego Wrap installation is to create a monolithic layer of protection between the concrete slab and moisture sources below. This can be accomplished by following the installation instructions outlined in ASTM E1643 - *Standard Practice for Selection, Design, Installation, and Inspection of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs*.

ASTM E1643 discusses the selection of the vapor retarder and preparation of the subbase to minimize potential damage during installation and concrete placement.

ASTM E1643, Section 5.3.4.1 - *Select a vapor retarder material capable of withstanding potential construction site damage.*

ASTM E1643, Section 5.3.5.1 - *Select vapor retarder material capable of withstanding tear or puncture damage due to the type, gradation, and texture of the base material to be installed below the material. Prepare base material to minimize risk of puncture, for example, by rolling or compacting.*

ASTM E1643, Section 6.1 - *Level and compact base material.*

ASTM E1643 then states to create a monolithic membrane to protect the slab from adjacent moisture sources.

ASTM E1643, Section 6.4 - *... create a monolithic membrane between the surface of the slab and moisture sources below the slab as well as at the slab perimeter.*

ASTM E1643, Section 6.5 - *Lap joints minimum 6 in. (150 mm), or as instructed by the manufacturer, and seal laps in accordance with the manufacturer's recommendations.*

Stego Wrap can be installed over an aggregate, sand, or tamped earth base. It is not necessary to have a cushion layer or sand base, as Stego Wrap is tough enough to withstand rugged construction environments.

1

Unroll Stego Wrap over the area where the slab is to be placed.

2

Unless otherwise indicated by the design professional(s) of record, unfold Stego Wrap to completely cover the placement area.

3

All joints/seams should be overlapped a minimum of 6 inches.

4

Ensure Stego Wrap is clean and dry when applying Stego Tape.

Tip: Use a cloth or other means to remove dust, debris, and excess moisture from Stego Wrap prior to applying Stego Tape.

5

Seal the seams with Stego Tape.

Where to Terminate the Stego Wrap

Always consult the project design team for where to terminate the vapor barrier to strike the balance between the location of the vapor barrier on or around foundation constructions and any structural concerns before proceeding.

ASTM E1643 provides direction on where to terminate the vapor barrier as follows:

ASTM E1643, Section 6.4 - *Extend vapor retarder over footings and seal to foundation wall, grade beam, or slab at an elevation consistent with the top of the slab or terminate at impediments such as waterstops or dowels...*

ASTM E1643, Section 6.6 - *Extend vapor retarder over the tops of pile caps and grade beams to a distance acceptable to the structural engineer.*

In accordance with ASTM E1643, terminate the Stego Wrap as follows:

At an elevation (height) consistent with the top of the slab;

Note: Turn Stego Wrap up foundation walls or forms.

At Impediments; OR

Note: Impediments may include rebar, dowels, water stops, etc.

At a location of termination designated by the project design team.

Note: The distance to which the vapor barrier is extended adjacent to, onto, or completely over a footing or grade beam should be determined by the project design team.

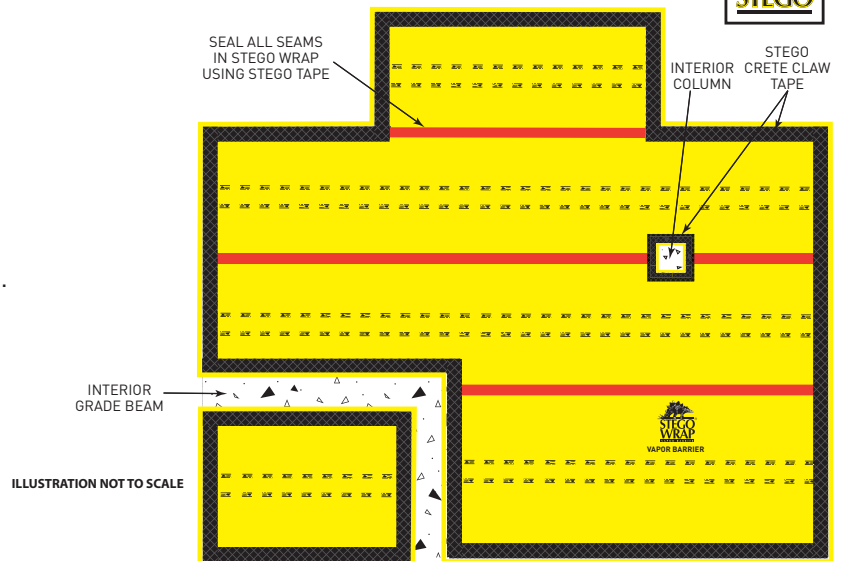

If the location of vapor barrier termination has not been clearly addressed in the construction documents, then clarification should be requested from the project design team. Should no direction be given, Stego recommends the project team follow the guidelines of ASTM E1643.

Regardless of where the vapor barrier is determined to be terminated, ASTM E1643 requires the terminating edges to be sealed. See Sealing Stego Wrap at Terminating Edges, next page.

Sealing Stego Wrap at Terminating Edges

Always consult the project design team for where to terminate the vapor barrier to strike the balance between the location of the vapor barrier on or around foundation constructions and any structural concerns before proceeding.

Seal Stego Wrap along all terminating edges as indicated by the project team. Stego provides several innovative options for creating a seal as required by ASTM E1643.

1 Ensure Stego Wrap is clean and dry when applying Stego Crete Claw Tape.
Tip: Use a cloth or other means to remove dust, debris, and excess moisture from the vapor barrier prior to applying Stego Crete Claw Tape.

2 Apply Stego Crete Claw Tape as close as possible to the terminating edge of Stego Wrap.
Tip: Applying Stego Crete Claw Tape within 2" of the terminating edge is almost always possible, even when the terminating edges are not cut perfectly straight.

3 Install Stego Crete Claw Tape last for a successful installation.
Tip: Install Stego Crete Claw Tape before rebar but after Stego Wrap has been overlapped and sealed at the seams with Stego Tape, sealed at penetrations, and terminated at the project's perimeter and/or other specified terminating location.

Stego Crete Claw Tape - Installation Tips

IMPORTANT:
Do not overlap Stego Crete Claw Tape over itself.
Tip: If placing multiple sections of Stego Crete Claw Tape, minimize gaps by abutting each adjacent section against one another.

Do not leave any open gaps between Stego Crete Claw Tape.
Tip: If a small gap exists between two pieces of Stego Crete Claw Tape, a supplementary piece of Stego Crete Claw Tape should be applied to run along the inside edges of the two original pieces and span the gap between them. The supplementary piece should run parallel and flush to the original pieces without overlap.

If protrusions or penetrations are determined to be impediments to applying Stego Crete Claw Tape along the perimeter terminating edges of Stego Wrap, route Stego Crete Claw Tape around the impediment, as close to the impediment as possible, and continue along the terminating edge of Stego Wrap on the opposite side of the impediment.

Stego Crete Claw Tape is often the preferred product because of its ease of application and versatility to accommodate most conditions. It has been engineered to create a seal between Stego Wrap and the concrete subsequently cast against it. See also StegoTack Tape and Stego Mastic options, detailed on the next few pages.

Sealing the Terminating Edges of Stego Wrap on Vertical Planes Using Stego Crete Claw Tape

IMPORTANT: Make sure the area of adhesion is free of dust, dirt, debris, moisture, and frost to allow maximum adhesion.

Vertical Plane: Foundation Wall

1 Extend Stego Wrap up the vertical surface, likely to the height of the slab.
Note: See Where to Terminate the Stego Wrap, page 5.

Optional: Temporarily secure Stego Wrap to the foundation wall with a small piece of Stego Tape.

Note: Trim excess Stego Tape after concrete has been placed and before removal of any adjacent forms.

3 Apply the entire 3" width of Stego Crete Claw Tape on the perimeter edge of Stego Wrap.

Note: Clean surface of Stego Wrap to ensure that it is free of moisture and debris prior to the installation of Stego Crete Claw Tape.

Vertical Plane: Concrete Form

1 Extend Stego Wrap up the vertical surface, likely to the height of the forms.
Note: See Where to Terminate the Stego Wrap, page 5.

Optional: Temporarily secure Stego Wrap to the concrete form with a small piece of Stego Tape.

Note: Trim excess Stego Tape after concrete has been placed and before removal of any adjacent forms.

3 Apply the entire 3" width of Stego Crete Claw Tape on the perimeter edge of Stego Wrap.

Note: Clean surface of Stego Wrap to ensure that it is free of moisture and debris prior to the installation of Stego Crete Claw Tape.

Sealing Stego Wrap Up Foundation Walls and Vertical Surfaces Using StegoTack Tape

StegoTack Tape can also be used to seal Stego Wrap to foundation walls, grade beams or other adjacent concrete constructions.

IMPORTANT: Make sure area of adhesion is free of dust, dirt, debris, moisture, and frost to allow maximum adhesion.

1 Remove the release liner on one side of StegoTack Tape and stick to foundation wall at the height of the slab or at impediments.

2 When ready to apply Stego Wrap, remove the exposed release liner from StegoTack Tape.

3 Press Stego Wrap firmly against StegoTack Tape to secure.
NOTE: If consistent, continuous pressure will not be applied (e.g. by a concrete slab), Stego Term Bar may be necessary.

Sealing Stego Wrap Up Foundation Walls and Vertical Surfaces Using Stego Mastic

Stego Mastic can also be used to seal Stego Wrap to foundation walls, grade beams or other adjacent concrete constructions.

IMPORTANT: Make sure area of adhesion is free of dust, dirt, debris, moisture, and frost to allow maximum adhesion.

1 Apply Stego Mastic to the foundation wall at the anticipated edge of the subsequently applied Stego Wrap at the height of the slab or impediments.

2 Press Stego Wrap firmly against the applied Stego Mastic on the foundation wall.

3 If consistent, continuous pressure will not be applied (e.g. by a concrete slab), Stego Term Bar may be necessary.

Sealing the Terminating Edges of Stego Wrap on a Horizontal Plane

Always consult the project design team for where to terminate the vapor barrier to strike the balance between the location of the vapor barrier on or around foundation constructions and any structural concerns before proceeding.

After the location of where to terminate the vapor barrier has been determined, seal Stego Wrap along all terminating edges as indicated by the project team.

With Stego Crete Claw Tape

At a Foundation Wall: Install Stego Crete Claw onto the terminating edge of Stego Wrap.

Tip: Install Stego Crete Claw onto Stego Wrap before sliding Stego Wrap into final termination location.

At Interior Grade Beam Impediments: Install Stego Crete Claw onto the terminating edge of Stego Wrap.

At a Location Designated by the Design Team: Install Stego Crete Claw onto the terminating edge of Stego Wrap.

With Stego Mastic

Onto a Perimeter Footing at Impediments: Seal Stego Wrap to concrete with Stego Mastic.

Onto Interior Grade Beams at Impediments: Seal Stego Wrap to concrete with Stego Mastic.

At a Location Designated by the Design Team: Seal Stego Wrap to concrete with Stego Mastic.

If consistent, continuous pressure will not be applied (e.g. by a concrete slab), Stego Term Bar may be necessary.

See “Where to Terminate the Vapor Barrier” on page 5 prior to choosing your terminating edge sealing accessory.

Sealing Damaged Areas: Small Hole or Slice

In the event that Stego Wrap is damaged during or after installation, repairs must be made. For smaller holes or slices in Stego Wrap, Stego Tape can be used as noted below.

1

Small hole or slice in Stego Wrap.

2

Clean area of adhesion.

3

Center Stego Tape over small hole or slice in Stego Wrap.

Sealing Damaged Areas: Larger Hole

In the event that Stego Wrap is damaged during or after installation, repairs must be made. For larger holes, cut a piece of Stego Wrap to a size and shape that covers any damage by a minimum overlap of 6" in all directions. Clean all adhesion areas of dust, dirt, moisture, and frost. Tape down all edges using Stego Tape.

1

Occasionally there are larger holes in the vapor barrier that require a patch.

2

Clean area of adhesion.

3

Measure and cut a piece of Stego Wrap to cover damaged area 6" in all directions. Seal patch with Stego Tape.

Sealing Single Pipe Penetration: Minimal Void Space

All penetrations must be sealed. All pipe, ducting, rebar, wire penetrations and block outs should be sealed using Stego Wrap, Stego Tape and/or Stego Mastic. If penetrations are encased in other materials, such as expansive materials like foam, unless otherwise specified, Stego Wrap should be sealed to the underlying penetration directly.

1 Install Stego Wrap around pipe penetrations by slitting/cutting material as needed. Try to minimize the void space created.

2 Pull material over and flatten. Clean area of adhesion where Stego Tape will be applied.

3 If Stego Wrap is close to pipe and void space is minimized then seal around pipe penetration with Stego Tape and/or Stego Mastic.

Sealing Single Pipe Penetration: Larger Void Space Requires Detail Patch

To minimize void space around a larger penetration, a detail patch may be required. Stego Pre-Cut Pipe Boots are also available to speed up the installation.

1 Cut a detail patch to a size and shape that creates a 6" overlap on all edges around the void space at the base of the pipe.

2 Cut an "X" the size of the pipe diameter in the center of the pipe boot and slide tightly over pipe.

3 Seal all sides of the pipe boot with Stego Tape.

4a Seal around the base of the pipe using Stego Tape. **OR...**

4b Seal around the base of the pipe with Stego Mastic.
Note: apply using disposable glove, paint brush, or similar.

Sealing Multiple Pipe Penetrations: Using Stego Tape

Multiple pipe penetrations in close proximity and very small pipes may be sealed using Stego Tape and/or Stego Mastic for ease of installation.

1

Cut a slit the size to accommodate the width of the multiple pipes. Try to minimize the void space created.

2

Seal any void space around each pipe using Stego Tape.

Note: Subbase should not be visible from above.

Sealing Multiple Pipe Penetrations: Using Stego Mastic

1

Seal any void space around each pipe penetration with Stego Mastic.

2

Dab Stego Mastic with disposable glove, paint brush, or similar, making sure entire void space is sealed.

Note: If pipe penetrations are abutted against one another, minimize any void space first with Stego Wrap, then seal any remaining void space with Stego Tape and/or Mastic in the same manner represented above.

Avoid Punctures with Beast® Concrete Accessories

To help eliminate the use of non-permanent penetrations in Stego Wrap installation, Stego Industries recommends the use of Beast vapor barrier-safe concrete accessories.

IMPORTANT: Avoid puncturing Stego Wrap with stakes while forming, bracing, and screeding.

Preventing punctures in the vapor barrier.

BEAST® FORM STAKE can be used with **BEAST® FOOT** as part of the Stego vapor barrier-safe forming system which meets ASTM E1643 requirements.

This concrete form stake takes the place of traditional nail stakes for interior forming applications, utilizing SpeedTrack™ Fastening Grooves for unlimited fastener placement.

Note: Refer to Beast Form Stake Installation Guide for detailed usage instructions.

Beast Form Stake is strong enough to withstand a beating during concrete placement while holding its shape. It is easy to remove and reusable for the next job.

Note: Beast Form Stake can be removed once concrete has set sufficiently to hold its shape. Fill and repair any voids in the concrete as necessary once the Beast Form Stake has been removed and strike Beast Form Stake against a hard surface to loosen the concrete buildup.

Locate it and lock it down!

BEAST® HOOK is a faster, easier way to set 2x4 overhead screeds. Use Beast Foot and Beast Form Stake and make it a vapor barrier-safe screed system.

No tools are required, just grip the knob to loosen or tighten. Fast, easy, efficient.

BEAST® SCREED is a fixed-elevation, point-to-point guide screed system designed to replace common wet-screed methods.

Improve efficiency and maintain concrete floor levelness with the **BEAST SCREED SYSTEM!**

Set it and forget it. Beast Screed eliminates the need to frequently re-establish grade to ensure floor elevation has not changed during the screeding operation as is typical with traditional wet-screed methods.

Note: Refer to Beast Screed System Installation Instructions for detailed usage instructions.

NOTE: Stego Industries, LLC's ("Stego") installation instructions are based on ASTM E1643 - *Standard Practice for Selection, Design, Installation, and Inspection of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs*. These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner's representative before proceeding. If you have any questions regarding the above mentioned installation instructions or Stego products, please call us at 877-464-7834 for technical assistance. While Stego employees and representatives may provide technical assistance regarding the utility of a specific installation practice or Stego product, they are not authorized to make final design decisions.

Contact Please contact us to get in touch with the nearest Stego representative. We look forward to working with you on your next project. **877-464-7834** | www.stegoindustries.com
