Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001A
Tank Id: 239319
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
C01 - Pipe Location - Aboveground
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
H05 - Tank Leak Detection - In-Tank System (ATG)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 06/15/2001
Capacity Gallons: 10000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MRBARROW
Last Modified: 04/14/2017
Material Name: #2 fuel oil (on-site consumption)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Info:

Tank Number: 001
Tank Id: 43044
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

G01 - Tank Secondary Containment - Diking (Aboveground)
A01 - Tank Internal Protection - Epoxy Liner
G03 - Tank Secondary Containment - Vault (w/o access)
D01 - Pipe Type - Steel/Carbon Steel/Iron
I01 - Overfill - Float Vent Valve
B00 - Tank External Protection - None
F05 - Pipe External Protection - Jacketed
C02 - Pipe Location - Underground/On-ground
H99 - Tank Leak Detection - Other

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 11/01/1979
Capacity Gallons: 20000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: F.O. #1
Tank Id: 67391
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
G03 - Tank Secondary Containment - Vault (w/o access)
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
E02 - Piping Secondary Containment - Vault (with Access)
C01 - Pipe Location - Aboveground

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 07/01/2003
Capacity Gallons: 7500
Tightness Test Method: NN
Date Test: Not reported

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "e2mis no 157411 While Sinclair was Flushing N-50208 with Vehicle # 60533,he sprang a Hydraulic leak from the Vactor system and approx 20 gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, no movement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results. 2/28 @ 19:50 According to Conduit plate E 26 - I - 1, there is no sewer connection. Update 3-1-05 @ 06:07 Lab

Sequence Number: 05-01745-001 - PCBs < 1 ppm Lab Sequence Number:
05-01747-001 - Analysis indicates the presence of a substance similar
to a lubricating oil. Update: 3/1/05 @ 17:21 hrs. Manhattan
Environmental Desk added manhole M50206 to the Description and
Location fields in order to track the completion of the cleanup in
this structure. This was discussed with ERT, Paul Walsh and he agreed
with this change. In addition, the Responsible Operation was changed
from Flush Operations to Underground South since they are responsible
for the cleanup in the manhole. Based on the results of the sample
analysis the oil in the manhole is the lubricating or hydraulic fluid
spilled by the Vactor truck. The cleanup of the vehicle was completed
but the cleanup of the manhole is pending scheduling of UG crews and
Tanker or Vactor truck. Update 3-25-05 @ 05:25 A Munro # 13615
reports that the cleanup is complete as of 05:25. 2 bags of ppe. 650
gallons of oil and water mixed removed by tanker. Double washed with
slix and flushed. Tag # 38687 removed. Source of spill was a vactor
truck that was on location previously. Cleanup crew and supervisor
are listed in the event involved person screen."

Remarks: "sprang leak on hydraulic hose. leak from vehicle recovered. manhole
affected 60533"

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 28636
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
I04 - Overfill - Product Level Gauge (A/G)
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
J02 - Dispenser - Suction Dispenser

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 3000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 05/09/2002

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 4984
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
B00 - Tank External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 54911
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

A01 - Tank Internal Protection - Epoxy Liner
H00 - Tank Leak Detection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
L00 - Piping Leak Detection - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 01/01/1950
Capacity Gallons: 12500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 08/08/2009
Register: True

DEC Memo: "03/06/13 Rec'd Investigation Summary report prepared by TRC. Three 600 gallon USTs were removed along with associated pipings. USTs were used for fueling rental cars. The surrounding properties are occupied by high rise residential and commercial structures. The tanks were found to be in good condition, free of pitting and perforations. Underground fill and vent pipes were removed along with dispenser, dispenser pans. Petroleum contamination observed in the pea gravel bedding below the USTs and on the ground water in the excavation. The standing water level was observed to be approx 4 ft below the top of the basement slab. The pea gravel bedding material was removed from the excavation for disposal. During excavation activities, approx 13,000 gallons of ground water were pumped out. Following excavation, neither a petroleum sheen nor separate phase liquid were observed on groundwater in the excavation. Bed rock present immediately below the tank excavation. Therefore, it was not possible to collect post excavation soil samples for lab analysis. A ground water sample was collected for analysis from the tank excavation. VOCs in ground water, Benzene 6.6 ug/l, Toluene 21 ug/L, Napthalene 16 ug/l, Xylenes 78 ug/L. Application of ORC is proposed by TRC. One 2 monitoring well will be installed in the excavation. (sr) 1/14/14: Mahat A spill closure report was received from Mr. Charles Guder (TRC Companines Inc.) requesting to review the case with an appeal for closure. Spill is transfered to DEC Mahat as per DEC Demeo. Report is under review at the moment. 1/15/14: Mahat A phone call was received from Mr. Dan Warren (Project Manager @ 917.232.9837) inquiring the status of the case review. 1/22/14: Mahat A complete case review on the spill has been performed. 2/1/13: On February 1, 2013, during UST removal, olfactory indications of petroleum contamination were observed in the pea gravel bedding below the USTs. Visual indications of petroleum contamination were observed in the groundwater in the excavation as well. NYSDEC was notified and Spill Case No. 12- 15225 was assigned. Additionally, bituminous waterproofing material was observed directly beneath the basement floor slab. 3/1/13: TRC s subcontractor, Brookside Environmental, Inc. (Brookside), completed removal of the three (3) USTs during January and February 2013. TRC maintained a full-time inspector on-Site during performance of the work. A Petroleum Bulk Storage (PBS) Notification for Tank Closure was submitted to NYSDEC by TRC and Brookside submitted a tank closure affidavit to New York City Fire Department(FDNY). A PBS registration change notification documenting the closure has been submitted to the NYSDEC by ABG. 3/19/13: On March 19, 2013, TRC advanced six (6) borings around the

1007205113

vicinity of the UST excavation to confirm the presence of bedrock beneath the basement floor slab. Results of analysis of the soil sample indicate that naphthalene was the only VOC. Naphthalene is a common constituent of bituminous waterproofing. Considering that naphthalene was the only petroleum-related compound detected in soil, the detected concentration of naphthalene in soil is attributable to the building waterproofing and not a gasoline release from historic fueling operations. Conclusions and Recommendations Based on the existing environmental conditions of the Site and the findings of the QHHEA, the following can be concluded: 1. The sources of historic petroleum impacts to soil and groundwater at the Site [three (3) 600-gallon gasoline USTs and associated piping and appurtenances] have been removed from the Site. 2. Bedrock is present either immediately below, or within one (1) foot of, the basement floor slab. There are no contaminants of concern in soil at the Site. 3. The results of analyses of groundwater samples collected from monitoring well TRC-MW-2 indicate residual gasoline-related VOCs are present at concentrations marginally above drinking water standards. However, there are no complete exposure pathways for petroleum-impacted groundwater at the Site. Therefore, exposure to petroleum-related VOCs in groundwater is not a concern at the Site. Based on these conclusions, no further groundwater sampling, investigation or remedial action is recommended. TRC respectfully requests NYSDEC approval for no further action (i.e., no further investigation or remedial actions) and closure of NYSDEC Spill Case 12-15225. 2/4/14: Mahat A call was received from Mr. Warren inquiring the status of the case status. 3/12/14: Mahat Entire report(edocs) from both Environmental consultant (PR and AP) has been reviewed. Based on the report, the Department will not conduct any further investigation on the site. The Department decided to close the spill, however the level of contamination is little above TOGS standard. Spill closure letter is sent to the property manager."

Remarks: "Caller advised found contamination in the process of removal of tanks. Clean up is pending."

Last Modified: 04/14/2017
Material Name: #2 fuel oil (on-site consumption)

Tank Number: 004
Tank Id: 245862
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I01 - Overfill - Float Vent Valve
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
E12 - Piping Secondary Containment - Double-Walled (AG only)
F06 - Pipe External Protection - Wrapped
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
C01 - Pipe Location - Aboveground
J07 - Dispenser - Loading Rack/Transfer Pump
G01 - Tank Secondary Containment - Diking (Aboveground)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 08/10/2012
Capacity Gallons: 4100
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004386110

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 209788
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

K01 - Spill Prevention - Catch Basin
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
E04 - Piping Secondary Containment - Double walled UG
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
C01 - Pipe Location - Aboveground
J02 - Dispenser - Suction Dispenser
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 12/29/2004
Capacity Gallons: 4000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The tank failed the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent, fill, suction and return separately and the tank itself. Plumber checked the lines and found the vent and fill are very old. 06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line. 6/13/14- Riteway sent the report dated 6/13/14. On April 30, 2013 Riteway Maintenance Corp. was contracted to perform a tank cleaning for a

S113494308

fuel oil conversion. Part of the conversion requirement is performing a tank tightness test. Riteway proceeded to pump and clean the tank. The tank was left empty for the conversion. the tank was then tested. The tank tightness test failed with an ullage (dry) portion leak. Line were isolated and a tank only test was performed with passing results. The source of the leak was determined to have been a faulty fill line. The old fill line was excavated and removed. soil was field screened via PID during the excavation and there was no contamination found. A new fill line was installed up to the first available fitting inside. The area was then backfilled, compacted and re-cemented to grade. the site is clean and free from contamination
Spill Closed. 6/13/154- David from Riteway sent the following email. The area was only excavated in order to remove the fill line, but no contamination was found"

Remarks: "6000G #6 Oil tank was empty and failed tank test."

DEC Memo: " 04/25/95: CALLED HOWARD GREENBERG ON 04/25/95 TO FIND OUT IF ANY ACTION HAS BEEN TAKEN. HE WAS NOT AVAILABLE WILL CALL BACK. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK TAKING ON WATER. ON JULY 8, 1996, Spoke to Carl Westerman, Properties & Facilities - Budget Rent-A -Car (708)955-7203 There are two 4,000 gallon UST gasoline in service at the facility. Tanks were steel installed in 1985. Tanks were laid into a bedrock foundation and had apoured concrete incasement. The problem involved one of the tanks. One tank began taking on water (12) over a rainy envent. Upon cleaning and inspecting the tank they found a hole in the bottom of the tank the size of a quarter. The tank was repaired with a steel plate and was fiberglass coated. The piping systems were repalced with fiberglass due to potential corrosion problems. The tanks were then cathodically protected by upgrading, and a leak detection system was added. According to Mr. Westerman, there was no loss of product from the system, and the only source of problems was water entering the tank. There have apparenently been no other indications of further leakage, or seepage into adjoining buildings. Mr. Westerman has photographs of the tank installation and documentaion on the cleanup which indicated that no product migrated back into the tank when it was emptied. See also Spill #9408906. On May 22, 2002, DEC Sigona received a call from Eric Meyn, Project Manager, American Environmental Assesment Corp, 188 LOnG Island Avenue, Wyandanch, N.Y. 11798 (631)586-2000 called to request the abandon the tanks in-place. They have not filed an application to abandon the tanks in-place. Eric Meyn was not aware that there is a spill history or additional spill reports which have been reported. DEC Sigona requested a complete site investigation plan along with documentation on previous remedial actions to be forwarded to DEC Sigona for review. DEC Sigona will consult with DEC Tipple regarding See Spill Nos. 9914694 and 9408906. Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 3/28/05 - spill closed, refer to spill # 9914694 for additional info. - KST "

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 3/28/00 +- 25 GAL. GAS FOUND IN OVERFILL. GAS PUMPED INTO DRUM FOR OFFSITE DISPOSAL. GAS ODOR ENTERED THE SCHOOL THROUGH THE ELEVATOR SHAFT THAT EXTENDS INTO THE GARAGE BELOW THE SCHOOL. A COMPLETE SYSTEM TEST IS SCHEDULED ON 3/29/2000 , THE SCHOOL WILL BE CLOSED FOR THE DAY. See Spill Nos. 9403751 and 9408906. 12/10/03 mt/// Transferred from Tipple to Rommel 10/19/05. J.Kringold got a call from TRC (Dave Glass). He stated that his co. was hired to do the tank closure. They check GW wells at the site and found elevated VOC and MTBE (27,000 ppb) in GW. Want to talk to DEC's PM regarding further action. The site owner Budget Rent A Car (contact Michael Feeley @ 973-496-3467). Case reassigned to BURB (Lauren MacDonald @ (518)402 - 9768.) DURNIN, 5/1/2006: October 2005:TRC was hired by

Budget Rent-A-Car to address Spill No. 9914694. November 16, 2005:TRC Tank Closure Plan Submitted to NYSDEC. December 1, 2005:NYSDEC Approval of Tank Closure Plan. December 6, 2005:Tanks closed in-place, piping removed. January 20, 2006:TRC ordering well socks for remediation of groundwater. January 25, 2006:TRC schedules ORC socks to be installed in a few weeks. March 20, 2006:The ORC socks were installed in the monitoring wells around the abandoned tanks. As per approved Work Plan, the ORC socks will be checked September 2006. August 23, 2006:TRC was emailed a request to schedule the 6 month replacement of ORC socks and the groundwater sampling event. September 5, 2006:The NYSDEC Project Manager visited the site and witnessed the removal and condition of the ORC socks from the 5 monitoring wells. MW-3 sock was the only discolored ORC sock. September 19, 2006:Groundwater samples were collected. October 19, 2006:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. November 10, 2006: TRC proposed to conduct another round of ORC applications. November 13, 2006:NYSDEC approved the Letter Report and the next round of ORC applications. November 14, 2006:The ORC socks were installed by TRC. The socks are to be in until May 2007. May 23, 2007:The Project Manager visited the site. The socks were removed and inspected. May 30, 2007:Groundwater samples were collected. July 16, 2007:TRC submitted the Letter Report on the results of the ORC application for the past 6 months and proposed to conduct another round of ORC applications. July 20, 2007:NYSDEC approved the Letter Report and the next round of ORC applications. September 5, 2007:The next round of socks were installed. The socks will be removed after 6 months (March 2008) and the groundwater will be sampled. March 2008:The socks were removed. April 11, 2008:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. TRC proposes to conduct two more 6-month rounds of ORC applications. May 9, 2008: NYSDEC approved the Letter Report and two 6-month rounds of ORC applications. June 16, 2008:TRC installed ORC socks in monitoring wells MW-2, MW-3 and MW-5. December 18, 2008:The ORC socks were removed. The DEC Project Manager was on-site for the removal event. February 24, 2009:The Letter Report was received and reviewed. March 5, 2009:NYSDEC approved the proposed plan to continue using ORC socks for the next 12 months. March 2009:The next round of ORC socks installed in wells MW-2, MW-3 and MW-5. August 31, 2009:TRC FOILs NYSDEC September 30, 2009:The ORC socks were removed. December 2009:TRC provides the results of the latest groundwater sampling. January 2010:TRC will submit an Exposure Assessment based on a DEC approved outline with the recommendation to close the spill. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. April 2010:NYSDEC reviews the Report. February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill. March 2010:NYSDEC reviewed The Letter Report. April 20, 2010:NYSDEC approved the Letter Report (no further action). A well commissioning work Plan is required. April 21, 2010:The Spill files are prepared for edoc filing June 23, 2010, J. Durnin: PM is waiting for TRC to submit a well decommissioning plan. July 14, 2010, J. Durnin: TRC submitted the Groundwater Monitoring Well Decommissioning Plan on July 13, 2010. The Plan was reviewed and approved on July 14, 2010. Well decommissioning is scheduled for the week of August 9, 2010. A Well Decommissioning Report will be submitted following the field work. August 24, 2010, J. Durnin: Well decommissioning took place on August 17, 2010. A Well Decommissioning

Report will be submitted. September 24, 2010, J. Durnin: The Well Decommissioning Report was submitted by TRC on September 24, 2010 and is under review. An Inactivation Letter is being drafted in anticipation of closing this spill. October 5, 2010, J. Durnin: The Well Decommissioning Report was reviewed and comments (1) emailed to TRC on October 5, 2010. An Inactivation Letter will be sent to Budget once the comment is addressed. October 22, 2010, J. Durnin: The Well Decommissioning Report dated September 13, 2010 (revised), was approved in an Inactivation Letter sent to Budget Rent-A-Car on October 8, 2010. This Spill No. 9914694 is closed as of October 8, 2010."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
