

# Inventory of Decking Opportunities Over Transportation Properties, 2008

## Overview:

**Inventory of Decking Opportunities over Transportation Properties** (2008), catalogues approximately 1,000 acres of subgrade road and rail corridors throughout the city, plus rail yards. While building in any of these corridors would be complex, were they to be decked over, opportunities would be provided to reunite communities and create the potential for new surface-level uses. The inventory is intended as a tool for stakeholders involved in any future planning for these sites.
