Meeting ID: 260 659 334 924 566

Passcode: WK2ky6fK

Mosquitoes are common in New York City during the summer and can spread illness.

In this presentation, you will learn:

- What mosquitoes are
- What West Nile virus is and its symptoms
- How to protect yourself from mosquito bites
- How to reduce mosquitoes around your home and neighborhood
- How NYC controls mosquitoes in the city

For more information, contact healthyaging@health.nyc.gov.

This webinar is in English, but ASL and interpretation in your preferred language are available on request. For language services, contact us at least 72 hours before the start time.
