1:44:34 Landmark Application – 21-20 45th Avenue, Long Island City, Enlargement of Existing Building within a Landmark District

Victor Han, Architect provided the following update:

- The property is located in the Hunters Point District located at 21-20 45th Avenue, LIC.

- Any renovations and enlargements require Landmark Preservation Commission review and approval. As part of their review and approval process the application gets referred over to the Community Board for comments and recommendations.
- The application does not seek any relief whether it is the zoning resolution, building code or fire code.
- The proposal is to replace the basement sunroom that is already there in the rear yard they are going to reframe that so that they can add two floors above the existing sunroom, the sunroom comes out approximately 20 ft and they are only coming out on the first and second floor, approximately 10 ft. Rear yard at the basement level will be about 38 ft, the rear yard at the first and second floor level will be about 48 ft, so they will far exceed the 30 ft minimum requirement for the rear yard floor area. They are below what the zoning permits height lot coverage and are below whatever the zoning requirements are.
- The project cannot be seen from the street level. It is an existing two family, but the enlargement is 10 ft. On the first floor it will allow for an extension for a dining room adjacent to the kitchen and on the second floor 10 additional feet would allow for bedrooms.

We have expressed a strong conviction as a board that we think the public sites should be maintained for public use and no simply rfpd. Another request has also been that they prioritized open space and community facilities in the DOE building.
