COVID-19 Response: Promising Practices in Health Equity II

The effects of COVID-19 on the health of racial and ethnic minority groups is still emerging; however, current data suggest a disproportionate burden of illness and death among these groups. In this video, presenters from local jurisdictions and national organizations discussed actions taken to mitigate the disproportionate impact on racial and ethnic minorities. Presenters discussed strategies to reduce COVID-19 health inequities for racial and ethnic minorities at the local, state, and national level.

DOING IT RIGHT: CONTRACT TRACING AND HEALTH EQUITY

There is ample evidence that communities of color are experiencing higher rates of infection and mortality rates. Testing and contact tracing are important tools to use in heading off future outbreaks of COVID-19. It is critical that contact tracing efforts are appropriate to those communities experiencing greater burdens of COVID-19. Recruiting and building a new cadre of contact tracers should meet the immediate goal of addressing the pandemic, but attention could also be paid to building a public health infrastructure that supports health equity. This webinar will explore how to promote health equity in contact tracing to mitigate COVID-19.
