Complex
Pedestrian Ramps Upgrades
See Locations on following page(s)

Project #: HWPR20MQC
Borough: Manhattan and Queens

Pedestrian Ramp Reconstruction Project

Project Location:
Manhattan Community Boards 5 and 6, Queens Community Boards 1,2,5,6,9,10

The City of New York is committed to making our pedestrian space safe and accessible for everyone, including aging residents and persons with disabilities.

The New York City Department of Design and Construction (NYCDDC), in partnership with the New York City Department of Transportation (NYCDOT), has begun Design work to upgrade certain pedestrian ramps in your Community Board to improve access on and off streets and sidewalks. These pedestrian ramps will be non-standard, requiring custom designs due to unusual site conditions, such as the need to relocate underground utilities. [Related work may be required for this project, including relocation of light poles, traffic signals, drainage structures, and private utilities.] Once designed and constructed, the improved pedestrian ramps will be ADA compliant and improve safety for everyone.

These ramps have been designed to meet the current ADA requirements. The ramp slopes, top landings, and related elements will be graded for persons with disabilities, including those using wheelchairs, walkers, and scooters, to be able to maneuver safely. Blind and low-vision pedestrians will be alerted that they are approaching potential hazards through brightly colored inserts with domed detectable warnings. These detectable warning surfaces will be either red or white to contrast with the surrounding sidewalk.

Design of this project is scheduled to be completed Winter of 2023. Construction is targeted to start in the Summer of 2024.

If you would like to learn more about this DDC Project, please contact the DDC Borough Director of Program Management:
