Our Schools Need Parents Like You

Run for a NYC Education Council

Now is your chance to impact how New York City public schools work for your children and all children in your community.

Your voice matters. Run for an Education Council seat and help shape the policies and priorities of your school district or even the city.

The only experience you need is to be a parent of a New York City public school student.

TEXT RUN2017 to 877-877

Receive automated recurring messages from DOE. No purchase necessary. MSG and Data rates may apply.

WINTER & HOLIDAY FIRE SAFETY from the FDNY

The winter season brings about many changes in your home. The heating system kicks on and you prepare for the holidays be decorating and cooking holiday feasts. The winter and holiday season is also the fire season. More than one-third of home fires occur during the months of December, January and February. Most fires and injuries are preventable by taking precautions that can make the difference between a happy and safe holiday or a holiday tragedy.

FUEL CONCERNS

Keeping warm in your home should fuel concerns for the safety of your family. During the months of December, January and February, home-heating equipment (central heating units, portable and fixed space heaters and fireplaces) is the second leading cause of home fires.

The major causes of home heating fires are poorly maintained systems, placing space heaters too close to combustible items and flaws in construction and installation of the heating units.

SAFELY HEAT YOUR HOME BY FOLLOWING THESE GUIDELINES

- Have a qualified technician install all new equipment.
- Have a qualified professional inspect your equipment annually. The inspection will ensure that the system is maintained in proper working order and identify any parts that require repair or replacement.
- Schedule regular cleaning of your boiler, furnace and hot water heater, including the chimney and chimney connectors.
- Have your wood-burning stove or fireplace, including the chimney and connectors, inspected every year by a professional.
- Keep a glass or metal screen in front of fireplace openings to prevent embers or sparks from jumping out.

BEFORE GOING TO SLEEP, BE SURE YOUR FIREPLACE FIRE IS OUT!

ELECTRIC SPACE HEATERS

When purchasing an electric space heater, look for heaters with automatic shut-off features.

GIVE SPACE HEATERS SPACE

Heaters should be placed at least three feet from any combustible material, such as bedding and furniture.

- **Never use an extension cord** with a space heater.
- Inspect the electrical cord for damage before each use.
- Keep young children and pets away from space heaters.
- Only use equipment that has the Underwriters Laboratories **(UL) Mark**.
- Avoid using electric space heaters in bathrooms or other areas where they may come in contact with water.
- **Turn off/unplug the space heater** whenever you leave the room or go to sleep.

Never use the kitchen oven or gas range to heat your home or apartment. Such improper use could cause dangerous levels of carbon monoxide to accumulate, causing severe illness and possible death. The use of kerosene or propane space heaters is strictly prohibited and illegal in New York City. The use of these types of space heaters poses a high risk of injury or death.
