Important Notice
**ATTENTION: ALL CURRENT
AND FORMER DDS CUSTOMERS**

You are receiving this notice because you have signed a contract with Digital Dispatch Systems Inc. now known as DDS Wireless International, Inc. (DDS)

As you probably know, the Agreement between DDS and the City of New York to provide TPEP systems and services expired on September 30, 2010. However, DDS is contractually obligated to service and maintain its systems until the end of a transition period (which TLC is currently targeting for April 30, 2011).

The TLC has now set a deadline of **December 31, 2010** for you to sign up with one of the two other contractors who provide TPEP systems and services – Mobile Knowledge Corp. (CMT) and VeriFone, Inc. (VTS). This means that all DDS customers must have signed an agreement with either CMT or VTS by December 31, 2010. (Note: You may only sign up with one of these vendors.)

If you have not already signed up with either CMT or VTS, you must contact them (at the numbers provided below) to choose the one you wish to contract with for TPEP systems and services, as soon as possible but in any case prior to December 31, 2010.

CMT: (718) 937-4444
VTS: (718) 752-1656 x255

In addition, you will be required to switch your TPEP systems to either CMT or VTS and have them installed as of your first vehicle inspection on and following February 1, 2011. Please contact DDS at (718) 361-2345 to learn the location of a DDS authorized de-installation center. *(Note: DDS may not charge you an early termination fee for switching to either of these other TPEP contractors.)*
