

For-Hire Vehicle Annual Accessibility Report

Year 5: July 1, 2022 to June 30, 2023

Executive Summary

The NYC Taxi and Limousine Commission (TLC) is committed to providing safe and reliable accessible service across the for-hire (FHV) industry. TLC's rules governing wheelchair accessibility took effect in January 2019. Through the highs of implementation and the lows of the COVID-19 pandemic, this sector demonstrated resilience. With an average of 30,000 trips completed every month, the demand for wheelchair accessible service continues to grow and performance continues to improve.

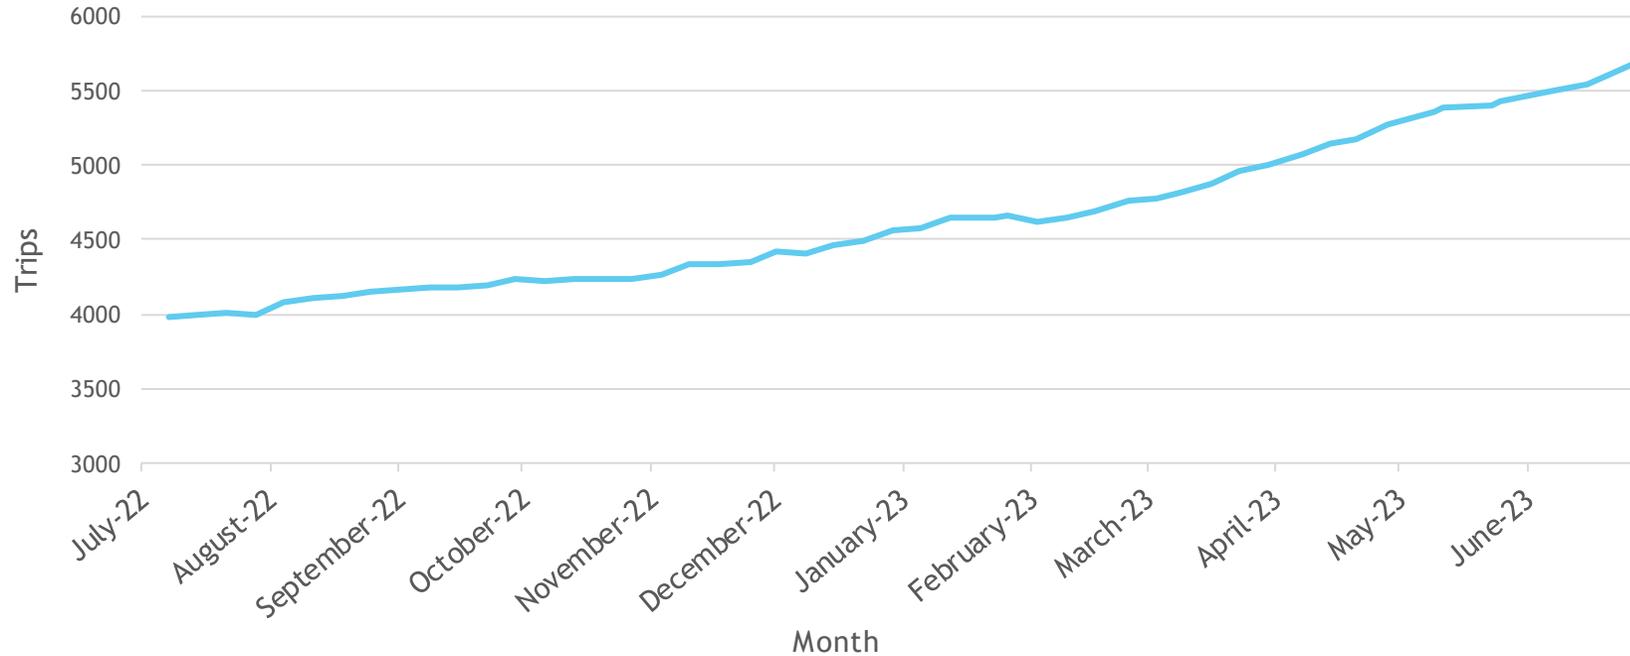

Since the rules went into effect almost five years ago, the number of wheelchair accessible vehicles (WAVs) has increased dramatically. There are now 5,700 wheelchair accessible for-hire vehicles in circulation compared to 339 that were available in January 2019. In addition, there were over 358,000 wheelchair accessible trips completed between July 2022 and June 2023 (Year 5). Across the five boroughs of New York City, customers can get picked up by a WAV in less than 10 minutes 87% of the time, exceeding the wait time standards.

In the coming year, TLC will work to make WAV trip metrics more readily available, survey customers and bases for feedback, and re-establish the annual FHV WAV dispatcher enrollment period. While service is much better than it used to be, TLC recognizes there are still opportunities for improvement.

Fleet Growth

FHV Accessibility
Number of WAVs on the road

Year 5 started with almost 4,000 vehicles in July 2022 and closed with over 5,700 vehicles in June 2023. This represents a 43% increase in wheelchair accessible vehicles in one year alone.

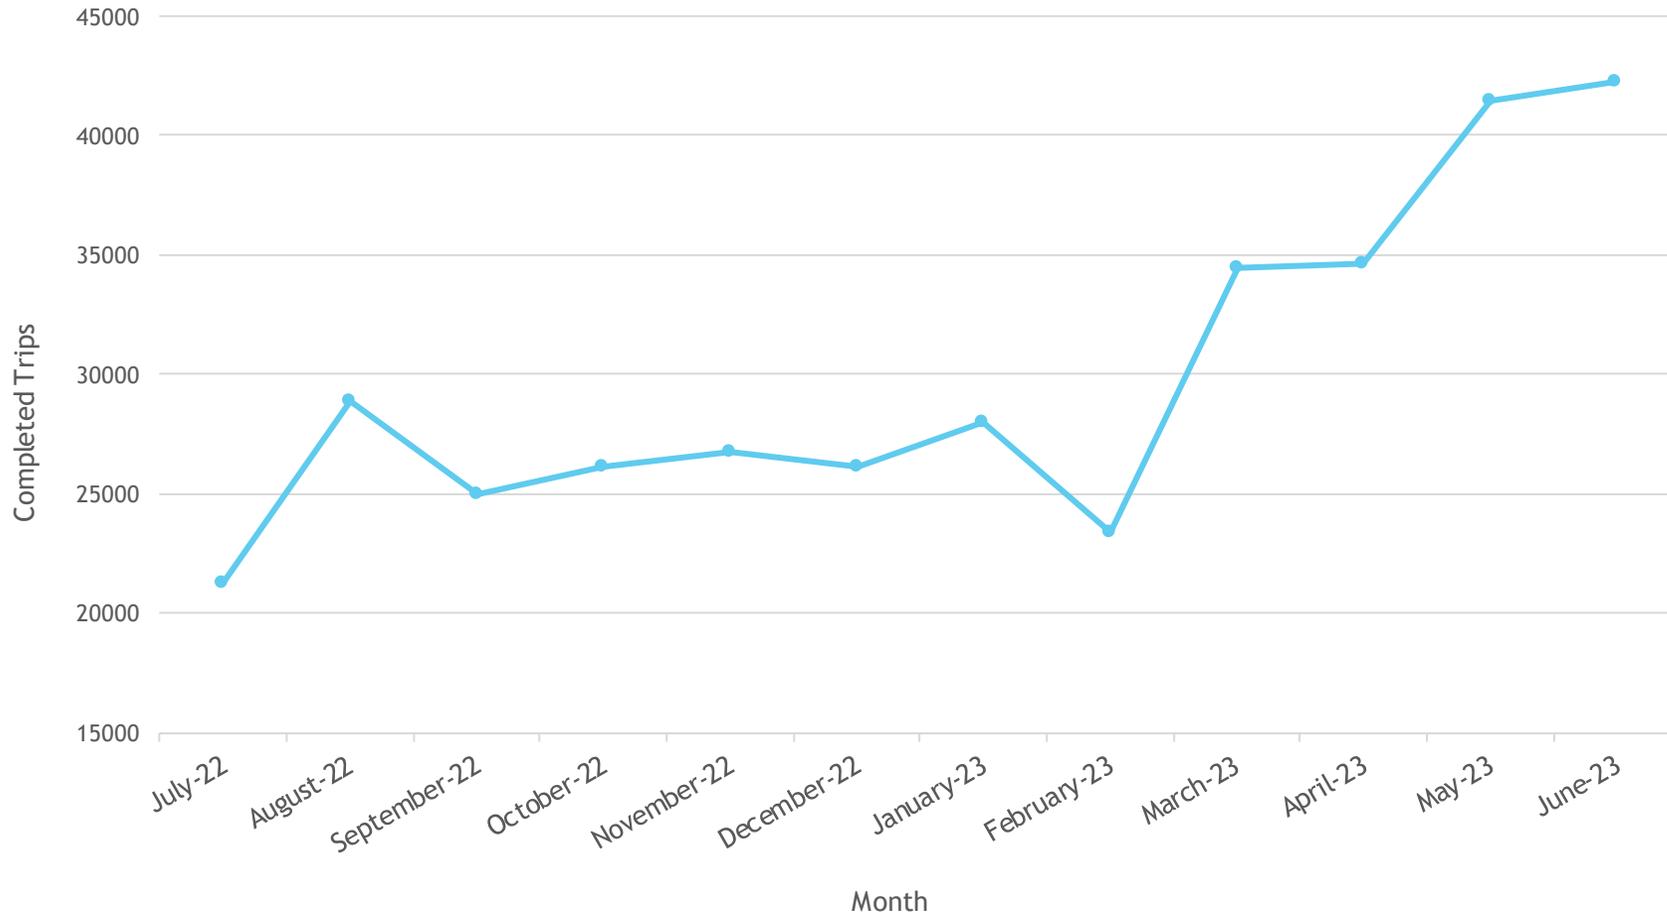

Rules Overview

The NYC Taxi and Limousine Commission (TLC) adopted new rules governing accessible service in the For-Hire Vehicle sector in 2019. The FHV bases were given two different options to meet the service requirement with service standards escalating over a five-year period.

Central Dispatch Exception: Completed Trips

The Central Dispatch Exception (CDE) has proven to be the most frequently selected option by customers and bases.

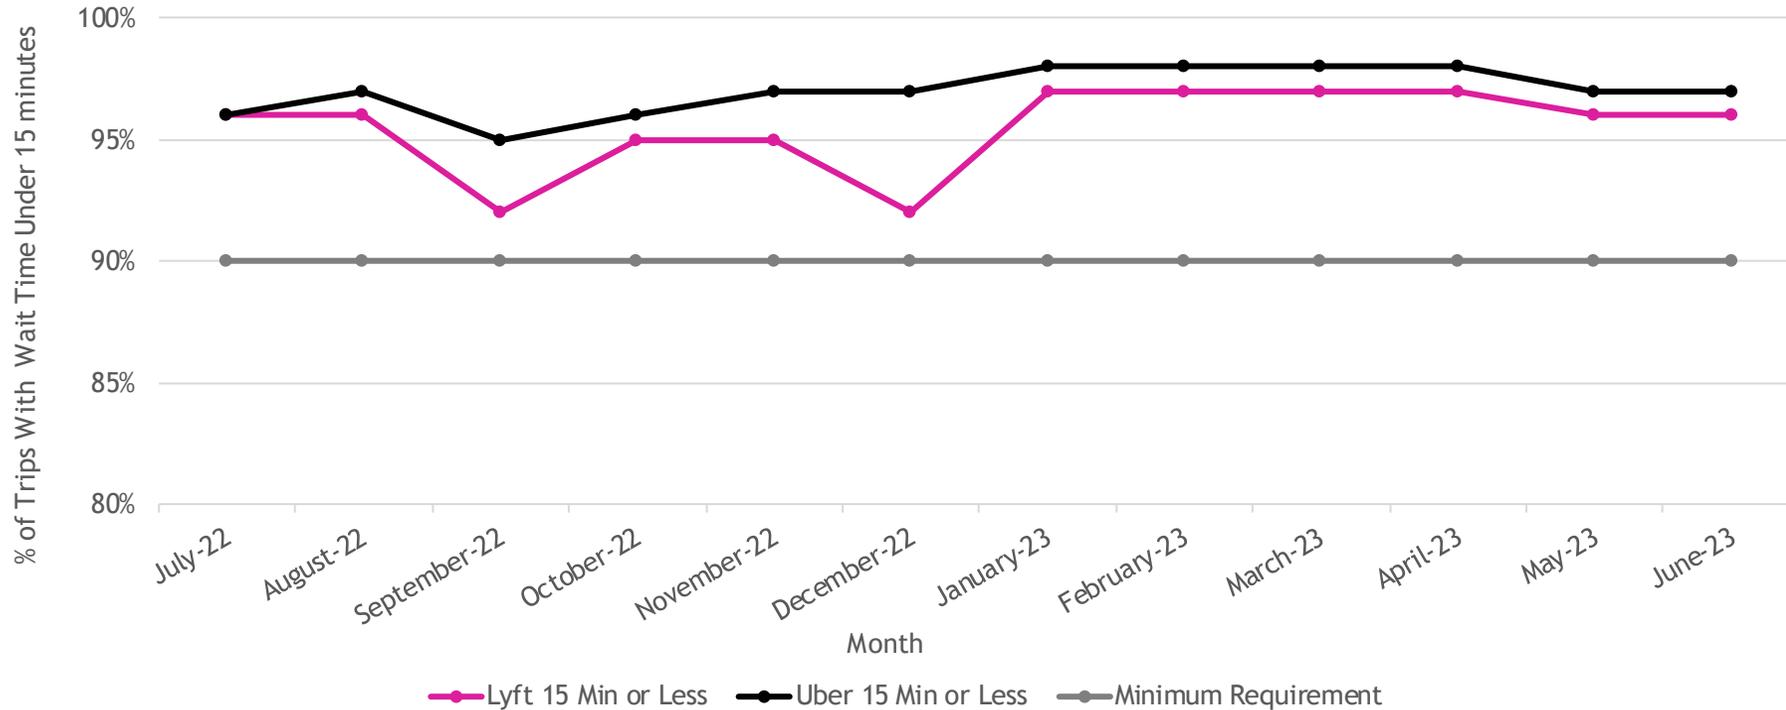

The graph reflects significant increases in trips under CDE, most notably starting in March 2023.

Central Dispatch Exception: 15 Minute Wait Time

Percent of Trips Completed Under 15 Minutes for All Dispatchers

Year 5: July 1, 2022 to June 30, 2023

During Year 5 both Uber and Lyft exceeded CDE compliance requirements. 92% of dispatched vehicles arrived at the customer's location within 15 minutes of the passenger's initial request.

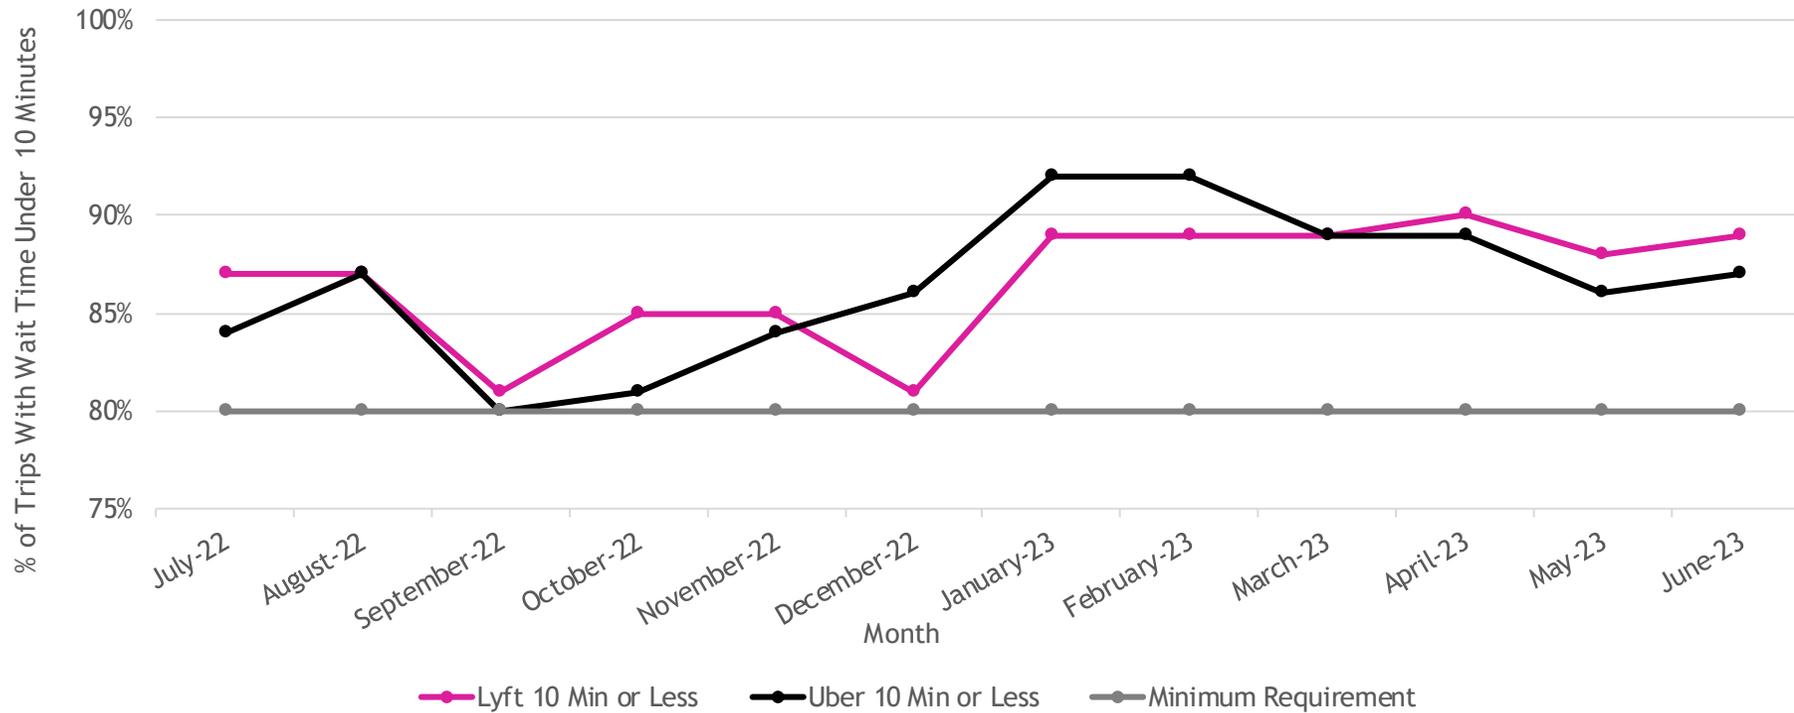

As of January 2023, both dispatchers managed to improve upon their compliance for the 15-minute wait time criteria and remained at or above 96% compliance through the end of the reporting period.

Central Dispatch Exception: 10 Minute Wait Time

Percent of Trips Completed Under 10 Minutes for All Dispatchers

Year 5: July 1, 2022 to June 30, 2023

Both dispatchers met and exceeded the 10-minute wait time standard. Starting in January 2023, over 85% trips had a wait time of 10 minutes or less. Getting a wheelchair accessible FHV anywhere in the five boroughs is becoming standard.

Trip Mandate Performance

25% of Trips Must Be Dispatched to a WAV

14% of Bases Dispatched 25% of Trips to a WAV

Total Number of Bases That Chose Trip Mandate Option	Bases That Dispatched 25% of Trips in a WAV (Pass)	Bases That Did Not Meet Requirement (Fail)
283	39	244

Most bases that chose the Trip Mandate Option are not in compliance. TLC will engage with bases to remind them of their options for meeting the accessibility requirements. Please see Appendix A for a full list of bases.

FHV WAV Recommendations

- 1 Add FHV WAV service metrics to the TLC Dashboard.
- 2 Survey passengers on their experience to identify pain points.
- 3 Survey and engage bases that are contracting with FHV WAV dispatchers to get feedback on program.
- 4 Secret Shopper – audit both FHV WAV service providers and Trip Mandate bases annually.
- 5 Re-establish annual enrollment period to enable bases to sign up or switch to a different FHV WAV dispatcher.
