 - (iii) When outside the five boroughs of New York City, the Street Hail Livery Driver must be able to enter a custom toll amount that is added to the total fare.
- (10) In the event that the trip originated as a Dispatch, the fare is paid for by providing credit/debit/prepaid card information to a dispatcher at the base, and the Passenger does not indicate this via the PIM when applicable, the DIM in conjunction with the LPEP system must:
 - (i) allow the Street Hail Livery Driver to indicate via the DIM that the fare was paid for outside of the LPEP;
 - (ii) display to the Passenger on the PIM when applicable that the fare payment is complete;

 - (ii) The availability and accessibility to the Commission of Trip Data must be greater than ninety-nine percent (99%). This service level is determined by the record of failures recorded or logged by the Help Desk.
 - (iii) The Trip Data must be retrievable by the Commission in response to a Commission initiated query within five (5) seconds at least fifty percent (50%) of the time and within ten (10) seconds at least ninety-five percent (95%) of the time. - The PIM, screen, or other device that reads credit/debit/prepaid cards must have a mean time between failures (MTBF) greater than 8,000 hours and a mean time to repair (MTTR) of two (2) hours. The MTBF and MTTR are determined by the record of failures and repairs recorded or logged by the Help Desk. The MTTR is measured from the time the Street Hail Livery arrives at an authorized repair facility.
- (5) Automatic Vehicle Location System and Location Services.
- (i) The AVL must determine the vehicle location in On-duty Location Positioning and On-duty Hail Exclusionary Zone Positioning to

within twenty-five (25) meters at least ninety-seven percent (97%) of the time and to within fifty (50) meters at least ninety-nine percent (99%) of the time.

- (ii) The availability of the AVL and location services shall be greater than 99.5%. Availability is measured as follows: (drop-off point determination + pick-up point determinations from Taximeter readings taken at Commission inspection facility) / (2 x number of paid trips as recorded in the Trip Data records).

(6) Maintenance Services.

Ninety-nine and nine tenths percent (99.9%) of service tickets or incidents as described in §83-22(c)(2) of these Rules must be resolved by the Help Desk within twenty-four (24) hours. Service ticket or incident resolution time is measured from the time of first reporting of an incident until the time LPEP service is restored enabling the Street Hail Livery to continue service.

- (j) *Critical Performance Failures.* A Critical Performance Failure exists when any of the following conditions are satisfied:

- (1) Eight percent (8%) or more of the LPEPs installed by an LPEP Provider are unable to process credit, debit, and prepaid card payment for more than four (4) consecutive hours;
- (2) The Commission or other City agencies are unable to transmit an emergency text message to at least twenty-five percent (25%) of the LPEPs installed by an LPEP Provider within four (4) hours; or

 - (i) For screens or other devices that read credit/debit/prepaid cards, a reported problem prevents a Passenger from making payment by credit, debit, or prepaid card; or
 - (ii) For PIMS, a reported problem prevents a Passenger from making payment by credit, debit, or prepaid card, viewing (or hearing) PSAs, or tracking the trip on the Passenger route map.

- (k) *Inspection by TLC.* The LPEP Provider must enable the Commission to inspect all components and inner workings of the LPEP by providing Commission inspection personnel with access to the LPEP by magnetic swipe card and/or password, or other secure method. Such components and inner workings include, but are not limited to:

- Hardware,
- Software,
- Driver Information Monitor,
- Passenger Information Monitor,
- screen,

- AVL receiver, and
- modem.

- (1) *LPEP and Taximeter Functionality.* The LPEP must enable the following functionality with regard to components of the LPEP and the Taximeter:
- (1) The LPEP may require the SHL Driver to enter both a user name and unique password via the DIM in order to engage the LPEP and Taximeter. The LPEP must enable an SHL Driver to login by pulling the SHL Driver's information from a smartcard for authentication when this technology becomes available;
 - (2) The LPEP must check the SHL Driver's training status against the TLC-published Current Licensee lists before allowing a SHL Driver to engage an SHL via the DIM. SHL Drivers that have not completed the appropriate training specified by the Commission must not be able to engage the LPEP and Taximeter via the DIM in an Accessible SHL;
 - (3) The LPEP must check the SHL Permit's status against the TLC-published Current Licensee lists before allowing the SHL Driver to log into the Taximeter via the DIM. If an SHL Permit is not Valid and active, the SHL Driver must not be able to engage the LPEP and Taximeter via the DIM;
 - (4) The LPEP must check the SHL vehicle's DMV License status against the TLC-published Current Licensee lists before allowing the SHL Driver to log into the Taximeter via the DIM. If an SHL vehicle's DMV License is not Valid and active, the SHL Driver must not be able to engage the LPEP and Taximeter via the DIM;
 - (5) The LPEP must check the TLC Driver License against the TLC-published Current Licensee lists before allowing the SHL Driver to log into the Taximeter via the DIM. If the TLC Driver License is not Valid and active, the LPEP must not allow the SHL Driver to log into the Taximeter via the DIM.
 - (6) The LPEP must check the TLC Driver License before allowing the SHL Driver to log into the Taximeter via the DIM. If the SHL Driver's License is already logged in to another LPEP or TPEP supplied by that LPEP Provider, the LPEP must not allow the SHL Driver to log into the Taximeter via the DIM.

- (7) The LPEP must check the SHL Driver's DMV License status against the TLC-published Current Licensee lists before allowing the SHL Driver to log into the Taximeter via the DIM. If a SHL Driver's DMV License is not Valid and active, the SHL Driver must not be able to engage the LPEP and Taximeter via the DIM;
 - (8) The LPEP must check the TLC Driver License against the TLC-published Current Licensee lists before allowing the SHL Driver to log into the Taximeter via the DIM. If the TLC Driver License has a designation that only allows them to operate Accessible SHLs, the SHL Driver must not be able to engage the LPEP and Taximeter via the DIM in a non-Accessible SHL;
 - (9) When Taximeters are able to support electronic linkage to the LPEP, the LPEP must be programmed to only recognize and activate when connected to the Taximeter with which it was installed as approved by the Commission, in order to prevent unauthorized individuals from modifying or exchanging the Taximeter in any way. - (o) *E-Hail Application Integration.* LPEP Providers must integrate with E-Hail Apps as follows:
- (1) LPEP Providers must develop and maintain an application programming interface (API) enabling developers of E-Hail Apps to integrate their apps directly into the LPEP data collection, and credit card transaction processing systems. Integration into the LPEP data collection, and credit card transaction processing systems includes but is not limited to:
 - (i) Providing access for E-Hail Apps to itemized fare data including time-and-distance fare, tolls, surcharges, extras, the SHL Improvement Surcharge and taxes from the LPEP and Taximeter, in real time, when the trip has been completed and the Driver has disengaged the Taximeter;
 - (ii) Ability of LPEP to receive either a confirmation from E-Hail Apps that provide for E-Payment or their third party designees that electronic credit card payment for the total fare amount has been successfully processed, or to receive the credit card and payment

- (iii) Ability of LPEP to receive relevant payment information from an E-Hail App that provides for E-Payment, or their third party designee, or Digital Wallet Application that processed the payment itself to the extent necessary to display the total charges including E-Hail service fee and tip (if applicable) on the PIM and on the printed receipt in accordance with paragraph (a)(2) of this section, and collect and transmit Trip Data in accordance with subdivision (c) of this section; and

 - (ii) the LPEP must collect and provide Trip Data as described in subdivision (c) of this section; and
 - (iii) the LPEP must provide an indication to the Driver through the DIM when payment for the total fare has been completed as described in subdivision (a) of this section.
- (3) A LPEP Provider may require E-Hail Apps that provide for E-Payment and process the payment through their own or their third party designee's payment gateway to pay a fee of not more than \$0.05 per trip for any trip for which the E-Hail App or their third party designee processes the payment.
- (4) A LPEP Provider may not charge a fee when the Passenger is using a Digital Wallet Application for payment, or when the Passenger uses an E-Hail App that provides for E-Payment which either through the E-Hail

App itself or through its third party designee provides the Passenger credit, debit or prepaid card and payment information to the LPEP Provider for payment processing through the LPEP Provider's payment gateway.
