

Use this list to schedule screening events for your class. 1. Determine which facility is closest and most convenient for you and your students. 2. Check the screening schedule to see if that facility has a screening event that fits your schedule. 3. Contact the field trip coordinator at the facility to either confirm your participation in an existing event. 4. If an existing event does not fit your class schedule, discuss an alternate date and time with the field trip coordinator. 5. Begin using the Prevention & Detection lesson in class after confirming the date and time of your screening event.
