

31 St & 37 Ave Bus Stop Improvements

Bus Stops Under the El

- Federally-funded program to improve safety at bus stops located under elevated subway lines
- Addresses unsafe waiting conditions, non-ADA compliant bus stops, and intersection safety
- Construction of bus boarding islands or curb extensions improves bus service and safety
- Improves bus operations and better organizes traffic and creates more predictability for vehicles, pedestrians and transit riders

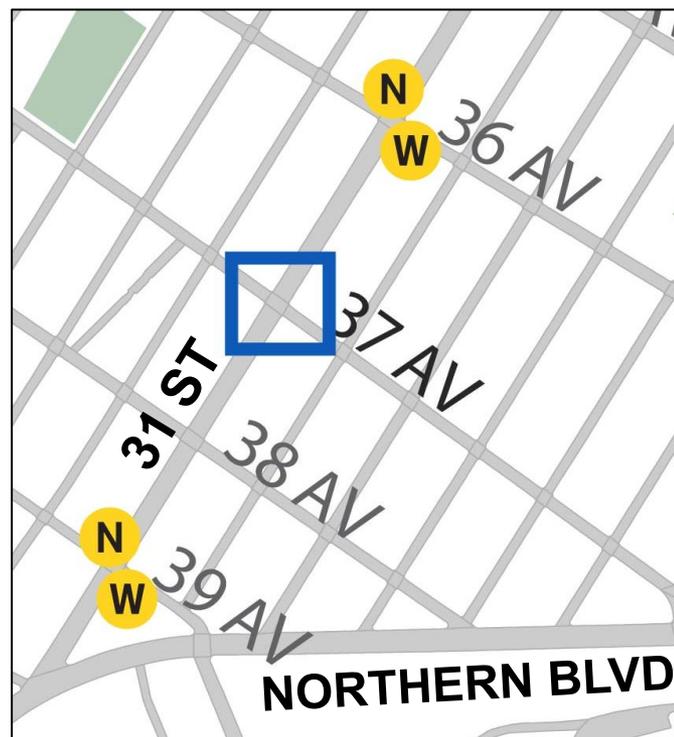

Above: Bus riders wait in the street at White Plains Rd and E 215 St in the Bronx
Below: Bus riders safely board at a newly constructed concrete island at White Plains Rd and E 215 St in the Bronx

Project Location

31 Street

- 31 Street and 37 Avenue
- Commercial and residential land use
- Subway Stations located at 39 Avenue and 36 Avenue that service the N and W trains
- Q102 (existing) and Q105 (proposed future) bus routes

Project Location 

31 Street, Northern Boulevard to 36 Avenue

Bus Stops Under the EI Issues

Vehicle and bus rider conflicts

Poor visibility of bus riders

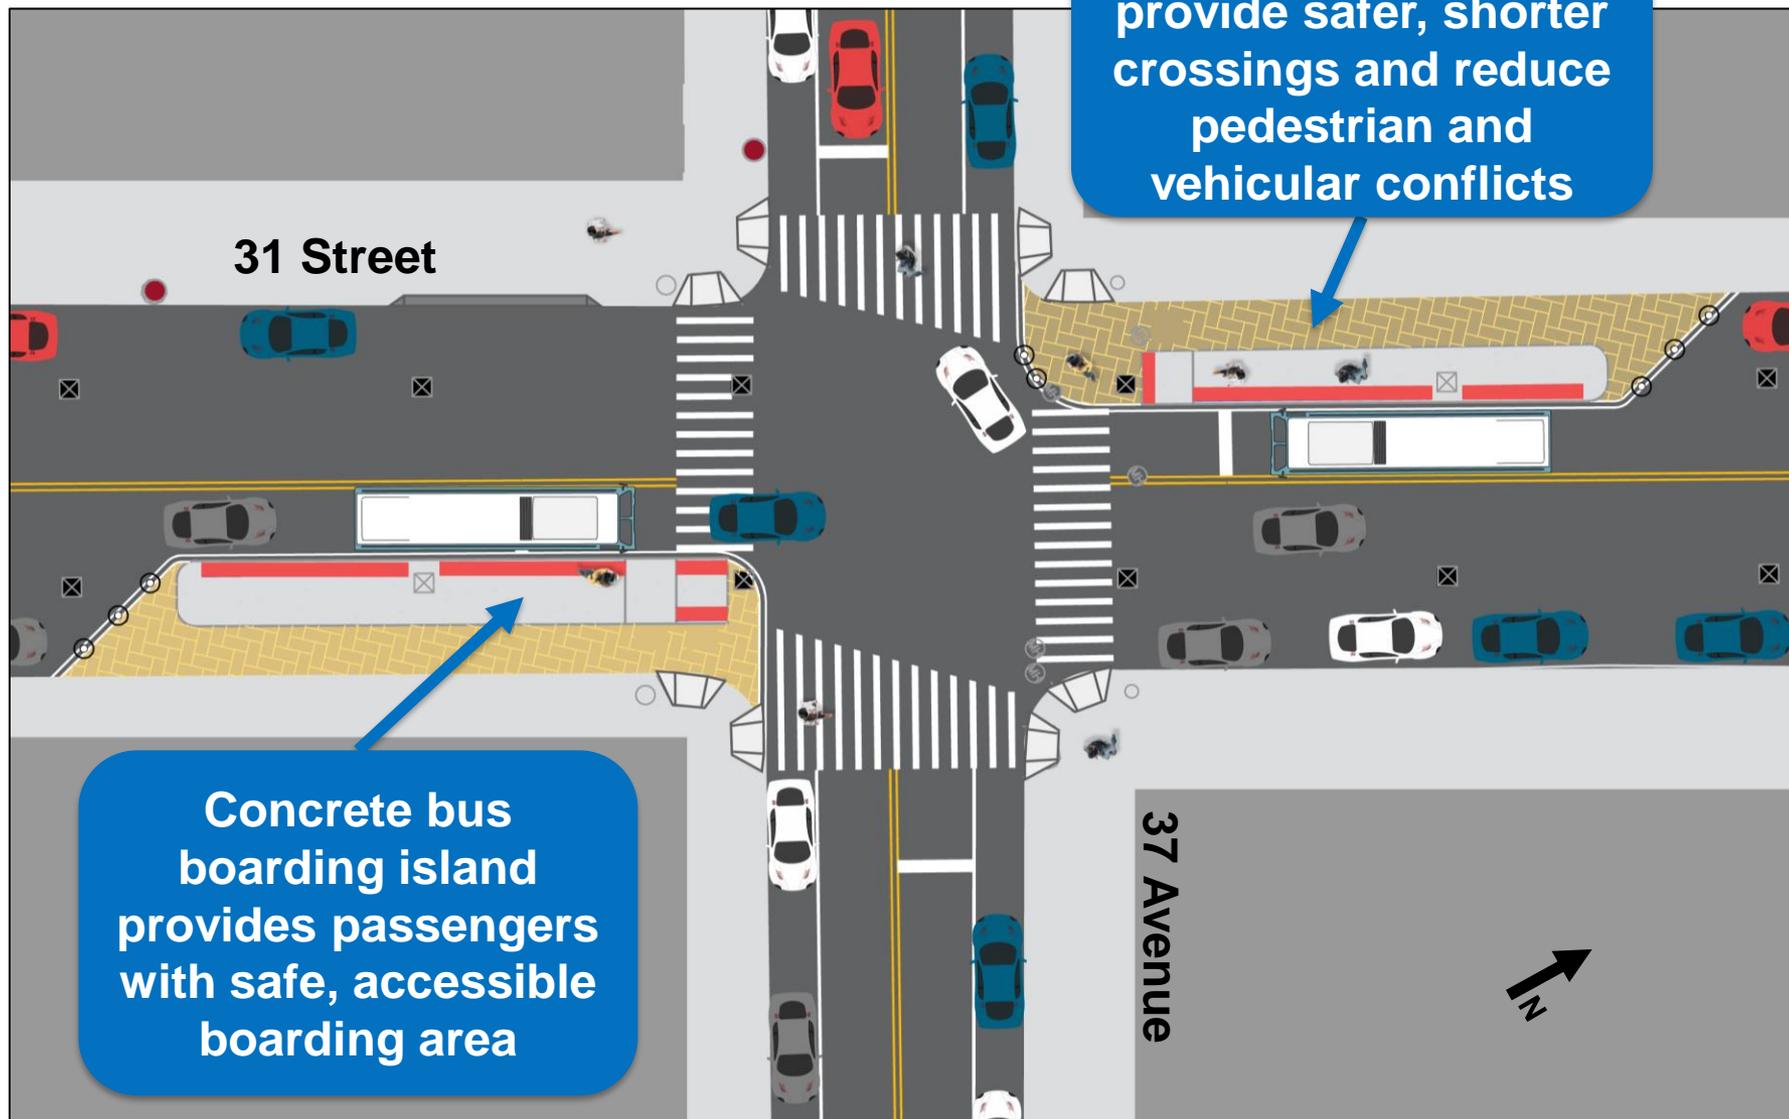

Accessibility issues for bus riders

Bus stops located in roadway

Proposed Conditions

Proposed Conditions

Bus Boarding Island provides passengers with safe level boarding area

Painted, protected pedestrian space

Project Benefits

- Bus boarding islands improve ADA accessibility and safety for riders
- Better organizes traffic and creates more predictability for vehicles, pedestrians and transit riders
- Shorter, safer crossings for pedestrians and improved pedestrian refuge space
- Improves bus operations

Westchester Ave, Bronx
