Welcome! We will begin in a few minutes

Translation & Accessibility

- Closed Captioning is available in English and live interpretation is available in Spanish via the Interpretation button
- Please use the chat to submit your questions.
- This workshop will also include breakout room discussions.

¡Bienvenido! Empezaremos en unos minutos

Traducción y Accesibilidad

- Los subtítulos están disponibles en inglés y la interpretación en vivo está disponible en español a través del botón de *Interpretación*
- Utilice el chat para enviar sus preguntas.
- Este taller también incluirá discusiones en cuartos virtuales separados.

University Heights Bridge to Macombs Dam Bridge

Wednesday, April 19, 6-8pm

Agenda

- Project Background & Goals
- Process + Schedule
- Existing Conditions
- Breakout Room Activity
- Next Steps/ Announcements

Poll #1

How do you currently travel in the area?

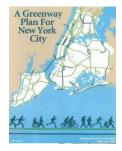

Project Background

- Bronx communities have been historically disconnected from the Harlem River
- Long-time advocacy for a continuous greenway and improved connectivity
- This is a community-based process to develop an implementation plan for the Greenway
- When complete, the Greenway will consist of a continuous 7-mile, multi-use shared path connecting Van Cortlandt Park to Randall's Island Park

Past Planning Studies

A Greenway Plan for New York City, 1993

Harlem River Greenway Plan (Pratt Center for Community Development), **2011**

Bronx, Meet Your Waterfront (MIT), **2011**

Mott Haven/Port Morris Waterfront Plan (South Bronx Unite), 2012

White distance— Note that the property of provide any property of provide any provide any

Harlem River Brownfields Opportunity Area Report (BCEQ/Parks), **2015**

Special Harlem River Waterfront District Expansion (DCP), **2017**

Harlem River Bridges Plan (DOT), **2018**

Harlem River
Watershed and
Natural
Resources
Management
(Parks), 2020

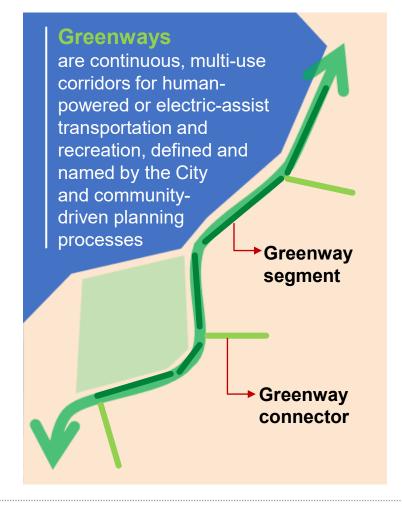

What is a Greenway?

- Continuity is key
- Main greenway corridor is comprised of several continuous segments (on and off street)
- Main corridor links to the rest of the network via greenway connectors
- Often along natural and man-made linear spaces (rail/ highway rights-of-way, rivers, waterfronts, and parks)

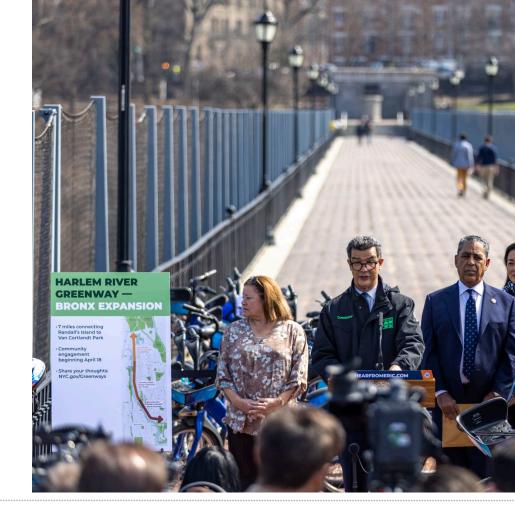

Benefits of a Greenway

- Improves transportation access and mobility
- Provides opportunities for active transportation (improving health)
- Encourages sustainable modes of transportation (biking and walking)
- Brings people together through recreation and leisure
- Encourages economic development in the area
- Connects people to nature and the waterfront

Project Goals

- Develop a comprehensive plan for a continuous, safe, and accessible path
- Work with community members to plan a greenway that best serves Bronxites
- Identify a series of short-term street improvement projects and longterm capital projects along the Harlem River
- Identify greenway connectors to provide upland communities with access to the Harlem River Greenway and waterfront

nyc.gov/dot 1(

Project Schedule

Implementation Strategies

- Street Improvement Projects use DOT's in-house resources such as paint and delineators to make street design changes quickly
- Capital Projects are longer-term, major street reconstruction projects which modify the geometry of the street and are often coordinated with sewer and water upgrades

Kent Avenue, DOT In-house Street Improvement Project, 2009

Kent Avenue, DOT/DDC Capital Project, 2021

Study Area Overview

- Van Cortlandt Park to Randall's Island Park
- 7-mile route
- 3 focus sections:
 - Van Cortlandt Park to University Heights Bridge
 - University Heights Bridge to Macombs Dam Bridge
 - Macombs Dam Bridge to Randall's Island Connector

Workshop # 2 Focus Area

 Central Section: University Heights Bridge to Macombs Dam Bridge

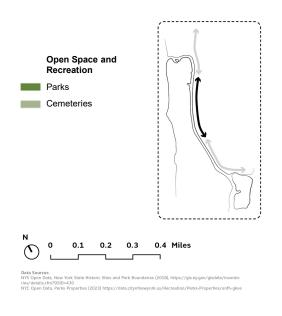

Study Area Context and Neighborhood Destinations

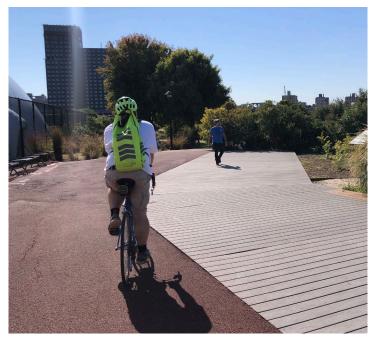

Key Destinations: Parks, Open Space and Recreation

Key Destinations: Parks, Open Space and Recreation

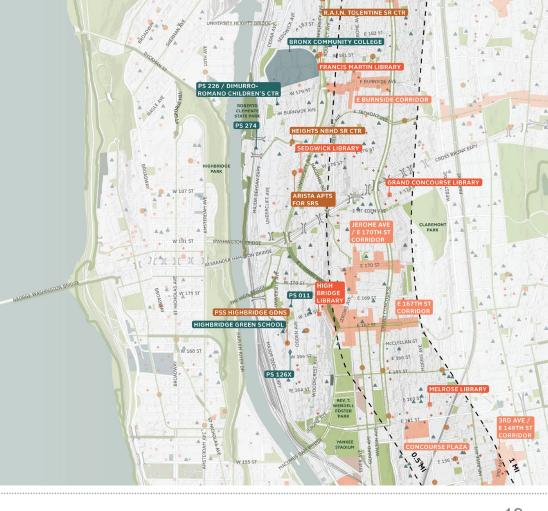

Key Destinations: Community Assets & Places of Interest

Transportation Conditions

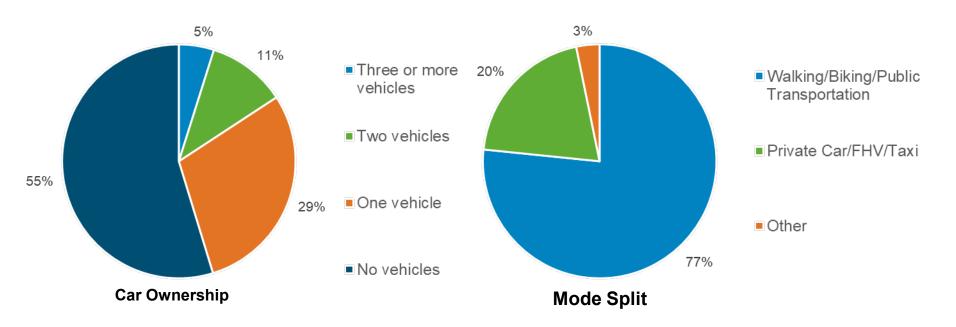

Poll #2

How would you like to travel in your area?

Nearby residents primarily travel by walking, transit, and biking

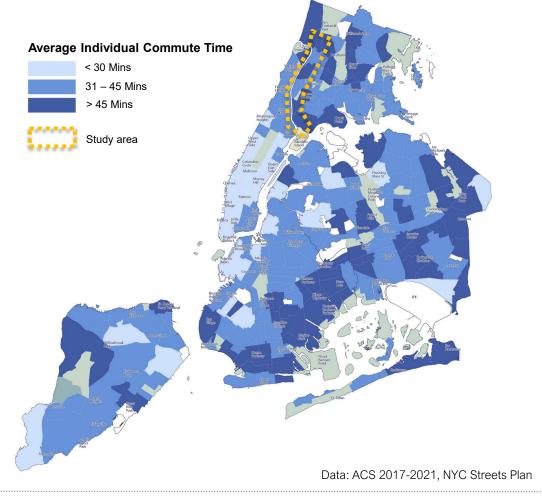

Typical Weekday

Data: Replica Fall 2021 datasets (ACS 2019); Figures shown represent 1 mile buffer around HRG study area

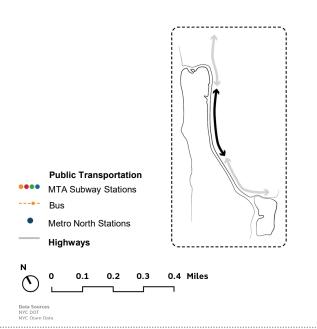

Commute Travel Times

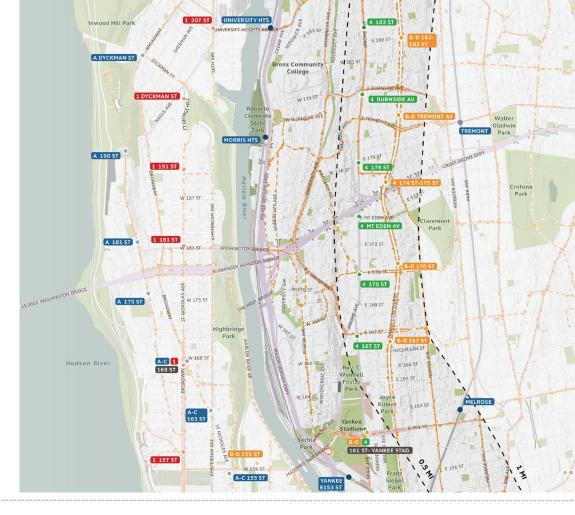

- Most people in study area have commute times longer than 30 minutes
- Greenways can provide additional transportation options and support connections to transit

Transit Network + Hubs

Bicycle Facilities - Typologies

Shared Bicycle Lanes

Shared lane markings guide cyclists where to ride on the street

- Alert drivers & cyclists of shared space
- · Provide wayfinding for cyclists
- Guide cyclists away from car doors

Standard Bicycle Lanes

Bicycle lanes provide dedicated space in the road

- Discourage speeding by visually narrowing the road
- Increase predictability by clearly defining road space for each user

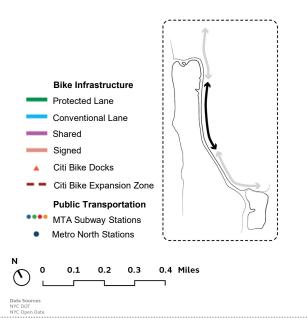

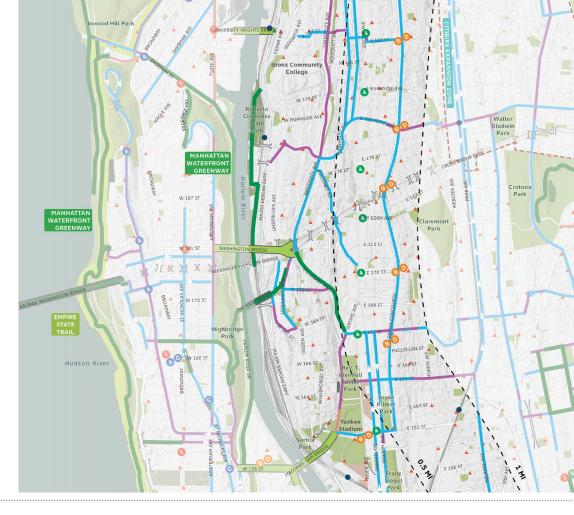

Protected Bicycle Lanes

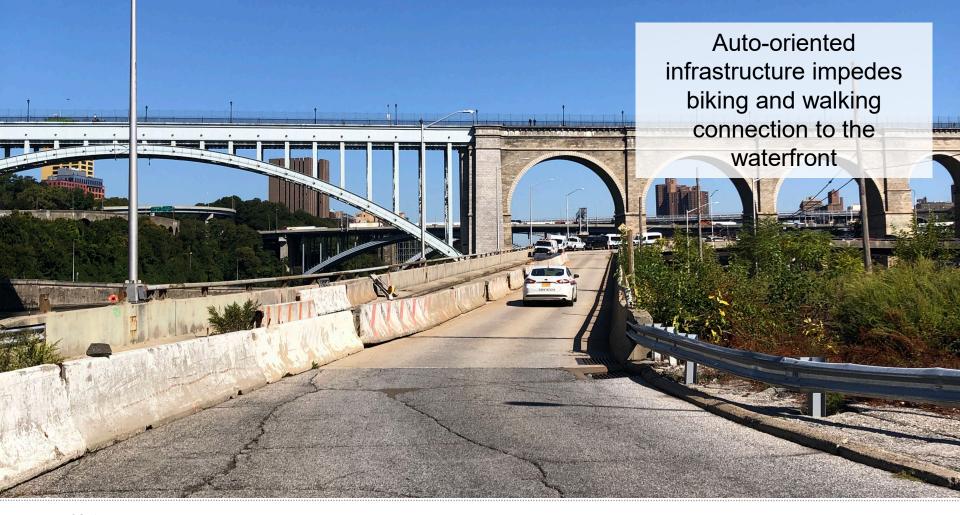

Bicycle lanes protected by bollards or floating parking

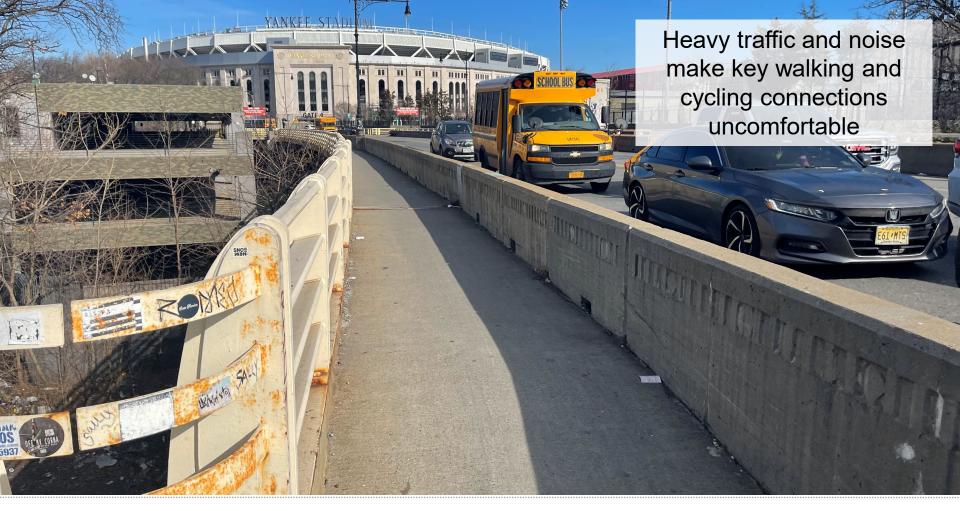

- Maximize traffic calming by physically narrowing roadways
- Increase safety for all road users by shortening crossing distances for pedestrians, & separating people driving and biking

Existing Bicycle Infrastructure

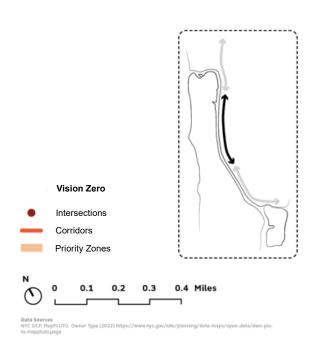

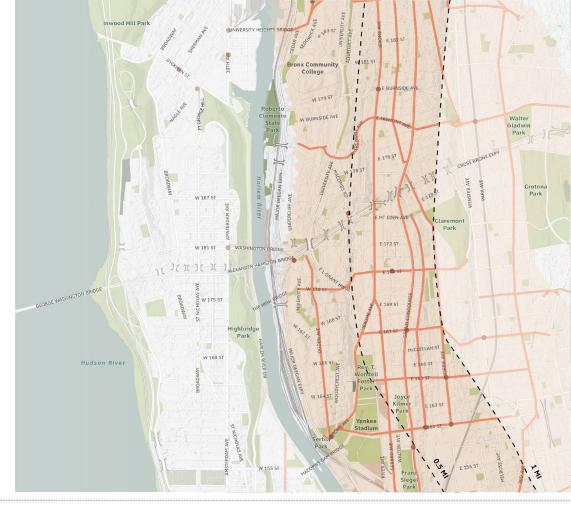

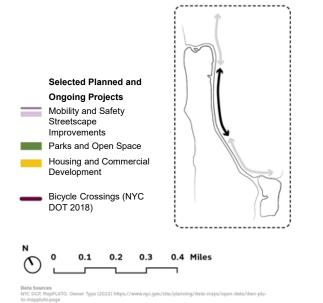

Safety – Vision Zero Priority Areas

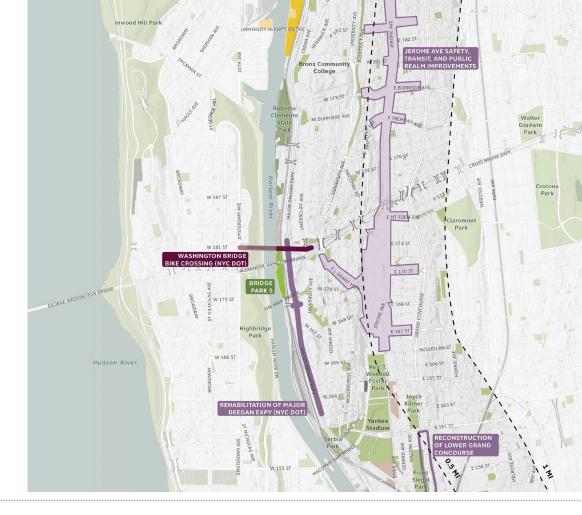

Ongoing Projects

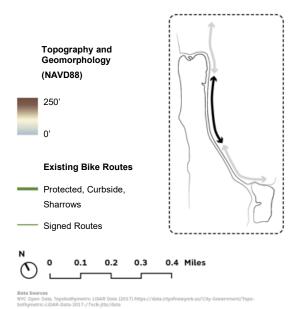

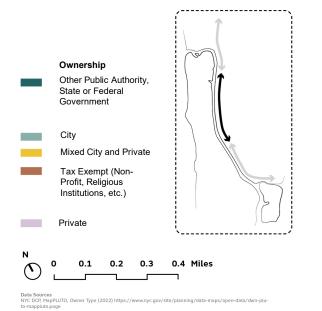

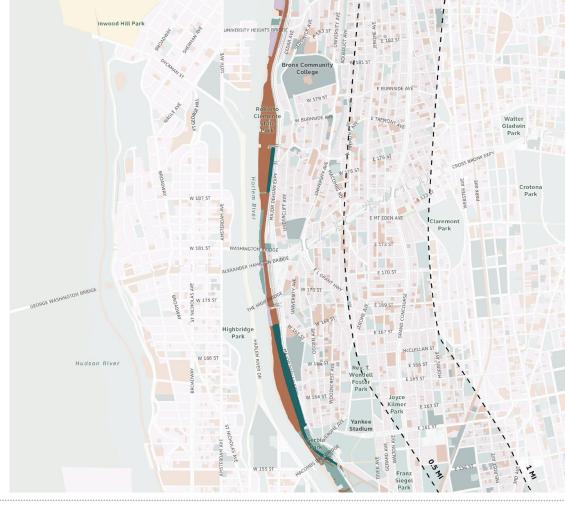

Topography & Slope

Ownership

Tell Us What You Think!

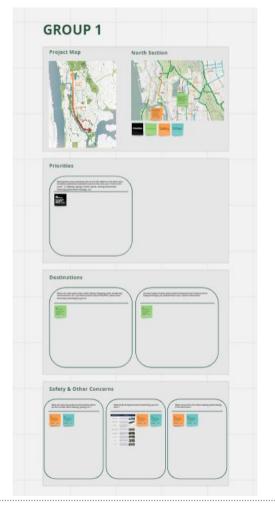

What we'd like to hear from you

- Learn about your transportation needs and challenges
- Identify key corridors and intersections that could benefit from safety improvements for people biking and walking
- Identify high priority gaps in accessibility in the study area

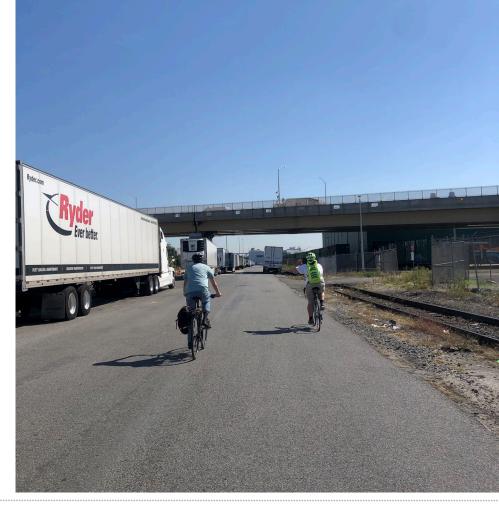

Breakout Room Activity

- When prompted, enter your assigned breakout room
- If you would like to continue with Spanish interpretation, please decline the breakout room invitation and stay in the main room
- Closed Captioning will be available throughout the activity
- We will come back to the main room at the end and report back before closing

Report Back

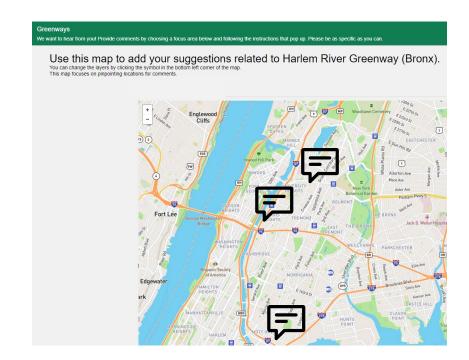

What were the main takeaways from each breakout room?

How to Provide Additional Feedback

- You can provide additional comments at the feedback portal
- To learn more, visit the project website here:

https://nycdotprojects.info/harlem-river-greenway-bronx

NY-NJ Harbor & Estuary Program Grant Opportunity

- Request for Proposals: public programs in support of the Harlem River and Harlem River Greenway
 - For example: learn to ride events, community plantings, canoe paddling, public art installations, neighborhood walks and bike rides
- Grant awards: ~\$5,000-\$15,000
- Letter of inquiry due May 15th
- More info available: www.hudsonriver.org/article/public-access-grants

NY/NJ HARBOR & ESTUARY PROGRAM

Next Steps

- Community Workshop series:
 - 1. Tuesday, April 18th 6-8pm ✓
 - 2. Wednesday, April 19th 6-8pm ✓
 - 3. Wednesday, April 26th 6-8pm
- Summer 2023:
 - Identify potential routes and project ideas based on community input
- 2024:
 - Publish Implementation Plan

Thank you!
