- 4. Community Input, Next Steps, and Discussion

Background

Why Hillside Avenue?

- Study area: Springfield Blvd to Queens Blvd (4.2 miles)
- 194,000 daily bus passengers on 17 MTA bus routes + 21,000 on 5 Nassau County (NICE) bus routes
- Connections to E D D Z and LIRR
- Bus speeds as low as 4 miles per hour
- 60 people have been killed or seriously injured on Hillside Av between 2018-2022

Blocked existing curbside bus lane on Hillside Av

NYC Streets Plan Update (2024)

Transit goals of the Streets Plan:

- 1. Increase sustainable travel modes by reconfiguring streets
- 2. Expand access to job opportunities through faster and more reliable transportation options
- 3. Allow all New Yorkers to get around the city in multiple ways **without encountering barriers to travel**

Hillside Avenue was identified in the 2021 Streets Plan, and is within Tier 1 and 2 Priority Investment areas

Queens Bus Network Redesign

- MTA's borough-wide plan to improve bus service launched in 2019
- Coordinating with NYC DOT on targeted corridors, including Hillside Av
- DOT is working to support MTA's Proposed Final Plan
- MTA published the Proposed Final Plan in December 2023, which incorporated concerns and needs expressed by riders, labor partners and other stakeholders
- QBNR team has participated in over 60 engagements since publishing the Proposed Final Plan including:
 - 22 Community Board presentations
 - 22 engagements with elected officials, civic groups, community groups, institutions and other stakeholders
 - 18 pop-up events
 - 5 in-person open houses

Contidors pictured in gray. For more information, please consult the Brookly Bus Redesign Draft Plan.

NICE Bus High Volume Corridor

One of every two NICE riders boards or alights in Queens. Hillside Avenue serves some of NICE's most popular routes:

n1 – 1,500 customers n6 / n6X – 10,100 customers n22 / n22X – 4,600 customers n24 – 4,200 customers n26 – 600 customers

21,000 total (average Weekday)

BETTERBUSES

Demographics

- 73,000 residents live in census tracts within a few blocks of Hillside Av
- 60% of workers commute via transit, walking, or other nondriving means

•Citywide, bus rider median annual income is lower than drivers (\$30,000 vs. \$47,000)

- 40% of households do not have access to a vehicle
- 46-minute average commute time above NYC average
- Additional housing units proposed for downtown Jamaica within DCP's Jamaica Neighborhood Plan

Car, truck, or van -- drove alone Car, truck, or van -- carpooled

Safety

- 992 people were injured in crashes on Hillside Av between 2018-2022
 - Average of nearly four injuries every week
- 58 people were severely injured; two were killed
- Vision Zero:
 - Priority Corridor
 - Two Priority Intersections (Springfield Blvd, 197th St)
 - Within Priority Area

Hillside Ave, Springfield Blvd to Queens Blvd Injury Summary, 2018-2022

	Total Injuries	Severe Injuries	Fatalities	KSI
Pedestrian	261	31	2	33
Bicyclist	47	3	0	3
Motor Vehical Occupant	676	23	0	23
Other Motorized	8	1	0	1
Total	992	58	2	60

KSI: Killed or Severely Injured. Data Source: NYC DOT

Source: Fatalities: NYCDOT, Injuries: NYPD FORMS database

DOT Improvements on Hillside Av

- School safety improvements: shortening crossing distances, providing more pedestrian crossing time near schools
- Pedestrian safety improvements: adding pedestrian refuge islands, curb extensions
- Corridor safety improvements: left turn calming, median extensions, new crosswalks

- Hillside Av remains one of the most dangerous corridors in Queens
- Future improvements will increase safety for all street users

Hillside Av Bus Speeds

- Speeds as low as 4 mph during peak hours
- Significant congestion around downtown Jamaica, 179th St subway station
- Vehicles illegally park and stand in existing curbside bus lanes, slowing down buses
- Double parking blocks curbside bus lane, impedes traffic flow

Hillside Avenue

Hillside Avenue

AM Peak: 6-10 am, PM Peak: 3-7 pm

BETTERBUSES

Vehicle Speeds and Volumes

- Slowest in Jamaica, averaging under 13 mph
- 2,400+ vehicles per hour carrying approx. 2,800 people during peak hours on most of corridor
 - Plus approx. 235 bus trips carrying 14,000 people per peak hour
 - Bus passengers account for 83% of roadway users, buses are allocated less than 1/3 of the roadway itself
- Downtown Jamaica busways have had minimal impact on Hillside Av traffic speeds

Source: Speeds from INRIX May 2023, Volumes from automated traffic recorders taken April 29- May 7, 2023.

AM Peak: 7-9 am, PM Peak: 4-7 pm

- Francis Lewis Blvd to 188th St: Unmarked curbside bus lane
 - Mon-Fri, 7-9am westbound, 4-7pm eastbound
- **188th St to Merrick Blvd:** Marked curbside bus lane (no red paint)
 - Mon-Fri, 7-9am westbound, 4-7pm eastbound
- Sutphin Blvd to Queens Blvd: Red painted curbside bus lane
 - Mon-Sat, 6-9am and 4-7pm, westbound only

No bus lane, Springfield Blvd to Francis Lewis Blvd and Merrick Blvd to Sutphin Blvd

Unmarked curbside bus lane, Francis Lewis Blvd to 188th St

Curbside bus lane, 188th St to Merrick Blvd

Red curbside bus lane, Sutphin Blvd to Queens Blvd WB only

BETTERBUSES

Existing Cross Sections – three treatments

Existing Curb Regulations

- No Standing curb regulation during peak rush hours on most of the corridor
- Westbound No Standing regulation from 7-9 am
- Eastbound No Standing Anytime from 4-7 pm
- Changes to design would reallocate curb space to better serve pedestrians and businesses in the area

Existing Conditions Challenges

- Bus lanes are inconsistent
- Unmarked bus lanes not visible to drivers or pedestrians
- Double parking blocks bus lanes, contributes to congestion
- Bus lanes frequently blocked by illegal loading and parking, forcing buses to merge in and out of lane

Toolkit

20

Transit Toolkit

Woodhaven Blvd, QN

161st St, BX

14th St, MN

Hylan Blvd, Sl

Broadway, QN

Parking Toolkit

22

Other Tools

- Traffic signal timing
- Transit Signal Priority (TSP)
- Bus lane camera enforcement
 - DOT stationary cameras
 - MTA on-bus cameras (ACE, formerly known as ABLE)
- Left and right turn bays
- Turn calming

Potential Design

- New, offset and/or center running bus lanes for the full length of this project
 - Center-running bus lanes in the left lane – for higher-traffic areas
 - Offset bus lanes next to the parking lane on the rest of the corridor
- Extends bus lane hours to 24/7
- Moving bus lanes off the curb may return up to 30 blocks of parking, loading, or other curbside uses
- Add pedestrian refuge islands, which shorten crossing distances and improve safety

Offset Bus Lanes – Example Cross Section

Center Running Bus Lanes – Example Cross Section

Community Input, Next Steps, and Discussion

27

Community Input

- "I love that you are asking me about the bus service, no one has asked me about this before."
- "There are so many Bengali [who] live here and we really need better bus [service]."
- "The buses get here late. There are many risks on the street for safety reasons. "
- "The buses do not get on time and I have to wait too long. This happened several times at day. On the weekends I look for other alternative because it's not reliable."

Community Input Continued

Next Steps

• Spring 2024:

- Refine proposal based on community feedback
- Conduct traffic analysis
- Continue community engagement, site visits and data collection
- Summer 2024: Finalize proposal
- Fall 2024: Share revised plan

Discussion

- How does Hillside Av operate right now? What works and doesn't work?
- Which tools sound most useful? Less useful?
- Who else should we reach out to about this project? Any groups or specific individuals?
- What would a successful project look like?
- What tradeoffs are acceptable?
- What role can DOT take to make Hillside Av work better?
