

New York City Department of Transportation Street Design Checklist "NYC Admin Code §19-182.2"

Pursuant to §19-182.2, this checklist was created New York City Department of Transportation ("NYC DOT") as a standard checklist of safety-enhancing street design elements that the department must consider for all Major Transportation Projects (MTP). An MTP is a project that, after construction will alter four or more consecutive blocks or 1,000 consecutive feet, of street, whichever is less, involving a major realignment of roadway, including either the removal of vehicular lane(s) or full time removal of parking lane(s), or the addition of vehicle lane(s).

NYC DOT is required to post such standard checklists on its website prior to the implementation of each MTP. NYC DOT may amend the standard checklist by rule only to promote vehicular, pedestrian and bicycle safety.
