

Welcome

Dear Patient,

Welcome to North Central Bronx Hospital (NCBH), a pillar of the Norwood community. Our vision is to be a model hospital and the hospital of choice for the North Bronx. Our major goals include excellent patient care, patient satisfaction, staff satisfaction, community satisfaction and fiscal viability. We represent the best that a community hospital has to offer: safe, quality healthcare delivered by caring and friendly staff in your very own neighborhood.

Our programs and services are designed for the specific medical and healthcare needs of our community. Many members of our team live in the community, and are known to the patients they serve.

NCBH continues to uphold its sterling reputation as a premier provider of primary care, women's healthcare, children's health services, asthma services, geriatric medicine, behavioral health services and more.

We are honored by your confidence in the services we offer at North Central Bronx Hospital. Thank you for choosing us for your healthcare needs.

Sincerely,

Gregory Calliste
