2. Staffing

There was a minor decrease in the percentage of posts staffed with steady staff from the previous month due to the opening of additional posts. d. *Provide a plan/timeline for being able to provide the number of classes offered and average number of participants for programming in comingled units.*

DOC faces a number of challenges to providing this level of programming data for comingled units, including the following:

- The census throughout the agency changes daily, and within a reporting period, some units may not remain comingled, while others may become comingled as young adults may be transferred in or out.
- DOC does not have an automatic mechanism for tracking comingled units on a daily basis, which would be required in order to report on daily programming for all young adults in DOC custody. Doing so manually is administratively time consuming.

In order to address these challenges and provide the requested data, the Adult Programming Division is creating additional reporting requirements which will ease the administrative burden and streamline the reporting process for program providers. DOC’s IT division will create a template to auto-report the Young Adults and Adults in each unit, which will be sent daily to Adult Programs staff. Adult Programs will create a template to track and report data. Once the IT reporting and template has been established, Adult Programs will then train all applicable staff. This is anticipated to be operational in one month.
