

<b>Course Required for:</b>	<input checked="" type="checkbox"/> Worker Training <input checked="" type="checkbox"/> License Qualification
<b>Purpose:</b>	<p>This course is a requirement for an individual – who is not a licensed rigger or a designated foreman of a licensed rigger – to maintain their designation to supervise the hoisting or lowering of articles on the outside of a building with hoisting equipment. In lieu of completing this course, an individual may instead possess a Department-Approved national rigging certification.</p> <p>As of January 1, 2025, it is also a prerequisite to renewing licensure as a Master Rigger, the applicant must successfully complete a Department-Approved Rigging Supervisor Refresher course that is at least 16 hours in length and meets the requirements of Section 3316.9.2 of the New York City Building Code as mandated by 1 RCNY §104-06.</p>
<b>Duration:</b>	16 Hours of instructional time, excluding breaks and meals
<b>Class Size:</b>	1 – 30 Trainees
<b>NYC Requirement:</b>	<p>To continue to supervise the hoisting or lowering of articles on the outside of a building with hoisting equipment – and a licensed rigger or designated rigging foreman is not required for such work – an individual must either (i) complete this refresher training course every four years following the completion of the 32-Hour Rigging Supervisor course and every four years thereafter, or (ii) possess a Department-Approved national rigging certification.</p> <p>As a prerequisite to renewing licensure as a Master Rigger on or after January 1, 2025, the applicant must successfully complete a Department-Approved rigging supervisor course that is at least sixteen (16) hours in length and meets the requirements of Section 3316.9.2 of the New York City Building Code as mandated by 1 RCNY §104-06.</p>
<b>Delivery Requirements:</b>	<p>Where the Instruction Delivery Method indicates:</p> <ul style="list-style-type: none"><li>• Classroom Lecture/Discussion w A/V (Audio-Visual): the instruction may be delivered by virtual live classroom; however, self-study modules are not permissible.</li></ul>
<b>Facility Requirements:</b>	<p>The Training Facility used by the Course Provider must:</p> <ul style="list-style-type: none"><li>• Have sufficient room to accommodate all expected attendees and the equipment needed to perform hands-on exercises where required as part of the course.</li><li>• Make provisions for the presentation of training material in all media types (computer, projector, video/DVD player, etc.).</li><li>• Comply with all applicable laws, rules and regulations relating to occupancy, zoning, egress, fire detection, fire suppression, light, ventilation, cleanliness, sanitary facilities, emergency notification and evacuation procedures.</li></ul> <p>Training may be held at construction sites, provided the above requirements are met.</p>
<b>Instructor Requirements:</b>	<p>To deliver this course the instructor(s) must:</p> <ul style="list-style-type: none"><li>• Demonstrate that he or she is credentialed or trained in instructional methods and learning processes. The instructor(s) must also successfully demonstrate his or her ability to solve or resolve problems relating to the subject matter by possession of a recognized degree, certificate, licensure, or professional standing, or by extensive knowledge, training, and experience, in the subject matter being taught. To the extent that the course instructor(s) holds, or has held, a trade license issued by the Department, it must be in good standing and not be surrendered to, suspended by, or revoked by the Department.</li><li>• Comply with all applicable Federal, State, and local laws, rules and regulations, and the Department's Industry Code of Conduct.</li></ul>
<b>Course Requirements:</b>	<p>All topics listed under Course Content Requirements must be covered using the listed Instructional Delivery Method. The time dedicated to each outline topic should be appropriate for the course content and can vary depending on the trade or job performed by the licensee. The Instructional Delivery Materials used in this course must contain all current applicable NYC Construction Code references, current rules, policies and bulletins.</p> <p>All statistics referenced should reflect the latest publicly available statistics. The selection of Case Studies should prioritize incidents in NYC since the prior renewal period and contain relevant and illustrative photos where available.</p> <p>Refresher or Renewal Courses should focus on the updates since the prior renewal period.</p>
