The building will contain approximately 70 affordable units, of which 60 percent will be reserved as supportive housing units for formerly homeless households.

Such actions would facilitate the development of a seven-story commercial building within an M1-2 district in Brooklyn Community District 1 (CD 1). The building would contain a mix of industrial, office, and retail uses, with a total floor area of 134,222 sq. ft.

#### PROCUREMENT

#### "Compete To Win" More Contracts!

Thanks to a new City initiative - "Compete To Win" - the NYC Department of Small Business Services offers a new set of FREE services to help create more opportunities for minority and women-owned businesses to compete, connect and grow their business with the City. With NYC Construction Loan, Technical Assistance, NYC Construction Mentorship, Bond Readiness, and NYC Teaming services, the City will be able to help even more small businesses than before.

• Win More Contracts at nyc.gov/competetowin

"The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City's prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

#### **HHS ACCELERATOR**

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

#### **Participating NYC Agencies**

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS) Department for the Aging (DFTA) Department of Consumer Affairs (DCA) Department of Corrections (DOC)

Department of Health and Mental Hygiene (DOHMH)

Department of Homeless Services (DHS)

Department of Probation (DOP)

Department of Small Business Services (SBS)

Department of Youth and Community Development (DYCD)

Housing and Preservation Department (HPD) Human Resources Administration (HRA)

Office of the Criminal Justice Coordinator (CJC)

To sign up for training on the new system, and for additional information about HHS Accelerator, including background materials, user guides and video tutorials, please visit www.nyc.gov/hhsaccelerator.

DPR is seeking to evaluate and pre-qualify a list of general contractors (a "PQL") exclusively to conduct non-complex general construction site work involving the construction and reconstruction of DPR parks and playgrounds projects not exceeding \$3 million per contract ("General Construction").

By establishing contractor's qualification and experience in advance, DPR will have a pool of competent contractors from which it can draw to promptly and effectively reconstruct and construct its parks, playgrounds, beaches, gardens and green-streets. DPR will select contractors from the General Construction PQL for non-complex general construction site work of up to \$3,000,000.00 per contract, through the use of a Competitive Sealed Bid solicited from the PQL generated from this RFQ.

The vendors selected for inclusion in the General Construction PQL will be invited to participate in the NYC Construction Mentorship. NYC Construction Mentorship focuses on increasing the use of small NYC contracts, and winning larger contracts with larger values. Firms participating in NYC Construction Mentorship will have the opportunity to take management classes and receive on-the-job training provided by a construction management firm.

DPR will only consider applications for this General Construction PQL from contractors who meet any one of the following criteria:

#### AGENCY RULES

#### BUILDINGS

■ NOTICE

#### NOTICE OF ADOPTION OF RULE

**NOTICE IS HEREBY GIVEN,** pursuant to the authority vested in the Commissioner of the Department of Buildings by Section 643 of the New York City Charter and in accordance with Section 1043 of the Charter, that the Department of Buildings hereby adopts Section 3316-01 of Title 1 of the Official Compilation of the Rules of the City of New York, regarding rigging equipment and operations.

This rule was first published on August 3, 2018 and a public hearing thereon was held on September 6, 2018.

10/2/18 Dated: /s/ New York, NY Rick D. Chandler, P.E. Commissioner

#### Statement of Basis and Purpose of Rule

The Department of Buildings (DOB) is adopting this rule to establish regulations for rigging equipment and rigging operations. Rigging consists of the system of ropes, slings, hooks, and other hardware used to secure loads while they are being lifted or lowered by a crane or other hoisting machine.

The rule adopts national model standards published by the American Society of Mechanical Engineers (ASME) for rigging hardware, hooks, below-the-hook lifting devices, and slings. Additional New York City specific provisions are also adopted. Provisions for inspections, record keeping, and equipment identification are added to create a framework to verify compliance with the ASME standards. Restrictions on repairs, alterations, and modifications are added to ensure these activities are performed in accordance with manufacturer requirements. Other specific precautions for rigging operations and certain types of rigging equipment are adopted to prohibit practices that have led to past rigging failures in New York City.

Adoption of ASME rigging standards, with New York City modifications, was recommended by the Crane Safety Technical Working Group ("TWG"), appointed by Mayor Bill de Blasio and Buildings Commissioner Rick Chandler following the February 2016 crane collapse in Tribeca (TWG recommendation #8).

The Department of Buildings' authority for these rules is found in Sections 643 and 1043 of the New York City Charter and Sections 3316.9 and 3319.9 of the New York City Building Code.

New material is underlined.
[Deleted material is in brackets.]

"Shall" and "must" denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

Chapter 3300 of Title 1 of the Rules of the City of New York is amended by adding a new Section 3316-01, to read as follows:

#### §3316-01 Rigging operations and rigging equipment

- (a) Applicability. This section applies to rigging operations performed in connection with the hoisting or lowering of articles on the outside of a building and all rigging equipment utilized in connection with such operations.
- (b) Definitions. For the purposes of this section, terms defined in Chapter 33 of the New York City Building Code and Section 3319-01 of these rules have the same meaning here.
- (c) Manufacturer specifications, design, and capacity restrictions. Rigging operations must be performed, and rigging equipment utilized, in accordance with specifications and rated capacities established by the manufacturer of the rigging equipment and the manufacturer of the object to be hoisted or lowered. In addition, where plans or design documents are provided, the rigging operations must be performed in accordance with such plans or design documents.
  - **Exceptions:** Deviations from the manufacturer specifications and rated capacities are allowed provided they are in accordance with design drawings prepared by a registered design professional who has demonstrated knowledge and experience with rigging. Such design drawings must clearly indicate the deviations from the manufacturer specifications and rated capacities.
- (d) Precautions. The following precautions must be observed during rigging operations.
  - (1) Tag lines. A tag or restraint line must be used where a load could be subject to rotation that would pose a hazard.
  - (2) Releasing the load. The rigging supervisor required by Section 3316.9.1 of the New York City building code is required to ensure that no load is released from the hoisting line or otherwise deposited until either:
    - The load is securely attached in place to the building or structure; or
    - (ii) The load has been placed on a surface or structure capable of supporting the load.
  - (3) Shock loading. Precautions must be taken to avoid shock loading.
  - (4) Makeshift links or fasteners. Makeshift links or fasteners formed from bolts or rods, or other such attachments are prohibited.
  - (5) Job built equipment. Job built rigging equipment must be designed by a registered design professional who has demonstrated knowledge and experience with rigging. Signed and sealed drawings for the job built rigging equipment must be kept at the site at all times.
- (e) Slings. Slings must be utilized in accordance with the requirements of this subdivision and ASME B30.9. Where differences occur between the provisions of this section and referenced standards, the provisions of this section apply.
  - (1) Repairs, alterations, and modifications. Slings may only be repaired, altered, or modified by the manufacturer of the sling, or an entity authorized by the manufacturer.

- **Exception:** Missing or illegible identification tags may be replaced by a qualified person in accordance with the requirements of the manufacturer of the sling.
- (2) Inspections. The frequent inspection required by ASME B30.9 must be performed prior to each shift by the individual responsible for supervising the rigging operation in accordance with Section 3316.9 of the New York City Building Code. Where synthetic slings are utilized, the softening mechanisms must also be inspected as part of the frequent inspection. The periodic inspection and other inspections required by ASME B30.9 must be performed by a competent person designated by the owner of the sling at the intervals prescribed by ASME B30.9.
  - (i) Additional inspection for synthetic slings.

    Synthetic materials can be degraded by exposure to sunlight or ultraviolet light. Manufacturer recommendations for the inspection of synthetic slings to determine the damage from sunlight or ultraviolet light must be followed.
- (3) Records. Where ASME B30.9 requires a record or documentation of an inspection or test, such record or documentation must be signed and dated by the individual who performed the inspection or test, and must be maintained by the owner of the sling.
- (4) Identification. Tags or similar identification on the sling must be legible.
- (5) Discarded rope. Discarded rope cannot be used for slings.
- (6) Weakest component. Hooks, rings, oblong links, pear shaped links, welded or mechanical coupling links, or other attachments must have a rated capacity at least equal to that of the sling with which they are used.
- (7) Protection of synthetic slings from edges, corners, or protrusions. Synthetic slings cannot be used unless softening mechanisms have been applied to all edges, corners, or protrusions.
- (8) Use of synthetic slings in conjunction with climber or tower crane erection, jumping, climbing, and dismantling. Synthetic slings can only be used in conjunction with climber or tower crane erection, jumping, climbing, and dismantling if the manufacturer's manual specifically states or recommends the use of synthetic slings.
- (f) Below-the-hook lifting devices. Below-the-hook lifting devices must be utilized in accordance with the requirements of this subdivision and ASME B30.20. Where differences occur between the provisions of this section and referenced standards, the provisions of this section apply.
  - (1) Repairs, alterations, and modifications. Below-the-hook lifting devices may only be repaired, altered, or modified by the manufacturer of the device, or an entity authorized by the manufacturer.
    - **Exception:** Missing or illegible identification tags may be replaced by a qualified person in accordance with the requirements of the manufacturer of the below-the-hook lifting device.
  - (2) Inspections. The frequent inspection required by ASME
    B30.20 must be performed prior to each shift by the
    individual responsible for supervising the rigging operation
    in accordance with Section 3316.9 of the New York City
    Building Code. The periodic inspection and other inspections
    required by ASME B30.20 must be performed by a competent
    person designated by the owner of the below-the-hook lifting
    device at the intervals prescribed by ASME B30.20.

- 2. Safety latches may be replaced by a qualified person in accordance with the requirements of the manufacturer of the rigging hardware.
- (2) Inspections. The frequent inspection required by ASME

  individual responsible for supervising the rigging operation
  in accordance with Section 3316.9 of the New York City
  Building Code. The periodic inspection and other inspections
  required by ASME B30.26 must be performed by a competent
  person designated by the owner of the rigging hardware at
  the intervals prescribed by ASME B30.26.
- (3) Records. Where ASME B30.26 requires a record or documentation of an inspection, calibration, or test, such record or documentation must be signed and dated by the individual who performed the inspection, calibration, or test, and must be maintained by the owner of the rigging hardware.
