

WHAT SHOULD CITY FLEET OPERATORS DO?

- City fleet drivers should go about their daily lives, but take certain precautions:
 - Fleet drivers are encouraged to wipe down their vehicles at least once daily.
 - Standard cleaning & disinfection products are recommended (e.g. Clorox, Purell, Peroxide multi-purpose cleaner).
 - Car washing services are not necessary.
 - Pay special attention to disinfecting surfaces and objects that are touched often, such as door handles, arm rests, and seatbelts, as appropriate.
 - Please work through your agency procurement department for supplies.
- **OTHER GENERAL GUIDANCE FROM THE DEPARTMENT OF HEALTH IS BELOW:**
 - Get the flu shot—it's not too late. Although the flu shot will not protect you from COVID-19, it will help prevent the flu which has similar symptoms to this coronavirus.
 - Cover your coughs and sneezes with a tissue or your sleeve (not your hands).
 - Wash hands often with soap and warm water for at least 20 seconds.
 - Use an alcohol-based hand sanitizer if soap and water are not available.
 - Do not touch your eyes, nose, or mouth with unwashed hands.
 - If you feel sick, contact your agency, stay home.
 - If you have fever, cough and/or shortness of breath, and recently traveled to an area with [ongoing spread of coronavirus](#), or have been in close contact with someone who has recently traveled to any of those areas, go to your doctor.
 - If you have these symptoms, but no travel history, contact your agency, stay home and call your doctor.

AT THIS TIME, FLEET OPERATORS DO NOT NEED TO:

- Limit travel within the city.
- Avoid public gatherings and public transportation.
- Wear a face mask if you are not sick. Face masks are only recommended if directed by a health care provider.
- People wear protective face masks for many reasons, including seasonal allergies, pollution or protecting those around them from a common cold. They should **not** be harassed or targeted for wearing one.

THE NYC HEALTH DEPARTMENT MAY CHANGE RECOMMENDATIONS AS THE SITUATION EVOLVES

- For up to date information, you can visit the Health Department's [website](#) and [social media channels](#), which are routinely updated and a trusted source. We are including these links below, as well as a link to a [public fact sheet](#).
