Protect Yourself and Others From Mpox

Get your two-dose mpox (monkeypox) vaccine. It is never too late to get the second dose. To find a vaccination site, visit nyc.gov/vaccinefinder.

Do not have sex or other intimate contact if you or your partners have a new rash or sores, feel sick, or were recently exposed to mpox. Ask your partners whether they have mpox symptoms and about their recent sexual history.

Frequently wash your hands, bedding, towels and other shared items. Sex toys should be washed after each use.

Talk to your health care provider about testing, pain management and treatment if you have symptoms you think could be mpox. If you do not have a provider, call 311 to get connected to care.

For more information, visit nyc.gov/mpox or scan the QR code.
