ESCR AMPHITHEATER CANOPY STRUCTURE

PROJECT TIMELINE

Subject to Change

WHAT WE HEARD & DESIGN UPDATES

- SEATING AND ACCESSIBILITY
- CAPACITY
- **ACOUSTICS**
- EVENT NEEDS: RESTROOMS
- EVENT NEEDS: POWER
- EVENT NEEDS: LOADING
- **STAKEHOLDER COORDINATION**
- SITE DESIGN UPDATES
- **STRUCTURE**

WHAT WE HEARD: STRUCTURE

- **Existing amphitheater structure is important to community and park identity**
- **Structure provides a sense of arrival and anticipation crossing the Corlears Hook Bridge into the park**

Draft Environmental Impact Statement (DEIS) Now Available for Review and Comments

The East Side Coastal Resiliency Project

The East Side Coastal Resiliency (ESCR) Project is a coastal protection initiative, jointly funded by the City of New York and the federal government, aimed at reducing flood risk due to coastal storms and sea level rise on Manhattan's East Side from East 25th Street to Montgomery Street.

The ESCR Project is a priority of the City of New York as outlined in the 2015 *One New York: The Plan for a Strong and Just City* and by the innovative Rebuild by Design competition sponsored by the U.S. Department of Housing and Urban Development (HUD). The project design intends to integrate flood protection into the community fabric, improving access to the waterfront rather than walling off the neighborhood.
