- Office building renovations , Laborer
- Assistant Office Engineer
Part time college & part time work
- Construction Inspector through Senior Inspector
- Office Engineer
- **Resident Engineer for ESCR (LiRo)**

What I like to share:

When I graduated the Civil program, I thought that I would become a designer and was excited to get started. At the time the job market was slow. When an opportunity came up to help manage construction on a NYC bridge project, I took the job for the experience until I could find one in design. Almost 30 years later I am grateful to have such an interesting and challenging career that makes a positive impact on society. As someone once said to me, we all have an idea of what we want to do, but eventually we find the place we need to be.

“ Some of the jobs I had in college and on my way up the ranks seemed insignificant in the moment. But time and time again, I find myself drawing upon those experiences, and I am grateful for having them. ”
