2000 Census

POPULATION
2000 Census and Change (1990 - 2000)

Population > Population and Housing Characteristics > 2000 Census and Change (1990 - 2000)

Data from the 2000 Census offer detailed information on New York City, enabling users to paint statistical portraits in a number of ways. Information is presented in the following sections:

Profiles of Census characteristics provide a large number of data items for various geographic areas. For example, the Socioeconomic Profiles provide six pages of characteristics that include high school graduates, median family income, and percent below poverty, as part of a profile that is displayed separately for each Community District.

- Demographic Profiles | Socioeconomic Profiles

Tables of Census characteristics provide detailed information on a single topic at various geographic levels. For example, detailed data on all income categories for persons in all 59 Community Districts is presented in a single table.

- Demographic Tables | Socioeconomic Tables | Journey to Work Tables

Maps of selected Census characteristics provide information on the distribution of a specific characteristic. For example, the number of children below the poverty line is mapped for all 2,217 census tracts in New York City.

- Demographic Maps | Socioeconomic Maps | Journey to Work Maps

Demographic Tables | Demographic Maps | Census Briefs | Census Challenge

***NTAs, or Neighborhood Tabulation Areas**, are aggregations of census tracts that are subsets of New York City's 55 Public Use Microdata Areas (PUMAs). Primarily due to these constraints, NTA boundaries and their associated names may not definitively represent neighborhoods. View NTA map, list, tract equivalency. Download NTA to tract equivalency.

POPULATION
American Community Survey

For the latest city and borough population totals, visit the Current Population Estimates section.

IMPORTANT INFORMATION ABOUT THE ACS: The Decennial Census and the American Community Survey (ACS)

USING MULTI-YEAR ESTIMATES: Special Note about Multi-year Estimates

*The 55 Census designated PUMA subareas approximate NYC community districts and are not coterminous. They must have a population of at least 100,000 persons. View PUMA/CD Map

POPULATION

Current Population Estimates

Current Estimates of New York City's Population for July 2013

Introduction

The U.S. Census Bureau prepares estimates of total population for all counties in the United States on an annual basis, using a demographic procedure known as the "administrative records method" (described below). This method assumes that post-census population change can be closely approximated by vital statistics data on births and deaths, along with other administrative and survey data that provide a picture of migration patterns.

Census Bureau Estimates for July 1, 2013

Total Population

According to Census Bureau population estimates, New York City's population increased from 8,175,133[1] in April of 2010 to 8,405,837 in July of 2013. This is an increase of 230,704 residents or about 2.8 percent over the 2010 mark. The largest change in the city's population occurred in Brooklyn, growing by 3.5 percent or 87,400 persons, followed by Queens (2.9 percent or 65,500 persons), Manhattan (2.5 percent or 40,300 persons), and the Bronx (2.4 percent or 33,600 persons). Staten Island (0.8 percent or 3,900 persons) showed the smallest gains over the 39 month period.

New York City's population increase since April of 2010 represented 84.5 percent of the total increase in New York State, which slightly raised the city's share of the State's population, from 42.2 percent to 42.8 percent.

Change in Population, Census Bureau Estimates
April 2010 to July 2013

	Census 2010	Census Estimates 2013	Change: Census 2010 and Estimates 2013 Number	Percent
New York State	19,378,102	19,651,127	273,025	1.4
New York City	**8,175,133**	**8,405,837**	**230,704**	**2.8**
Bronx	1,385,108	1,418,733	33,625	2.4
Brooklyn	2,504,700	2,592,149	87,449	3.5
Manhattan	1,585,873	1,626,159	40,286	2.5
Queens	2,230,722	2,296,175	65,453	2.9
Staten Island	468,730	472,621	3,891	0.8

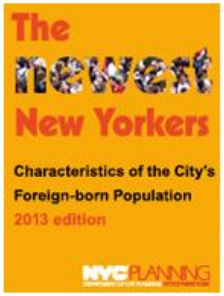
Newest New Yorkers 2013 edition



This is the latest volume in The Newest New Yorker series, which began in 1992 with the publication of *The Newest New Yorkers: An Analysis of Immigration to New York City in the 1980s*, and continued with *The Newest New Yorkers, 1990-1994*, *The Newest New Yorkers, 1995-1996*, and *The Newest New Yorkers, 2000*, which was released in 2005. The 2013 edition of *The Newest New Yorkers* builds on the preceding volume and provides detailed analyses of the latest available data. It continues a tradition of providing comprehensive information on the foreign-born to policy makers, program planners, and service providers, to help them gain perspective on a population that continues to reshape the city.

Estimate of the Potential for New Housing Units

- DCP Initiatives/Rezonings
  - Up-zoning Areas for increased housing opportunity
- Private Development Projects
  - Large private developments that generate new housing
- Public Development Projects
  - NYCHA, HPD, and City-Owned Sites
- Areas of Opportunity
  - Increased housing along major corridors & thoroughfares
- Background Growth
  - Soft Site analysis and Underutilized Areas

Constraints

- Carrying Capacity of the Infrastructure
  - Existing water supply and sewer capacity
- Land Development Needs of Public Facilities
  - Including schools, parks, libraries, police and fire depts.
- Non-Residential Uses
  - Prohibits residential development
