ITEM 5: PROJECT DESCRIPTION

**Premises: Tax Block 701, Lots 1, 3, 5, 6, 8, 9, 77, 78, and 108)
Queens, New York**

I. INTRODUCTION

The applicant, Vlacich LLC, is seeking a zoning map amendment to rezone a portion of Block 701 (Lots 1, 3, 5, 6, 8, 9, 77, 78, and 108) in the Astoria neighborhood of Queens, New York (the "Rezoning Area") from an R5 district to an R5/C1 -2 district by imposing a 150' deep C1-2 commercial overlay along the entire 28th Avenue frontage of Block 701. The Rezoning Area is bounded by 42nd Street, 28th Avenue, 43rd Street and a line parallel to and 150' feet north of 28th Avenue. The Rezoning Area is comprised of 9 tax lots, with a total area of approximately 30,000 square feet. Tax Lots 5, 6, 9 and 108 are owned by the applicant, and total approximately 13,225 square feet in area (the "Subject Property"). The proposed action would facilitate the currently existing use of portions of Lot 5 and Lot 9 on Block 701 as off-site accessory parking for the legal nonconforming restaurant on Lot 6, while bringing the existing mixed-use development in the Rezoning Area into conformance.

II. DESCRIPTION OF EXISTING CONDITIONS

The Subject Property is developed with four buildings on four tax lots, three of which are residential and one mixed-use. Tax Lot 5 is developed with a two-story residential building and 4 accessory parking spaces for the adjacent residential use on Lot 5, Lot 6 is developed with a two-story mixed-use building (legal non-conforming restaurant on ground floor, residential above), Lot 9 is developed with a two-story residential building and 18 accessory parking spaces, and Lot 108 is developed with a two-story semi-detached residence. The mixed-use building on Lot 6 was built in or around 1947 to house a restaurant and stores on the ground floor and a dwelling unit and dental offices above. The dental offices were converted to a second dwelling unit in or around 2005, and a restaurant (Piccolo Venezia) occupies the entire ground floor as a legal non-conforming commercial use. Piccolo Venezia is a longstanding neighborhood establishment, family-owned and operated since opening 38 years ago, in 1973. The NYC Department of Buildings has issued violations for the existing illegal parking lot use of Lot 9 (see Appendix A).

Of the remaining tax lots in the Rezoning Area, Lot 8 is approximately 1,500 square feet in area and developed with a one-story semi-detached residence. Lot 3 is approximately 6,150 square feet in area, and developed with a five-story mixed use building (stores on ground floor, residential above). Lot 1 is approximately 4,000 square feet in area, and developed with a four-story mixed use building (stores on ground floor, residential above). Lot 77 is approximately 2,275 square feet in area and developed with a three-story residential building. Lot 78 is approximately 2,682 square feet in area and developed with a three-story residential building.

The Rezoning Area and the surrounding area (within 400') are located within an R5 zoning district. To the west of Rezoning Area, there is an existing 150' deep C2-2 overlay on the north side of 28th Avenue and 41st Street, and a 150' deep C1-2 overlay on the south side of 28th Street and 41st Street, as shown on the Area Map submitted with this application.

The land uses in the surrounding area are mainly residential, both multi- and single-family, along with some non-conforming mixed-use commercial and residential buildings. The Rezoning Area is

predominantly characterized by mixed-use buildings with non-conforming ground-floor commercial use, fronting on 28th Avenue. The remainder of Block 701 beyond the Rezoning Area is primarily developed with attached and semi-detached 2- and 3-story residential buildings and a few 4-story multiple dwellings, typical of the surrounding area.

III. PURPOSE AND NEED FOR PROPOSED ACTION

The proposed rezoning will bring several existing commercial uses in the Rezoning Area into conformance and better reflect the character of existing development. The Rezoning Area has never been rezoned, despite the overwhelmingly commercial character of the 28th Avenue frontage of Block 701. The proposed rezoning would also facilitate the use of portions of Lots 5 and 9 on Block 701 of the Subject Property for off-site accessory parking for the legal non-conforming restaurant on Lot 6 by allowing commercial use.

IV. DESCRIPTION OF PROPOSED ACTION

The proposed rezoning would change the Rezoning Area from an R5 zoning district to an R5/C1-2 district, which is a medium-density district which permits residential and community facility development, as well as commercial development and mixed-use buildings. The C1-2 district is the most appropriate commercial overlay for the Rezoning Area as it will bring into conformance almost all the existing non-conforming commercial uses in the Rezoning Area, while prohibiting more intensive commercial uses that will be out of character with the residential development along the side streets.

In a mixed residential/commercial building, the commercial use must be located beneath the residential use. The C1-2 commercial overlay would permit Use Groups 1-6, with a maximum 1.0 FAR for commercial uses. C1-2 districts are intended for local retail and service businesses that serve the surrounding area and do not create significant parking demand. The regulations of the residential district in which the C 1-2 overlay is mapped generally govern residential bulk, but certain regulations are waived, including front and side yard requirements.

If the proposed action is approved, the proposed rezoning would facilitate the use of portions of Lots 5 and 9 on Block 701 as attended off-street accessory parking spaces for the legally non-conforming restaurant on Lot 6 of the Subject Property and would bring into conformance the existing mixed-use development in the Rezoning Area, which includes the 2-story building with ground floor restaurant use on Lot 6, a 5-story building with ground floor retail use on Lot 3 and a 4-story building with ground floor retail use on Lot 1.

If the proposed action is not approved, the 18 accessory parking spaces on Lot 9 would be removed, the 4 accessory parking spaces on Lot 5 would continue to be used as accessory parking for the adjacent residential use, and the existing ground floor retail uses on Lots 1 and 3 would be converted to community facility uses (as stated in the RWCDS, Future No Action Condition). Patrons of the legal non-conforming restaurant would then have to seek on-street parking in the surrounding area.

V. Reasonable Worst Case Development Scenario

Future No-Action Condition

In the future without the action, the Reasonable Worst Case Development Scenario (RWCDs) on the project site would be the following.

No changes would occur to the existing conditions on the project site described above with the following exceptions:

- The 18 accessory parking spaces on Lot 9 would be removed.
- The 4 accessory parking spaces on Lot 5 would continue to be used as accessory parking for the adjacent residential use on Lot 5.
- The 1,480 square feet of retail space on Lot 1 would be converted to community facility use.
- The 1,476 square feet of retail space on Lot 3 would be converted to community facility use.

Future With-Action Condition

In the future with the action, the RWCDs on the project site would include following:

- The existing legal non-conforming restaurant on restaurant on Lot 6 would be made conforming under the proposed C1-2 commercial overlay (No Change Site #1).
- The 18 accessory parking spaces on Lot 9 would be made conforming under the proposed C1-2 commercial overlay (Projected Site #1).
- The 4 accessory parking spaces on Lot 5 would be used as accessory parking for the restaurant on Lot 6 and would conform with the proposed C1-2 commercial overlay (Projected Site #2).
- The 1,480 square feet of retail space on Lot 1 would be made conforming under the proposed C1-2 commercial overlay (Potential Site #1).
- The 1,476 square feet of retail space on Lot 3 would be made conforming under the proposed C1-2 commercial overlay (Potential Site #2).

8. Site Description: Except where otherwise indicated, provide the following information with regard to the directly affected area. The directly affected area consists of the project site and the area subject to any change in regulatory controls.

GRAPHICS The following graphics must be attached and each box must be checked off before the EAS is complete. Each map must clearly depict the boundaries of the directly affected area or areas and indicate a 400-foot radius drawn from the outer boundaries of the project site. Maps may not exceed 11x17 inches in size and must be folded to 8.5 x 11 inches for submission

- Site location map
 Zoning map
 Photographs of the project site taken within 6 months of EAS submission and keyed to the site location map
 Sanborn or other land use map
 Tax map
 For large areas or multiple sites, a GIS shape file that defines the project sites

PHYSICAL SETTING (both developed and undeveloped areas)

Total directly affected area (sq. ft.): 30,000 SF	Type of Waterbody and surface area (sq. ft.):	Roads, building and other paved surfaces (sq. ft.)
--	---	--

Other, describe (sq. ft.):

9. Physical Dimensions and Scale of Project (if the project affects multiple sites, provide the total development below facilitated by the action)

Size of project to be developed: N/A (gross sq. ft.)

Does the proposed project involve changes in zoning on one or more sites? YES NO

If 'Yes,' identify the total square feet owned or controlled by the applicant: 13,224.78 SF Total square feet of non-applicant owned development: 16,773.72 SF

Does the proposed project involve in-ground excavation or subsurface disturbance, including but not limited to foundation work, pilings, utility lines, or grading? YES NO

If 'Yes,' indicate the estimated area and volume dimensions of subsurface disturbance (if known):

Area: sq. ft. (width x length) Volume: cubic feet (width x length x depth)

DESCRIPTION OF PROPOSED USES (please complete the following information as appropriate)

	Residential	Commercial	Community Facility	Industrial/Manufacturing
Size (in gross sq. ft.)		legalize 2,956 sf retail		
Type (e.g. retail, office, school)	units	legal 18 pkg sp; 4 sp for com'l use		

Does the proposed project increase the population of residents and/or on-site workers? YES NO Number of additional residents? Number of additional workers?

Provide a brief explanation of how these numbers were determined: No increase in population of residents or on-site workers is proposed.

Does the project create new open space? YES NO if Yes (sq. ft.)

Using Table 14-1, estimate the project's projected operational solid waste generation, if applicable: N/A (pounds per week)

Using energy modeling or Table 15-1, estimate the project's projected energy use: N/A (annual BTUs)

Has a No-Action scenario been defined for this project that differs from the existing condition? YES NO If 'Yes,' see Chapter 2, "Establishing the Analysis Framework" and describe briefly:

In the case that the proposed action is not approved, the existing 18 accessory parking spaces on lot 9 would be removed, 4 accessory parking space on Lot 5 would continue to be used as accessory parking for the residential use on Lot 5, and the existing ground floor retail uses on Lots 1 and 3 would be converted to community facility uses (as described in the RWCDs, Future No-Action Condition).

10. Analysis Year [CEQR Technical Manual Chapter 2](#)

ANTICIPATED BUILD YEAR (DATE THE PROJECT WOULD BE COMPLETED AND OPERATIONAL): 2013 ANTICIPATED PERIOD OF CONSTRUCTION IN MONTHS: 0

WOULD THE PROJECT BE IMPLEMENTED IN A SINGLE PHASE? YES NO IF MULTIPLE PHASES, HOW MANY PHASES:

BRIEFLY DESCRIBE PHASES AND CONSTRUCTION SCHEDULE:

11. What is the Predominant Land Use in Vicinity of Project? (Check all that apply)

RESIDENTIAL MANUFACTURING COMMERCIAL PARK/FOREST/OPEN SPACE OTHER, Describe:

PART II: TECHNICAL ANALYSES

INSTRUCTIONS: The questions in the following table refer to the thresholds for each analysis area in the respective chapter of the CEQR Technical Manual.

- If the proposed project can be demonstrated not to meet or exceed the threshold, check the 'NO' box.
- If the proposed project will meet or exceed the threshold, or if this cannot be determined, check the 'YES' box.
- Often, a 'Yes' answer will result in a preliminary analysis to determine whether further analysis is needed. For each 'Yes' response, consult the relevant chapter of the CEQR Technical Manual for guidance on providing additional analyses (and attach supporting information, if needed) to determine whether detailed analysis is needed. Please note that a 'Yes' answer does not mean that an EIS must be prepared—it often only means that more information is required for the lead agency to make a determination of significance.
- The lead agency, upon reviewing Part II, may require an applicant either to provide additional information to support this Short EAS Form or complete a Full EAS Form. For example, if a question is answered 'No,' an agency may request a short explanation for this response. In addition, if a large number of the questions are marked 'Yes,' the lead agency may determine that it is appropriate to require completion of the Full EAS Form.

	YES	NO
1. LAND USE, ZONING AND PUBLIC POLICY: CEQR Technical Manual Chapter 4		
(a) Would the proposed project result in a change in land use or zoning that is different from surrounding land uses and/or zoning? Is there the potential to affect an applicable public policy? If "Yes", complete a preliminary assessment and attach.	✓	
(b) Is the project a large, publicly sponsored project? If "Yes", complete a PlaNYC assessment and attach.		✓
(c) Is any part of the directly affected area within the City's Waterfront Revitalization Program boundaries? If "Yes", complete the Consistency Assessment Form .		✓
2. SOCIOECONOMIC CONDITIONS: CEQR Technical Manual Chapter 5		
(a) Would the proposed project:		
• Generate a net increase of 200 or more residential units?		✓
• Generate a net increase of 200,000 or more square feet of commercial space?		✓
• Directly displace more than 500 residents?		✓
• Directly displace more than 100 employees?		✓
• Affect conditions in a specific industry?		✓
3. COMMUNITY FACILITIES: CEQR Technical Manual Chapter 6		
(a) Does the proposed project exceed any of the thresholds outlined in Table 6-1 of Chapter 6 ?		✓
4. OPEN SPACE: CEQR Technical Manual Chapter 7		
(a) Would the proposed project change or eliminate existing open space?		✓
(b) Is the proposed project within an underserved area in the Bronx , Brooklyn , Manhattan , Queens , or Staten Island ? If "Yes," would the proposed project generate 50 or more additional residents? If "Yes," would the proposed project generate 125 or more additional employees?		✓
(c) Is the proposed project in a well-served area in the Bronx , Brooklyn , Manhattan , Queens , or Staten Island ? If "Yes," would the proposed project generate 300 or more additional residents? If "Yes," would the proposed project generate 750 or more additional employees?		✓
(d) If the proposed project is not located in an underserved or well-served area, would the proposed project generate: 200 or more additional residents? 500 additional employees?		✓

	YES	NO
5. SHADOWS: <i>CEQR Technical Manual Chapter 8</i>		
(a) Would the proposed project result in a net height increase of any structure of 50 feet or more?		✓
(b) Would the proposed project result in any increase in structure height and be located adjacent to or across the street from a sunlight-sensitive resource?		✓
6. HISTORIC AND CULTURAL RESOURCES: <i>CEQR Technical Manual Chapter 9</i>		
(a) Does the proposed project site or an adjacent site contain any architectural and/or archaeological resource that is eligible for, or has been designated (or is calendared for consideration) as a New York City Landmark, Interior Landmark or Scenic Landmark; is listed or eligible for listing on the New York State or National Register of Historic Places; or is within a designated or eligible New York City, New York State, or National Register Historic District?		✓
If "Yes," list the resources and attach supporting information on whether the project would affect any of these resources.		
7. URBAN DESIGN: <i>CEQR Technical Manual Chapter 10</i>		
(a) Would the proposed project introduce a new building, a new building height, or result in any substantial physical alteration to the streetscape or public space in the vicinity of the proposed project that is not currently allowed by existing zoning?		✓
(b) Would the proposed project result in obstruction of publicly accessible views to visual resources that is not currently allowed by existing zoning?		✓
8. NATURAL RESOURCES: <i>CEQR Technical Manual Chapter 11</i>		
(a) Is any part of the directly affected area within the Jamaica Bay Watershed? If "Yes," complete the Jamaica Bay Watershed Form .		✓
(b) Does the proposed project site or a site adjacent to the project contain natural resources as defined in section 100 of Chapter 11? If "Yes," list the resources and attach supporting information on whether the project would affect any of these resources.		✓
9. HAZARDOUS MATERIALS: <i>CEQR Technical Manual Chapter 12</i>		
(a) Would the project allow commercial or residential use in an area that is currently, or was historically, a manufacturing area that involved hazardous materials?		✓
(b) Does the project site have existing institutional controls (e.g. (E) designations or a Restrictive Declaration) relating to hazardous materials that preclude the potential for significant adverse impacts?		✓
(c) Would the project require soil disturbance in a manufacturing zone or any development on or near a manufacturing zone or existing/historic facilities listed in Appendix 1 (including nonconforming uses)?		✓
(d) Would the project result in the development of a site where there is reason to suspect the presence of hazardous materials, contamination, illegal dumping or fill, or fill material of unknown origin?		✓
(e) Would the project result in development where underground and/or aboveground storage tanks (e.g. gas stations) are or were on or near the site?		✓
(f) Would the project result in renovation of interior existing space on a site with potential compromised air quality, vapor intrusion from on-site or off-site sources, asbestos, PCBs or lead-based paint?		✓
(g) Would the project result in development on or near a government-listed voluntary cleanup/brownfield site, current or former power generation/transmission facilities, municipal incinerators, coal gasification or gas storage sites, or railroad tracks and rights-of-way?		✓
(h) Has a Phase I Environmental Site Assessment been performed for the site? If "Yes," were RECs identified? Briefly identify:		✓
10. INFRASTRUCTURE: <i>CEQR Technical Manual Chapter 13</i>		
(a) Would the proposed project result in water demand of more than one million gallons per day?		✓
(b) Is the proposed project located in a combined sewer area and result in at least 1,000 residential units or 250,000 SF or more of commercial space in Manhattan or at least 400 residential units or 150,000 SF or more of commercial space in the Bronx, Brooklyn, Staten Island or Queens?		✓
(c) Is the proposed project located in a separately sewered area and result in the same or greater development than that listed in Table 13.1 of Chapter 13 ?		✓
(d) Would the project involve development on a site five acres or larger where the amount of impervious surface would increase?		✓
(e) Would the project involve development on a site one acre or larger where the amount of impervious surface would increase and is located within the Jamaica Bay Watershed or in certain specific drainage areas including: Bronx River, Coney Island Creek, Flushing Bay and Creek, Gowanus Canal, Hutchinson River, Newtown Creek, or Westchester Creek?		✓
(f) Is the project located in an area that is partially sewered or currently unsewered?		✓
(g) Is the project proposing an industrial facility or activity that would contribute industrial discharges to a WWTP and/or generate contaminated stormwater in a separate storm sewer system?		✓
(h) Would the project involve construction of a new stormwater outfall that requires federal and/or state permits?		✓
11. SOLID WASTE AND SANITATION SERVICES: <i>CEQR Technical Manual Chapter 14</i>		
(a) Would the proposed project have the potential to generate 100,000 pounds (50 tons) or more of solid waste per week?		✓
(b) Would the proposed project involve a reduction in capacity at a solid waste management facility used for refuse or recyclables generated within the City?		✓

	YES	NO
12. ENERGY: CEQR Technical Manual Chapter 15		
(a) Would the proposed project affect the transmission or generation of energy?		✓
13. TRANSPORTATION: CEQR Technical Manual Chapter 16		
(a) Would the proposed project exceed any threshold identified in Table 16-1 of Chapter 16 ?		✓
(b) If "Yes," conduct the screening analyses, attach appropriate back up data as needed for each stage, and answer the following questions:		
(1) Would the proposed project result in 50 or more Passenger Car Equivalents (PCEs) per project peak hour? If "Yes," would the proposed project result in 50 or more vehicle trips per project peak hour at any given intersection? <i>**It should be noted that the lead agency may require further analysis of intersections of concern even when a project generates fewer than 50 vehicles in the peak hour. See Subsection 313 of Chapter 16, "Transportation," for information.</i>		
(2) Would the proposed project result in more than 200 subway/rail or bus trips per project peak hour? If "Yes," would the proposed project result, per project peak hour, in 50 or more bus trips on a single line (in one direction) or 200 subway trips per station or line?		
(3) Would the proposed project result in more than 200 pedestrian trips per project peak hour? If "Yes," would the proposed project result in more than 200 pedestrian trips per project peak hour to any given pedestrian or transit element, crosswalk, subway stair, or bus stop?		
14. AIR QUALITY: CEQR Technical Manual Chapter 17		
(a) <i>Mobile Sources:</i> Would the proposed project result in the conditions outlined in Section 210 of Chapter 17 ?	✓	
(b) <i>Stationary Sources:</i> Would the proposed project result in the conditions outlined in Section 220 of Chapter 17 ? If "Yes," would the proposed project exceed the thresholds in the Figure 17-3, Stationary Source Screen Graph ? (attach graph as needed)		✓
(c) Does the proposed project involve multiple buildings on the project site?	✓	
(d) Does the proposed project require Federal approvals, support, licensing, or permits subject to conformity requirements?		✓
(e) Does the proposed project site have existing institutional controls (e.g. E-designations or a Restrictive Declaration) relating to air quality that preclude the potential for significant adverse impacts?		✓
15. GREENHOUSE GAS EMISSIONS: CEQR Technical Manual Chapter 18		
(a) Is the proposed project a city capital project, a power plant, or would fundamentally change the City's solid waste management system?		✓
(b) If "Yes," would the proposed project require a GHG emissions assessment based on the guidance in Chapter 18 ?		
16. NOISE: CEQR Technical Manual Chapter 19		
(a) Would the proposed project generate or reroute vehicular traffic?	✓	
(b) Would the proposed project introduce new or additional receptors (see Section 124 of Chapter 19) near heavily trafficked roadways, within one horizontal mile of an existing or proposed flight path, or within 1,500 feet of an existing or proposed rail line with a direct line of site to that rail line?		✓
(c) Would the proposed project cause a stationary noise source to operate within 1,500 feet of a receptor with a direct line of sight to that receptor or introduce receptors into an area with high ambient stationary noise?		✓
(d) Does the proposed project site have existing institutional controls (e.g. E-designations or a Restrictive Declaration) relating to noise that preclude the potential for significant adverse impacts?		✓
17. PUBLIC HEALTH: CEQR Technical Manual Chapter 20		
(a) Would the proposed project warrant a public health assessment based upon the guidance in Chapter 20 ?		✓
18. NEIGHBORHOOD CHARACTER: CEQR Technical Manual Chapter 21		
(a) Based upon the analyses conducted for the following technical areas, check yes if any of the following technical areas required a detailed analysis: Land Use, Zoning, and Public Policy, Socioeconomic Conditions, Open Space, Historic and Cultural Resources, Urban Design and Visual Resources, Shadows, Transportation, Noise If "Yes," explain here why or why not an assessment of neighborhood character is warranted based on the guidance of in Chapter 21, "Neighborhood Character." Attach a preliminary analysis, if necessary.		✓

		YES	NO
19.	CONSTRUCTION IMPACTS: <i>CEQR Technical Manual Chapter 22</i> Would the project's construction activities involve (check all that apply):		
	• Construction activities lasting longer than two years;		✓
	• Construction activities within a Central Business District or along an arterial or major thoroughfare;		✓
	• Require closing, narrowing, or otherwise impeding traffic, transit or pedestrian elements (roadways, parking spaces, bicycle routes, sidewalks, crosswalks, corners, etc);		✓
	• Construction of multiple buildings where there is a potential for on-site receptors on buildings completed before the final build-out;		✓
	• The operation of several pieces of diesel equipment in a single location at peak construction;		✓
	• Closure of community facilities or disruption in its service;		✓
	• Activities within 400 feet of a historic or cultural resource; or		✓
	• Disturbance of a site containing natural resources.		✓

If any boxes are checked, explain why or why not a preliminary construction assessment is warranted based on the guidance of in Chapter 22, "Construction." It should be noted that the nature and extent of any commitment to use the Best Available Technology for construction equipment or Best Management Practices for construction activities should be considered when making this determination.

20. APPLICANT'S CERTIFICATION

I swear or affirm under oath and subject to the penalties for perjury that the information provided in this Environmental Assessment Statement (EAS) is true and accurate to the best of my knowledge and belief, based upon my personal knowledge and familiarity with the information described herein and after examination of pertinent books and records and/or after inquiry of persons who have personal knowledge of such information or who have examined pertinent books and records.

Still under oath, I further swear or affirm that I make this statement in my capacity as the

28TH AVENUE, ASTORIA REZONING

ENVIRONMENTAL ASSESSMENT STATEMENT

INTRODUCTION

Based on the analysis and the screens contained in the Environmental Assessment Statement Short Form, the only analysis areas that require further explanation include land use, zoning, and public policy, air quality, and noise as further detailed below. The subject heading numbers below correlate with the relevant chapters of the January 2012 *CEQR Technical Manual*.

4. LAND USE, ZONING, AND PUBLIC POLICY

Introduction

The applicant, Vlacich LLC, is seeking a zoning map amendment to rezone a portion of Block 701 (Lots 1, 3, 5, 6, 8, 9, 77, 78, and 108) in the Astoria neighborhood of Queens, New York (the "Rezoning Area") from an R5 district to an R5/C1-2 district by imposing a 150' deep C1-2 commercial overlay along the entire 28th Avenue frontage of Block 701. The Rezoning Area is bounded by 42nd Street, 28th Avenue, 43rd Street, and a line parallel to and 150' feet north of 28th Avenue. The Rezoning Area is comprised of 9 tax lots, with a total area of approximately 30,000 square feet. Tax Lots 5, 6, 9, and 108 are owned by the applicant, and total approximately 13,225 square feet in area (the "Subject Property"). The proposed action would facilitate the use of portions of Lots 5 and 9 on Block 701 as attended off-street accessory parking spaces for the legally non-conforming restaurant on Lot 6 while bringing the existing mixed-use development in the Rezoning Area into conformance.

Existing Conditions

The Subject Property is developed with four buildings on four tax lots, three of which are residential and one mixed-use. Tax Lot 5 is developed with a two-story residential building and 4 accessory parking spaces for the adjacent residential use on Lot 5, Lot 6 is developed with a two-story mixed-use building (legal non-conforming restaurant on the ground floor, residential above), Lot 9 is developed with a two-story residential building and 18 accessory parking spaces which are currently being illegally used for the restaurant on Lot 6, and Lot 108 is developed with a two-story semi-detached residence. The mixed-use building on Lot 6 was built in or around 1947 to house a restaurant and stores on the ground floor and a dwelling unit and dental offices above. The dental offices were converted to a second dwelling unit in or around 2005, and a restaurant (Piccolo Venezia) occupies the entire ground floor as a legal non-conforming commercial use. Piccolo Venezia is a longstanding neighborhood

establishment, family-owned and operated since opening 38 years ago, in 1973. The NYC Department of Buildings has issued violations for the existing illegal parking lot use of Lot 9 (see Appendix A).

Of the remaining tax lots in the Rezoning Area, Lot 8 is approximately 1,500 square feet in area and developed with a one-story semi-detached residence. Lot 3 is approximately 6,150 square feet in area, and developed with a five-story mixed-use building (stores on ground floor, residential above). Lot 1 is approximately 4,000 square feet in area, and developed with a four-story mixed-use building (stores on ground floor, residential above). Lot 77 is approximately 2,275 square feet in area and developed with a three-story residential building. Lot 78 is approximately 2,682 square feet in area and developed with a three-story residential building.

The Rezoning Area and the surrounding area (within 400') are located within an R5 zoning district. To the west of the Rezoning Area, there is an existing 150' deep C2-2 overlay on the north side of 28th Avenue and 41st Street, and a 150' deep C1-2 overlay on the south side of 28th Street and 41st Street, as shown on the Area Map submitted with this application.

The land uses in the surrounding area are mainly residential, both multi- and single-family, along with some non-conforming mixed-use commercial and residential buildings. The Rezoning Area is predominantly characterized by mixed-use buildings with non-conforming ground-floor commercial use, fronting on 28th Avenue. The remainder of Block 701 beyond the Rezoning Area is primarily developed with attached and semi-detached 2- and 3-story residential buildings and a few 4-story multiple dwellings, typical of the surrounding area.

Table 4-1 presents the existing development in the Proposed Rezoning Area.

Future No-Action Condition

In the future without the action, the Reasonable Worst Case Development Scenario (RWCDS) on the project site would be the following.

No changes would occur to the existing conditions on the project site described above with the following exceptions:

- The 18 accessory parking spaces on Lot 9 would be removed.
- The 4 accessory parking spaces on Lot 5 would continue to be used as accessory parking for the residential use on Lot 5.
- The 1,480 square feet of retail space on Lot 1 would be converted to community facility use.
- The 1,476 square feet of retail space on Lot 3 would be converted to community facility use.

It should be noted that although the existing restaurant on Lot 6 is not allowed under the property's existing R5 zoning, Lot 6 has a Certificate of Occupancy for a ground floor restaurant use so in the Future No-Action condition this legal use would remain.

Surrounding land uses within the immediate study area are expected to remain largely unchanged by the project build year of 2013. No development plans are known to exist for the study area by the project build year of 2013. The project study area is generally fully developed with few vacant parcels.

Table 4-1 presents the Future No-Action Condition RWCDs in the Proposed Rezoning Area.

Future With-Action Condition

The proposed rezoning would bring several existing commercial uses in the Rezoning Area into conformance and better reflect the character of existing development. The Rezoning Area has never been rezoned, despite the overwhelmingly commercial character of the 28th Avenue frontage of Block 701. The proposed action would facilitate the currently existing use of portions of Lot 5 and Lot 9 on Block 701 as off-site accessory parking for the legal nonconforming restaurant on Lot 6, while bringing the existing mixed-use development in the Rezoning Area into conformance.

The proposed rezoning would change the Rezoning Area from an R5 zoning district to an R5/CI-2 district, which is a medium-density district which permits residential and community facility development, as well as commercial development and mixed-use buildings. The CI-2 district is the most appropriate commercial overlay for the Rezoning Area as it would bring into conformance almost all the existing non-conforming commercial uses in the Rezoning Area, while prohibiting more intensive commercial uses that would be out of character with the residential development along the side streets.

In a mixed residential/commercial building, the commercial use must be located beneath the residential use. The CI-2 commercial overlay would permit Use Groups 1-6, with a maximum 1.0 FAR for commercial uses. CI-2 districts are intended for local retail and service businesses that serve the surrounding area and do not create significant parking demand. The regulations of the residential district in which the CI-2 overlay is mapped generally govern residential bulk, but certain regulations are waived, including front and side yard requirements.

Lots 5 and 9 currently have 4 and 18 accessory parking spaces, respectively (a total of 22). The 4 accessory parking spaces on Lot 5 are currently being used as accessory parking for the adjacent residential use on Lot 5. Therefore, if the proposed action is approved, it would legalize the currently existing use of portions of Lots 9 as attended accessory parking space for the legal non-conforming restaurant on Lot 6 as well as allow the use of portions of Lot 5 as accessory parking for the commercial use on Lot 6.

As noted on the original Certificate of Occupancy for the existing restaurant building on Lot 6, issued in 1947, there are no on-site accessory parking spaces provided. However, to prevent on-street parking by restaurant patrons on the adjacent residential side streets, the applicant is currently providing off-site accessory parking on Lot 9, which is not permitted within the current R5 zoning district. Should the proposed R5/C1-2 zoning district be approved, the applicant would be permitted to legally utilize portions of Lots 5 and 9 for off-site accessory parking, pursuant to Section 36-43 of the Zoning Resolution. The proposed rezoning would also bring into conformance the existing mixed-use development in the rezoning area.

Should the proposed rezoning be approved, the existing buildings on Lots 5 and 9 would remain. Portions of Lots 5 and 9 not occupied by existing multi-family buildings are already paved for the current use as accessory off-street parking, and a 6-foot high chain link fence and a 12-foot masonry wall provide a buffer for adjoining residential uses. New planters with arbor vitae would be installed at the rear of the residential buildings on Lots 5, 108, and 9 to provide a buffer from the parking use.

Should the proposed rezoning be approved, the off-site accessory parking would continue to be accessed from 42nd Street by a 16'-0" wide curb cut in front of Lot 9, located approximately 120 feet from the intersection of 42nd Street and 28th Avenue. This curb cut would continue to be used for both ingress and egress. No new curb cuts would be created. Four spaces are currently used by residential tenants of the buildings that abut the accessory parking lot (there is no required accessory parking for these dwelling units, but certain tenants have agreements with the applicant to park in the lot).

If the proposed action is not approved, the use of portions of Lot 9 for off-site accessory parking for the restaurant on Lot 6 would be removed, portions of Lot 5 would continue to be used as accessory parking for the adjacent residential use, and patrons of the legal non-conforming restaurant would have to seek on-street parking in the surrounding area.

In the future with the action, the RWCDs on the project site would include following:

- The existing legal non-conforming restaurant on restaurant on Lot 6 would be made conforming under the proposed C1-2 commercial overlay (No Change Site #1).
- The 18 accessory parking spaces on Lot 9 would be made conforming under the proposed C1-2 commercial overlay (Projected Site #1).
- The 4 accessory parking spaces on Lot 5 would be used as accessory parking for the restaurant on Lot 6 and would conform with the proposed C1-2 commercial overlay (Projected Site #2).

- The 1,480 square feet of retail space on Lot 1 would be made conforming under the proposed C1-2 commercial overlay (Potential Site #1).
- The 1,476 square feet of retail space on Lot 3 would be made conforming under the proposed C1-2 commercial overlay (Potential Site #2).

Table 4-1 presents the Future With-Action Condition RWCDS in the Proposed Rezoning Area and the increment between the No-Action and With-Action scenarios. The proposed action would be taken in 2012.

17. AIR QUALITY

Introduction

Under CEQR, two potential types of air quality impacts are examined. These are mobile and stationary source impacts. Potential mobile source impacts are those which could result from an increase in traffic in the area, resulting in greater congestion and higher levels of carbon monoxide (CO). Potential stationary source impacts are those that could occur from stationary sources of air pollution, such as major industrial processes or heat and hot water boilers of major buildings in close proximity to a proposed project. Both the potential impacts of a proposed project on surrounding buildings and potential impacts of uses in the environs of a proposed sensitive use, such as residences, schools, and hospitals, are considered in the assessment.

Mobile Source

Under guidelines contained in the January 2012 *CEQR Technical Manual*, projects in this area of New York City generating fewer than 170 additional vehicular trips in any given hour are considered as highly unlikely to result in significant mobile source impacts, and do not warrant detailed mobile source air quality studies. The proposed action would result in the following as related to mobile source air quality concerns:

- An existing legal non-conforming 4,185 square foot restaurant would become conforming under the proposed C1-2 commercial overlay zoning (No Change Site #1). No new floor area would be created. No additional traffic would be generated relative to existing or Future No-Action conditions. Therefore, no additional mobile source emissions would be generated.
- Two existing retail stores totaling 2,956 square feet in floor area would be made conforming under the proposed C1-2 commercial overlay zoning (Potential Sites #s 1 and 2). Under the Future No-Action condition, the existing retail floor area would be converted to community facility space which would result in comparable traffic volumes. No new floor area would be created. Therefore, no significant additional mobile source emissions would be generated.

- 18 existing attended off-street parking spaces would be legalized under the proposed C1-2 commercial overlay zoning (Projected Site # 1). The 18 accessory parking spaces would not exist in the Future No-Action condition. The currently existing 4 accessory parking spaces used for the adjacent residential use would be used as accessory to the commercial use on Lot 6. Under guidelines contained in the January 2012 *CEQR Technical Manual*, projects that would result in parking facilities may require a mobile source analysis. In this area of New York City (Zone 3 – areas located within 0.5 miles of a subway station), a transportation analysis would only be required for off-street parking facilities with 80 or more parking spaces. As the proposed action would result in only 22 attended off-street parking spaces, a transportation analysis would not be needed. As a transportation analysis would not be required for 22 parking spaces, it is assumed that a mobile source air quality analysis would similarly not be needed. In addition, in the absence of the 22 parking spaces on-site, patrons driving to the restaurant would utilize on-street parking spaces and mobile source emissions would essentially be the same.

The project would generate fewer than 170 new vehicle trips at any intersection in the study area during any peak hour. Therefore, no detailed mobile source air quality analysis would be required per the *CEQR Technical Manual*, and no significant mobile source air quality impacts would be generated by proposed action.

Stationary Source

A stationary source analysis would not be required for the proposed action. The existing restaurant is a legal nonconforming use under existing zoning and would remain in the Future No-Action condition. The restaurant would only be made conforming under the proposed C1-2 commercial overlay in the Future With-Action condition. The two existing retail uses, which would not legally be allowed to remain under the existing R5 zoning of the site, would be converted to community facility space in the Future No-Action condition. Under the proposed action, these uses would be converted back to retail use and would be made legal and conforming under the proposed C1-2 commercial overlay. No new floor area would be developed on the project site and no changes would occur to the existing HVAC systems in the subject buildings. Therefore, relative to the Stationary Source screening thresholds contained in the January 2012 *CEQR Technical Manual*, no stationary source screening would be required.

Conclusion

Conditions associated with the project development would not result in any violations of the ambient air quality standards. Therefore, the action would not result in any potentially significant adverse stationary or mobile source air quality impacts, and further assessment is not warranted.

19. NOISE

Introduction

Two types of potential noise impacts are considered under CEQR. These are potential mobile source and stationary source noise impacts. Mobile source impacts are those which could result from a proposed project adding a substantial amount of traffic to an area. Potential stationary source noise impacts are considered when a proposed action would cause a stationary noise source to be operating within 1,500 feet of a receptor, with a direct line of sight to that receptor, or if the project would include unenclosed mechanical equipment for building ventilation purposes.

Mobile Source

Relative to mobile source impacts, a noise analysis would only be required if a proposed project would at least double existing passenger car equivalent (PCE) traffic volumes along a street on which a sensitive noise receptor (such as a residence, a park, a school, etc.) is located. Vehicles would travel to and from the project site along 42nd Street and 28th Avenue. Both 42nd Street and 28th Avenue are lined with numerous residences as well as several commercial and manufacturing uses, and the effect of project traffic generation on residences located along these streets would therefore be relevant for this assessment.

There would be a minimal increase in vehicular traffic along 42nd Street and 28th Avenue resulting from the proposed action as further discussed below. This increase would not double PCE volumes along these streets and a mobile source noise impact from the proposed action would therefore not occur.

- An existing legal non-conforming 4,185 square foot restaurant would become conforming under the proposed C1-2 commercial overlay zoning (No Change Site #1). No new floor area would be created. No additional traffic would be generated relative to existing or Future No-Action conditions. Therefore, no additional mobile source noise would be generated.
- Two existing retail stores totaling 2,956 square feet in floor area would be made conforming under the proposed C1-2 commercial overlay zoning (Potential Sites #s 1 and 2). Under the Future No-Action condition, the existing retail floor area would be converted to community facility space. In the Future With-Action condition, the community facility space would be converted back to retail space. No new floor area would be created. In this area of New York City (Zone 3 – areas located within 0.5 miles of a subway station), a transportation analysis would be required for 20,000 square feet of new retail floor area or 25,000 square feet of new community facility floor area. These thresholds indicate that retail space generates somewhat greater traffic volumes than community facility space. However, the difference in traffic generation would not be enough to double

traffic volumes along either 42nd Street or 28th Avenue. Therefore, no significant additional mobile source noise would be generated.

- 18 existing attended off-street parking spaces would be legalized under the proposed C1-2 commercial overlay zoning (Projected Site # 1). The 18 accessory parking spaces would not exist in the Future No-Action condition. The currently existing 4 accessory parking spaces used for the adjacent residential use would be used as accessory to the commercial use on Lot 6. In this area of New York City (Zone 3 – areas located within 0.5 miles of a subway station), a transportation analysis would only be required for off-street parking facilities with 80 or more parking spaces. As the proposed action would result in only 22 attended off-street parking spaces, a transportation analysis would not be needed. As a transportation analysis would not be required for 22 parking spaces, a mobile source noise analysis would similarly not be relevant. The difference in traffic generation between the Future No-Action and Future With-Action conditions would not be enough to double traffic volumes along either 42nd Street or 28th Avenue. In addition, in the absence of the 22 parking spaces on-site, patrons driving to the restaurant would utilize on-street parking spaces and mobile source noise generation would essentially be the same.

Pursuant to CEQR methodology, no mobile source noise impacts would be anticipated since traffic volumes would not double along either 42nd Street or 28th Avenue due to the proposed project. Therefore, the proposed project would not result in a mobile source noise impact.

Stationary Source

The project would not locate a receptor within 1,500 feet of a substantial stationary source noise generator, and there is not a substantial stationary source noise generator close to the Proposed Rezoning Area that is also a sensitive receptor. Additionally, the proposed project would not include any unenclosed heating or ventilation equipment that could adversely impact other sensitive uses in the surrounding area. Therefore, the project would not have any potentially adverse stationary source noise impacts.

Conclusion

A detailed noise analysis is not required for the proposed action as the action would only result in the development of commercial uses and would not result in the introduction of sensitive receptors. In addition, the proposed development would not introduce significant mobile or stationary source noise into the surrounding area.

The development that would be facilitated by the proposed rezoning would not have any potentially significant adverse mobile or stationary source noise impacts, and further assessment is not warranted.
